INTRODUCTION

The purpose of this directory is to provide current information on the availability and content of Federal machine-readable data files which are available from NTIS.

More than 1,000 data files are listed and described in the Directory; technical reports are not described. The minimum documentation (i.e., technical report) available for these data files is a description of the contents of the tape file (i.e., the record layout). All of these files are available for purchase from NTIS.

For additional information, contact:

Computer Products Support Group
National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161
Phone: (703) 487-4763
FTS 737-4763

HOW TO ORDER

To order a magnetic tape or document from NTIS, fill out the order form (or a copy) bound in the back of this Directory and send it to NTIS, 5285 Port Royal Road, Springfield, VA 22161. Be sure to include the NTIS order number (printed at the upper right of each entry in the abstract section). Please specify tape recording mode on the order form. You can pay by check, American Express, MasterCard, or Visa credit card account, or NTIS Deposit Account. If payment is by check, please make it payable to NTIS; if by credit card, please give your card number, expiration date, and sign with your authorized signature. If you would like to open an NTIS Deposit Account, please call (703) 487-4770 or write to NTIS at the above address.

IMPORTANT NOTICE!

The three letters at the end of many NTIS order numbers have been placed there to help NTIS determine the most effective media to bring various types of information to readers' attention. Starting in January, 1985, almost all order numbers will have media codes attached.

Order numbers with media codes are tabulated monthly to show customer interest produced from various announcements used by NTIS.

When you order documents, you may be tempted to omit the media code letters to save time. Please resist that temptation, because the information the media codes produce will help us to provide you with better information more consistent with your needs.

PRICING

Costs of data files available from NTIS are given in price codes in the right-hand portion of the last line of each entry in the Number Index section. Price codes are also contained in the availability statement in each citation. Price codes, rather than price are indicated so that you will always be able to determine the current price. The following price schedules list prices in effect at the time this Directory was published. Prices for magnetic tapes include all accompanying documentation.

OUTSIDE NORTH AMERICAN CONTINENT PRICE SCHEDULE

Customers outside the North American Continent use this price schedule; Canada, United States, and Mexico addressees, please write for Folder PR-360-3.

HOW TO USE THIS DIRECTORY

A machine-readable data file* can be located in two ways: It can be found in the Abstract Section under the appropriate subject category; or it can be found by using the indexes in the back of the Directory. The following indexes are available.

- Agency Index** Lists the originating agencies (or their contractors) for these data files. Entries are sequenced alphabetically by agency, including applicable subunit, then by NTIS order number or originating agency number.
- Number Index** Lists all data files in alphanumeric order by NTIS order number or originating agency number.
- Subject Index** Lists all data files in alphanumeric order by NTIS order number arranged in alphanumeric order under each subject term.

A typical sample entry is graphically detailed on the facing page; the various parts of an abstract entry and its associated major index entries are labeled. The key words with preceeding asterisks are the subject terms under which a title is found in the subject index.

* All references to machine-readable data files include related technical reports, where applicable.

SAMPLE ITEM

Title of Data File: Countries, Dependencies, and Areas of Special Sovereignties

Originating Agency: National Bureau of Standards
Gaithersburg, Maryland

ABSTRACT ENTRY

Countries, Dependencies, and Areas of Special Sovereignty. **PB-267 936/XDD** NTIS Order Number—USE THIS NUMBER TO ORDER PRODUCTS

Data file. This publication provides a list of geographical-political entities of the world and associated standard codes. These entities include independent states, dependent areas, areas of quasi-independence, noncontiguous territories, possessions without populations, areas with special sovereignty associations, areas without sovereignty, political regimes not recognized by the United States, and outlying areas of the United States.

For related technical report, see FIPS-PUB-10-2.

Keywords: *Data file, *Geography, *Data processing. Standards, Magnetic tapes, *Countries, Federal information processing standards. Data elements. **Keywords—USED FOR INDEXING AND SEARCHING**

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation, FIPS-PUB-10-2. **Statement of Availability**

DIRECTORY OF COMPUTERIZED DATA FILES 1985 -----

ECONOMICS

1. AGRICULTURAL ECONOMICS

PB-194 346/3/XDD

Survey of Purchases of Fish Products by Households, Volume 2, Fresh and Frozen Shellfish (1969-70).

Data file. The file contains complete records of purchases of fresh and frozen shellfish for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-02.

Keywords: *Data file, *Fishes, *Market surveys, *Shellfish.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, Ebcidic odd parity.

PB-194 347/1/XDD

Survey of Purchases of Fish Products by Households, Volume 4, Canned Salmon (1969-70).

Data file. The file contains complete records of purchases of canned salmon for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of

residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-04.

Keywords: *Data file, *Fishes, *Market surveys, *Salmon.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

PB-194 348/9/XDD

Survey of Purchases of Fish Products by Households, Volume 3, Fresh and Frozen Finfish (1969-70).

Data file. The file contains complete records of purchases of fresh and frozen finfish for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-03.

Keywords: *Data file, *Fishes, *Market surveys.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, Ebcidic, odd or even parity; or 9 track, 800bpi, odd parity.

ECONOMICS

Field 1—AGRICULTURAL ECONOMICS

PB-194 349/7/XDD

Survey of Fish Products by Households, Volume 5, Canned Tuna (1969-70).

Data file. The file contains complete records of purchases of canned tuna for home use by participating households surveyed during the period Feb 69 thru Jan 70. Each two-week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-05.

Keywords: *Data file, *Fishes, *Market surveys, *Tunas.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, Ebcdic, odd parity.

PB-194 350/5/XDD

Survey of Fish Products by Households, Volume 6, Canned Sardines (1969-70).

Data file. The file contains complete records of purchases of canned sardines for home use by participating households surveyed during the period Feb 69-Jan 70. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-06.

Keywords: *Data file, *Fishes, *Market surveys, *Sardines.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

PB-194 351/3/XDD

Survey of Purchases of Fish Products by Households. Fish Meals Away from Home (1969-70).

Data file. The tape contains complete records of fish and shellfish meals eaten away from home by participating households surveyed over the period February 1969 through January 1970. Each 2 week survey was done from a continuing panel of 1,500; those remaining in the survey 6 months or more (1,043 households) are included in this tape. Purchases are identified as to product, number of meals, and whether it was a main dish. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase the various fish products. (Author)

Keywords: *Data file, *Fishes, *Market surveys.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 or 9 track, 800bpi and odd or even parity. (Note: 9 track is available only in odd parity).

PB-194 352/1/XDD

Survey of Fish Products by Households, Volume 7, Miscellaneous Canned Fish or Shellfish (1969-70).

Data file. The file contains complete records of purchases of miscellaneous canned fish or shellfish for home use by participating households surveyed during the period Feb 69-Jan 1970. Each two week survey was done from a continuing panel of 1500; those remaining in the survey six months or more (1043 households) are included in this file. Purchases are identified as to species, product and preservation form, cost of each purchase, and weight. Each household is identified by household income, per capita income, religion, race, family size, U.S. Census geographic division of residence, age of household head, education of household head, occupation of household head, whether husband or wife is household head, and age-sex structure of the children. The data are used originally in econometric analysis to isolate the determinants of fish purchases and expenditures. The data can be used to segment the market to determine which population groups purchase various fish products.

Publications: BCF MT-69-07.

Keywords: *Data file, *Fishes, *Market surveys, *Shellfish.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

ECONOMICS

COMMERCE - UNITED STATES AND FOREIGN—Field 2

PB-232 863/1/XDD

Feed Grain, Wheat and Cotton Reports Master File: 1973

Data file. The file records by county the following data on voluntary participation in the 1973 feed grain, wheat and cotton set-aside programs: the number of farms eligible and the number of farms and producers participating, applicable acres of cropland, conserving base, feed grain bases, wheat and cotton allotments, set-aside acreage, payments and reductions, and planted acres for each crop. Data are as recorded through September 1973. Additions corrections and/or adjustments subsequent to that date are not included. Source documents include producer participation and compliance data on sheets prepared and furnished by ASCS county offices, and the 1973 Set-Aside Programs Annual Report.

Keywords: *Data file, *Agricultural products, *Grains(Food), *Wheat, *Cotton plants, Federal programs, Projects, Feeding stuffs, Wheat, Cotton plants, Statistical data, Farms, Land, Farm crops, Allocations, Payment, Classifications, Magnetic tapes, Set aside programs, Voluntary participation, Eligibility.

Availability: NTIS, CP T01, 1 reel mag tape. Available as STC Model 3450-5, Standard OS-360 headers/trailers, 9 track, 1600bpi, Ebcidc.

PB-234 639/3/XDD

Livestock Production, Disposition and Income (1965-69).

Data file. The file contains annual data covering production of livestock by state, income, and value of production from livestock cash receipts and disposition of livestock.

For related technical reports, see PB-234 643/5/XDD, PB-234 642/7/XDD, PB-234 641/9/XDD, PB-234 640/1/XDD.

Keywords: *Data file, *Livestock, Tables(Data), Cattle, Swine, Sheep, Goats, Income, Farms, Inventories.

Geocoding: States.

Availability: NTIS, CP T01, 1 reel mag tape*. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, bcd; or 9 track, 800bpi, odd parity, Ebcidc. Price includes documentation.

PB62-157314/XDD

Foreign Production, Supply and Distribution of Agricultural Commodities.

Data file. This file contains information on foreign production, supply and distribution of agricultural products. This includes area harvested, production, beginning stocks, total imports, total exports, total domestic use and ending stocks. Commodity coverage includes grains, rice, dairy, poultry, livestock, oilseeds, cotton, coffee, sugar, tobacco and cigarettes. The most recent year reported is 1982. Complete supply and distribution data are not always available. When only production figures are reported, this will be indicated by a Production Only flag in the record.

Keywords: *Data file, *Agricultural products, Foreign countries, *Marketing, *International trade, Supply(Economics), Production, Food supply, Commodities, Dairy products, Grains(Food), Live-

stock, Poultry, Tobacco, Coffee, Sugar crops, Cotton plants, Imports, Exports, Magnetic tapes.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB84-159961/XDD

Foreign Production, Supply and Distribution of Agricultural Commodities.

Data file. This file contains foreign production, supply and distribution information. This includes area harvested, production, beginning stocks, total imports, total exports, total domestic use and ending stocks. Commodity coverage includes grains, rice, dairy, poultry, livestock, oilseeds, cotton, coffee, sugar, tobacco and cigarettes. The most recent year reported is 1984. Complete supply and distribution data are not always available. When only production figures are reported, this will be indicated by a 'Production Only' flag in the record.

Keywords: *Data file, *Agricultural products, *Foreign countries, Rice, Grains(Food), Production, Supply(Economics), Distribution systems, Oilseeds, Cotton plants, Imports, Exports, Stockpiles, Consumption, Dairy products, Magnetic tapes, Statistical data, Tables(Data), Coffee, Sugars, Livestock, Poultry, Tobacco, Global, Cigarettes.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

2. COMMERCE - UNITED STATES AND FOREIGN

COM-72-10813/6/XDD

Interregional Commodity Trade Flow Estimates - Appendix D: 1963 Commodity Flows for Census Regions - Tons and Dollars.

Data file. The file contains estimates of trade flow in tons and dollars for 61 commodity groups between the nine census geographic divisions in the U.S. for 1963.

For related technical report, see COM-72-10817/8/XDD.

Keywords: *Data file, Interstate transportation, *Cargo transportation, Value, Estimates, *Commerce, Commodity management, Tonnage, Commodity data, Regions.

Geocoding: Census regions.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidc, odd parity.

ECONOMICS

Field 2—COMMERCE - UNITED STATES AND FOREIGN

COM-72-10819/4/XDD

Interregional Commodity Trade Flow Estimates - Appendix E: 1963 Commodity Flows for States and State Combinations - Tons and Dollars.

Data file. The file contains estimates of trade flows in tons and dollars for 61 commodity groups between 44 states and combinations of states in the U.S. for 1963.

For related technical report, see COM-72-10817/8/XDD.

Keywords: *Data file, Interstate transportation, *Cargo transportation, Estimates, Value, *Commerce, Commodity data, Tonnage, Geocoding, States(United States).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidic, odd parity.

COM-72-10820/2/XDD

Interregional Commodity Trade Flow Estimates - Appendix F: 1963 Commodity Flows Production and Rest-of-State Areas - Tons and Dollars.

Data file. The report contains estimates of trade flows in tons and dollars for 61 commodity groups between 76 production areas and rest-of-state areas in the U.S. for 1963.

For related technical report, see COM-72-10817/8/XDD.

Keywords: *Data file, Commodity management, *Cargo transportation, Marketing, Intrastate transportation, Economic analysis, Value, Estimates, *Commerce, Commodity data, Tonnage, Production areas, Geocoding, States(United States).

Geocoding: United States.

Availability: NTIS, CP T03, 12 reels mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidic, odd parity.

COM-73-10533/0/XDD

Data Files for the Report: Implementation and Evaluation of the Multiregional Input-Output Model of the United States.

Data file. The first reel of a two-reel file contains the following data: 1963 state input-output tables, state transfer matrices, and modified trade flows. The second reel contains the following data: 1963 final demands; payrolls, employment, and output for 1963, 1958, and 1947; projected final demands for 1970 and 1980.

Technical data: The files were designed for use with the Fortran 5 Univac 1108 computer programs, which are available separately (see COM-73-10534) and are also included with the data files as COM-73-10531-SET.

For related technical report, see PB-242 558, AE/XDD.

Keywords: *Data file, Models-simulation, Economic models, *Salaries, *Employment, Computer programming, *Input output analysis, *Economic analysis, *Commerce.

Availability: NTIS, CP T03, 2 reels mag tape. Specify tape recording mode desired: Univac 1108, 7 track, 556 or 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcidic, odd parity.

PB-178 679/7/XDD

Magnetic Data Tape for Input-Output Transactions by Transportation Mode - 1947 and 1958 Tables.

Data file. A file is available on the revision of the 1947 and 1958 national tables to derive separate input-output detail for eight modes of transportation: railroads, overseas water transportation, domestic water transportation, trucking and warehousing, airlines and aviation services, pipelines, intercity bus and local passenger transportation, and transportation services not elsewhere classified. The 1947 revisions are to be incorporated in the OBE version of the table which is being aggregated and redefined as necessary to be consistent with the classification and definitions of the 1958 table. The work was intended to provide a basis for analyzing the time trends in transportation requirements by industry sectors in the input-output model by separate modes of transportation over the period 1947, 1958 and 1963 (data for the latter year to be supplied from the forthcoming input-output table for 1963). The study was performed by Jack Faucett Associates, Inc., under contract with The Office of the Secretary of Transportation of the U.S. Department of Transportation, assisted by several members of the staff of the Harvard Economic Research Project.

Publications: Input-Output Transactions by Transportation Mode, 1947 and 1958 (April, 1968). NTIS Publication No. PB-178 677.

Multiregional Input-Output Basic Data - DOTR1

Data file. Four data tapes are available for the multiregional input-output (MRIO) data. This tape (DOTR1) contains the following data: 1947, 1958, 1963 Final demands; 1963 Commodity Credit Corporation adjustment to federal government final demand; 1947 (58\$) and 1958 (63\$) final demand deflators; 1947, 1958, and 1963 outputs, employment, and payrolls; 1947/58 output deflators; 1970 and 1980 final demand projections; state secondary matrices--1963; sum of state secondary matrices--1963. A detailed description of the assembly of the data is available in the series edited by Karen R. Polenske, entitled, Multiregional Input-Output Analysis, which is being published by Lexington Books, D.C. Heath and Company.

Keywords: *Data file, Regional economic activity, Multiregional models, *Input output analysis, Demand(Economics), Federal policies, State planning, Payrolls, *Employment, Economic projections, Data files, Magnetic tapes, United States, *Commerce, *Economic analysis, Economic deflators, Geocoding, Regions, *Salaries.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity, BCD; or 9 track, 800 BPI, odd parity, EBCDIC.

PB-251 369/5/XDD

Multi-Regional Input-Output Basic Data Tape, DOTR5.

Data file. The tape (DOTR5) consists of 3 files. The first file contains the 1963 state tonnage trade flows, the second file contains the sum of the 1963 state tonnage trade flows; and the third file contains the 1963 commodity prices. Specific information on the data assembly of the interregional shipments is available in a volume by John M. Rodgers, *State Estimates of Interregional Commodity Trade, 1963* (Lexington, Mass.: Lexington Books, D.C. Heath and Co., 1973).

Keywords: *Data file, Economic models, *Commerce, Industries, *Economic analysis, Regional planning, Transportation, Magnetic tapes, FORTRAN, Input output models, Multiregional models, Trade flows, Regional economic activity, *Input output analysis, *Geocoding, Regions.

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in BCD character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-251 370/3/XDD

Multi-Regional Input-Output Basic Data Tape, DOTR6.

Data file. The tape consists of 4 files. The first file contains the projected 1970 state tonnage trade flows; the second file contains the sum of the projected 1970 state tonnage trade flows, the third file contains the projected 1980 state tonnage trade flows; and the fourth file contains the sum of the projected 1980 state tonnage trade flows. Specific information on the assembly of 1963 trade data upon which these projections are based is contained in a book by John M. Rodgers, *'State Estimates of Interregional Commodity Trade, 1963'*, (Lexington, Mass.: Lexington Books, D.C. Heath and Co., 1973). Information on the method of making the projections is contained in a report by Karen R. Polenske, Caroline W. Anderson, and Mary M. Shirley, *'A Guide for Users of the U.S. Multiregional Input-Output Model'* (DOT Report No. 2, Prepared for the Office of Systems Analysis and Information, U.S. Department of Transportation, September 1973, revised--NTIS No. PB-242 558.)

For related technical report, see PB-242 558/XDD.

parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-184830/XDD

Chilton Light Truck Data Base.

Data file. This tape contains data on the physical operating performance and market characteristics of light trucks for the model years 1955-1977. Information was collected from published and unpublished sources with extrapolation and correlations being made when raw data was unavailable. Vehicles are reported by model year and grouped by manufacturer, using production volume, model, body type, engine displacement, transmission and GVWR class attributes as criteria to select representative vehicle configurations. Models which are essentially duplicated by more than one division of a manufacturer--i.e., Chevrolet C-10 and GMC C-1500--are represented by attributes of only one of the duplicate models. Production volume for both models is then combined. Characteristics are documented for vehicles representative of total U.S. sales of domestic and imported light trucks for the model years indicated. **For related technical report,** see PB81-144388/XDD.

Keywords: *Data file, *Trucks, Market research, Performance evaluation, Sales, Production rate, Magnetic tapes, *Motor trucks, Light duty vehicles, Motor vehicles(1955-1977 models).

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Consumer Price Index: 1913 to Date (Updated Monthly).

Data files. The Consumer Price Index (CPI) is a statistical measure of change, over time, of the prices of goods and services in major expenditure groups--such as food, housing, apparel, transportation, and health and recreation--typically purchased by urban consumers. Essentially, it measures the purchasing power of consumers' dollars by comparing what a sample market basket of goods and services costs with what the same sample market basket cost at an earlier reference date. This reference date is designated as the base period. The revised CPI introduced by the BLS in 1978 includes indexes for two populations: urban wage earners and clerical workers; and all urban consumers. The urban wage earners and clerical workers index represents the buying habits of about 40 percent of the noninstitutional, civilian population. The all urban consumers

ECONOMICS

COMMERCE - UNITED STATES AND FOREIGN—Field 2

index covers about 80 percent of the population by including the following groups: the self-employed; professional, managerial, and technical workers; short-term workers; the unemployed; retirees; and others not in the labor force. U.S. average indexes for both populations are available monthly for 357 consumer items and groups of items. Indexes for both populations are available for 28 urban places for 64 items. Regional indexes for both populations are available for four regions with about 100 items. Five city-size indexes for both populations are available with 89 items and groups per class.

Keywords: *Data file, *Prices, *Cost indexes, Indexes(Ratios), Expenses, Consumers, Magnetic tapes, Consumer price indexes, Price index, Consumer products.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

PB82-948600/XDD

Producer Price Index: 1947 to Date (Updated Monthly).

Data files. The Producer Price Index (PPI) is a measure of price changes for goods sold in primary markets in the United States. The universe for the PPI covers manufactured and processed goods and the output of industries classified as manufacturing, agriculture, forestry, fishing, mining, gas and electricity, public utilities and goods competitive with those made in the producing sector, such as waste and scrap materials. To the extent possible, the prices used in constructing the PPI are those that apply to the first significant commercial transaction in the United States. The classification system follows commodity lines. Products are grouped by similarity of end-use or material composition. The PPI classification does not match any other standard classification. BLS collects over 10,000 price quotations each month covering 2,700 commodities and commodity groups, most beginning in 1974 or earlier. These data are obtained from reports submitted by individual producers supplemented with information appearing in trade publications or obtained through programs of other government agencies.

Keywords: *Data file, *Prices, *Cost indexes, *Manufacturers, Indexes(Ratios), Expenses, Magnetic tapes, Wholesale price index, Price index.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

PB82-948700/XDD

Imports - Industrial Commodity Classes (1972 SIC): 1972 to Date (Updated Quarterly).

Data files. BLS receives reports (IM-145) from the Bureau of the Census containing the value and quantity of imported commodities classified by the

Tariff Schedules of the United States Annotated (TSUSA). These reports are summarized by customs value to quarterly and annual commodity measures on a 4-digit 1972 Standard Industrial Classification (SIC) basis. Value-based ratios of imports to new supply (U.S. product shipments plus imports) are calculated annually for 4-digit SIC-based commodity import groups. Beginning with statistics for 1978, the timing of the statistical month for recording imports was changed from the date of entry (DOE)--filing date of documents--to the date of importation (DOI)--date the shipment actually entered the U.S. Therefore, caution should be exercised in relating current data with data for 1977 and prior years. The import industrial commodity classes survey, based on the 1972 SIC, has 414 quarterly and annual import value series on a 4-digit SIC basis, beginning in 1975. Annual ratios of imports to new supply for 347 4-digit (1972) SIC manufacturing commodity import groups are available beginning in 1972.

Keywords: *Data file, *Imports, *International trade, United States, Commodities, Magnetic tapes, Foreign trade.

Availability: NTIS, Subscription, 4 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$420.00/year, \$125.00/individual issue; all others write for quote.

PB82-948800/XDD

Imports - By Tariff Commodity Class: 1968 to Date (Updated Quarterly).

Data files. BLS receives reports (IM-145) from the Bureau of the Census containing the value and quantity of imported commodities classified by the 7-digit Tariff Schedules of the United States Annotated (TSUSA). These reports of customs values and quantities of imports are summarized to quarterly and annual measures on a TSUSA basis. Beginning with statistics for 1978, the timing of the statistical month for recording imports was changed from the date of entry (DOE)--the date the documents were filed--to the date of importation (DOI)--the date the shipment actually entered the U.S. Therefore, caution should be used in comparing current data with data for 1977 and prior years.

Available on subscription, North American Continent price \$420.00/year, \$125.00/individual issue; all others write for quote.

PB82-948900/XDD

Export and Import Price Indexes: 1970 to Date (Updated Quarterly).

Data files. The export price indexes measure price changes for products produced in the U.S. and sold to residents of other countries. The import price indexes measure changes in the prices paid by U.S.

ECONOMICS

Field 3—COMMERCIAL FINANCE AND INVESTMENTS

residents for goods produced in other countries and imported into the U.S. The products covered are concentrated in machinery and equipment, chemicals, crude materials, and some intermediate products. Plans are to extend coverage to all major categories of U.S. imports and exports in the next few years. Price data are obtained directly from exporters and importers residing in the U.S. and represent transaction prices in the third month of each calendar quarter for the products which are reported. Export and import product samples yield quarterly price indexes publishable at the 4- and 5-digit level and higher level aggregates of the Standard International Trade Classification System, a product classification scheme developed by the United Nations. Export and/or import price indexes, with a combined total of about 100 commodities, are available on a quarterly basis beginning in 1974. Index series for June of each year covering the period before 1974 are available for most series. Also available are over-the-quarter percent change series.

Keywords: *Data file, *Prices, *Imports, *Exports, *International trade, Commodities, Magnetic tapes, *Cost indexes, Foreign trade.

Availability: NTIS, Subscription, 4 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Annual Statistical Report of REA Telephone Borrowers (1972).

Data file. The annual report presents financial and statistical information on the operations of REA telephone borrowers individually and as a group. The report is based on financial and statistical statements submitted by 816 borrowers. However, since some borrowers did not report all items, the number of borrowers included is not the same for all tables. The data in the report are on a calendar year basis to coincide with the accounting period of practically all borrowers. The information submitted by the borrowers is subject to possible revision as a result of future audits and adjustments.

Source documents: Financial and statistical report (REA Form 479, 479A) These reports are submitted by REA borrowers to REA on a calendar year basis. Loan and accounting information obtained from REA Loan Accounting System files. The above mentioned source documents generally are not matters of public record.

Publications: Annual Statistical Report, Rural Telephone Borrowers, (REA Bulletin 300-4).

Keywords: *Data file, *Rural areas, *Telephone systems, State summaries, *Financing.

Annual Statistical Report of REA-Electric Distribution Borrowers (1972).

Data file. An annual report contains financial and statistical information about the operations of REA electric borrowers individually and as a group. The report also presents separate summary data on co-operative borrowers. Data in the report are on a calendar year basis, since most borrowers close their books on December 31. About 94% of the borrowers are private business corporations. Their detailed financial statements and operating reports generally are not matters of public record. If more details than given in the report are desired, requests should be submitted directly to individual borrowers. Additional data on borrowers which are not co-operatives are included in Federal Power Commission annual reports. The revenue and expense statistics for each borrower show the year's financial operations. The trend of a borrower's operations can be observed by comparing data in this report with that in previous annual reports. Statistics relating to principal and interest payments to REA are cumulative from the time the borrower obtained an REA loan. The calculations of interest and principal due the government reflect the following: The payment schedule originally established for each borrower; changes in the original repayment and interest schedules through (a) reduction in interest rate and extension of amortization periods, pursuant to the 1944 amendments to the Rural Electrification Act; and (b) any extensions in the time of payment of interest or principal that may have been approved pursuant to Section 12 of the Act; and notes paid in full, ahead of schedule, are shown as due and paid in the full amount. All data on operations of borrowers' systems are based on reports submitted by borrowers and are subject to possible revision as the result of future audits and adjustments.

Source documents: Financial and Statistical Report (REA Form 7 and 7a). These operating reports are submitted by REA borrowers to REA on a calendar year basis. Loan and accounting information obtained from REA Loan Accounting System files. The above mentioned source documents generally are not matters of public record.

Publications: Annual Statistical Report, Rural Electric Borrowers, (REA Bulletin 1-1).

WIN II Program Evaluation - Data Tape for Public Use Data Base (1954-75).

Data file. The data base contains WIN program experience, welfare histories and employment information for a sample of WIN participants and registrants collected during a comprehensive, longitudinal evaluation of the WIN program. The data has been merged from three sources -- personal interviews and WIN/welfare records from local offices. Up to three completed questionnaires are available for each of the 6,555 respondents corresponding to one of the three waves of personal interviews. Information on the client's participation in the WIN program was recorded during the original sample selection in 1974 and the second-run site visits in 1975. The client's welfare history was coded from records at local welfare offices.

For related technical report, see PB-284 230/XDD.

Keywords: "Data file, Social welfare, Disadvantaged groups, Magnetic tapes, Evaluation, Vocational guidance, Specialized training, Salaries, Cost effectiveness, Surveys, Program effectiveness, "Employment, Earnings, "Federal assistance programs, "Social services, Work Incentive Program.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. PB-289 909/4/XDD

Pennsylvania Continuous Wage and Benefit History.

Data file. The Pennsylvania Continuous Wage and Benefit History (PA-CWBH) data is drawn from the administrative records maintained by the Pennsylvania Bureau of Employment Security. This data base contains detailed longitudinal histories of both the employment and unemployment experience of 0.6 percent of the workers who claimed unemployment insurance benefits in Pennsylvania from 1966 to 1968. Work histories describe employment and earnings for 1967-1970. Claim histories describe benefits paid for claims established in 1966-1968. Over 4,000 workers are included in the file. The data are contained on one reel of magnetic tape. The data tape is 9 track, EBCDIC, 1600 bpi, with standard labels suitable for use with IBM and most other computers. A codebook which describes the data set in detail accompanies the tape.

For related technical report, see PB-289 910/XDD.

Keywords: "Data file, "Unemployment, Insurance, "Pennsylvania, Incentives, Characteristics, Claims, Earnings, "Employment, Wages, "Salaries, Income, CWBH project, Unemployment insurance.

PB-291 001/6/XDD

Arizona Employment and Unemployment Data of the Continuous Wage and Benefit History.

Data file. The Arizona Employment and Unemployment Data Set (AZEUD) is made up of information drawn from the administrative records of government agencies in two separate samples: A 20% sample of workers who applied for unemployment insurance (UI) in Arizona from 1963 to 1971. A 1% sample of the Arizona labor force from 1957 to 1972. The 20% sample is drawn from the Continuous Wage and Benefit History (CWBH) data set maintained by the Arizona Bureau of Employment Security. This data base contains detailed longitudinal histories of both the employment and unemployment experience of workers who claimed UI benefits in Arizona from 1963 to 1971. About 40,000 workers are included in the file. The 1% sample is derived from the Social Security Administration's Longitudinal Employee-Employer Data file (LEED). The data base contains detailed longitudinal histories of the employment experience of workers covered by Social Security who were employed in Arizona from 1957-1972. There is no explicit indicator of whether or not this sample claimed unemployment insurance. About 25,000 workers are included in this file. The data are contained in two reels of magnetic tape. The data tapes are 9 track, EBCDIC, 1600 bpi, with standard labels suitable for use with IBM and most other computers. A codebook which describes the data set in detail accompanies the tapes. Only the CWBH data is available from NTIS. The LEED data must be obtained directly from the Center for Naval Analyses. **For related technical report, see PB-289573/XDD.**

CLMS (Continuous Longitudinal Manpower Survey) Public Use Tape of Selected March 1976 CPS Data (CPS-1).

Data file. The CPS-1 public use data tape is one of three sets of tapes containing data from the Continuous Longitudinal Manpower Survey (CLMS) being released in July 1980. The CLMS is the major data development effort of the U.S. Department of Labor for evaluation of the decentralized employment and training programs funded under the Comprehensive Employment and Training Act (CETA). The CPS-1 tape contains approximately 80,000 person records selected from the annual demographic file of the March 1976 Current Population Survey (CPS). To the records on the file, annual earnings (1951-1977) as reported to the Social Security Administration have been appended. This file may be used to develop comparison groups for estimates of CETA's impacts.

For related technical report, see PB81-128381/XDD.

Keywords: "Data file, "Employment, Earnings, Salaries, Income, Manpower, Personnel, Industrial training, Demographic surveys, Magnetic tapes, "Training, Labor force participation, Comprehensive Employment and Training Act, Wages, Sponsors.

PB81-162513/XDD

Standard Occupational Classification Manual 1980 (SOC).

Data file. The SOC provides a statistical classification system for occupations that should make statistics compiled by different agencies much more comparable, as the Standard Industrial Classification does for industries. The 548-page Manual was developed to fill the need for a standard classification to be used in Federal and other programs in which occupational data were collected. The SOC, with over 600 occupational groups, in four levels is not expected to meet all the needs of all agencies but rather it is intended to be used as the framework which all surveys should use to provide comparability at some level with other occupational statistics. The system includes all occupations in which work is performed for pay or profit including family members in family-operated businesses. The SOC can be related to Dictionary of Occupational Titles, which was developed primarily for job placement and job analysis.

For related technical report, see PB81-162521/XDD.

Dictionary of Occupational Titles (DOT) (Fourth Edition) Scores for 1970 Census Categories.

Data file. The Committee on Occupational Classification and Analysis of the National Academy of Sciences was funded jointly by the Department of Labor and the Equal Employment Opportunity Commission to investigate the Dictionary of Occupational Titles (DOL) and systems of evaluating job worth (EEOC). In the course of its investigations, the Committee acquired a computer file, which contained both a selection of labor force variables from the 1971 Current Population Survey and information on occupational characteristics from the Dictionary of Occupational Titles for 60,441 workers in the U.S. Experienced Civilian Labor Force. Using those data, staff for the Committee created the present computer file of aggregated DOT characteristics for the 574 expanded categories of the 1970 U.S. Census. The file contains 145 variables each read in with a F13.3 format.

PB82-191628/XDD**Labor Surplus Area Zipcode Reference.**

Data file. Since August 1981, the Department of Labor (DOL) has added 53 new LSA's under the exceptional circumstances criteria. These criteria permit DOL to waive eligibility requirements in areas where a sudden and precipitous rise in unemployment has occurred and is not reflected in the average unemployment for the reference period and which is not the result of temporary or seasonal factors. This update includes zip codes for the 53 newly classified LSA's as well as the 1,086 areas included in the August reference. In order to reduce publication costs only the national list has been updated.

Keywords: *Data file, *Unemployment, Manpower, Coding, Magnetic tapes, *Zip codes, *Labor force, Geographic areas, Geocoding.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products Support Group if you have questions.

PB82-191719/XDD**Employee Welfare Benefit Plans and Plan Sponsors in the Private Nonfarm Sector in the U.S., 1978-79.**

Data file. The data were collected for a study performed by Battelle Human Affairs Research Centers. The purpose of the study was to collect comprehensive data on the sponsors of employee welfare benefit plans and types of benefits offered. The study surveyed 2,400 sponsors of welfare plans in 1978-79

and examined the characteristics of their plans. According to the study, employee benefit plans currently provide a broader range of major medical, dental, eye care, prescription drug, and X-ray benefits to workers than they did in 1974. In addition, 70 percent of all private U.S. workers were covered by employee welfare benefit plans in 1978-79. An estimated 1.7 million employers, employee organization and joint union-management boards sponsored these plans.

For related technical report, see PB81-180358/XDD.

Keywords: Fringe benefits, *Data file, Magnetic tape, Welfare, Services, Health, *Benefit plans.

PB82-948000/XDD**Labor Force - National: 1948 to Date (Updated Monthly).**

Data files. The Current Population Survey (CPS) produces information about employment, unemployment, and non-participation in the labor force, classified by a variety of demographic, social and economic characteristics. The CPS is a nation-wide monthly sample of households and is designed to represent the civilian non-institutional population, 16 years and older. These data are compiled and aggregated by personal and labor force characteristics. Presently, there are approximately 25,000 labor force series available each month. Major employment status series—civilian labor force, employed, unemployed, and the unemployment rate—are defined by race, age, sex, industrial and occupational classification, class of worker and other characteristics. Also available are selected series for total and civilian non-institutional population and the status of those not in the labor force.

Keywords: *Data file, *Personnel, *Employment, *Demographic surveys, Households, Economic surveys, Unemployment, Populations, Characteristics, Magnetic tapes, *Socioeconomic status, *Labor force.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

PB82-948100/XDD**Industry Employment, Hours, and Earnings - National: 1909 to Date (Updated Monthly).**

Data files. The Current Employment Statistics Program provides employment, hours of work, and earnings information on a national basis in considerable industrial detail. BLS cooperates with State agencies in collecting data each month from a sample of establishments in all non-agricultural activities including government. The data include series for total em-

Field 4—EMPLOYMENT AND WAGES

ployment, number of women employed, number of production or nonsupervisory workers, average hourly earnings, average weekly hours, average weekly earnings, and average weekly overtime hours in manufacturing industries. A sample of about 160,000 employer units covering 40 percent of total payroll employment is utilized for this monthly mail survey. For hours and earnings of production or nonsupervisory workers in private non-agricultural industries, the sample contains 143,000 employer units. All employment, hours and earnings series are classified according to the 1972 Standard Industrial Classification (SIC).

Keywords: *Data file, *Salaries, *Earnings, *Employment, United States, *Working hours, *Wages.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

PB82-948200/XDD

Industry Employment, Hours, and Earnings - State and Area: 1939 to Date (Updated Monthly).

Data files. The Current Employment Statistics program, as a joint Federal-State undertaking, generates State and area statistics on employment, hours, and earnings. State agencies collect data each month from a sample of establishments in all non-agricultural activities including government. From these data, a large number of series on employment, hours, and earnings in considerable industrial detail are published monthly by each of the 50 States and the District of Columbia. Those industries which reflect significant economic activities are selected for publication. All employment, hours, and earnings series, State and area, are classified according to the 1972 standard industrial classification (SIC). For total payroll employment, over 8,800 series of monthly data are available. They cover each State and 241 major labor areas, most of which are Standard Metropolitan Statistical Areas (SMSA). About 10,000 monthly series covering production or nonsupervisory workers' average weekly earnings, average weekly hours, and average hourly earnings for each State and 206 major labor areas are reported.

Keywords: *Data file, *Salaries, *Earnings, *Employment, States(United States), Magnetic tapes, *Working hours, *Wages.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$1500.00/year, \$210.00/individual issue; all others write for quote.

PB82-948300/XDD

Unemployment and Labor Force - State and Area: 1974 to Date (Updated Monthly).

Data files. Unemployment estimates for States and local areas are developed by State employment security agencies to measure local labor market conditions under a Federal-State cooperative program.

These estimates are derived from a variety of sources including unemployment insurance claims and ratios reflecting historical relationships between covered unemployment and covered employment, and between entrants into the labor force and the experienced unemployed and experienced labor force. Monthly Unemployment and Labor Force series are available for approximately 5,600 geographic areas, including cities over 25,000 population, counties, SMSA's, States, and special administrative areas. For each area, the following estimates are presented: total civilian labor force, total number of people employed, total number of people unemployed, and unemployment rate. These series begin in 1975 for State-wide data, 1979 for administrative areas, and 1975 for all other sub-State areas.

Keywords: *Data file, *Unemployment, Manpower, *Employment, Magnetic tapes, *Labor force, Labor market.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

PB82-948400/XDD

Industry Labor Turnover - National: 1930 to Date (Updated Monthly).

Data files. The Labor Turnover program produces data through a cooperative Federal-State venture. Each month State employment security agencies collect data on labor turnover actions from a sample of establishments drawn from a list of those subject to State unemployment insurance programs. Labor turnover refers to the gross movement of wage and salary workers into and out of employed status with respect to individual establishments. Series for accessions and separations express these actions as a rate per 100 employees. Separate rates are computed for component items of these series: new hires and recalls, quits and layoffs. Almost 1,600 published monthly series are available for 248 manufacturing industries and for 12 mining and communication industries. Rates are available for manufacturing from 1930 and for telephone and telegraph from 1943. For industry groups and individual industries in the manufacturing and mining divisions, all series begin in 1958. Seasonally adjusted series for manufacturing, commencing in 1930 complete the published series.

Keywords: *Data file, *Occupational mobility, *Employment, Magnetic tapes, *Labor force.

Availability: NTIS, Subscription, 12 mag tapes*. Source tape is in EBCDIC character set. Tapes can be prepared on 9 track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Available on subscription, North American Continent price \$960.00/year, \$110.00/individual issue; all others write for quote.

Cable Television EEO (Equal Employment Opportunity) Data File, 1982.

Data file. The file is a data base of information collected annually from Cable TV System operators via FCC 395A forms. It contains employment figures based on SEX, ETHNIC TYPE and JOB CLASSIFICATION divisions for full-time, part-time and on the job training employees. The totals of full-time and part-time employees for each ethnic type and job classification is calculated as is the total of all full-time employees. The filing date of the 395A Form is also stored.

Keywords: *Data file, *Television broadcasting, *Employment, Minority groups, Ethnic groups, Magnetic tapes, *Cable television, *Equal opportunity.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Employment Opportunity Pilot Project (EOPP). Employer and Household Data Base.

Data file. The tape is Data base for two Projects: (1) Baseline Household Surveys for the Employment Opportunity Pilot Projects (EOPP) DLETA 20-24-79-23. The tape contains the household baseline data. The survey covered 10 pilot sites and 10 control sites that were chosen to match each pilot site. Approximately 1,900 families were interviewed in the pilot sites and 900 more families were interviewed at each control site for a total of 29,620 families. (2) Labor Market Effects of the Employment Opportunity Pilot Projects, DLETA 20-06-80-11. The tape contains the information from employers in ten locations throughout the United States who were surveyed to determine their hiring behavior of low-income individuals.

For related technical reports, see PB83-251173/XDD, PB83-251165/XDD.

Keywords: *Employment, *Data file, *Low income groups, Magnetic tapes, Surveys, *Equal opportunity.

5. FINANCES - FEDERAL, STATE, AND LOCAL GOVERNMENT

PB-174 432/5/XDD

Budget of the United States Government for FY 1966. Part I. Financing and Object Classification Schedule Master Data Tape.

Data file. The financing and object schedule master file contains more than 20k data records which comprise all the detail in the financing portion of the program and financing schedules and the object classification schedules in the budget appendix (except for annexed budgets and foreign currency schedules). Certain modifications have been made to assist in machine processing. These variances are designed to take account of legislation proposing changes in funding patterns, and to allow for proper consolidation of limitation accounts. The file also includes financing and object schedule information for the House of Representatives, Senate, and joint items not printed in the budget appendix; this information is included to allow for preparation of summary tables that are all inclusive.

Keywords: *Data file, *Federal budgets, Information systems, *Financing, Classifications, Master files.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, Bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidic, odd parity.

PB-174 433/3/XDD

Budget of the United States Government for FY 1966. Part II. Special Analysis Master Data Tape.

Data file. The special analysis master file contains approximately 4000 data records which classify new obligational authority and expenditure amounts for accounts in the budget appendix (except for annexed budget and foreign currency schedules) into character classifications for special analysis purposes. The information is a major source for budget special analysis D 'Investment, operating, and other expenditures,' F 'Federal Activities in Public Works,' I 'Federal Research, Development, and Related Programs,' and J 'Federal Aid to State and Local Governments.' Items proposed for later transmittal are not separately identified. If amounts are under existing legislation, they are included with existing legislation totals. Amounts for obligational authority are separately identified only if they involve public works and research and development classifications, otherwise the new obligational authority amounts are summarized in total from the account.

For related technical report, see PB-174 431/XDD.

Keywords: *Data file, *Federal budgets, Classifications, *Liabilities, Master files, New obligations.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidic, odd parity.

PB-174 434/1/XDD

PB-229 487/4/XDD

Fiscal Year 1975 Budget Preparation System Master File

Data file. The file consists of appropriation account data as described in OMB Circular A-11 and appearing in either the Budget or the appendix to the Budget of the United States Government as associated control data requisite for internal processing.

Keywords: *Data file, *Federal budgets, Accounting, Magnetic tapes, *Budgeting, OMB.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity; or 9 track, 800 BPI, odd parity.

PB-239 470/8/XDD

Catalog of Federal Domestic Assistance Magnetic Tape of Program Descriptions Text and Coded Characteristics (1974 Update)

Data file. This tape includes all the textual material published by the Government Printing Office in the Program Descriptions Section of the Catalog of Federal Domestic Assistance 1974 (updated December 1974). There are 1,000 programs. In addition, there is a characteristics record for each program. This consists of information extracted and coded from the full text material.

For related technical report, see PB-239 469/0/XDD.

Keywords: *Data file, Social welfare, *Federal assistance programs, *Economic assistance, Federal programs, Catalogs(Publications), Magnetic tapes, Information, Domestic assistance.

Availability: NTIS, CP T01, 1 reel mag tape. Available only in 9 track, 800 bpi, odd parity, EBCDIC.

PB-250 759/8/XDD

Federal Domestic Assistance, 1975. (Update).

Data file. The Federal Domestic Assistance file reflects all the textual material published in the program description section of the 1975 catalog. There are 1,030 programs. In addition, a characteristics record is included for each program. These contain information extracted and coded from the textual material, for use with the accompanying documentation.

For related technical report, see PB-250 760/XDD.

Keywords: *Data file, *Federal assistance programs, *Economic assistance, National government, Magnetic tapes, *Catalogs(Publications), Computer programming, Projects, Domestic assistance.

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in EBCDIC character set and certain fields contain packed decimal data. Character set restricts preparation in 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions. Price includes documentation.

FINANCES - FEDERAL, STATE, AND LOCAL GOVERNMENT—Field 5

PB-259 320/0/XDD

President's Budget, FY 1977.

Data file. The master account title (MAT) file contains the titles of functions, agencies, bureaus and accounts that appear in the budget. The purpose of the MAT file is to provide titles for agencies, bureaus, and appropriation accounts as well as to maintain the integrity of the budget preparation system by ensuring that data applicable to a specific agency or bureau or data applicable to the appropriation accounts are properly processed and maintained. The MAT file is maintained in both batch and interactive modes. All subsystems of the budget preparation system (EPS) are dependent on the MAT file except that of the Treasury combined statement.

For related technical report, see PB-259 321/XDD.

Keywords: *Data file, *Federal budgets, Data processing, Identifying, Organizations, Accounting, Records management, Operations, Magnetic tapes, Master account title file.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC Character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB-260 563/2/XDD

Catalog of Federal Domestic Assistance, 1976 Update.

Data file. The file reflects all the textual material published in the program descriptions section of the Catalog of Federal Domestic Assistance Update (1976). There are 1,044 programs. In addition, a 'characteristics record' is included for each program. These contain information extracted and coded from the textual material, for use with the accompanying documentation.

For related technical report, see PB-260 564/XDD.

Keywords: *Data file, *Federal assistance programs, *Economic assistance, Catalogs(Publications), Magnetic tapes, Projects, Descriptions, Coding, Classifications, Information, Catalog of Federal Domestic Assistance, Federal agencies.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track one-half inch tape only. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB-274 480/3/XDD

Catalog of Federal Domestic Assistance, 1977, Update

Data file. The file reflects all the textual material published in the program descriptions section of the Catalog of Federal Domestic Assistance (1977). There are 1,086 programs. In addition, a 'characteristics record' is included for each program. These contain information extracted and coded from the textual material, for use with the accompanying documentation.

For related technical report, see PB-274 481/XDD.

Keywords: *Data file, *Federal assistance programs, *Catalogs(Publications), Magnetic tapes, Information, Coding, Records, *Economic assistance, Domestic assistance.

Availability: NTIS, CP T02, 1p. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB-279 022/8/XDD

Fiscal Year 1978 Budget and Budget Title Files

Data file. The Master Account Title (MAT) File contains the titles of agencies, bureaus and accounts that appear in the Budget. The purpose of the MAT file is to provide titles for agencies, bureaus, and appropriation accounts as well as to maintain the integrity of the Budget Preparation System by ensuring that data applicable to a specific agency, bureau or appropriation account are properly processed and maintained. The Receipt Account Title File contains titles for each receipt account in the Budget (see OMB Circular A-11 for discussion of Budget Accounts, Section 22.4). The Budget Preparation System Master File contains approximately 32,000 records and consists of the following basic record types: (1) Program and Finance Data (P & F) Schedule Data (2) Object Classification Schedule Data (3) Federal Credit Data (4) Supplementary Source Document (SSD) Data (5) Receipt Data. The information contained in these data provide all or a major portion of the data required to produce some of the several tables and analyses appearing in the Budget of the United States.

For related technical report, see PB-279 023/XDD.

Keywords: *Data file, *Federal budgets, Accounting, Appropriations, Projects, Data, Magnetic tapes, National government, Budgeting, Federal agencies.

Availability: NTIS, CP T02, mag tape*. Source tape in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-285 306/7/XDD

Fiscal Year 1979 Budget and Budget Title Files

Data file. The FY79 Budget and Budget Title data file contains three files. (1) The Master Account Title (MAT) file contains the authorized identification codes for all appropriation accounts appearing in the budget; the authorized chapter/agency, organization/bureau, and appropriation account titles to be used in the budget; a complete cross-reference of all OMB appropriation accounts to the Treasury identification codes; and sequencing and identification codes for computer-generated reports. The file controls the entry of data into the Appropriation Account Data (AAD) computer file. (2) The Receipt Account Title (RAT) file contains titles and codes related to the receipt accounts in the Budget (see OMB Circular A-11, Section 22.3 for a discussion of Budget Accounts). (3) The Budget Preparation System Master (BPS) File contains approx. 32,000 records and consists of the following record types: Program and Finance Schedule Data (P&F); Supplementary

Source Document 'A' Data (SSD-A); Supplementary Source Document 'B' Data (SSD-B); Supplementary Source Document 'C' Data (SSD-C); Object-Classification Data; Federal Credit Data; and Receipt Data. The information contained in these records provides the financial input to the production of the tables and analyses appearing in The Budget of the United States.

Keywords: *Data file, *Budgeting, *Federal budgets, Magnetic tapes, Government agencies, National government, Appropriations.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-290 476/1/XDD

Catalog of Federal Domestic Assistance, 1978, Update.

Data file. The file reflects all the textual material published in the program descriptions section of the Catalog of Federal Domestic Assistance (1978). There are 1,075 programs. In addition, a 'characteristics record' is included for each program. These contain information extracted and coded from the textual material, for use with the accompanying documentation.

For related technical report, see PB-290 477/XDD.

Keywords: *Data file, *Federal assistance programs, United States, *Economic assistance, Grants, Public law, Classifications, Organizations, Descriptions, Coding, Magnetic tape, Catalogs(Publications), Financial support, Federal aid, Voluntary organizations, Agencies.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-293 111/1/XDD

Budget and Budget Title Files (FY 80).

Data file. The FY 80 Budget and Budget Title data file contains three files. (1) The Master Account Title (MAT) file contains the authorized identification codes for all appropriation accounts appearing in the budget; the authorized chapter/agency, organization/bureau, and appropriation account titles to be used in the budget; a complete cross-reference of all OMB appropriation accounts to the Treasury identification codes; and, sequencing and identification codes for computer-generated reports. The file controls the entry of data into the Appropriation Account Data (AAD) computer file. (2) The Receipt Account Title (RAT) file contains titles and codes related to the receipt accounts in the Budget (see OMB Circular A-11, Section 22.3 for a discussion of Budget Accounts). (3) The Budget Preparation System Master (BPS) File contains approx. 32,000 records and consists of the following record types: Program and Finance Schedule Data (P&F); Supplementary Source Document A Data (SSD-A); Supplementary

Source Document B Data (SSD-B); Supplementary Source Document C Data (SSD-C); Object-Classification Data; Federal Credit Data; and Receipt Data. The information contained in these records provides the financial input to the production of the tables and analyses appearing in The Budget of the United States.

For related technical report, see PB-293 112/XDD.

Keywords: *Data file, *Budgeting, National government, Accounting, Classifications, Coding, Organizations, Financial management, Records, Fiscal policies, Identifying, Magnetic tape, *Federal budgets, Budgets, Accounts receivable, Master account title file, Geocoding(United States), Federal programs.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-296 329/6/XDD

Catalog of Federal Domestic Assistance (1979).

Data file. The file reflects all the textual material published in the program descriptions section of the Catalog of Federal Domestic Assistance (1979). There are 1,078 programs. In addition, a 'characteristics record' is included for each program. These contain information extracted and coded from the textual material, for use with the accompanying documentation.

For related technical report, see PB-296 330/XDD.

Keywords: *Data file, *Federal assistance programs, Characteristics, National government, Magnetic tapes, Grants, Indexes(Documentation), Organizations, United States, *Economic assistance, Catalogs(Publications), Federal programs, Federal aid, Administrative agencies.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB80-117096/XDD

Catalog of Federal Domestic Assistance, 1979 (First Update).

Data file. The file reflects all the textual material published in the program descriptions section of the Catalog of Federal Domestic Assistance (1979). There are 1,093 programs. In addition, a 'characteristics record' is included for each program. These contain information extracted and coded from the textual material, for use with the accompanying documentation.

For related technical report, see PB80-117104/XDD.

Keywords: *Data file, *Federal assistance programs, Catalogs(Publications), *Economic assistance, National government, Projects, United States, Grants, Organizations, Magnetic tapes, Data processing, Agencies.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-209 352/4/XDD

Federal Individual Income Tax Return Data for Each Five-Digit Zip Code Area in the U.S. - 1969.

Data file. The file contains a tabulation of data from individual 1970 income tax returns for the United States. The tabulation reflects information reported on 1969 income tax returns filed in 1970. For each five-digit postal Zip code area within the state, the following data are provided: number of returns; number of joint returns; number of exemptions (total, taxpayer, dependent); adjusted gross income; total tax. The data are further broken down, under the above headings, to reflect total returns, those filed for incomes under \$3000, for incomes from \$3000 to under \$5000, from \$5000 to under \$10,000 from \$10,000 to under \$15,000, and for incomes of \$15,000 or more. Introductory material explains the classifications and terms used, and sources and limitations of the data. The 9 track tape was produced by the IBM 360 computer system, and contains packed numeric data.

Keywords: "Data file, Classifications, "Income taxes, Salaries, Joint returns, Exemptions, Tax brackets, Personal income tax data, Adjusted gross income, "Zip codes.

Geocoding: Zip code areas.

Availability: NTIS, CP T03, 2 reels mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidic, odd parity.

Simulated Tax and Transfer System (Stats) - Unit (1970-71).

Data file. The Stats-unit file contains selected information formed by merging the Stats family file and the Stats person file. Unit is defined as the minimum economic unit that is eligible for public transfer payment (Social Security, public assistance, public pension, etc.). This Stats unit file contains 57,797 records. The income reported is for calendar year 1970 and the population is reported as of March 1971.

Source documents: March 1971 Current Population Survey file of the Bureau of the Census in a format as used by the Office of Research and Statistics of the Social Security Administration.

Publications: 'Measurement of Transfer Income in the Current Population Survey,' by Dorothy S. Projector, Judith S. Bretz, Mary P. Johnston, and Ellen Murray. Paper prepared for the Conference on Research in Income and Wealth of the National Bureau of Economic Research held at the Pennsylvania State University, October 1972.

For related technical report, see PB-221 649/XDD.

Simulated Tax and Transfer System (Stats) - Social Security Unit (1970-71).

Data file. The Stats social security unit file used the Stats unit file to determine if a unit is eligible for social security benefits and, if eligible, who in the unit is (are) receiving such benefits. In addition, the Stats person file and the Stats family file were used to determine which of the approximate 35 combinations of social security beneficiary units the particular unit is. This Stats social security unit file contains 57,797 records. The income reported is for calendar year 1970 and the population is reported as of March 1971.

Source documents: March 1971 Current Population Survey file of the Bureau of the Census in a format as used by the Office of Research and Statistics of the Social Security Administration.

Publications: 'Measurement of Transfer Income in the Current Population Survey,' by Dorothy S. Projector, Judith S. Bretz, Mary P. Johnston, and Ellen Murray. Capital Stock Estimates, 1947-1971.

Data file. This file includes industry investment data and associated estimates of gross and net capital stock in current constant dollars for the period 1947-1971. The industry classification is the three digit SIC level for manufacturing and 1958 BEA interindustry study classification for the nonmanufacturing sectors. The capital estimates were made using the perpetual inventory method. The net stock estimates are based upon assumed depreciation function which accelerates over the life of the investment item. Investment life parameters were taken from Bulletin F, U.S. Department of the Treasury, adjusted to make the stock estimates equal the average book values reported to Census for 1962-64 for manufacturing sectors. For manufacturing sectors, the live parameters were adjusted using information from regulatory agencies and other sources. Separate estimates were prepared for stocks owned by the Federal Government and operated by private contractors. Public sector stock later sold to the private sector are given separately for manufacturing sectors and are included in the nonmanufacturing estimates.

For related technical reports, see PB-242 639/3/XDD, PB-238 730/6/XDD, AD-758 747/0/XDD.

Single Employer Pension Plans (Schedule B, 1979).

Data file. The President's Commission on Pension Policy, expired as of May 24, 1981, obtained actuarial data and assumptions on 1,539 single employer defined benefit pension plans from the Schedule B of the 1979 Form 5500. These data were obtained from a number of actuarial and benefit consulting firms. Pre-tax profit, net worth, and long-term debt data on these 493 plans, which were sponsored by 215 firms, were taken primarily from Standard & Poor's Standard Corporate Descriptions, 1979.

Keywords: *Data file, *Pensions, *Benefit plans, Government policies, Profits, Assets, Liabilities, *Employers, Financial statements, NTISNTIS.

Availability: NTIS, CP T02, mag tape*.

FB81-245557/XDD

Household Pension Survey.

Data file. The President's Commission on Pension Policy contracted for a household pension survey primarily to determine the effect of social security and pensions on savings behavior. Due to the complexity of determining savings rates, the analysis required demographic, employment, pension, social security, asset, and income data of family units. Thus the resulting data base is rich, and could be used for other analysis as well. The bulk of the data base comes from two interviews, one year apart. The Wave I interview was conducted in September 1979, and the Wave II interview was conducted in September 1980.

For related technical reports, see PB81-245565/XDD, PB81-245573/XDD, PB81-245581/XDD.

Income Survey Development Program (ISDP). 1979 Research Panel Working Files, Linking Index and Extract File.

Data files. The Income Survey Development Program (ISDP) was designed to test data collection materials, procedures, and processing systems necessary to handle the ongoing Survey of Income and Program Participation (SIPP) scheduled to be implemented in the early 80's. The ISDP (and subsequently SIPP) was intended, among other things, to provide annual and subannual measures of income and income change and to provide data necessary to evaluate the impact of policy changes regarding Federal and state tax, welfare, and various benefit programs. These tapes are preliminary and final tapes with family units, program units and reciprocity edits will be issued by October 1983. This set contains the 6 interview waves of the 1979 Research Panel along with the Extract File from Wave 5 Questionnaire and the Linking Index File for Matching individual Waves. **For related technical reports,** see PB83-244830/XDD, PB83-244848/XDD, PB83-195537/XDD, PB83-195545/XDD.

Cumulative Monthly Financial and Operating Data for Major Telephone Companies, 1976-1982, Historic (FCC Form 901).

Data file. The FCC form 901 data are required monthly from the large fully subject telephone companies. These companies have over one million dollars in annual operating revenues and interstate plant. Some large telephone companies that are not subject file voluntarily. Monthly reports are generated by the FCC for individual carriers, and on a quarterly basis industry consolidations are generated. Comparisons of monthly and cumulative data, for this year and last year, can be made to determine the amount and percent of increases or decreases for operating revenues, operating expenses and net income. One can also generate comparisons and ratios for revenues and expenses for the various time periods. Beginning with the 1983 tapes, the data will contain selected balance sheet information enabling one to develop monthly and cumulative for the year rate of return ratios. This is the Historic file.

Keywords: *Data file, *Telephone systems, *Public utilities, Operating expenses, Revenue, Income, Taxes, Magnetic tapes, *Financial statements.

Electric Utility Company Monthly Statement (EIA-826) January 1975-December 1982.

Data file. Purpose of Form EIA-826 formerly FERC-5, Electric Utility Company Monthly Statement, is to collect data necessary to fulfill regulatory responsibility; identify near-term trends in energy use; and contingency analysis. This form is filed monthly by approximately 150 electric utilities. All privately owned electric utilities with annual electric operating revenues of \$100,000,000 or more must respond. In addition, the sample includes other selected electric utilities. This reported data is expanded by factors, calculated using annual data from a previous period, to give electric sales data by state and sector. Other information collected includes data gathered on depreciation, construction, net income before taxes, and extraordinary items.

Keywords: *Data file, *Electric utilities, Sales, Magnetic tapes, Energy use, Monthly statements, *Financial statements.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. PB84-156025/XDD

FERC 11: Natural Gas Pipeline Co. Monthly Statement (January 1980-August 1983).

Data file. The computer data tape specified herein contains four (4) files consisting of FERC Form-11 respondent data from Jan. 1980 through Aug. 1983. Each file is identical in format and consist of company revenue data, income data operation and maintenance data and other selected data. Revenue data is reported in thousands of dollars and sales volume data is reported in millions of cubic feet. These files will be updated each quarter to reflect company re-submission and filing errors found during data validation.

Keywords: *Data file, *Gas pipelines, *Natural gas, Pipeline transportation, Interstate transportation, Operations costs, Maintenance costs, Revenues, Income, Magnetic tape, Tax credits, *Financial statements.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB84-215417/XDD

Monthly Household and Family Composition.

Data file. The file is the result of Mathematica Policy Research's effort to determine living arrangements of the sample members by month for the period covered by the first 5 waves of the 1979 Income Surveys Development Program Research Test Panel (ISDP). The file contains one record per person for each month the individual was present in the sample. In each record there is an indicator of the household, family and food stamp unit to which the individual belonged. Each person is uniquely identified by the constructed variable called the link index. If the user desires to use this data set in conjunction with the public use cross-sectional ISDP files, he/she would first need to merge the link-index to those cross-sectional tapes. The link index and the variables necessary to merge it to the public use files are contained in the master link-index file issued by NTIS.

Keywords: *Data file, *Economic surveys, *Income, *Earnings, Salary surveys, Assets, Magnetic tapes, Labor force participation, Food stamps, Living arrangements.

Availability: NTIS, CP T02, mag tape. Source tape is in the EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB84-217389/XDD

Income Survey Development Program (ISDP) 1979, Wave 2, Final Version.

Data file. The file contains updated information on labor force participation and reciprocity of income, asset ownership, and associated amounts. Supplemental topics include program eligibility. This file also reflects the addition of fields containing edited Food Stamp, Medicaid, and AFDC variables and the identification of AFDC, Food Stamp, and Medicaid units.

For related technical reports, see PB83-244848/XDD, PB83-244830/XDD, PB83-195545/XDD, PB83-195537/XDD, PB83-195529/XDD.

Keywords: *Data file, *Economic surveys, *Income, *Earnings, Salary surveys, Assets, Magnetic tapes, Labor force participation, Medicaid, Food stamps.

Availability: NTIS, CP T02, mag tape. Source tape is in the EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. COM-74-11095/8/XDD

Economic Development Administration Industrial Location Planning System (ILPS) - Summary Data Tape

Data file. A planning system has been designed to match resources of under-developed and declining areas eligible for EDA aid with perceived industrial locational requirements. As part of this system, EDA conducted a survey of 2,950 leading manufacturing firms in 254 (5-digit product class) growth industries during the latter half of 1971. In order to distinguish between historic and current locational requirements, data were gathered on both the locational and operating characteristics of plants in operation in 1970, and the industrial location needs of companies contemplating expansion during 1971-75. EDA published two statistical summaries of the data for 223 industries, Industrial Location Determinants, 1971-75, and Manufacturing Plant Characteristics, 1970, in February and June, 1973.

Keywords: *Data file, Industrial site selection, Regional planning, Economic development, Economic assistance, Systems engineering, Economically depressed areas, Resources, Economic surveys, Statistical data, Magnetic tapes, *Site surveys, *Economic analysis, *Industries.

Availability: NTIS, CP T01, 1 reel mag tape. Available only in 7 track, 556bpi, even parity, Bcd.

PB-234 121/2/XDD

Federal Modeling Survey,

Data file. A data file is available for the survey of Federally supported modelling efforts. It contains responses from model builders (project directors) and knowledgeable technical personnel in an agency (agency monitor) covers model type, history, cost, and use.

For related technical report, see PB-234 122/0/XDD.

Keywords: *Data file, Management information systems, *Mathematical models, Forecasting, *Models, Surveys, Classifications, Project planning, Project management, Technical workers, Data acquisition, Classifications, Utilization, Questionnaires, Analytical measures, Magnetic tapes.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcdic, odd parity. Price includes documentation.

Petroleum Industry Survey Data Tape (1973).

Data file. The information in the data tape described here is based on a survey of 89 petroleum companies in the United States (63 of whom responded to the survey questionnaire). The survey was designed to gather data on each major aspect of industry structure and to focus upon interactions among companies in each stage of the industry. Information was collected on a detailed geographic basis, usually being individual States or P.A.D. Districts within the U.S. and individual countries in foreign operations. Data covers the following areas: general ownership, management, and financial structure of the companies; oil and natural gas (1) well ownership and production, (2) assignments, and (3) exploratory and developmental wells; natural gas sales, purchases, processing, and gathering; petroleum refining in 1964-73; marketing; transportation and storage; foreign operations and their revenue, net worth, and ownership; uranium and coal; and, financial questions including security issues, auditing and law firms retained by the companies, and investment, revenues, costs and profits.

For related technical report, see PB-256 635/XDD.

Keywords: *Data file, *Petroleum industry, Surveys, Petroleum, Crude oil, Natural gas, Economics, Management, Exploration, Petroleum refining, Marketing, Fuel storage, Transportation, International trade, Uranium, Coal, Security, Financial management, Auditing, *Industries, Magnetic tapes.

Geocoding: United States.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBDCIC character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call

Standard Industrial Classification Manual, 1977.

Data file. File 1: Contains records of the short or tabulation titles of 1005 industries, 420 industry groups, 84 major groups, and 11 divisions. File 2: Contains records of the titles of 1005 industries, 420 industry groups, 84 major groups, and 11 divisions. The file is in numerical code order and is recorded in upper and lower case EBCDIC. File 3: Contains records of the approximately 17,000 index items of the SIC Manual, 1972, recorded in upper and lower case EBCDIC. File 4: Contains the description of each Standard Industrial Classification industry, industry group, major group and division. This description is usually a paragraph describing the particular group. It generally does not contain the broader definition contained at the higher levels of aggregation. Therefore, the complete description of each four-digit industry draws from all four levels.

Keywords: *Data file, *Industries, *Classifications, *Federal cataloging system, Manuals, Magnetic tapes, Coding, *Standard industrial classifications, IBM 360 computers, IBM 370 computers.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions.

PB80-111271/XDD

Data Tape of Medical Malpractice Closed Claims (1976).

Data file. This is a user's tape consisting of data items from 4,126 medical malpractice closed claims between July 1, 1976, and October 31, 1976. The purpose of the data collection effort was to construct a file of closed claims data for analysis of injuries and compensations. Westat, Inc. conducted the data processing tasks necessary to build the data file and performed the analyses of the data. The results of that analysis are reported in the Medical Malpractice Closed Claims Study, 1976.

For related technical reports, see PB80-111289/XDD, PB80-111297/XDD.

Keywords: *Data file, *Insurance, Claims, Data storage, Magnetic tapes, *Injuries, Compensation, *Medical malpractice.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Interstate Natural Gas Pipeline Companies/Historic. Form 2.

Data file. Presents financial and operational statistics of interstate natural gas pipeline companies in the United States and the District of Columbia. The data are tabulated from annual reports filed with the Federal Energy Regulatory Commission (FERC) by 86 Class A and B companies (all interstate natural gas pipeline companies with annual gas operating revenues of \$1 million or more). The summary section of the report reviews the more significant results of operations for covered companies. All data are for the most recent calendar year unless otherwise noted. Data includes the financial and operational balance sheet; income accounts; statement of changes in financial position; gas operating revenues, customers, and sale quantities; gas operation and maintenance expenses; data per type of utility plant; gas accounts; and physical quantities for gas reserves, storage gas, producing wells, and miles of pipeline. Included for each company is a record of

PB83-120477/XDD

Large Combustor Energy Consumption Data Base 1979.

Data file. This tape provides questionnaire-level data on energy consumption in establishments and large combustors as reported on the 1980 Manufacturing Industries Energy Consumption Study and Survey of Large Combustors (EIA-463). Four data files are included on the tape: (1) establishment-level data; (2) combustor-level data; (3) selected information on smaller combustors by Standard Industrial Classification (SIC), and (4) selected information on smaller combustors by region. For the purposes of maintaining confidentiality of respondents, there is no way of matching combustor data to establishments. These data bases are all independent. Several types of data are included. Fuel consumption by fuel type is reported in Btu for both establishments and boilers. These data have been rendered confidential by the introduction of a small amount of random error into each reported value. This scrambling procedure does not significantly alter covariate relationships within the data, however. Information is also provided on the SIC and geographic region of the combustor/establishment. Other information includes the maximum design firing rate of combustors, electricity and steam generation of establishments, the capability to burn alternative fuels in combustors, the con-

sumption of waste gases, etc. Documentation is provided with the tape.

For related technical report, see PB83-120429/XDD.

Keywords: *Data file, Fuel consumption, Boilers, *Manufacturers, Magnetic tapes, *Combustors, *Energy consumption.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Energy Price and Expenditure Data System - Data. (1970-1980)

Data file. This tape contains data used to produce Energy Price and Expenditure Data Report, 1970-1980 (State and U.S. Total), DOE/EIA-0376. The publication contains State and U.S. energy expenditures and average fuel price data for the years 1970 through 1980. The data file contains data identified by major fuel and economic sector to allow for evaluation of trends in energy expenditures and prices. This is the first time such a comprehensive energy price and expenditure data system has been developed. It represents a major contribution to the field of energy information. Two separate EIA data bases were utilized to produce this series. A summary of

National Fire Incident Reporting System (NFIRS) Data Base. 1982 Incident Report File.

Data file. The U.S. Fire Administration established the National Fire Incident Reporting System for the collection of fire incident and fire casualty data on a nationwide basis. NFIRS is the center of the National Fire Data Center's program which has as one of its primary goals assisting state and local government and other critical groups in the development of their own fire data systems, and in the use and interpretation of their data. NFIRS contributes to the second major goal of the Data Center, as well; this is to determine the magnitude and characteristics of the U.S. fire problem in sufficient detail and accuracy to guide fire protection decisions of various levels of

government and the private sector, and help identify solutions to the problems identified. The NFIRS data contains two files the first is the Master File and the second is the Incident and Equipment/Casualty Report Files.

Keywords: *Data file, *Fires, *Information systems, Magnetic tape, State government, Local government, Fire protection.

National Fire Incident Reporting System (NFIRS) Data Base. 1982 Equipment Report File.

Data file. The U.S. Fire Administration established the National Fire Incident Reporting System for the collection of fire incident and fire casualty data on a nationwide basis. NFIRS is the center of the National Fire Data Center's program which has as one of its primary goals assisting state and local governments and other critical groups in the development of their own fire data systems, and in the use and interpretation of their data. NFIRS contributes to the second major goal of the Data Center, as well; this is to determine the magnitude and characteristics of the U.S. fire problem in sufficient detail and accuracy to guide fire protection decisions of various levels of government and the private sector, and help identify solutions to the problems identified. The NFIRS data contains two files. The first is the Master File and the second is the Incident and Equipment/Casualty Report Files.

Keywords: *Data file, *Fires, *Information systems, Magnetic tape, State government, Local government, Fire protection.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Statistics of Interstate Natural Gas Pipeline Companies (1982). Form 2.

Data file. This annual publication presents financial and operational statistics of interstate natural gas pipeline companies in the United States. The data are tabulated from annual reports filed with the Federal Energy Regulatory Commission (FERC) by 97 Class A and B companies (all interstate natural gas pipeline companies with annual gas operating revenues of \$1 million or more). The summary section of the report reviews the more significant results of operations for covered companies. All data are for the most recent calendar year unless otherwise noted.

Keywords: *Data file, Gas pipelines, *Natural gas, *Pipeline transportation, Interstate transportation, Operating costs, Maintenance costs, Tax credits.

8. DEMOGRAPHY AND POPULATION

PB-170 771/0/XDD

Population of Housing Data for the United States by Standard Location Areas, 1960 Census (Hawaii, Vermont, Rhode Island, Delaware, Idaho, Montana, Colorado, South Dakota, Nebraska, Arkansas).

Data file. Information is given in the file for each standard location area in a format that lists each item of information together with its location. The record for 10 states lists such information as the family relationship within a household, the school enrollment of the children, income, employment status, the numbers of personnel employed by industry and in agriculture, tenancy and vacancy status of housing units, value of property, the heating fuels used, and the numbers of workers classified according to type of work.

Keywords: *Data file, *Demographic surveys, Family relations, Income, *Census, Standard location areas, *Housing, Selected states, *Population(Statistics), School enrollment, Property values, Occupations.

Geocoding: States(United States).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

PB-170 772/8/XDD

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Louisiana, North Carolina, Indiana).

Data file. Information is given in the file for each standard location area in a format that lists each item of information together with its location. The record for three states lists such information as the family relationship within a household, the school enrollment of the children, income, employment status, the numbers of personnel employed by industry and in agriculture, tenancy and vacancy status of housing units, value of property, the heating fuels used, and the number of workers classified according to type of work.

Keywords: *Data file, Employment, *Demographic surveys, Family relations, Income, *Census, Standard location areas,

*Housing, Selected states, *Population(Statistics), School enrollment, Property values, Occupation.

Geocoding: States(United States).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

PB-170 773/6/XDD

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Minnesota, Mississippi, South Carolina, Oklahoma, District of Columbia).

Data file. Information is given in the file for each standard location area in a format that lists each item of information together with its location. The record for four states and the District of Columbia lists such information as the family relationship within a household, the school enrollment of the children, income, employment status, the numbers of personnel employed by industry and in agriculture, tenancy and vacancy status of housing units, value of property, the heating fuels used, and the numbers of workers classified according to type of work.

Keywords: *Data file, *Demographic surveys, Family relations, Income, *Census, Standard location areas, *Housing, Selected states, Population(Statistics), School enrollment, Property values, Occupations.

Geocoding: States(United States).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

PB-170 774/4/XDD

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Ohio).

Data file. Information is given in the file for each standard location area in a format that lists each item of information together with its location. The record for Ohio lists such information as the family relationship within a household, the school enrollment of the children, income, employment status, the numbers of personnel employed by industry and in agriculture, tendency and vacancy status of housing units, value of property, the heating fuels used, and the numbers of workers classified according to type of work.

National Survey of Family Growth, Cycle II, 1976.

Data file. The National Survey of Family Growth (NSFG) was designed to provide data on fertility, family planning, and related aspects of maternal and child health. Fieldwork for Cycle II was carried out by Westat, Inc., between January and September of 1976. A multistage probability sample of the conterminous United States was used in Cycle II. Approximately 33,000 households were screened to identify the sample of women who would be eligible for the NSFG, i.e., women aged 15-44 years, inclusive, who were either currently married, previously married or never married but had offspring presently living in the household. For Cycle II, interviews were completed with 8,611 women.

For related technical reports, see PB-297 346/XDD, PB80-145956/XDD, PB-294481/XDD.

Keywords: *Data file, Family planning, *Fertility, Magnetic tapes, Data storage, Females, Surveys, Statistical data, Interviews, *Families, Maternal and child health services, Women, Health surveys, *Health statistics.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-109019/XDD

Rectangular Version of National Survey of Family Growth, Cycle I, 1973.

Data file. A national survey of U.S. women of child-bearing age describing their pregnancy histories, contraceptive behavior, and attitudes toward childbearing and family.

For related technical report, see PB81-109027/XDD.

Keywords: *Data file, *Fertility, *Contraception, Birth control, Surveys, Attitudes, *Family planning, Behavior, Pregnancy, *Attitude surveys, Women.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-109035/XDD

Hierarchical Version of National Survey of Family Growth, 1973.

Data file. A national survey of U.S. women of child-bearing age describing their pregnancy histories, use of contraceptives, and attitudes toward childbearing and family. The file has a hierarchical structure with three record types: respondent, interval, and live birth. The Data Base Dictionary files included on the tape requires the proprietary software package 'LEXICOGRAPHER' in order to be used. Users not having this package should refer to the printed Dictionary files which will accompany each tape.

For related technical report, see PB81-109043/XDD.

Keywords: *Data file, *Fertility, Magnetic tapes, Data storage, Females, *Contraception, Surveys, *Family planning, *Attitude surveys, Women, *Data dictionaries.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-109050/XDD

Current Population Survey (1977), June Supplement.

Data file. The data file contains the results of a national survey of U.S. women of childbearing age describing their attitudes toward fertility and family planning. The file contains 40,604 records each with a logical record length of 480. The file layout is essentially the same as that documented by the Census Bureau in the current population survey interview record layout June 1977 fertility supplement. Alphabetic codes have been converted to numeric codes in most cases. Dates have been converted from a month-year format to century months.

For related technical report, see PB81-109068/XDD.

MSA: Metropolitan Statistical Areas Data Tape.

Data file. The Office of Management and Budget (OMB) announced revised definitions of the nation's metropolitan statistical areas (MSAs) effective June 30, 1983. Based on demographic data derived from the 1980 decennial census, a comprehensive review was undertaken by the Federal Committee on MSAs, which advises OMB on MSA matters. The previous term Standard Metropolitan Statistical Area (SMSA) has been shortened to Metropolitan Statistical Area (MSA). Under the new standards, an area qualifies for recognition as an MSA in one of two ways: if there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. If an area has more than 1 million population and meets certain other specified requirements, it now will be termed a 'Consolidated Metropolitan Statistical Area' (CMSA), consisting of major components recognized as 'Primary Metropolitan Statistical Areas' (PMSAs). A total of 257 MSAs are recognized. In addition, there are 23 CMSAs, consisting of 78 PMSAs. This tape contains computer files documenting titles, components and Federal Information Processing Standards (FIPS) codes for Metropolitan Statistical Areas and related statistical areas. It includes two computer files to convert titles, components, and FIPS codes for Standard Metropolitan Statistical Areas to June 30, 1983 MSA definitions.

Keywords: *Data file, *Metropolitan areas, Coding, Urban areas, Magnetic tapes, Standard metropolitan statistical areas, *Federal information processing standards, Geographical areas.

Availability: NTIS, CP T02, mag tape. Source tape is in both the EBCDIC and the ASCII character sets. Character sets restrict preparation to 9 track, one-half inch tape only. Identify recording mode by specifying character set and density. Call NTIS Computer Products if you have questions.

Bureau of Health Professions Area Resource File (ARF).

Data file. The Bureau of Health Professions' Area Resource File is a county-unit data base with over 3,000 data elements for each county in the U.S., with the exception of Alaska for which there is a State total, and certain Independent Cities which have been combined into their appropriate counties. Altogether, there are a total of 3,077 records on the file. The purpose of the ARF is to summarize data from many sources into a single file to facilitate health manpower analysis. The data elements include in part: (1) County descriptors (Names, Fips, HSA, PSRO, SMSA, SEA, BEA, city size, shortage area designation, etc., codes); (2) Health Professions data (M.D., DDS, Veterinarians, Pharmacists, Optometrists, Podiatrists, R.N., L.P.N., and Dental Hygienists); (3) Health Facility data (hospital size, type, utilization, and staffing and services; Nursing home data); (4) Population data (Size, composition, employment, housing, natality, morality by cause, by sex and race, and by age; crime data); (5) Health Training data (Training programs, enrollments, and graduates by type); (6) Expenditure data (Hospital expenditures, Medicare enrollments, and reimbursements, medicare prevailing charge data); (7) Economic data (Total, per capita, and median income; income distribution, and AFDC recipients); (8) Environment data (Land area, large animal population, elevation, latitude and longitude of population centroid, water hardness index, and climatic data).

For related technical report, see HRP-0903605/XDD.

Keywords: *Data file, Magnetic tapes, Data storage, United States, Environments, Populations, *Health manpower, Health facilities, Area Resource Files, Training programs, Expenditures.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation, HRP-0903605.

Keywords: *Data file, *Health care utilization, *Health surveys, Magnetic tapes, Data storage, Demographic surveys, Health care requirements, Methodology, Questionnaires, Medical services, *Families, Health statistics.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 800 bpi, odd or even parity, BCD. Price includes documentation.

PB-261 655/5/XDD

Physician Capacity Utilization Public Use Files One and Two.

Data file. There are two data files: Public Use File 1 and Public Use File 2. The first contains individual data collected via telephone interviews from primary care physicians (General Practitioners, Internists and Pediatricians) in metropolitan and non-metropolitan areas of the USA. The interview asked for wait times to appointments and in the office, hours spent with patients, number and type of aides, price, and number of examining rooms. An area (SMSA or non-metropolitan area defined in documentation) identifier is given on file. File 2 contains grouped data. Each variable given has a mean (or proportion) for three physicians within the same specialty, region and survey type (i.e., large, small or non-metropolitan area). In addition to the interview data found on File 1 a few biographical variables (sex, age, foreign medical graduate, board-certification) were included on File 2.

For related technical report, see PB-261 656/XDD.

Keywords: *Data file, *Physicians, *Health care utilization, Magnetic tapes, Data storage, Rural areas, Urban areas, Interviews, Medical services, General practitioners, Pediatricians, Internists, Health statistics, *Health surveys.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-269 452/9/XDD

Analysis of Incentive Reimbursement System for Health Care and LTC Services (1973).

Data file. A total of five files appear on this volume. The first file is an augmentation of the 1973 National Nursing Home survey. The unit of observation is the patient, but facility and environmental data are also appended to the record. The second file is an SPSS file of the same data. Files 3 and 4 are files containing patient information and facility information obtained from the two states to be used to simulate the impact of using the reimbursement formula developed statistically from the first two files. The fifth file is an assortment of software used during the study.

For related technical reports, see PB-269 453/XDD, PB-269 454/XDD, PB-269 455/XDD.

Keywords: *Data file, *Health care utilization, *Long term care, Magnetic tapes, Data storage, Surveys, Patients, Health care facilities, Incentives, Health care costs, Cobol, Reimbursements, IBM 370/168 computers, *Health statistics.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB-283 727/6/XDD

Long Term Care Alternatives: Section 222 Day Care and Homemaker Demonstrations; LTC 003 Data Tape

Data file. The LTC 003 data tape comprises two files and one document describing the data base collected on 1800 clients from six demonstration sites. The LTC 003 Patient Master File contains a record for all participants sorted by demonstration site and participant case number. The LTC 003 Bill Summary File contains records of bills paid for each participant for Expanded Medicare Benefits within the demonstration and conventional Medicare Benefits outside of the demonstration sorted by demonstration site and participant case number. The documentation contains descriptive overviews of the files, discussion of data quality, file formats, and tape specifications. The file format contains the following notation for each data item: Column location, variable name, variable number, field size, field and character type, source of question, and coding categories.

For related technical report, see PB-283 728/XDD.

Keywords: *Data file, *Long term care, Magnetic tapes, Data storage, Medicare, Patients, *Health care utilization, Health care costs, Day care services(Health), Homemaker services, Billing, Health insurance, Health services research, Alternative care, Benefits.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-284 912/3/XDD

Master Facility Inventory - Annual Survey of Hospitals, 1971

Data file. The Micro-Data Tape contains the data from the Annual Survey of Hospitals, a component of the Master Facilities Inventory (MFI) compiled by the National Center for Health Statistics. The MFI provides a census of inpatient health facilities in the fifty States and the District of Columbia. The Hospitals Survey provides the name and address of each hospital in the MFI, type of ownership and specialty (if any). Demographic data include county, state and region codes. The Survey collects data on the hospitals' facilities, services, beds, utilization, finances and personnel. The 1971 Micro-Data Tape contains information on 7678 hospitals.

For related technical report, see PB-284 913/XDD.

Keywords: *Data file, *Hospitals, *Medical services, Health care utilization, Magnetic tapes, Data storage, Health surveys, *Health facilities, Demography, States(United States), District of Columbia, Inpatients, Inventories, Health statistics, Counties, Regions, Coding, Health manpower, Personnel, Financing.

Availability: NTIS, CP T00, mag tape*. Source tape is in EBCDIC character set and certain fields contain packed decimal data. Character set restricts preparation in 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-290 478/7/XDD

National Ambulatory Medical Care Survey, 1975.

Data file. The National Ambulatory Medical Care Survey (NAMCS) provides data on ambulatory medical care rendered in physicians' offices. The NAMCS is a continuous survey based on a sample of patient visits to a national sample of office-based physicians. The survey obtains information on office visits by age, race, and sex of the patient and by selected physician characteristics such as type of specialty and practice and geographic location. Data describing the clinical substance of these visits include the patient's problem or complaint, prior visit status, seriousness of the problem, physician's diagnosis, treatment and services, disposition, and duration of the visit. The patient's problem or complaint is coded according to a symptom classification developed specifically for the NAMCS. The physician's diagnosis is coded according to the Eight Revision of the International Classification of Diseases Adapted for Use in the United States (ICDA). In 1975 NAMCS sampled about 63,000 patient records from the 2,472 doctors who participated in the survey.

For related technical report, see PB-290 479/XDD.

Keywords: *Data file, Magnetic tapes, Data storage, Statistical data, Physicians, Age, Sex, Characteristics, Patients, Medical records, *Medical services, Health surveys, *Physician visits, *Ambulatory health care, Race, Specialty services, Health statistics.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-294 661/4/XDD

Responses of Canadian Physicians to the Introduction of Universal Medical Care Insurance: The First Five Years in Quebec (1971-75).

Data file. The computer data tape consists of seven (7) files which were produced as part of a study of the responses of physicians in Quebec province to the introduction of universal medical care insurance. The complete set of files includes: Beneficiary Utilization File (Variable length records); Beneficiary Utilization File (Fixed length records); Physician Master File; Telephone Survey of General Practitioners; Market area subset; Consultation File; and Diagnostic File. The Physician Master File (PMF) contains data on all physicians in Quebec province for the period 1971 to 1975. The variable length record Beneficiary Utilization File (BUF-VL) contains the records of medical utilization for each sampled beneficiary in Quebec province who had a record of utilization in a one-year period. There were five different age-sex groups (one file for each age-sex group) sampled during each of the three one-year periods. The sample was also stratified by location and time. Only beneficiaries who actually received services were included. The fixed length record Beneficiary Utilization File (BUF-FL) contains records of a sample of Beneficiaries of the Quebec Health Insurance Plan for five different age-sex groups (one file for each age-sex group) sampled during each of the three one-year periods, stratified by location and time. The Telephone Survey of General Practitioners contains the responses to a telephone survey of a sample of 2,000 general practice physicians in the Spring of 1977. The Survey was conducted with the cooperation of the Federation des Omnipraticiens du Quebec (FMOQ). The Market Area Subset File contains data on the socioeconomic, demographic, and medical conditions of each of 64 individual medical service market areas. The Consultation File (CONSUL) contains individual records of visits to physicians, upon referral by other physicians, (4 reels). The Diagnostic File (DIAG), (19 reels) provides data on all procedures performed for selected diagnoses during selected time periods between 1970 and 1975.

For related technical reports, see PB-294 662/XDD, PB-286 032/XDD, PB-286 033/XDD.

Keywords: *Data file, *Physicians, Magnetic tapes, Data storage, Responses, Questionnaires, Surveys, Canada, Data collection, General practitioners, *Health insurance, Health services research, Quebec, National health insurance, Medical care.

Availability: NTIS, CP T99, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-296 029/2/XDD**Health and Nutrition Examination Survey (HANES I) 1971-1975. Health Care Needs, General Medical History and Supplements on Respiratory and Cardiovascular Data Tape, Catalog Number 4091.**

Data file. The first Health and Nutrition Examination Survey (HANES I), conducted during the period 1971-75, was designed to measure the nutritional status and health of the U.S. population ages 1-74 years and to obtain more detailed information on the health status and medical care needs of adults ages 25-74 years in the civilian noninstitutionalized population. The information obtained during the course of the survey consisted of: a detailed dietary interview; general medical histories & detailed histories of respiratory disease, cardiovascular disease, & arthritis; health care needs & general well-being questionnaire; a general medical examination; dental, dermatological, & ophthalmological examination; anthropometry; vision tests & speech tests; x-rays of the hands, knees, hips & chest; blood and urinary laboratory tests; electrocardiogram; spirometry & pulmonary diffusion tests; and tap water samples. There were a total of 32,331 sample persons of which 31,973 were interviewed and 23,808 were examined. This data tape contains demographic characteristics & data from the Health Care Needs, General Medical History Questionnaire; Respiratory and Cardiovascular supplements for 6,913 sample persons ages 25-74 examined during HANES I.

For related technical report, see PB-296 030/XDD.

Keywords: *Data file, *Nutrition, Magnetic tapes, Data storage, Surveys, Questionnaires, Respiratory system, Cardiovascular system, Interviews, Health care requirements, *Health surveys, Medical care, *Medical examination.

National Natality Followback Survey, 1967.

Data file. The 1967 National Natality Survey, which was conducted by the National Center for Health Statistics, was designed primarily to collect information on pre- and post-natal care received by women having babies in 1967, and on the medical care received by the newborn infants. In addition to obtaining the information on medical care, information on certain socioeconomic and demographic characteristics which were thought to be relevant to the study was obtained from the mother. The sample was comprised of one out of every 1,000 births of white infants and one out of every 500 births of all other infants.

For related technical report, see PB-300 998/2/XDD.

Keywords: *Data file, Magnetic tapes, Data storage, Infants, Demography, Socioeconomic status, Characteristics, National government, Mothers, *Natality, *Birth rate, *Health surveys, Medical care, Prenatal care, Health statistics, National Center for Health Statistics, Postnatal care.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-300 999/0/XDD

National Natality Followback Survey, 1969.

Data file. The 1969 National Natality Survey, which was conducted by the National Center for Health Statistics, was designed primarily to collect information on pre- and post-natal care received by women having babies in 1969, and on the medical care received by the newborn infants. In addition to obtaining the information on medical care, information on certain socioeconomic and demographic characteristics which were thought to be relevant to the study was obtained from the mother. The sample was comprised of one out of every 1,000 births of white infants and one out of every 500 births of all other infants.

For related technical report, see PB-301 000/6/XDD.

Keywords: *Data file, Magnetic tapes, Data storage, Infants, Demography, Socioeconomic status, Characteristics, National gov-

ernment, Mothers, *Natality, *Birth rate, *Health surveys, Medical care, Prenatal care, Health statistics, National Center for Health Statistics, Postnatal care.

PB-301 358/8/XDD

National Natality Followback Survey, 1972.

Data file. The 1972 National Natality Survey is a mail survey of a sample of legitimate live births in 1972. It was conducted by the National Center for Health Statistics to evaluate the accuracy and completeness of selected items on the live birth certificate as reported through the vital registration system, to extend the scope of data which are collected through the vital registration system, and to gather information comparable to that collected in previous national natality surveys to assess trends in birth related matters. A sample of 1972 birth certificates was selected, and the mothers, physicians, and hospitals associated with those births were mailed questionnaires to gain additional social, demographic, and medical information. Mothers provided a complete pregnancy history, information on prenatal care, health insurance, wantedness of the sample birth, expectation of additional births, and social and demographic information. Hospitals and physicians provided medical information on both mother and infant. These data sources, when linked with the birth certificate, comprise the 1972 National Natality Survey.

For related technical report, see PB-301 359/XDD.

Keywords: *Data file, *Vital statistics, Magnetic tapes, Data storage, Infants, Demography, Socioeconomic status, Characteristics, National government, Mothers, *Natality, *Birth rate, *Health surveys, Medical care, Prenatal care, Health statistics, National Center for Health Statistics, Postnatal care.

Medical Device Establishment Registration Master File.

Data file. The data file contains the name and address of each domestic and foreign establishment currently registered with the U.S. Food and Drug Administration. Each record contains the name and address of: (1) the registered establishment, (2) the owner/operator or parent company of the registered establishment and, (3) official correspondent or designated person who acts as a contact person for the registered establishment. The registered establishment is also identified as a manufacturer, repackager or initial distributor of imported devices. Each record also identified any other trading names used by the registered establishment.

Keywords: *Data file, *Medical equipment, Magnetic tapes, Data storage, Manufacturers, Registration.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Patterns of Ambulatory Care: Evaluation Research (PAC:ER) Project - Clinic Data Base Tape.

Data file. This tape contains details regarding costs and services provided during the course of 6,500 visits to selected ambulatory care clinics operated by the Los Angeles County Department of Health Services. The data cover services received by 2,500 individuals. Data relating to specific treatments and services provided at each visit were combined with standardized costs of the respective services and used to evaluate alternative rate calculation mechanisms with respect to such criteria as ease and cost of bill preparation, equity and acceptability to third-party payors. Forty-five data elements are included for each visit, including descriptive data about the patient (7 items), source of payment (2 items), purpose of visit, provider(s) seen (2 items), diagnosis, treatments/services (6 items), medications (5 items), and time (duration) of visit.

For related technical reports, see PB80-111255/XDD, PB80-111263/XDD.

Keywords: *Data file, Data storage, Magnetic tapes, Costs, *Physician visits, *Ambulatory health care, Reimbursements, Los Angeles County(California), Health care services.

Determinants of Service Intensity Data Tape: Reabstracted PAS Data and AHA/AMA Data for 17 Study Hospitals.

Data file. All data refer to 17 hospitals located throughout the nation. Two types of information are stored on this data tape: (a) Data reabstracted from 1799 medical records to validate PAS abstract data based on same records (File No. 1); and (b) Data from AHA (1970-75) and AMA (1972) merged in one file (File No. 2). The foregoing description covers the tape documentation. For further information under this contract: HRA 230-75-0169, refer to 'Determinants of Service Intensity in the Medical Care Sector: Final Report and Executive Summary'; and order by National Technical Information Service (NTIS) Report No. PB-287 365. This final report contains a copy of the original PAS abstraction form and the coding manual for the reabstraction study. Some data obtained in the reabstraction study regarding services used by a patient were collected in more detail than available in the PAS abstract information. **For related technical report,** see PB80-115728/XDD.

Physician Capacity Utilization Surveys: Public Use Files.

Data file. The Physician Capacity Utilization Surveys Public Use Files contain data from surveys undertaken in 1973/74 and again in 1975 among primary care physicians (general and family practice, internists, and pediatricians) in selected large and small metropolitan areas (SMSA's) and nonmetropolitan areas. The data base consists of three files. The first file includes the responses of individual physicians and contains the sampling unit identification number (SMSA or nonmetro primary sampling unit). The individual records have been supplemented by the addition of limited biographical information and by the addition of appropriate data elements from the DMA Area Resource File. The second file aggregates records into groups of three physicians sorted by

homogeneous groups. Records are only available by general area type and Census region but include more extensive biographical data. The third file is an area means file containing means data by sampling unit weighted across the three specialty groupings noted above. The area means file has also been augmented by the Area Resource file.

For related technical report, see PB80-116965/XDD.

PB80-130230/XDD

National Ambulatory Medical Care Survey, 1977.

Data file. The National Ambulatory Medical Care Survey (NAMCS) provides data on ambulatory medical care rendered in physicians' offices. The NAMCS is a continuous survey based on a sample of patient visits to a national sample of office-based physicians. The survey obtains information on the volume of office visits by age, race, and sex of the patient and by selected physician characteristics such as type of specialty and practice and geographic location. Data describing the clinical substance of these visits include the patient's problem or complaint, prior visit status, referral status, time since onset of complaint, seriousness of the problem, physician's diagnosis, diagnostic and therapeutic services provided, disposition, and duration of the visit. The patient's problem or complaint is coded according to a revised symptom classification developed specifically for the NAMCS. The physician's diagnosis is coded according to the 'Eighth Revision of the International Classification of Diseases Adapted for Use in the United States (ICDA).' In 1977 NAMCS sampled about 51,000 patient records from the 1932 doctors who participated in the survey.

For related technical report, see PB80-130248/XDD.

National Nursing Home Survey, 1977. Data Tapes.

Data file. The 1977 National Nursing Home Survey (NNHS) is a nationwide sample survey of nursing homes, their residents, their discharges and their staff. The survey was conducted via a combination of personal interviews and self-enumerated forms. Data on nursing home operating and utilization characteristics were obtained by personal interview with the administrator, data on the financial characteristics of the facility were self-enumerated by the nursing homes accountant or bookkeeper. Data on a sample of patients currently residing in the institution (1977) as well as a sample of residents discharged in 1976 were abstracted from medical records in the presence of a knowledgeable caregiver. Data on nursing home staff was self-enumerated. The 1977 NNHS covered nursing care homes, personal care homes (with or without nursing), and domiciliary care homes. Fieldwork was conducted from May to December 1977 and yielded approximately 7000 current residents, 5100 discharged residents and 14,000 staff respondents from the 1451 nursing homes participating in the survey.

For related technical report, see PB80-188048/XDD.

National Nursing Home Survey, 1977. 5 State Data Tapes.

Data file. The 1977 National Nursing Home Survey (NNHS) was designed to produce national estimates of nursing homes, their residents, their discharges and their staff. In order to produce State estimates for selected states, the national sample was supplemented with the additional nursing homes needed to produce reliable State estimates. These data tapes contain data on the 5 States with the largest proportion of residents: California, Illinois, Massachusetts, New York and Texas. The data items collected in the 5 States are comparable to those collected in the national sample of the NNHS in both methodology, scope and definitions. Fieldwork was conducted from May to December 1977 and yielded approximately 3100 current resident, 2500 discharged resi-

dent and 5700 respondents from the 644 nursing homes participating in the survey.

For related technical report, see PB80-188725/XDD.

Keywords: *Data file, Interviews, Surveys, Characteristics, Data storage, Magnetic tapes, Patients, *Nursing homes, Health facilities, *Long term care.

PB80-191349/XDD

Survey Data of Medical Group Practices Study: Formatted Data Tapes.

Data file. This study consists of two files (one each on two reels) which were produced as part of a nationwide survey of group medical practices in the United States. The objective of the survey was to develop a data base for a series of proposed analyses on the economics of group practice. The types of medical groups surveyed were: general practice, internal medicine, pediatrics, general surgery and obstetrics/gynecology. The group file contains data from the Main Group Questionnaire which includes data on the groups' legal and administrative structure, medical and support staff, and income-distribution scheme. In total, the file contains information on 957 group practices. The physician file contains all of the data on the group file in addition to a survey of the groups' physicians concerning scheduling of patient appointments. In total, the file contains information on 6,342 physicians associated with the 957 group practices.

For related technical reports, see PB80-191356/XDD, PB82-169756/XDD.

Attorney Roster File.

Data file. The Attorney Roster File consists of records of those attorneys and/or agents who are registered to practice before the Patent and Trademark Office, who also wish to have their names and addresses published in the yearly publication of 'Attorneys and Agents Registered to Practice before the U.S. Patent and Trademark Office.' The Attorney Roster Master File is in a 5 position numeric control number order. The records are arranged on the master file in this order for update purposes. The Master File is updated on a quarterly schedule. The updates consist of record changes, deletions of records, and addition of records. From the Attorney Roster Master File an extract tape for NTIS is generated. This tape contains all names and preferred publication addresses requested by each attorney/agent, and is sorted in zip code sequence (major) and alphabetical last name, first name sequence (minor). The block size is 3080; record size is 308 and blocking factor is 10. The internal label identification value is ATYR44550540TS1M.

Keywords: *Data file, *Patents, *Law(Jurisprudence), National government, Magnetic tapes, Personnel, Lawyers, Patent and Trademark Office.

Availability: NTIS, CP T02, mag tape*. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

PB81-172363/XDD

National Sample Survey of Registered Nurses, 1977.

Data file. The 1977 National Sample Survey of Registered Nurses is a study conducted by the American Nurses' Association under a contract from the Division of Nursing, Bureau of Health Professions, U.S. Public Health Service, Department of Health and Human Services. The objectives of the project were

to provide more detailed statistics on the registered nurse population; to assess factors related to the present and projected RN labor force and to determine the effectiveness of the national sampling mechanism developed under a previous contract. The basis for sample selection were the individual state boards of nursing registration files that list the names and addresses of all RN's possessing current licenses. Following the first unduplication 20,417 RN's comprised the sample. All data were collected between August and December 1977 by means of a mail questionnaire and, when necessary, a telephone interview. The final effective response rate for the survey was 82.2 percent. The data prepared for September 1977 did not include nurses who were granted a new license or a reinstated license during the interval between sample selection and the mailing of the survey. The September nurse population figure is thus estimated to understate the actual nurse population by about 15,000 nurses.

For related technical report, see PB81-172371/XDD.

Keywords: *Data file, *Nurses, Magnetic tapes, Data storage, Medical personnel, Statistical data, Registered nurses, *Health manpower, Health resources.

Women's Community Health Care Survey: Data Tape.

Data file. The Women's Community Health Care Survey was designed as the data collection phase of an intramural project investigating the indirect costs of obtaining medical care services. The objective of the contract was to field a community probability survey of approximately 1100 women aged 13-44 in low-income, high-density census tracts of Dallas County, Texas. The scope of the data collection contract included normal procedures for surveys: pretest of the survey instrument, interviews, coding, key-punching, and editing records for a computerized file of individual respondents, with all personal identifiers removed. The sample design and selection and the survey instrument were specified by NCHSR. The survey questionnaire included questions on use of health services (primarily female health services), indirect costs of obtaining care, health status, health attitudes, and family economic and demographic characteristics for 1977. The indirect costs of obtaining care include individual subjective time costs, travel and child care costs, and other inconveniences faced in seeking care. The individual time values are measured by wage rates for labor-market respondents and by 'reservation wages' for non-market women. The survey located 1134 eligible respondents in 816 households. Eighty-five percent or 960 eligible women completed interviews. Computerized records were created for household information and for individual responses. The NCHSR analysis based on this data base is available from University

Field 9—HEALTH CARE

National Survey of Personal Health Practices and Consequences-Wave I.

Data file. The National Survey of Personal Health Practices and Consequences (NSPHPC) was conducted by the National Center for Health Statistics (NCHS) as a part of the effort to meet the data needs of the prevention initiative of the U.S. Department of Health and Human Services. The survey is a national probability sample selected using random-digit dialing techniques and was conducted in two waves of interviews among a panel of non-institutionalized civilian persons aged adult 20-64 years in the conterminous United States. Wave I was conducted in the Spring of 1979 and comprises data for 3025 respondents. Included among the wide battery of questions were those on diet and exercise; sleeping; smoking; drinking of alcoholic beverages; weight status; dental hygiene; use of seat belts; changes in preventive health behavior due to illness; perceived health status and energy level; use of preventive health services; use of medical and hospital care; behavior with respect to high blood pressure; work status; conditions of work with respect to hazards, stress, physical demands and sick leave; participation in social groups and religious services; enjoyment of free time; number and closeness of friends and relatives; general psychological well-being; recent stressful life events; and socio-demographic information, such as age, sex, marital status, educational level, race, and family income. The NSPHPC replicates, in part, a 1965 study conducted among a sample of the adult residents of Alameda County, California, by the Human Population Laboratory of the California State Department of Health. The results of the analyses of data from the NSPHPC will be published in the NCHS Report Series No. 15. **For related technical reports,** see PB82-157272/XDD, PB82-157280/XDD, PB82-157298/XDD.

National Ambulatory Medical Care Survey for Drug Mentions, 1980.

Data file. The National Ambulatory Medical Care Survey (NAMCS) provides data on ambulatory medical care rendered in physicians' offices. The NAMCS is a continuous survey based on a sample of patient visits to a national sample of office-based physicians. The survey obtains information on the volume of office visit by age, race, and sex of the patient and

by selected physician characteristics such as type of specialty and practice and geographic location. Data describing the clinical substance of the visits include the patient's problem or complaint, prior visit status, referral status, major reason for visit, ethnicity of the patient, physician's diagnosis, diagnostic and therapeutic services provided, disposition, and duration of the visit. In 1980 the NAMCS also collected information on all drugs/medications ordered, administered or provided during the visit. To facilitate analysis of these drug data, a data tape has been prepared which includes a separate record for each drug entered on each sample encounter form. This tape, called the drug mention tape, contains information on 51,372 drugs mentioned in the national sample of 46,081 patient visits. The information contained in the drug mention tape is derived from two major sources. Patient visit and physician characteristics are derived from the 1980 NAMCS. These data are supplemented by drug characteristics obtained from the Drug Product Information File developed and maintained by the American Society of Hospital Pharmacists. The data items include the medication code, generic name and code, brand name, entry status, prescription status, federal controlled substance status, composition status, and related ingredient codes. The coding and classification of the NAMCS drug data is described in 'The Collection and Processing of Drug Information National Ambulatory Medical Care Survey, United States, 1980.'

For related technical report, see PB83-154781/XDD.

Keywords: *Data file, Magnetic tapes, Diagnosis, Drugs, Physicians, Age, Sex, Therapy, Surveys, *Ambulatory health care, *Physician visits, Race, Specialists.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

National Medical Care Expenditures Survey Household Data: Person Record SAS (Statistical Analysis System) File.

Data file. The data in this file were obtained as part of the 1977 National Medical Care Expenditure Survey (NMCES) from a national sample of 40,320 persons representing the civilian, noninstitutionalized population of the United States. The tape contains a Statistical Analysis System (SAS) data file of one record per person on population characteristics, health status, access to care, and health insurance coverage, and on use, expenditures, and sources of payment for medical and related services; a SAS format library file; and a file containing the codebook. The data file also has the capacity to link sample members to specific households so that family analyses can be undertaken. The survey reference period is 1 January to 31 December 1977. The documentation for this file contains a description of NMCES; information on sample design, construction of population weights, and methods of variance estimation; information on imputation of missing data and related procedures; description of file structure and content; and technical notes. These data are also available in an Extended Binary Coded Decimal Interchange Code (EBCDIC) under the name Medical Care Expenditure Survey Household Data: Person Records EBCDIC File.

For related technical reports, see PB82-250796/XDD, PB82-250804/XDD, PB83-198085/XDD.

National Medical Care Utilization and Expenditure Survey, 1980.

Data file. NMCUES was designed to produce a database of detailed information on the country's health status, patterns of health care utilization, charges for services received and methods of payment. The survey was based on a sample selected to represent the civilian, noninstitutionalized population of the United States. Repeat interviews were conducted with the initial panel of 6,600 responding households at approximately twelve-week intervals beginning in early 1980 and ending in mid-1981. The public use files consist of six fixed-length files; Person, Medical Visit, Dental Visit, Hospital Stay, Condition, and Prescribed Medicine and Other Medical Expense. The Health Care Financing Administration and the National Center for Health Statistics cosponsored the survey. Data were collected by the Research Triangle Institute, National Opinion Research Center, and the Systemetrics, Inc. under contract to the Department of Health and Human Services. Summary data and more detailed survey descriptions may be found in the 'Public Use Data Tape Documentation' and 'Procedures and Questionnaires of the National Medical Care Utilization and Expenditure Survey.'

National Sample Survey of Registered Nurses II: Special County Tape.

Data file. This tape contains an abridged set of data from the second National Sample Survey of Registered Nurses provided especially for those who wish to develop an analysis of the distribution of nursing resources on a geographic basis. Questionnaires were mailed to about 40,000 individuals with current licenses to practice as registered nurses in the fall of 1980. The number of respondents totaled 30,642 or 80 percent of those surveyed. Responses to the survey were weighted to reflect the universe of registered nurses. The estimated number of registered nurses with current licenses to practice located in the United States in November 1980 was 1,662,382. Of these, an estimated 1,272,851 RN's were em-

ployed in nursing, 76 percent of the total RN's. The study also provides data on the demographic characteristics of the nurse population, their educational background, type of nursing employment and the functions performed, their hours of work and earnings, their activities if not employed in nursing and their geographic location.

For related technical report, see PB83-254078/XDD.

Keywords: *Nurses, *Data file, Professional personnel, Surveys, Sites, Demography, Employment, Education, Salaries, Magnetic tape, *Health manpower.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB84-151752/XDD

National Sample Survey of Registered Nurses (1977): Special County Tape.

Data file. This tape contains an abridged set of data from the 1977 National Sample Survey of Registered Nurses provided especially for those who wish to develop an analysis of the distribution of nursing resources on a geographic basis. Questionnaires were mailed to 20,417 individuals with current licenses to practice as registered nurses in the fall of 1977. The number of respondents totaled 16,382 or 82 percent of those surveyed. Responses to the survey were weighted to reflect the universe of registered nurses. The estimated number of registered nurses with current licenses to practice located in the United States in September 1977 was 1,401,633. Of these, an estimated 981,500 RN's were employed in nursing, about 70 percent of the total RN's. The study also provides data on the demographic characteristics of the nurse population, their educational background, type of nursing employment and the functions performed, their hours of work and earnings, their activities if not employed in nursing and their geographic location.

For related technical report, see PB84-151745/XDD.

Keywords: *Nurses, *Data file, Professional personnel, Surveys, Sites, Demography, Employment, Education, Salaries, Magnetic tape, *Health manpower.

Organizational Structure of Health Maintenance Organizations (HMOs).

Data file. The data tape contains five files: (1) Inventory file - organizational data on 197 HMOs operational as of July 1, 1979 and still operational at the time of the survey; (2) Interview file - responses of up to six officials from each of 48 HMOs to in depth

questions regarding HMO structure, processes, and officials' attitudes and opinions; (3) Physician file - responses of 288 physicians from 43 of the 48 HMOs to question regarding their relationships with the HMO (payment, communication, supervision, etc.) and their attitudes toward the HMO. Also some information on 94 nonrespondents to the survey; (4) Administrative staff file - responses of 206 administrative staff from 40 of the 48 HMOs measuring such items as coordination, supervision, satisfaction; (5) Service area characteristics file - characteristics of the service areas of the 48 HMOs, including items such as number of hospital beds, number of physicians, population, sex and age of population.

For related technical report, see PB84-155076/XDD.

Keywords: *Data file, Health, *Organizations, Utilization, Attitudes, Physicians, Cost analysis, Personnel, Communicating, Magnetic tape, *Health Maintenance Organizations.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB84-163930/XDD

Home Healthcare Team: Randomized Trial of a New Team Approach to Home Care.

Data file. The Home Healthcare Team approach met with great satisfaction from patients and even more from their families. It allowed patients to stay out of the hospital more often than their controls and made it possible for more patients to remain and die at home, if they preferred. It provided the necessary medical and psychosocial support to families providing informal care at home. No significant trends in change of physical, mental, or functional disability were found which favored either the team or control patients. Team patients experienced less institutionalization than the controls, with 38% fewer hospital days and 59% fewer nursing home days. Overall costs for the team treatment approach, including both in- and out-of-home treatment, were nearly 10% lower, averaging \$47.83 per day compared to \$52.33 for the controls. The variance in the out-of-home day-cost for the controls was substantially greater than for the team patients, suggesting greater control and predictability of hospital costs for the patient under the close team surveillance and care. Strong trends favored the team in out-of-home costs for both medicaid patients and those living alone.

For related technical reports, see PB84-163948/XDD, PB84-163955/XDD.

Keywords: *Data file, Physicians, Nurses, Satisfaction, Patients, Families, *Health care delivery systems, Home health care, Patient care teams, Health care utilization, Social workers.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Field 10—HEALTH STATISTICS

PB84-177286/XDD

Empirical Hospital Organization Research Codes and Abstracts File (1960-1979).

Data file. The data tape (one reel) contains four files. (1) Sixties Codes - 19 descriptive, identifying, evaluative and substantive variables numerically classifying each of the 1,044 empirical hospital organization research items produced between 1960-1969. (2) Sixties Abstracts - title, author, publication reference and 100 word summary of the 1,044 empirical hospital organizational research items produced between 1960-1969. (3) Seventies Codes - descriptive, identifying, evaluative, substantive/policy and conceptual variables numerically classifying each of the 973 empirical hospital organization research items produced between 1969-1979. A minimum of 48 variables are coded for each item. In addition, up to 25 substantive, policy and related variables; up to five dependent variables and up to 10 independent variables for dependent variables are coded for each item. (4) Seventies Abstracts - title, author, year of publication, publication reference, key words and 100-300 word summary of the 973 empirical hospital organization research items produced between 1969-1979. Each summary contains nature of the problem, population studied, type of analysis, policy implications and conclusions.

Keywords: *Data file, *Hospitals, Magnetic tapes, *Health care facilities, Health care delivery organizations.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. National Ambulatory Medical Care Survey, 1981.

Data file. The National Ambulatory Medical Care Survey (NAMCS) provides data on ambulatory medical care rendered in physicians' offices. The NAMCS is a continuous survey based on a sample of patient visits to a national sample of office-based physicians. The survey obtains information on the volume of office visits by age, race, and sex of the patient and by selected physician characteristics such as type of specialty and practice and geographic location. Data describing the clinical substance of the visits include the patient's problem or complaint, prior visit status, referral status, major reason for visit, ethnicity of the patient, physician's diagnosis, diagnostic and therapeutic services provided, disposition, and duration of the visit. The patient's problem or complaint is coded according to a revised symptom classification developed specifically for the NAMCS. The physician's diagnosis is coded according to the 'International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM).' The medication therapy, or drugs provided, are coded according to 'The Collection and Processing of Drug Information, National Ambulatory Medical Care Survey, United States, 1980.' In 1981 NAMCS sampled about 46,000 patient records from the 1,870 doctors who participated in the survey.

For related technical report, see PB84-191196/XDD.

AMRL Anthropometric Data Bank Library, Volume V. U.S. Correlations.

Data file. Correlation matrices based on data from USAF anthropometric surveys of women (1968, 127 variables), flying personnel (1950, 128 variables; 1967, 190 variables), and basic trainees (1965, 161 variables); a U.S. Army survey of women separatists (1946, 60 variables); the Health Examination Survey of civilian adults (1960-1962, 18 variables); and a survey of law enforcement officers (1974, 23 measurements) are presented for use by engineers who need them in solving design problems and for anthropologists and statisticians whose analyses and understanding of the interrelationships of body size data depend significantly on these coefficients. Sample sizes in these surveys ranged from almost 2000 upward. Sample means and standard deviations are presented for all variables involved. The contents of this tape are also described in the report, Interrelationships of Anthropometric Measurements: A Source Book for USA Data, Churchill, E., P. Kikta, and T. Churchill, AMRL-TR-77-2 (AD-A058 616), Aerospace Medical Research Laboratories, WPAFB OH, May 1978. Complete data from the four USAF surveys are described in the AMRL Anthropometric Data Bank Library, Volumes I-V, Churchill, E., P. Kikta, and T. Churchill, AMRL-TR-77-1 (AD-A047 314), Aerospace Medical Research Laboratories, WPAFB OH, October 1977, and on magnetic computer tapes available from NTIS. AD numbers for these tapes are: (1968) AD-A056 154/AS, (1967) AD-A056 155/AS, (1965) AD-A056 156/AS, and (1950) AD-A056 157/AS. (Author)

Effect of MEDICAID on Health Care of Low-Income Persons (1968-69).

Data file 1968-69. Survey questions include ones designed to ascertain sources and kinds of health care utilization patterns, attitudes and knowledge and health, health care services, and sources of care, knowledge about the use of free health care services, including Medicaid, and extent of out-of-pocket expenditures for health care services. Data have been collected from a national sample of 5,382 low income families covering 15,405 individuals living in low income enumeration districts. The survey was conducted between November 1968 and June 1969. The magnetic tape contains 12 files with standard IBM header and trailer records. There are 36 tape marks through out the tape separating these files.

Keywords: *Data file, Medical services, *Medicaid, Low income groups, Health care delivery systems, Questionnaires, Surveys, Public health, Attitudes, Magnetic tapes, *Health care utilization, *Health insurance, *Health statistics.

Geocoding: Enumeration districts.

Availability: NTIS, CP T03, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; or 9 track 800 bpi, Ebcidc, odd parity. Price includes documentation, PB-234 586.

PB-235 543-SET/XDD

Health Interview Survey Data, 1969

Data file. The sample is composed of approximately 42,000 households containing about 134,000 persons. Information is obtained on the number of restricted activity days, bed days, work or school-loss days, and all physician and dental visits occurring during the 2-week period prior to the week of the interview. Data are also obtained on the acute and chronic conditions which were responsible for these days or visits. Respondents are asked about long term limitation of activity and mobility and the chronic conditions leading to this disability. Information was obtained on muscle-skeletal-skin (this year's chronic

condition slated for particular study). All conditions are coded to the international classification of diseases using the limited diagnostic detail available from a household respondent. Data are obtained about all hospital episodes during the prior 12 months, including length of stay, reason for entering hospital and whether surgery was performed. Data are also obtained on the interval since the last doctor and dental visit. Data are arranged for five different record types (household, person, condition, doctor visit, and hospital) with basic person data on each record.

Source document: National Center for Health Statistics continuing nationwide survey of the U.S. civilian, noninstitutional population conducted by household interviews. The tape is available as 9-track, 800 bpi, odd parity, EBCDIC; only. Related document is Current Estimates from the Health Interview Survey, United States - 1969, Estimation and Sampling Variance in the Health Interview Survey.

For related technical reports, see PB-235 549/XDD, PB-235 550/XDD, PB-235 551/XDD, PB-235 552/XDD, PB-235 554/XDD.

Keywords: *Data file, *Medical services, Dental services, Magnetic tapes, *Health surveys, Musculoskeletal disorders, Skin diseases, Demographic surveys, Hospitalizing, Data storage, Data tapes, Medical records, Statistical data, Interviews.

Availability: NTIS, CP T07, 6 reels mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 BPI, odd parity, EBCDIC. Price includes documentation.

PB-237 322/3/XDD

Health Interview Survey Data - 1970.

Data file. The sample is composed of approximately 37,000 households containing about 116,000 persons. Information is obtained on the number of restricted activity days, bed days, work or school-loss days, and all physician and dental visits occurring during the 2-week period prior to the week of the interview. Data are also obtained on the acute and chronic conditions which were responsible for these days or visits. Information was obtained on respiratory conditions (this year's chronic condition slated for particular study). Data are arranged for five different record types (household, person, condition, doctor visit, and hospital) with basic person data on each record.

Source document: National Center for Health Statistics continuing nationwide survey of the U.S. civilian, noninstitutional population conducted by household interviews.

For related technical reports, see PB-237 325/6/XDD, PB-237 324/9/XDD, PB-237 323/1/XDD, PB-235550/XDD, PB-235553/XDD.

Keywords: *Data file, Health, *Health surveys, Statistical data, Data tapes, Epidemiology, *Medical services, Morbidity, Health insurance, Interviews, Magnetic tapes, Cigarette smoking, Health statistics, Health status.

New Medical Care Delivery System Data Tape, Kaiser Foundation Research Institute.

Data file. The two files of data contained on this tape are from a study, conducted at the Kaiser Permanente Health Plan in Oakland, California, to test and evaluate a new medical care delivery system that was designed to provide efficient utilization of physicians, paramedical personnel, and technology. The objectives were: (1) to improve accessibility by reducing waiting time for new patients; (2) to provide prompt entry work-ups using minimum doctor time; (3) to systematize the work-up and improve its comprehensiveness and efficiency; (4) to effectively determine patient health needs and match need with appropriate resources; (5) to provide an effective program for continuity of health care; and (6) to develop a new mode of access that is cost-effective and acceptable to patients and staff. The first file contains utilization data of sample patients in the new medical care delivery system and the traditional medical system. The second file contains information on patient satisfaction in both the new medical care delivery system and the traditional medical system.

Keywords: *Data file, *Medical services, Magnetic tapes, Data storage, Evaluation, Efficiency, Utilization, Physicians, Medical personnel, Objectives, Questionnaires, Patients, Surveys, California, Oakland(California), *Health care delivery systems, *Kaiser Foundation Health Plan, Health statistics.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 800 bpi, odd or even parity, BCD.

Hospital Discharge Survey, 1970.

Data file. The Hospital Discharge Survey (HDS) provides data on the utilization of non-Federal short-stay hospitals. The HDS is a continuous survey based on a sample of medical records of patients discharged from a national sample of these hospitals. The survey obtains information on the patients' demographic characteristics, length of stay, discharge status, final diagnoses and surgery performed. The demographic information consists of sex, date of birth, age, race and marital status. The medical information is coded using the Eighth Revision International Classification of Diseases, Adapted for Use in the United States (IDCA). In 1970 HDS sampled about 206,000 medical records from the 395 hospitals that participated in the survey. This sample represents approximately 0.7% of the estimated 29 million discharges in 1970.

For related technical report, see PB-270 764/XDD.

Keywords: *Data file, *Hospitals, *Health care utilization, *Health surveys, Data collection, Data storage, Medical records, Demography, Diagnosis, Surgery, Sex, Age, Health statistics, Magnetic tapes, Medical services, Race, *Discharge(Health care facilities), Discharge abstracts, Length of stay(Health care facilities), Health statistics, Short term hospitals.

Availability: NTIS, CP\$125.00, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes User's Guide.

PB-270 765/1/XDD

Hospital Discharge Survey, 1971.

Data file. The Hospital Discharge Survey (HDS) provides data on the utilization of non-Federal short-stay hospitals. The HDS is a continuous survey based on a sample of medical records of patients discharged from a national sample of these hospitals. The survey obtains information on the patients' demographic characteristics, length of stay, discharge status, final diagnoses and surgery performed. The demographic information consists of sex, date of birth, age, race and marital status. The medical information is coded using the Eighth Revision International Classification of Diseases, Adapted for Use in the United States (IDCA). In 1971 HDS sampled about 198,000 medical records from the 379 hospi-

tals that participated in the survey. This sample represents approximately 0.7% of the estimated 29 million discharges in 1971.

For related technical report, see PB-270 766/XDD.

Keywords: *Data file, *Hospitals, *Health care utilization, *Health surveys, Data storage, Medical records, Demography, Diagnosis, Surgery, Sex, Age, Health statistics, Magnetic tapes, Coding, Race, *Discharge(Health care facilities), Discharge abstracts, Length of stay(Health care facilities), Short term hospitals, Health statistics.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes User's Guide.

PB-270 767/7/XDD

Hospital Discharge Survey, 1972.

Data file. The Hospital Discharge Survey (HDS) provides data on the utilization of non-Federal short-stay hospitals. The HDS is a continuous survey based on a sample of medical records of patients discharged from a national sample of these hospitals. The survey obtains information on the patients' demographic characteristics, length of stay, discharge status, final diagnoses and surgery performed. The demographic information consists of sex, date of birth, age, race and marital status. The medical information is coded using the Eighth Revision International Classification of Diseases, Adapted for Use in the United States (IDCA). In 1972 HDS sampled about 225,000 medical records from the 424 hospitals that participated in the survey. This sample represents approximately 0.7% of the estimated 32 million discharges in 1972.

For related technical report, see PB-270 766/XDD.

Keywords: *Data file, *Hospitals, *Health care utilization, *Health surveys, Data storage, Medical records, Demography, Diagnosis, Surgery, Sex, Age, Health statistics, Magnetic tapes, Coding, Race, *Discharge(Health care facilities), Length of stay(Health care facilities), Discharge abstracts, Health statistics, Short term hospitals.

PB-277 054/3/XDD

National Survey of Family Growth, Cycle I, 1973, Data File

Data file. The National Survey of Family Growth (NSFG) is a cyclic survey of civilian noninstitutional women living in the coterminous United States who are less than 45 years of age and who are currently married, previously married, or single with natural children presently living in the household. Data are collected by means of personal interviews with a probable sample of these women. Fieldwork for Cycle I was conducted by the National Opinion Research Center in a period centering on September 1973, and yielded 9,797 interviews. Included on the tape are data on maternal and child health, and family planning practices and attitudes. The Sample Design, Estimation Procedures, and Variance Estimation Document is available in hard copy from GPO as stock no. 017-022-00604-9.

For related technical reports, see PB-277 055/XDD, PB-277 056/XDD.

Keywords: *Data file, Females, *Health surveys, Magnetic tapes, Data storage, Interviews, Family planning, Attitudes, United States, Growth, Health statistics, *Vital statistics, *Family Maternal and child health services.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared on 9 track 1600 bpi density, odd parity at the price shown. For price at other tracks and densities call NTIS Computer Products Office.

PB-281 126/3/XDD

Health Interview Survey, 1975

Data file. The Health Interview Survey (HIS) utilizes a questionnaire which obtains information on personal and demographic characteristics, illnesses, injuries, impairments, chronic conditions and other selected health characteristics. It is based on a continuing nationwide sample of households of the civilian noninstitutionalized population of the United States living at the time of the interview. The medical data is based on the International Classification of Diseases, Adapted (ICDA). During the 52 weeks of 1975, the sample was composed of about 40,000 households containing 116,000 persons.

For related technical reports, see PB-235 553/XDD, PB-262 954/XDD, PB-281 127/XDD, PB-281 128/XDD, PB-281 129/XDD, PB-281 130/XDD, PB-281 131/XDD, PB83-244376/XDD.

Keywords: *Data file, *Health surveys, Interviews, Magnetic tapes, Data storage, Questionnaires, Demography, Characteristics, Injuries, Morbidity, Populations, Health statistics, Statistical data, Demographic surveys, Chronic diseases, International Classification of Disease.

Availability: NTIS, CP T07, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Physical Measurements Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.

Data file. The first cycle of the Health Examination Survey was an examination survey of the adult, civilian, noninstitutionalized population of the United States, excluding Alaska and Hawaii. The adult population was defined as those persons from 18-79 years of age. A nationwide probability sample of 7,710 persons aged 18-79 years was drawn. Altogether 6,672 persons were examined during the course of the survey which was begun in October 1959 and completed in December 1962. Seventeen body measurements including height and weight are coded on this file. Much of the body measurement data collected during the Cycle I survey of adults has been analyzed and published by the National Center for Health Statistics in the Vital and Health Statistics, Series 11.

For related technical report, see PB-293 123/XDD.

Keywords: *Data file, *Medical examination, Adults, United States, Magnetic tapes, Data storage, Measurement, Humans, *Health surveys, Health statistics, Health Examination Survey, *Body measurements.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared on 9-track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Price includes documentation.

PB-293 124/4/XDD

Integrated Data Tape from the National Health Examination Survey of Children 6-11 Years, Cycle II, 1963-1965.

Data file. The Health Examination Survey, Cycle II Integrated Data Tape (IDT) contains information gathered from a nationwide probability sample of 7,417 noninstitutionalized children aged 6-11 years from 1963-1965. A total of 7,119 children were examined during the course of the survey. Information was obtained for each examined child by means of a household interview; detailed medical and developmental questionnaires: a school questionnaire; medical, dental and psychological examinations; hearing and vision tests; and anthropometric measurements. Approximately one-third of those children examined were again examined during Cycle III of the Health Examination Survey which operated from 1966-1970. Much of the data collected during the Cycle II survey of children has been published by the National Center for Health Statistics in the Vital and Health Statistics, Series 11.

For related technical report, see PB-293 125/XDD.

Keywords: *Data file, *Medical examination, United States, Magnetic tapes, Data storage, Interviews, Questionnaires, Visual acuity, *Health surveys, Health statistics, Health Examination Survey, Dental evaluation, Hearing, Psychological evaluation.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared on 9-track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Price includes documentation.

Field 10—HEALTH STATISTICS

PB-293 126/9/XDD

Symptoms of Psychological Distress Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.

Data file. The first cycle of the Health Examination Survey was an examination survey of the adult, civilian, noninstitutionalized population of the United States, excluding Alaska and Hawaii. The adult population was defined as those persons from 18-79 years of age. A nationwide probability sample of 7,710 persons aged 18-79 years was drawn. Altogether 6,672 persons were examined during the course of the survey which was begun in October 1959 and completed in December 1962. Responses to 12 items from a medical history questionnaire which were selected as indicators of psychological distress are coded on this file. The following report based on these data has been published by the National Center for Health Statistics: Selected Symptoms of Psychological Distress, United States; Vital and Health Statistics, Series 11, Number 37.

For related technical report, see PB-293 127/XDD.

Keywords: *Data file, *Stress(Psychology), *Mental disorders, Adults, United States, Magnetic tapes, Data storage, Signs and symptoms, *Health surveys, Health statistics, Health Examination Survey, *Psychological evaluation.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared on 9-track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Price includes documentation.

PB-293 128/5/XDD

Dental Findings Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.

Data file. The first cycle of the Health Examination Survey was an examination survey of the adult, civilian, noninstitutionalized population of the United States, excluding Alaska and Hawaii. The adult population was defined as those persons from 18-79 years of age. A nationwide probability sample of 7,710 persons aged 18-79 years was drawn. Altogether 6,672 persons were examined during the course of the survey which was begun in October 1959 and completed in December 1962. Findings from a dental examination are coded including the condition of individual teeth and assessments of periodontal disease, oral hygiene, and malocclusion. Much of the dental data collected during the Cycle I survey of adults has been analyzed and published by the National Center for Health Statistics in the Vital and Health Statistics, Series 11.

For related technical report, see PB-293 129/XDD.

Keywords: *Data file, *Dentistry, Adults, United States, Magnetic tapes, Data storage, Oral diseases, *Health surveys, Health statistics, Health Examination Survey, Oral hygiene, *Dental care, Malocclusion.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared on 9-track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Price includes documentation.

PB-293 130/1/XDD

Osteoarthritis and Rheumatoid Arthritis Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.

Data file. The first cycle of the Health Examination Survey was an examination survey of the adult, civilian, noninstitutionalized population of the United States, excluding Alaska and Hawaii. The adult population was defined as those persons from 18-79 years of age. A nationwide probability sample of 7,710 persons aged 18-79 years was drawn. Altogether 6,672 persons were examined during the course of the survey which was begun in October 1959 and completed in December 1962. Included on this tape are findings pertaining to osteoarthritis and rheumatoid arthritis from x-rays of the hands and feet, medical history items, and a physician's examination. Much of the osteoarthritis and rheumatoid arthritis data has been analyzed and published by the National Center for Health Statistics in the Vital and Health Statistics, Series 11.

For related technical report, see PB-293 131/XDD.

Keywords: *Data file, *Medical examination, *Osteoarthritis, *Rheumatoid arthritis, Adults, United States, Magnetic tapes, Data storage, Musculoskeletal disorders, *Health surveys, Health statistics, Health Examination Survey.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared on 9-track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Price includes documentation.

PB-293 132/7/XDD

Diabetes Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.

Data file. The first cycle of the Health Examination Survey was an examination survey of the adult, civilian, noninstitutionalized population of the United States, excluding Alaska and Hawaii. The adult population was defined as those persons from 18-79 years of age. A nationwide probability sample of 7,710 persons aged 18-79 years was drawn. Altogether 6,672 persons were examined during the course of the survey which was begun in October 1959 and completed in December 1962. Included in this file are responses to medical history questions which relate to diabetes, pertinent findings from a physical examination, results of a Glucose Tolerance Test (GTT), and serum cholesterol values. Much of the diabetes findings from the Cycle I survey of adults has been analyzed and published by the National Center for Health Statistics in the Vital and Health Statistics Series 11, Number 2.

For related technical report, see PB-293 133/XDD.

Keywords: *Data file, *Medical examination, *Diabetes mellitus, Adults, United States, Magnetic tapes, Data storage, Metabolic diseases, Endocrine diseases, Cholesterol, *Health surveys, Health statistics, Health Examination Survey, Glucose tolerance test.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared on 9-track, 1600 bpi density, odd parity, at the price shown. For price at other

tracks and densities, call NTIS Computer Products Office. Price includes documentation.

PB-293 134/3/XDD

Demographic Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.

Data file. The first cycle of the Health Examination Survey was an examination survey of the adult, civilian, noninstitutionalized population of the United States, excluding Alaska and Hawaii. The adult population was defined as those persons from 18-79 years of age. A nationwide probability sample of 7,710 persons aged 18-79 years was drawn. Altogether 6,672 persons were examined during the course of the survey which was begun in October 1959 and completed in December 1962. This data tape contains demographic, household and personal information for each sample person including age, race, sex, income, education, region, size of residence, usual activity and sampling weight. This information has been used in the analyses and publication of the health data collected during the Cycle I survey of adults.

For related technical report, see PB-293 135/XDD.

Keywords: *Data file, *Demography, Adults, United States, Magnetic tapes, Data storage, Age, Sex, Income, Education, Activity, *Health surveys, Health statistics, Health Examination Survey, Race.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared on 9-track, 1600 bpi density, odd parity, at the price shown. For price at other tracks and densities, call NTIS Computer Products Office. Price includes documentation.

PB-293 136/8/XDD

Vision Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.

Data file. The first cycle of the Health Examination Survey was an examination survey of the adult, civilian, noninstitutionalized population of the United States, excluding Alaska and Hawaii. The adult population was defined as those persons from 18-79 years of age. A nationwide probability sample of 7,710 persons aged 18-79 years was drawn. Altogether 6,672 persons were examined during the course of the survey which was begun in October 1959 and completed in December 1962. Included in this file are findings from a vision examination which measured corrected and uncorrected visual acuity for near and far vision. Much of the vision data collected during the Cycle I survey of adults has been analyzed and published by the National Center for Health Statistics in the Vital and Health Statistics, Series 11.

For related technical report, see PB-293 137/XDD.

Keywords: *Data file, *Visual acuity, *Medical examination, Adults, United States, Magnetic tapes, Data storage, *Health surveys, Health statistics, Health Examination Survey.

PB-296 025/0/XDD

Extended Data Tape from the National Health Examination Survey of Youths 12-17 Years, Cycle III. 1966-1970.

Data file. The Health Examination Survey, Cycle III Extended Data Tape (EDT) contains information gathered from a nationwide probability sample of 7,514 noninstitutionalized youths aged 12-17 years from 1966-1970. Information was obtained for each of 6,768 examined youths by means of a household interview; medical and developmental questionnaires; a school questionnaire; medical, dental, and psychological examinations; vision and hearing tests; anthropometric measurements; and certain x-rays and laboratory tests. Provision has been made to enable the tape user to identify those sample youths examined both in Cycle III and in the earlier Cycle II and to create from the Cycle II Integrated Data Tape (IDT) and the Cycle III EDT, a composite data set for longitudinal studies. Much of the data collected during the Cycle III survey of youths has been analyzed and published by the National Center for

National Survey of Family Growth, Cycle II (Interval File), 1976.

Data file. The National Survey of Family Growth (NSFG) was designed to provide data on fertility, family planning, and related aspects of maternal and child health. Fieldwork for Cycle II was carried out by Westat, Inc., between January and September of 1976. A multistage probability sample of the conterminous United States was used in Cycle II. Approx-

mately 33,000 households were screened to identify the sample of women who would be eligible for the NSFG, i.e., women aged 15-44 years, inclusive, who were either currently married, previously married or never married but had offspring presently living in the household. For Cycle II, interviews were completed with 8,611 women.

For related technical report, see PB80-168214/XDD.

National Health Interview Survey, 1977.

Data file. The National Health Interview Survey (NHIS) utilizes a questionnaire which obtains information on personal and demographic characteristics, illness, injuries, impairments, chronic conditions, and other selected health characteristics. It is based on a continuing nationwide sample of households of the civilian noninstitutionalized population of the United States living at the time of the interview. The medical data are based on the International Classification of Diseases, Adapted (ICDA). In 1977, data were collected during the entire 52 weeks. The sample consisted of approximately 40,000 households containing about 111,000 persons.

Data file. The National Survey of Family Growth (NSFG) was designed to provide data on fertility, family planning, and related aspects of maternal and child health. Fieldwork for Cycle II was carried out between January and September of 1976. A multistage probability sample of the conterminous United States was used in Cycle II. Approximately 33,000 households were screened to identify the sample of women who would be eligible for the NSFG, i.e., women aged 15-44 years, inclusive, who were either currently married, previously married or never married but had offspring presently living in the household. For Cycle II, interviews were completed with 8,611 women.

National Health Interview Survey, 1978.

Data file. The National Health Interview Survey (NHIS) utilizes a questionnaire which obtains information on personal and demographic characteristics, illness, injuries, impairments, chronic conditions, and other selected health characteristics. It is based on a continuing nationwide sample of households of the civilian noninstitutionalized population of the United States living at the time of the interview. The medical data are based on the International Classification of Diseases, Adapted (ICDA). In 1978, data were collected during the entire 52 weeks. The sample consisted of approximately 41,000 households containing about 110,000 persons.

PB81-186827/XDD

Vital Statistics Mortality Multiple Cause Data, Detail, 1976.

Data file. Vital Statistics data relating to mortality provide demographic, underlying and multiple cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex and geographic area. Underlying cause-of-death data and multiple cause-of-death data have been coded to the causes shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics. Multiple cause-of-death data at the 'each cause' level of detail is included as Appendix I of the multiple cause-of-death documentation.

For related technical report, see PB81-186835/XDD.

Dental Consumer SPSS Data File 'DENPOP' (1974).

Data file. In 1974, the Division of Dentistry of the Health Resources Administration, U.S. Department of Health, Education, and Welfare, sponsored a national survey of households in the United States as a part of a continuing Division program in the general areas of dental health services research. This survey was conducted in the months of September and October 1974. The interview instrument and resultant data included information on (1) personal and demographic characteristics, (2) dental behavior, (3) perception of need, (4) knowledge, habits and attitudes toward dental treatment, (5) financing and expendi-

tures for dental treatment, and (6) utilization of dental treatment. The population covered by the sample was the civilian, noninstitutionalized population of the continental United States. The reference period varied somewhat by question but was generally the previous 12 month period. A publication entitled 'A Decade of Dental Service Utilization: 1964-1974' (DHHS Publication No. (HRA) 80-56) was prepared, in part, through the use of these data.

For related technical report, see PB81-190464/XDD.

NHANES II (National Health and Nutrition Examination Survey, Second). Model Gram and Nutrient Composition Data Tape. Catalog Number 5702 and 5703.

Data file. The Second National Health and Nutrition Examination Survey (NHANES II), conducted during the period 1976-80, was designed to measure and monitor the nutritional status and health of the U.S. population ages 6 months through 74 years. A similar survey, NHANES I, was conducted from 1971-1975. During NHANES II, data were collected by means of a household questionnaire, medical histories, dietary questionnaires, a physical examination, spirometry trials, electrocardiograms, body measurements, puretone audiometry, speech and allergy tests, x-rays, a medication/vitamin usage questionnaire, a behavior questionnaire and laboratory analyses of blood and urine samples. There were a total of 27,801 sample persons of which 25,286 were interviewed and 20,322 were examined. The Model Gram tape consists of 2,605 food items with food

groups; food codes; alphanumeric descriptions; preferred food model codes and gram conversion factors. The Nutrient Composition tape contains the actual nutrient analysis in 100 gram edible portions of all foods listed in the Model Gram tape. These tapes are essentially an interpretive tool for use as input to a computer analysis of NHANES II 24-Hour Recall dietary data, or data from a survey employing similar methodology.

For related technical reports, see PB82-142621/XDD, PB83-207654/XDD.

Hospital Discharge Survey, 1976.

Data file. The Hospital Discharge Survey (HDS) provides data on the utilization of nonfederal short-stay hospitals. The HDS is a continuous survey based on a sample of medical records of patients discharged from a national sample of these hospitals. The survey obtains information on the patients' demographic characteristics (sex, date of birth, age, race, and marital status), dates of admission and discharge, discharge status, diagnoses, and surgery performed. The medical information is coded using the Eighth Revision International Classification of Diseases, Adapted for Use in the United States (ICDA). In 1976 HDS sampled about 223,000 medical records from the 419 hospitals that participated in the survey. This sample represents approximately 0.7 percent of the estimated 34 million discharges in 1976.

For related technical report, see PB82-179219/XDD.

Vital Statistics Natality Data, Detail, 1980.

Data file. Vital statistics data relating to natality provide demographic and health data for births occurring during the calendar year. The data are based on information abstracted from birth certificates filed in vital statistics offices of each State and the District of Columbia. Prior to 1972, data are based on a 50-percent sample of birth certificates from all States. Beginning in 1972, data are based on 100 percent of the birth certificates from some of the States and on a 50-percent sample from the remaining States. The number of States from which 100 percent of the record are used has increased from 6 in 1972 to 44 in 1980. These States are identified by data year in Appendix A of the tape documentation package. Demographic data include variables such as date of birth, age and educational attainment of parents, marital status, live-birth order, race, sex, and geographic area. Health data include such items as birth

National Health Interview Survey, 1981.

Data file. The National Health Interview Survey (NHIS) utilizes a questionnaire which obtains information on personal and demographic characteristics, illness, injuries, impairments chronic conditions, and other selected health characteristics. It is based on a continuing nationwide sample of households of the civilian noninstitutionalized population of the United States living at the time of the interview. The medical data are based on the International Classification of Diseases, Adapted (ICDA).

For related technical reports, see PB-262 954/XDD, PB84-111616/XDD, PB84-111624/XDD, PB84-111632/XDD, PB84-111640/XDD.

Keywords: *Data file, Magnetic tapes, United States, Health, Diseases, Interviews, Questionnaires, *Health surveys, Health statistics.

Availability: NTIS, Mag Tape \$425.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

National Natality Survey and National Fetal Mortality Survey, 1980.

Data file. The 1980 National Natality Survey and 1980 National Fetal Mortality Survey are based on samples of 9,941 live birth vital records and 6,386 fetal death vital records of 28 weeks gestation or more. The records can be weighted to reflect U.S. estimates of 3,612,258 live births and 19,202 fetal deaths of 28 weeks gestation or more. The data derived expand our knowledge of the relationships of social, demographic, maternal health, infant health, and radiation characteristics to live births and late fetal deaths. Seven Public Health Service Agencies collaborated with the National Center for Health Statistics in designing, funding, and analyzing data from these surveys.

For related technical reports, see PB84-188929/XDD, PB84-178748/XDD.

Mortality Surveillance Program Data (Mortality and Population) for Years 1968-1978.

Data file. The Mortality Surveillance Project was initiated to develop a national mortality and population data base from which differential mortality trends can easily and efficiently be examined. The mortality data base is derived from the 21 million U.S. micro-data death records from the National Center for Health Statistics for the period 1968-1978. The population data base is derived from annual estimates for each county that was prepared by the U.S. Bureau of the Census.

For related technical report, see PB84-191170/XDD.

Keywords: *Data file, *Mortality, Populations, Information systems, Counties, Census, Magnetic tape, Trends, Data bases.

Availability: NTIS, Mag Tape \$185.00, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. U.S. Cancer Mortality Rates and Trends 1950-1979.

Data file. The report contains cancer mortality rates and changes in rates for counties of the United States for 1950-1959, 1960-1969, and 1970-1979. This report includes the number of deaths and cancer mortality rates age-adjusted to the 1970 U.S. population for each of 35 site-specific cancers for four race-sex groups. Further, counties are ranked nationally by percentile for 1970-1979 age-adjusted death rates and for percent change from 1950-1959 to 1970-1979.

Keywords: *Data file, *Mortality, *Malignant neoplasms, Trends, Magnetic tapes, United States, Counties, Statistical data, Census.

Availability: NTIS, CP T02, mag tape*. Source tape is in the ASCII character set. This restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

Vital Statistics Mortality Data, Local Area Summary, 1981.

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for

SOCIAL SCIENCES

Field 10—HEALTH STATISTICS

deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Ninth Revision of the International Classification of Diseases. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes.

For related technical reports, see PB84-212984/XDD, PB84-117046/XDD.

PSIDATA-CHAR/Private Sector Initiatives Market Area Resource File, 1972-1980.

Data file. The data file 'PSI DATA-CHAR' was prepared for the Private Sector Initiatives (PSI) project under a contract with the Assistant Secretary for Planning and Evaluation (ASPE) of the U.S. Department of Health and Human Services (DHHS). The character file has 184 variables for 306 Standard Metropolitan Statistical Areas (SMSAs) covering the time period 1972 through 1980. The variables are of three basic types: demographic variables, health utilization and resource variables, and PSI (i.e., prepaid health plans, health care coalitions, and private utilization review) variables. Data sources included the Area Resource File (edited in several places), the American Hospital Association, the Office of Civil Rights, and specially collected variables.

Keywords: *Data file, *Demography, *Health insurance, Magnetic tapes, *Standard metropolitan statistical areas, *Health resources.

Juvenile Detention and Correctional Facility, Census File - 1971.

Data file. Census was taken of the 722 public juvenile detention and correctional facilities in the U.S. in fiscal 1971, covering detention centers, shelters, diagnostic or reception centers, training schools, ranches, forestry camps and farms, and group homes and halfway houses. Data were collected on the number, age and sex of children held, number of adjudicated delinquents held by offense, movement into and out of facilities, age, length of stay, age of physical plants, programs and services available to children, number and type of employees and expenditures for fiscal year 1971.

Source documents: The 722 facilities in the census were contacted via mail questionnaire and were subject to telephone follow-up. Future plans include conducting the census annually.

Publications: Children in Custody - The Report of Juvenile Detention and Correctional Facility Census - 1971.

Keywords: *Data file, Population(Statistics), Criminology, *Correctional institutions, Juvenile detention, *Prisons.

Geocoding: United States.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; 9 track, 800bpi, Ebcidic, odd parity.

AFDC Studies (Aid to Families with Dependent Children), 1969.

Data file. Data for AFDC studies have been collected on a one percent random sample basis, and include demographic and financial data on the members of the assistance unit in the Aid to Families with Dependent Children program. The study month for 1969 was May. To collect the data a systematic random sample of assistance units was drawn by each state agency from a payroll or similar listing for the study month. Data for each of the items of the study report were then provided from case records by caseworkers in the local welfare agencies. The report gives information on the family and the household; the children; the AFDC father; the AFDC mother; social services; and financial data.

Keywords: *Data file, *Social welfare, Federal aid, Children, Financial assistance, Demographic surveys, Household characteristics, Family characteristics, Socioeconomic status, Age groups, Employment, Family income, Sample surveys, Magnetic tapes, *Federal assistance programs, *Economic assistance, *Social welfare, Mother status, Child care, SRS, *Aid to families with dependent children.

Geocoding: Father status.

PB-231 230/4/XDD

Adult Category Surveys: APTD (Aid to the Permanently and Totally Disabled).

Data file. The financial assistance surveys are collected on a variable-size random sample based on the sizes of the respective recipient state popula-

tions. Systematic sampling with a random start is prescribed along with a minimum sample size per State of 500 cases or two percent for APID. Data for all surveys are completed from case records in the local welfare agencies by the case workers. Included in the data coverage are general demographic characteristics of recipients, such as age, sex, marital status, employment history and education. Living arrangements, household and related children, dependents; assistance status, types and lengths of time; social services received; health and mobility related information.

Keywords: *Data file, Financial assistance, Demographic surveys, *Social welfare, Social statistics, Services, Adults, Family relations, Blindness, Physical fitness, Senior citizens, Sampling, Magnetic tapes, *Federal assistance programs, *Economic assistance, *Handicapped persons, *Disabled persons, Totally disabled persons, Permanently disabled persons, SRS.

PB-231 239/5/XDD

Adult Category Surveys: AB Aid to the Blind.

Data file. The financial assistance surveys are collected on a variable-size random sample based on the sizes of the respective recipient state populations. The sample universe for each state is the state's payroll or a similar listing of recipients in the Adult Category programs. Systematic sampling with a random start is prescribed along with a minimum sample size per State, a straight minimum sample of ten percent for AB. Data for the survey is completed from case records in the local welfare agencies by the case-workers. Included in the data coverage are: General demographic characteristics of recipients, such as age, sex, marital status, employment history and education; living arrangements, household; and related children financially dependent; assistance status, types and lengths of time; social services received; health and mobility related information; and AB Program information, such as diagnoses onset, origin, referral, and receipt of services from vocational rehabilitation agencies.

Keywords: *Data file, Magnetic tapes, Blindness, *Social welfare, Adults, Age, Sex, Children, Financing, Demography, Family relations, Statistical data, *Economic assistance, *Federal assistance programs, *Handicapped persons, *Disabled persons, Vocational rehabilitation, Aid to the Blind, SRS, *Blind persons.

PB-241 034/8/XDD

AFDC Study (Aid to Families with Dependent Children), 1967.

Data file. File includes demographic and financial data on the members of the assistance unit in Aid to Families with Dependent Children program. The study month was November or December 1967. To collect the data, a systematic random sample of assistance units was drawn by each State agency from a payroll or similar listing for the study month. The data were derived from a sample which included all states and jurisdictions except Guam. The minimum Statewide sampling ratio required was 3 percent or 500 cases, whichever was larger, with an additional requirement of at least 500 cases for counties containing cities with populations of one million or more and at least 200 cases for counties containing cities of 500,000 to 999,999. About 66,000 records are included in the sample. Data for each of the items of the study report were provided from case records by caseworkers in the local welfare agencies. The

report form, FS-2019.1, Case Schedule, requested information in six general areas: (1) Family and household; (2) children; (3) AFDC father; (4) AFDC mother; (5) social services; and (6) financial data. Data availability and use may in no way violate individual confidentiality. All release of data in these files must be in accordance with the confidentiality requirements as set forth in the enabling legislation. **Publications:** NCSS Report AFDC-3(67), Findings of the 1967 AFDC Study: Data by State and Census Division, Part I, Demographic and Program Characteristics; NCSS Report AFDC-4(67), Findings of the 1967 AFDC Study: Data by State and Census Division, Part II, Financial Circumstances; NCSS Report AFDC-Special (67-69); National Cross-tabulations from the 1967 and 1969 AFDC studies.

PB-264 541/4/XDD

AFDC Study (Aid to Families with Dependent Children), 1975.

Data file. File includes demographic and financial data on the members of the assistance unit in Aid to Families with Dependent Children program. The study month was May 1975. To collect the data, a systematic random sample of assistance units was drawn by each State agency from a payroll or similar listing for the study month. The data were derived from a sample survey which included all states and jurisdictions except Guam. The minimum statewide sampling ratio required was 1/2 of 1 percent and States were allowed to supplement the sample to obtain statistically reliable results. About 31,000 records are included in the sample. Data for each of the items of the study report were provided from case records by caseworkers in the local welfare agencies. The report forms SRS-NCSS-126E and S Case Record Schedule, requested information in six general areas: (1) family and household; (2) children; (3) AFDC father; (4) AFDC mother; (5) social services; and (6) financial data. Data availability and use may in no way violate individual confidentiality. All release of data in these files must be in accordance with the confidentiality requirements as set forth in the enabling legislation.

For related technical report, see PB-264 542/XDD.

Triage: Coordinated Delivery of Services to the Elderly.

Data file. The Triage Demonstration Project is a model project designed to overcome organizational and financial barriers inhibiting the provision of appropriate care to the elderly. Teams made up of a nurse clinician and a social worker performed assessment, service coordination, and monitoring functions. Services arranged by the teams were financed through a series of waivers on the use of Medicare funds. Between March 1974 when the first client was enrolled, and April 1978 when the program was closed to new clients, the project enrolled 2128 clients. The demonstration setting was the state of Connecticut Central Connecticut Planning Region. The complete data base is produced on three reels: two of which contain patient assessment and reassessment data; the third reel contains services utilization and cost data. The assessment/reassessment data includes a wide range of social, psychological, economic, health, medical and functional status about the 2128 clients participating in the demonstration. Reel ID No. 7275 contains four files, two of which are initial assessment data and two are SPSS programs used to generate descriptive statistics on the initial assessment data. Reel ID No. 8978 contains six files, five of which are periodic reassessment data and one is the SPSS program used to generate descriptive statistics and the reassessment data. Initial assessments were made on the total study population (N=2128) and a reassessment at the close of the project was made on those remaining after attrition (N=1404). Periodic reassessment six months apart for at least two years were made on a subset called Experimental group (N=307) of the total Triage population that entered the program during a specific time period (August 1976 - January 1977) and a non-equivalent Comparison group (N=195) chosen during the same time period from a different area of the state with demographic characteristics similar to the Triage demonstration area. Reel ID No. 8953 contains seven files of cost data derived from several sources: (1) payments made by the fiscal intermediary that reimbursed for services provided to Triage clients; (2) payments made for services not prescribed by the Triage teams and which were paid through third party on behalf of Medicare or Medicaid; (3) diaries of expenditures for services which clients maintained, generally self paid

for non-covered services and supplies. The files are organized to facilitate either longitudinal or comparative analyses.

National Reporting System for Family Planning Services, 1960.

Data file. The National Reporting System for Family Planning Services began in 1972 to collect data on visits to family planning service sites in the United States and some of its territories. From 1972 through June 1977, NRSFPS was conducted as a complete enumeration, collecting information for every family planning visit at every participating site. From July 1, 1977 through 1980, however, the system was conducted as a sample survey. The scope of the NRSFPS includes medical family planning visits occurring in nonmilitary clinics and in other sites that provide family planning services. Excluded from the scope of the survey are all family planning visits to private physicians' offices and visits made only for the detection of pregnancy or venereal disease or only for obtaining contraceptive supplies or counseling.

Freeway Surveillance Data - Data Tapes. January 1974 - February 1976.

Data file. The development and testing of incident detection algorithms was based on freeway surveillance data obtained in Los Angeles and Minneapolis. The Los Angeles data were in the form of samples of the sensor presence pulses fifteen times per second. These data were aggregated in the form of twenty-second averages, by lane, of occupancy and volume. The Minneapolis data were already aggregated in the form of thirty-second averages of occupancy and volume, usually averaged over all lanes at a sensor station. The organization and contents of these tapes are described in the Report FHWA-RD-76-74. These data tapes were used in the development of incident detection algorithms described in FHWA Reports FHWA-RD-76-19, FHWA-RD-76-20, FHWA-RD-76-21 and FHWA-RD-76-22 titled 'Development and Testing of Incident Detection Algorithms' Volumes 1 - 4. The three reels contain con-

densed data sets, each set consisting of three files. Reel 1, the Los Angeles data tape, contains three data sets with Incident Data. Reel 2 is a continuation of the Los Angeles data tape with one data set of Incident Data, one with Incident-Free Data and one set with Multifunction Data. Reel 3, the Minneapolis data tape, contains one data set of Incident Data and one set of Non-Incident Data.

For related technical reports, see PB-263 644/XDD, PB-263 645/XDD, PB-263 646/XDD.

San Diego Bus Transit Study (1972-75).

Data file. The San Diego bus transit study data base comprises 16 files of data describing (on a monthly basis) the operations of the San Diego Transit Corporation bus system from January 1972 through April 1975. Many of the data items are available for individual bus routes. The major categories of data include: (1) Revenues and patronage, by type of fare and by type of ticket, for all routes and for the system as a whole; (2) supply data (vehicle miles, vehicle hours, and one-way trips operated) for all routes and for the system as a whole; (3) details of service quality, derived from the published schedules, for 32 routes; (4) systemwide operating costs, in total and disaggregated into 16 categories; (5) route descriptive data (length, bus stops, etc.) for 32 routes; and (6) other variables relevant to inter-route and inter-month variations in demand.

For related technical report, see PB-272 754/XDD.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII/ Binary character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB-294 873/5/XDD

Los Angeles Freeway Data Tapes.

Data file. Freeway incident and non-incident data have been collected from the San Diego, Santa Monica, and Harbor Freeways in Los Angeles, California and stored on magnetic computer tapes. The data was collected from vehicle presence sensors imbedded in the freeways which are polled by a computer 15 times per second. So that the data may be used in a variety of different applications, the time actuations of the individual wheels crossing the sensors are recorded on the tapes. Specific information

on how the data is stored on nine magnetic tapes, identifying 33 specific data sets and a Fortran Analysis Program may be found in FHWA Report FHWA-RD-78-130.

For related technical report, see PB-294 874/XDD.

14. VITAL STATISTICS

PB-235 643/4/XDD

Vital Statistics Natality Data, State Summary - 1968.

Data file. Data are obtained from a 50% sample of the birth certificates filed in 1968. The demographic

information includes classification by place of occurrence and of residence, geographic area, age of mother, live-birth weight, and period of gestation. Classification by place of occurrence includes births occurring in the specified registration area. In residence classification all births are allocated to the usual place of residence of the mother as reported on the birth certificate. In geographic classification all areas are arranged alphabetically by state, county, and city. Birth certificate numbers are not on the tapes. Data on the state summary file have been weighted and represent a total count of births and estimates of the variables on the tape.

Source documents: Birth certificates.

Keywords: *Data file, Birth, Demographic surveys, Age, Birth-place, Occurrence place, State summaries, Gestation period, *Natality, *Birth rate, *Vital statistics.

Availability: NTIS, Mag Tape \$125.00, mag tape. 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 and 1600bpi, Ebcidc, odd parity.

PB-235 644/2/XDD

Vital Statistics Natality Data, State Summary, 1969.

Data file. Data are obtained from a 50-percent sample of birth certificates filed for births occurring in 1969. The demographic information includes classification by place of occurrence and of residence, geographic area, race of child, sex of child, live-birth order, age of mother, birth weight, total birth order and month of birth. Classification by place of occurrence includes births occurring in the specified registration area. In residence classification all births are allocated to the usual place of residence of the mother as reported on the birth certificate. In geographic classification all areas are arranged alphabetically by state, county, and city. Birth certificate numbers are not on the tapes. Data on the state summary file have been weighted and represent a total count of births and estimates of the variables on the tape.

Source Documents: Birth Certificates.

Keywords: *Data file, *Vital statistics, Birth, United States, Magnetic tapes, *Birth rate, *Natality.

Availability: NTIS, Mag Tape \$125.00, 1 reel mag tape. Available only in 9 track, 1600bpi, Ebcidc, odd parity. Documentation available.

PB-235 645/9/XDD

Vital Statistics Marriage Data, Detail, 1968.

Data file. The file contains marriage data from 39 states, the District of Columbia, and three independent areas. Demographic information includes geographic (state only) classification, age, race, sex, and previous marital status for each partner in the marriage. Certificate numbers are not on the tapes. Records of each state were samples at one of the five sampling rates used in processing the data. There is one tape record for each marriage included in the sample. The tape record includes a weight based on the sampling fraction of the reporting state.

PB-237 326/4/XDD

Vital Statistics Natality Survey Data, 1964-66.

Data file. The file contains data which are obtained from a probability sample of one in 1000 live births selected independently for each year from the file of United States births. The estimates are for legitimate live births collected principally by a mail survey from questionnaires sent to the mothers. Topics in the survey include pregnancy histories, birth expectation, spacing, family composition, employment status, health insurance coverage, and selected socioeconomic variables. Data are also included on variables contained on the birth certificates.

For related technical reports, see PB-237 329/8/XDD, PB-237 328/0/XDD, PB-237 327/2/XDD.

Keywords: *Data file, *Vital statistics, Birth, Magnetic tapes, Data tapes, Health, Surveys, *Natality, *Birth rate.

Availability: NTIS, Mag Tape \$125.00, 1 reel mag tape. Available only in 9 track, 1600bpi, odd parity, Ebcidic. Price includes User's Guide.

PB-238 560/7/XDD

Vital Statistics Infant Mortality Data, 1964-66.

Data file. Data are obtained from selecting 1 out of 11 deaths under one year of age from the 10-percent systematic sample (CMS) selected monthly from the 54 registration areas in the United States. The data are collected principally through a mail survey in which the mother acts as the respondent. Topics in the survey include pregnancy histories, family composition, health insurance coverage, spacing, birth weight (1964 and 1965), and selected socioeconomic variables. Denominators for the survey items are available from the Natality Survey Data Tape, 1964-66. Data are also included on variables contained on the birth certificate.

For related technical report, see PB-238 561/5/XDD.

Availability: NTIS, CP T02, mag tape. 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 and 1600bpi, Ebcidc, odd parity.

PB-299 676/7/XDD

Vital Statistics Mortality Data, Detail, 1969.

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each

Field 14--VITAL STATISTICS

State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical reports, see PB-299 677/XDD, PB-299 678/XDD.

Keywords: *Data file, *Vital statistics, *Mortality, Demography, Death, Age, Sex, Geography, Magnetic tapes, Data storage, Statistical data, *Health statistics, Race.

Availability: NTIS, Mag Tape \$605.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price. Price includes documentation.

PB-299 679/1/XDD

Vital Statistics Mortality Data, Detail, 1970.

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical reports, see PB-299 681/7/XDD, PB-299 680/9/XDD.

Keywords: *Data file, *Vital statistics, *Mortality, Magnetic tapes, Data storage, Demography, Death, Age, Sex, Geography, Statistical data, *Health statistics, Race.

Availability: NTIS, Mag Tape \$605.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price. Price includes documentation.

PB-300 423/1/XDD

Health Interview Survey, 1976.

Data file. The Health Interview Survey (HIS) utilizes a questionnaire which obtains information on personal and demographic characteristics, illness, injuries, impairments, chronic conditions and other selected health characteristics. It is based on a continuing nationwide sample of households of the civilian non-institutionalized population of the United States living at the time of the interview. The medical data is based on the International Classification of Diseases, Adapted (ICDA). During the 52 weeks of 1976, the sample was composed of about 40,000 households containing 113,000 persons.

For related technical reports, see PB-281 131/XDD, PB-300 424/9/XDD, PB-300 425/6/XDD, PB-281 130/5/XDD, PB-262 954/1/XDD, PB-83-244376/XDD.

Vital Statistics Natality Data, State Summary, 1970.

Data file. Vital statistics data relating to natality provide demographic and health data for births occurring during the calendar year. The data are based on information abstracted from birth certificates filed in vital statistics offices of each State and the District of Columbia. Prior to 1972, data are based on a 50-percent sample of birth certificates from all States. Beginning in 1972, data are based on 100 percent of the birth certificates from some of the States and on a 50-percent sample from the remaining States. The number of States from which 100 percent of the records are used has increased from 6 in 1972 to 33 in 1977 and these States are identified by data year in Appendix A of the tape documentation package. Demographic data include variables such as date of birth, age and educational attainment of parents, legitimacy status, live-birth order, race, sex, and geographic area. Health data include such items as birth weight, gestation and prenatal care. The number of births and birth rates for selected demographic variables are published annually in Vital Statistics of the

United States, Volume I, 'Nativity.' A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical report, see PB-300 427/2/XDD.

Vital Statistics Mortality Data, Detail, 1977.

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspects and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical reports, see PB-300 799/4/XDD, PB-299 680/9/XDD.

Vital Statistics Natality Data, Detail, 1977.

Data file. Vital statistics data relating to natality provide demographic and health data for births occurring during the calendar year. The data are based on information abstracted from birth certificates filled in vital statistics offices of each State and the District of Columbia. Prior to 1972, data are based on a 50-percent sample of birth certificates from all States. Beginning in 1972, data are based on 100 percent of the birth certificates from some of the States and on a 50-percent sample from the remaining States. The number of States from which 100 percent of the records are used has increased from 6 in 1972 to 33 in 1977 and these States are identified by data year in Appendix A of the tape documentation package. Demographic data include variable such as date of birth, age and educational attainment of parents, legitimacy status, live-birth order, race, sex, and geographic area. Health data include such items as birth weight, gestation and prenatal care. The number of births and birth rates for selected demographic variables are published annually in *Vital Statistics of the United States, Volume I, 'Natality.'* A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes. Specialized reports are published periodically in *Vital and Health Statistics*.

For related technical reports, see PB-301 361/2/XDD, PB-299 680/9/XDD.

PB80-108749/XDD**Vital Statistics Mortality Data, Local Area Summary, 1970.**

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical reports, see PB80-108756/XDD, PB-299 680/XDD.

Keywords: *Data file, *Vital statistics, Demography, Statistical data, Age, Education, Sex, Geography, Weight, Gestation, Magnetic tapes, Data storage, Birth certificates, Health statistics, Race, Prenatal care, *Mortality.

PB80-117138/XDD**National Mortality Followback Survey, 1966-68.**

Data file. The report is based on information obtained from death certificates and from questionnaires mailed to death record informants, during the three-year survey period from 1966 through 1968. In the survey, all persons 35 to 84 years of age who had died during the three-year survey period were included in the universe of decedents from which the sample was drawn. The survey conducted by the Division of Vital Statistics, National Center for Health Statistics, was designed primarily to provide information on the smoking habits of decedents. In addition, certain socioeconomic and demographic data which were thought to be relevant to the study were collected.

For related technical report, see PB80-117146/XDD.

Keywords: *Data file, *Mortality, *Vital statistics, Data storage, Magnetic tapes, United States, Statistical data, Surveys, Demography, Socioeconomic status, Smoking, Health statistics, Death certificates, Cigarette smoking.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB80-117153/XDD**Vital Statistics Natality Data, Detail, 1976.**

Data file. Vital statistics data relating to natality provide demographic and health data for births occurring during the calendar year. The data are based on information abstracted from birth certificates filed in vital statistics offices of each State and the District of Columbia. Prior to 1972, data are based on a 50-percent sample of birth certificates from all States. Beginning in 1972, data are based on 100 percent of the birth certificates from some of the States and on a 50-percent sample from the remaining States. The number of States from which 100 percent of the records are used has increased from 6 in 1972 to 33 in 1977 and these States are identified by data year in Appendix A of the tape documentation package. Demographic data include variables such as date of birth, age and educational attainment of parents, legitimacy status, live-birth order, race, sex, and geographic area. Health data include such items as birth weight, gestation and prenatal care. The number of births and birth rates for selected demographic variables are published annually in Vital Statistics of the United States, Volume I, 'Natality.' A technical appendix giving information regarding the historical aspect and limitations of the data is included in the publishing volumes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical reports, see PB80-117161/XDD, PB-299680/XDD.

Keywords: *Data file, *Vital statistics, Data storage, Magnetic tapes, Demography, *Natality, *Birth rate, Birth certificates, *Health statistics.

Availability: NTIS, Mag Tape \$965.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Vital Statistics Mortality Data, Cause of Death Summary, 1968.

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

Vital Statistics Mortality Data, Cause-of-Death Summary, 1975.

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical report, see PB80-134141/XDD.

PB80-185804/XDD

Vital Statistics Marriage, Detail, 1977.

Data file. Vital statistics relating to marriage provide demographic data for marriages occurring during the calendar year. The data are based on information abstracted from marriage certificates registered in the vital statistics offices of States which meet reporting criteria for participation in the marriage-registration area (MRA). The MRA covered 39 States in 1968-70 and 41 States in 1971-77; the District of Columbia was also included for all these years. Marriage data for each State in the MRA are based on marriage certificates sampled at one of five sampling rates (5, 10, 20, 50, or 100 percent), depending in most cases on the total number of marriages performed in the State during the calendar year. The tape record includes a weight based on the sampling fraction of the reporting State. All records are used from States submitting precoded data tapes through the Cooperative Health Statistics System. Demographic data include variables such as age, race, previous marital status, number of this marriage, and education of both bride and groom; records also include date and State of marriage.

For related technical report, see PB80-185812/XDD.

Keywords: *Data file, *Vital statistics, Demography, Age, Education, States(United States), Statistical data, United States, Data storage, Magnetic tapes, *Marriage, Race.

Availability: NTIS, CP T04, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Vital Statistics Natality Data, Local Area Summary, 1969.

Data file. Vital statistics data relating to natality provide demographic and health data for births occurring during the calendar year. The data are based on information abstracted from birth certificates filed in vital statistics offices of each State and the District of Columbia. Prior to 1972, data are based on a 50-

Field 14—VITAL STATISTICS

percent sample of birth certificates from all States. Beginning in 1972, data are based on 100 percent of the birth certificates from some of the States and on a 50-percent sample from the remaining States. The number of States from which 100 percent of the records are used has increased from 6 in 1972 to 33 in 1977 and these States are identified by data year in Appendix A of the tape documentation package. Demographic data include variables such as date of birth, age and educational attainment of mother, legitimacy status, live-birth order, race, sex, and geographic area. Health data include such items as birth weight, gestation and prenatal care. The number of births and birth rates for selected demographic variables are published annually in Vital Statistics of the United States, Volume I, 'Nativity'. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical report, see PB80-186307/XDD.

Vital Statistics Divorce, Detail, 1971.

Data file. Vital statistics relating to divorce provide demographic data for divorces occurring during the calendar year. The data are based on information abstracted from certificates of divorce of annulment registered in the vital statistics offices of States which meet reporting criteria for participation in the divorce-registration area (DRA). The DRA covered 26 States in 1968, 28 in 1969-70, and 29 in 1971-77. Divorce data for each State in the DRA are based on divorce certificates sampled at one of five sampling rates (5, 10, 20, 50, or 100 percent), depending in most cases on the total number of divorces granted in the State during the calendar year. The tape record includes a weight based on the sampling fraction of the reporting State. All records are used from States submitting precoded data tapes through the Cooperative Health Statistics System. Demographic data include variables such as age, race, number of this marriage, and education of both husband and wife. Records also include date and State of marriage and of divorce.

For related technical report, see PB80-187172/XDD.

Keywords: *Data file, *Vital statistics, Demography, Age, Education, States(United States), Statistical data, United States, Data storage, Magnetic tapes, *Divorce, Race.

PB80-188618/XDD

Vital Statistics Natality Data, Detail, 1978.

Data file. Vital statistics data relating to natality provide demographic and health data for births occurring during the calendar year. The data are based on information abstracted from birth certificates filed in vital statistics offices of each State and the District of Columbia. Prior to 1972, data are based on a 50-percent sample of birth certificates from all States. Beginning in 1972, data are based on 100 percent of the birth certificates from some of the States and on a 50-percent sample from the remaining States. The number of States from which 100 percent of the records are used has increased from 6 in 1972 to 36 in 1978 and these States are identified by data year in Appendix A of the tape documentation package. Demographic data include variables such as date of birth, age and educational attainment of parents, marital status, live-birth order, race, sex, and geographic area. Health data include such items as birth weight, gestation, prenatal care, attendant at birth, and Apgar score. The number of births and birth rates for selected demographic variables are published annually in Vital Statistics of the United States, Volume I, 'Natality'. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical report, see PB80-188709/XDD.

Keywords: *Data file, *Vital statistics, Demography, Age, Education, States(United States), Statistical data, United States, Data storage, Magnetic tapes, Race, *Natality, *Birth rate.

Vital Statistics Mortality Data, Local Area Summary, 1978.

Data file. Vital statistics data relating to mortality provide demographic and cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex, and geographic area. Cause-of-death data have been coded to the underlying causes of death shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the

death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

For related technical report, see PB81-100240/XDD.

Demographic data include variables such as date of death, age, race, and sex and geographic area. Underlying cause-of-death data and multiple cause-of-death data have been coded to the causes shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics. Multiple cause-of-death data at the each cause level of detail is included as Appendix I of the multiple cause-of-death documentation.

For related technical reports, see PB81-117046/XDD, PB82-121724/XDD.

Keywords: *Data file, *Vital statistics, *Mortality, Demographic surveys, Death, Magnetic tapes.

Availability: NTIS, Mag Tape \$665.00, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB82-186164/XDD

Vital Statistics Mortality Multiple Cause Data, Detail, 1974.

Data file. Vital Statistics data relating to mortality provide demographic, underlying and multiple cause-of-death data for deaths occurring during the calendar year. The data are based on information abstracted from all death certificates filed in vital statistics offices of each State and the District of Columbia. Death is defined as the permanent disappearance of any evidence of life at any time after live birth, therefore, data relating to fetal deaths are not included in the data. Demographic data include variables such as date of death, age, race, sex and geographic area. Underlying cause-of-death data and multiple cause-of-death data have been coded to the causes shown in the Eighth Revision of the International Classification of Diseases, Adapted for Use in the United States. Death and infant mortality rates and/or denominators required to derive such rates are not on the tapes. The number of deaths and the death and infant mortality rates for selected demographic and cause variables are published annually in Vital Statistics of the United States, Volume II, Parts A and B. A technical appendix giving information regarding the historical aspect and limitations of the data is included in the published volumes and the documentation for the data tapes. Specialized reports are published periodically in Vital and Health Statistics.

Vital Statistics Divorce Data, Detail, 1980.

Data file. Vital Statistics relating to divorce provide demographic data for divorces occurring during the calendar year. The data are based on information abstracted from certificates of divorce or annulment registered in the vital statistics offices of States which meet reporting criteria for participation in the divorce-registration area (DRA). For the current data year the DRA includes 30 States. Divorce data for each State in the DRA are based on divorce certificates sampled and one of five sampling rates (5, 10, 20, 50, or 100 percent), depending in most cases on the total number of divorces granted in the State during the calendar year. Divorce rates and numbers of divorces by selected demographic variables are published annually in Vital Statistics of the United States, Volume III -- 'Marriage and Divorce.' Information regarding historical aspects and limitations of the data, including a discussion of the sample design, sampling procedures, estimation procedures, and sampling errors, is included in the technical appendix of the annual volume. Specialized reports are published periodically in Vital and Health Statistics.

For related technical report, see PB83-243212/XDD.

Demographic data include variables such as age, race, previous marital status, number of this marriage, and education of both bride and groom; records also include date and State of marriage. **For related technical report,** see PB84-164193/XDD.

Keywords: *Data file, *Vital statistics, *Marriage, Magnetic tapes, Demography, States(United States), Statistical data.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation, PB84-164193.

PB84-220052/XDD

Fertility Tables for Birth Cohorts by Color: United States, 1917-1980.

Data file. This data tape contains three types of rates: Age-specific cohort fertility rates, age-specific period fertility rates, and cumulative age-specific cohort fertility rates. The data are for actual groups or cohorts of women as they pass through their childbearing years of 14 to 49 in calendar years 1917 to 1980. Data are broken down by race (all, white, and nonwhite) and parity.

Keywords: *Data file, *Fertility, *Females, Age, Minority groups, Characteristics, Vital statistics, Magnetic tapes, Birth rates.

Availability: NTIS, CP T02, mag tape. Source tape is in the EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Test Scores for 684 Executives and 923 Brain Damaged Subjects Seen in Halstead Laboratory of Medical Psychology 1935-69. Higher Brain Functions in Man and the Frontal Lobes.

Data file. The file contains the complete test scores of two major groups evaluated in the Halstead Laboratory of Medical Psychology, University of Chicago. Each subject is identified by a number. File one contains the scores of persons evaluated specifically for a question of organic brain damage. This file contains a special code which incorporates the independent evidence collected for each subject on the question of brain damage. File two contains the scores of men labeled executives and tested as part of a periodic medical examination program at Billings Hospital, University Chicago. File three is the documentation for Files one and two listing names of the

Nation-Wide Outdoor Recreation Supply Inventory, 1965

Data file. A 1965 nationwide area and agency inventory of public outdoor recreation supply covers federal, state, county, and city jurisdictions. It includes acreage, facilities, and visitation data. (Cities under 50,000 population were sampled.)

Keywords: *Data file, Outdoor recreation, Economic surveys, *Recreation, Inventories, *Public land, Area statistics, Utilization characteristics, Magnetic tapes, United States, BOR.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; or 9 track, 800bpi, odd parity.

PB-246 395/8/XDD

China: Supplement to the Directory of Officials of the People's Republic of China. A(CR) 75-16, April 1975.

Data file. This file was prepared for the use of US Government officials. The format, coverage and contents of the file are designed to meet the specific requirements of governmental users. This file identifies Chinese officials reported in major positions since the publication of the Directory of Officials of the People's Republic of China, A(CR) 75-16, April 1975, a CIA Reference Aid that is made available to non-US Government users through the Document Expediting (DOEX) Project, Exchange and Gift Division, Library of Congress, Washington, D.C., 20540. Provided for each entry in the file is the name of the Chinese official (Wade-Giles romanization with aspirates and a separate umlaut indicator field), Standard Telegraphic Codes, if available, for the name of the official, new position, location (by province in China, by country outside of China) and, except for diplomats and Deputies to the National People's Congress, the page number cross-referenced to the Directory. Not included in this supplement are additions to Chapter 9 (Trading Corporations) and Part IV (Scientific and Educational Organizations). The letter 'f' appearing after a name indicates that the official is female. The words 'delete record' in an entry mean that the official no longer holds the position in which he is listed in the Directory. The file is based primarily on Chinese news sources as reported in the FBIS People's Republic of China Daily Reports. The first day an official is identified will give the approximate date of the Daily Report in which the information appeared. The documentation accompanying this file

is as follows: a list that provides a description of each field in the file; and a cross-reference lookup table for location of the official.

Keywords: *Data file, Biographical intelligence, Government employees, Foreign government, *China, *Political intelligence, Personnel, Data, *Directories, Magnetic tapes, *Government officials.

Availability: NTIS, CP T01, 1 reel mag tape. Available only in 9 track, 800/1600 BPI, EBCDIC, odd parity. Price includes documentation.

Chinese Contact File, 1972-November 1975.

Data file. This file identifies Chinese officials who have met with foreign delegations visiting the People's Republic of China during the period January 1972-November 1975. The data base for the file is derived from the FBIS People's Republic of China Daily Report (available by subscription from NTIS). Provided for each entry in the file is the name of the Chinese official (Wade-Giles romanization without aspirates or umlauts), country of origin of the visiting individual or delegation, the type of contact (e.g., diplomatic, economic, scientific, etc.), a simple description of the individual or group involved in the contact, and the reported dates of the delegation's stay in China. Only one entry per group contact is made for each Chinese official. The documentation accompanying this file provides a description for each field in the file, a cross-reference lookup table for the country of the visiting individual or delegation; and a cross-reference lookup table for type of contact.

Keywords: *Data file, *Political intelligence, Officer personnel, Records, *China, Meetings, International relations, Time, Biographical intelligence, Information retrieval, *Government officials, Officials, Foreign delegations.

Availability: NTIS, CP T01, 1 reel mag tape. Available in 9 track, 1600 bpi, odd parity, EBCDIC only.

PB-265 813/6/XDD

Ethnic Minorities IQ Data File.

Data file. The data for the Ethnic Minority I.Q. file was collected primarily from individual student records in schools and boards of education in communities across the country. Some of the data items collected were sex, date of birth, ethnicity of student and of father and mother, student test data, and father and mother's birthplace and occupation. Among general problems associated with collecting the data were (1) determining of the ethnicity of students where such data were not available in the school records, (2) selecting among I.Q. scores where several were available, and (3) determining the occupational category of the student's parents from their job descriptions, where the latter were available. These problems were resolved and are discussed in a paper made available with the data file.

For related technical report, see PB-265 814/XDD.

Keywords: *Data file, *Minority groups, *Ethnic groups, *Intelligence, Students, Records, Data acquisition, Sociometrics, Family relations, Sex, Employment, Magnetic tapes, Regions, Research, Parents occupations, Intelligence quotient.

Survey of the Public's Attitude Towards Soil, Water and Renewable Resources (Narrative Report, Data Books, Data Tape).

Data file. USDA contracted with Louis Harris and Associates, Inc., to undertake a major public opinion survey on soil, water and related resources. This nationwide public opinion survey which includes 7,010 adult Americans, was the major purposes of the study: (a) to assess the state of the public's knowledge and understanding of basic soil and water conservation problems and practices; (b) to establish the extent to which the public believes in an ethic of conservation; (c) to gauge public priorities in the allocation of land, water and financial resources among competing national domestic needs; (d) to determine public preferences among alternative programmatic approaches to soil and water conservation; (e) to investigate public attitudes towards two leading options for increasing domestic energy supplies, gasohol and synfuels, and their relationship to resource allocation and conservation; (f) to explore the public's perceptions of the structure of American agriculture; and (g) to examine public views of the citizen participation in Federal Government decision making.

For related technical reports, see PB80-219959/XDD, PB80-219967/XDD, PB80-219975/XDD, PB80-219983/XDD, PB80-219991/XDD.

Attitudes of the U.S. Public Toward Science and Technology: Data Tape, 1979.

Data file. The tape contains the results of a national public opinion survey, performed from October to December 1979, to investigate public attitudes toward science and technology. The work was done by the Institute for Survey Research at Temple University. The Science Indicators Unit of NSF commissioned this study to aid in preparing the National Science Board's Science Indicators reports. The National Opinion Research Center designed the questionnaire under contract from NSF. Their report explaining the questionnaire is available from NTIS (Order Number PB81-155079). The survey was conducted among 1635 men and women, 18 years or age and over, living in the contiguous 48 States. All interviews were done in person, and averaged 1 hour. Advanced sampling techniques were used in designing the sample. The project report can be ordered under No. PB81-161317. The tape contains the responses to all questions from each interview, in card-image format.

Indianapolis Fertility Survey, 1941 Study of Social and Psychological Factors Affecting Fertility.

Data file. This data file contains 4,725 variables based on interviews concerning fertility and social, economic, and psychological characteristics with a sample of 1444 couples interviewed in Indianapolis, Indiana, between April 1, 1941, and January 31, 1942. The couples were fecund, native white, Protestant, with at least an elementary school education, married in 1927-1929 when the wife was under age 30 and the husband was under 40, and neither was previously married.

National Marine Fisheries Service Consumption Data. (1973-74).

Data file. This tape contains fish consumption data for 24,652 individuals in the United States from a survey conducted during 1973-74. The panel was balanced nationally with regard to major demographic characteristics. The age, sex and geographic location is given for each individual. Information is provided on each species eaten, the serving size and the number of servings eaten by an individual. Documentation describing this tape is available.

Nationwide Food Consumption Survey, Basic Household, Spring Quarter, 1977-78.

Data file. This file contains food and nutrient data of 3083 housekeeping households for spring 1977 from the USDA 1977-78 Nationwide Food Consumption Survey collected during April 1977 through March 1978. Sample design provided for a national basic sample. When the weights are applied, the total spring weighted samples are 3473 interviews. The data were collected by personal interviews with household member most knowledgeable about the household food consumption. A food list was used to help recall kinds, quantities (converted to pounds) and costs of foods used from the household food supply during the 7 days prior to the interview. Counts of meals eaten at home and away from home were recorded for each household member, as well as for guests' meals and/or snacks served from household supply. Money value of all foods per household is summarized. For each food item reported, there are its conversion factor and nutritive value for food energy, protein, fat, carbohydrate, calcium, iron, magnesium, phosphorous, vitamin A value, thiamin, riboflavin, niacin, vitamin B6, vitamin B12, and

Field 16—AGRICULTURE AND FOOD

ascorbic acid. Other information includes household sizes in equivalent nutrition units, nutritive values per nutrition unit, ratios of nutritive value per nutrition unit to the Recommended Dietary Allowances, and weekly aggregate nutritive values. Household income, education and employment of household heads, and other factors that might affect food consumption were reported. Accompanied are the data file format information and code manual with food codes, descriptions of foods, and weights of some household measures.

Nutritive Values of Foods, as in Agriculture Information Bulletin No. 382.

Data file. This file contains composition values from a slightly revised version of Table 1 of Agriculture Information Bulletin No. 382, 'Nutrition Labeling--Tools for Its Use', issued in 1975. Twelve composition values for common household measure of 885 foods are included. Composition values in file 382-1 are for food energy, protein, carbohydrate, fat, and percentages of the U.S. RDA for protein, vitamin A, vitamin C, thiamin, riboflavin, niacin, calcium, and iron. The values have been rounded according to the rules used for food labeling. The data set contains a 5-digit food code and an abbreviated description for each food item. Files 382-2 and 382-3 are companion files to 382-1 and contain the same 5-digit code and abbreviated description for each food item. File 382-2 has the composition values rounded to the nearest whole calorie and to the nearest gram of protein, carbohydrate, and fat. The percentages of the U.S. RDA have been rounded to the nearest hundredth of a percent.

For related technical report, see PB80-190200/XDD.

Nationwide Food Consumption Survey, Basic Individual, Spring Quarter, 1977-78.

Data file. This file contains food and nutrient intake for 9,260 men, women, and children plus 40 breast-

fed infants (weighted on household basis) collected in spring, 1977, as part of Nationwide Food Consumption Survey 1977-78. The interview was conducted in the home with each individual asked to recall his previous day's diet and then to keep a diet record for the next 2 days which the interviewer returned to review and pick up after completion. Information was gathered on all days of the week including Saturday and Sunday. Data includes for each eating occasion, its name, time, and person(s) sharing it, and if eaten away from home, where eaten, type of service, and cost. For each food and beverage, the kind and quantity (grams) is given and whether from home supplies or obtained away. Data given on vitamin and mineral supplements taken, frequency of consuming organ meats during previous 30 days, whether person is a vegetarian and if so, type of foods eaten, whether person is on a diet, whether diet was typical, and self-appraisal of health status. Characteristics available for each individual are sex, age, race, if Spanish descent; estimated height and weight; pregnancy and lactation status for women; household income before taxes (category); household size; and education, occupation, and employment status of male and female heads. Nutrient content of each food, each day's intake, and 2 or 3 day average intake are available for energy, protein, fat, carbohydrate, calcium, iron, magnesium, phosphorus, vitamin A value, thiamin, riboflavin, pre-formed niacin and vitamins B6, B12, and C.

For related technical report, see PB80-190226/XDD.

PB80-195415/XDD

Nationwide Food Consumption Survey, Basic Individual, Spring Quarter, 1965.

Data file. This file contains food and nutrient intake for over 14,000 men, women, and children included in the nationwide USDA survey of food intake of individuals carried out in the spring of 1965. The interview was conducted in the home and the household respondent, usually the homemaker, was asked to recall the previous day's food intake for selected members in the household. One-half of the individuals 20-64 years of age were systematically selected. Information was collected over all days of the week, including Saturday and Sunday. Data included for each item of food reported the kind, quantity (in grams), time eaten, and, for foods not from the household supply, the place of eating, type of service, and food cost, if bought. For each food item reported, there is also listed its equivalent value for food energy, protein, fat, carbohydrate, calcium, iron, vitamin A value, thiamin, riboflavin, niacin, and ascorbic acid. Characteristics available for each individual

are sex, age, estimated height and weight, use of vitamin or mineral supplements, and, for women, pregnancy and lactation status.

Yields and Losses or Gains in Preparation of Foods.

Data file. This file contains data on food yields and losses in food preparation as published in Table 1 of Food Yields--summarized by different stages of preparation, Agriculture Handbook No. 102, revised September 1975. The revised data and additional information in this publication serves as the principal basis for values on refuse in the revisions of Agriculture Handbook No. 8, Composition of Foods--raw, processed, prepared, revised 1963, \$3.60. (For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402). Yields after preparation as well as percent change (by weights) are provided for up to nine variations in preparation for each food item. Each item is identified by an item number which relates directly to the item described in AH 102. No descriptions are contained in this file. This file contains data for 2,894 food items.

Keywords: *Data file, *Food composition, *Nutrition, Magnetic tapes, Data storage.

Food Consumption Survey, Hawaii Household, 1977-78.

Data file. This file contains food and nutrient data of 1157 housekeeping Hawaiian households from the USDA Nationwide Food Consumption Survey. The Hawaiian sample was collected during January, February, and March 1978. The sample design provided for an area probability sample of households in the entire Hawaiian Islands. When weights are applied, the total weighted sample gives 1256 interviews. The data were collected by personal interviews with household member most knowledgeable about the household food consumption. A food list was used to help recall kinds, quantities (converted to pounds) and costs of foods used from the household food

supply during the 7 days prior to the interview. Counts of meals eaten at home and away from home were recorded for each household member, as well as for guests' meals and/or snacks served from household supply. Money value of all foods per household is summarized. For each food item reported, there are its conversion factor and nutritive value for food energy, protein, fat, carbohydrate, calcium, iron, magnesium, phosphorus, vitamin A value, thiamin, riboflavin, niacin, vitamin B6, vitamin B12, and ascorbic acid. Other information includes household sizes in equivalent nutrition units, nutritive values per nutrition units, ratios of nutritive value per nutrition unit to the Recommended Dietary Allowances, and weekly aggregate nutritive values. Household income, education and employment of household heads, and other factors that might affect food consumption were reported. Accompanied are the data file format information and code manual with food codes and descriptions of foods.

PB81-146763/XDD

Food Consumption Survey, Alaska Household, 1977-78.

Data file. This file contains food and nutrient data of 2394 housekeeping Alaskan households from the USDA Nationwide Food Consumption Survey. The Alaskan sample was collected during January, February, and March 1978. The sample design provided for an area probability sample of the urban households of Alaska. When weights are applied, the total weighted sample gives 2362 interviews. The data were collected by personal interviews with household members most knowledgeable about the household food consumption. A food list was used to help recall kinds, quantities (converted to pounds) and costs of foods used from the household food supply during the 7 days prior to the interview. Counts of meals eaten at home and away from home were recorded for each household member, as well as for guests' meals and/or snacks served from household supply. Money value of all foods per household is summarized. For each food item reported, there are its conversion factor and nutritive value for food energy, protein, fat, carbohydrate, calcium, iron, magnesium, phosphorus, vitamin A value, thiamin, riboflavin, niacin, vitamin B6, vitamin B12, and ascorbic acid. Other information includes household sizes in equivalent nutrition units, nutritive values per nutrition unit, ratios of nutritive value per nutrition unit to the Recommended Dietary Allowances, and weekly aggregate nutritive values. Household income, education and employment of household heads, and other fac-

tors that might affect food consumption were reported. Accompanied are the data file format information and code manual with food codes and descriptions of foods.

For related technical report, see PB80-190189/XDD.

PB81-146771/XDD

Food Consumption Survey, Hawaii Individual, 1977-78.

Data file. This file contains food and nutrient intake for 3050 men, women, and children (weighted on household basis, 3,086 individuals, unweighted) collected in Hawaii in Winter 1978, as part of Nationwide Food Consumption Survey 1977-78. The interview was conducted in the home with each individual asked to recall his previous day's diet and then to keep a diet record for the next 2 days which the interviewer returned to review and pick up. Information was gathered on all days of the week including Saturday and Sunday. Data include name for each eating occasion, time, and person(s) sharing it, and if eaten away from home, where eaten, type of service, and cost. For each food and beverage, the kind and quantity (grams) are given and whether from home supplies or obtained away. Data given on vitamin and mineral supplements taken, frequency of consuming organ meats during previous 30 days, whether person is on a diet, whether diet was typical, and self-appraisal of health status. Characteristics available for each individual are sex, age, race, if Spanish descent; estimated height and weight; pregnancy and lactation status for women; household income before taxes (category); household size; and education, occupation, and employment status of male and female heads. Nutrient content of each food, each fat, carbohydrate, calcium, iron, magnesium, phosphorus, vitamin A value, thiamin, riboflavin, preformed niacin and vitamins B6, B12, and C.

For related technical report, see PB80-190226/XDD.

PB82-136496/XDD

Nutritive Values of Foods Used in the Nationwide Food Consumption Survey (Including Puerto Rico), Basic Household, 1977-78.

Data file. This file contains nutritive values for 4,083 food items reported used by households in the USDA Nationwide Food Consumption Survey 1977-78 and the Household Food Consumption Survey in Puerto Rico. Food composition values are for 1 pound of food, as purchased for food energy (calories), protein (g), fat (g), carbohydrate (g), calcium (mg), iron (mg), magnesium (mg), phosphorus (mg), vitamin A (I.U.), thiamin (mg), riboflavin (mg), niacin (mg), vitamin B6 (mg), vitamin B12 (mcg), and ascorbic acid (mg) with cooking losses deducted for the following seven vitamins: vitamin A, thiamin, riboflavin, niacin, vitamin B6, vitamin B12, and ascorbic acid. Also provided are conversion factors which convert appropriate food items to an equivalent weight based on calcium content or equivalents based on flour, sugar, fresh potatoes, eggs in shell, single strength juice, dry legumes, or shelled nuts. Most of the data on nutrients were derived from Table 2, U.S. Department of Agriculture Handbook No. 8 and its revised supplements. Some values from these sources were updated based on results of new food composition research, on information from industry about new food products, and in accordance with new regulations on the enrichment of food. A food code manual is provided with this data file which includes a unique 15-digit food code for each food item reported in the survey, a description of the food, and the commonly reported household measures with their weights in pounds for that food.

Keywords: *Data file, Nutritive value, Food, *Puerto Rico, Data storage, Magnetic tapes, Nutrients, Food composition, Surveys, *Nutrition, *Food consumption.

Availability: NTIS, CP T99, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price.

PB82-138504/XDD

Nutritive Values of Foods Used in the Nationwide Food Consumption Survey Including Puerto Rico, Basic Individual, 1977-78.

Data file. A nutrient data base of approximately 4545 food items developed for the USDA Nationwide Food Consumption Survey 1977-78. Only items reported exclusively in the Puerto Rican phase of the survey are included. Food composition values are for 100-gram edible portions of food as eaten, for energy (kilocalories), protein (g), fat (g), carbohydrate (g), calcium (mg), iron (mg), magnesium (mg), phosphorus (mg), vitamin A value (I.U.), thiamin (mg), riboflavin (mg), niacin (mg), vitamin B6 (mg), vitamin B12 (mcg), and vitamin C (mg). For milk and milk products, a calcium conversion factor is provided which converts each product to an equivalent weight of whole milk based on its calcium content relative to whole milk. Food items reported in the survey but not specifically described are assigned nutrient values for a commonly eaten form of the food for a composite of several forms. Food values for mixtures or recipes are based on popular recipes, commercial products, or composites of several products. A food code manual is provided which includes, for each item, a unique seven-digit food code, description of food, and commonly reported household measures with their weights in grams. The first digit of the code denotes one of nine major food categories. A tenth category of miscellaneous items used in small amounts, assigned a first digit of zero.

Food Consumption Survey, Elderly Individual, Spring and Summer, 1977-78.

Data file. This file contains food and nutrient intake for 3419 men, women, and children (weighted household basis, 3568 individuals, unweighted) collected in the 48 conterminous states from May 1977 through September 1977. Individuals were from a sample of households in which at least one member was 65 years or over. The Department of Health and Human Services provided a probability sample list of names and addresses of persons 65 years or over who were participants in programs such as social security and medicare. The interview was conducted in the home with each individual asked to recall his previous day's diet. Information was gathered on all days of the week including Saturday and Sunday. Data include name for each eating occasion, time, and person(s) sharing it, and if eaten away from home, where eaten, type of service, and cost. For each food and beverage, the kind and quantity (grams) are given and whether from home supplies or obtained away. Data are given on vitamin and mineral supplements taken, frequency of consuming organ meats during previous 30 days, whether person is a vegetarian and if so, type of foods eaten,

whether person is on a diet, whether diet was typical, and self-appraisal of health status. Characteristics available for each individual are sex, age, race, if Spanish descent; estimated height and weight; household income before taxes (category); household size; and education, occupation, and employment status of male and female heads. Nutrient content of each food and the day's intake, are available for energy, protein, fat, carbohydrate, calcium, iron, magnesium, phosphorus, vitamin A value, thiamin, riboflavin, preformed niacin and vitamins B6, B12, and C.

PB83-137281/XDD

Elderly Household Food Consumption Survey, 1977-78.

Data file. This file contains food and nutrient data of 2154 (unweighted) households collected from May through September 1977 for the USDA Survey of Food Consumption in Elderly Households 1977-78. The universe under study was households in which at least one member was 65 years and over. The Department of Health and Human Services provided a probability sample list of names and addresses of elderly persons, derived from their files of those participating in specific programs such as Social Security and Medicare. The sampling unit was same as those represented in the basic Nationwide Food Consumption Survey 1977-78. Four independent probability list samples were drawn and executed in four quarters of data collection. Applicable sampling weights are included in the file. Information was obtained through an interview with the person identified as most knowledgeable about the household food consumption. List-recall method provided quantities (converted to pounds) and costs of foods used from the household food supply during the seven days prior to the interview.

Keywords: *Data file, *Food consumption, *Elderly persons, *Nutrition, Diets, Surveys, Interviews.

PB83-180455/XDD**Data Set 456, Food Composition Data, Release 4.**

Data file. This file contains food composition data as published in tables 1 and 2 of Agriculture Handbook No. 456 along with three other composition values (fiber, ash, and cholesterol) and the refuse adjustment factor. Where values were not available for publication in Handbook No. 456, imputed values have been included on the tape. This file also has updated values that have been made available since the handbook was published. The data are provided for the same household units as given in the publication. Food item numbers are assigned sequentially with the food descriptions in alphabetical order. The first four digits and the letter code are identical to those used in the publication for the same food item but a fifth digit has been appended to allow for a finer distinction of the food than was used originally. Where no finer definition is needed, the fifth digit is zero. As an example, item 45 in the publication (cooked artichokes) has now been further specified as 45-1 (cooked artichokes without salt added) and 45-2 (cooked artichokes with salt added). Iron values for enriched flour and bread, and other products made with enriched flour, have been changed to reflect revised standards of identity. The higher iron levels are voluntary before July 1, 1983 and mandatory after that date (Federal Register August 28, 1981). The number of food items in the file is 6615, when the items with their 'finer distinctions' and the different household measures are counted. The data file format, a list of food descriptions and item numbers, which may be printed for use as a coding manual, appear as the first data set on the tape. **For related technical report,** see PB81-146656/XDD.

Keywords: *Data file, *Food composition, Magnetic tapes, Nutritive value, Nutrients, *Nutrition.

AMRL Anthropometric Data Bank Library. Volume I. 1968 Survey of USAF Women.

Data file. The survey of women of the Air Force was made in the Spring of 1968 by the Anthropology Branch, Aerospace Medical Research Laboratory, Wright-Patterson AFB, Ohio and the Anthropology Research Project (then at Antioch College, Yellow Springs, Ohio). A description of the survey and the results are published in Anthropometry of Air Force Women (AD-743-113), 1972. Data for age (variable 1), 123 body size measurements (variables 2-124), and grip strength (variable 125) were obtained from a sample of 1905 women. 13 measurements were repeated on 1513 subjects with the subjects wearing foundation garments (variables 126-138). The contents of this tape are also described along with Volumes II-V of The AMRL Anthropometric Data Bank Library in the report The AMRL Anthropometric Data Bank Library: Volume I-V, AMRL-TR-77-1, October 1977. This contains the complete survey in the fully edited form.

For related technical report, see AD-047 314/XDD.

Keywords: *Data file, *Anthropometry, Data bases, Computer files, Magnetic tape, Air Force personnel, Females, Tables(Data), Human body, Sizes(Dimensions), *Women, Adults.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density and parity. Documentation available.

AD-A056 155/5/XDD

AMRL Anthropometric Data Bank Library. Volume II 1967 Survey of USAF Flying Personnel.

Data file. An anthropometric survey was conducted during the first three months of 1967. Measuring was carried out at almost 20 bases spread over the country. Summary statistics and a description of measuring techniques for most variables are reported in a review of anthropometric data of German Air Force and United States Air Force personnel 1967-1968, published as AGARD-AG-205, 1975. The contents of this tape are also described along with Volume I and Volumes III-V of the AMRL Anthropometric Data Bank Library in the report The AMRL Anthropometric Data Bank Library: Volumes I-V, AMRL-TR-77-1, October 1977. This contains the complete survey in its fully edited form.

For related technical report, see AD-A047 314/XDD.

Keywords: *Data file, *Anthropometry, Data bases, Computer files, Magnetic tape, Air Force personnel, Flight crews, Males, Tables(Data), Human body, Sizes(Dimensions), Military personnel.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density and parity. Documentation available.

AD-A056 156/3/XDD

AMRL Anthropometric Data Base Library. Volume III. 1965 Survey of USAF Personnel.

Data file. A survey of USAF male personnel was conducted during the spring and summer of 1965. In the first portion of the survey 549 officers (396 pilots and navigators; 153 non-flyers), 4 Warrant Officers and 683 Enlisted men were measured. In the second half, 2632 men (2203 white, 412 black, 17 other) undergoing basic training and one Sergeant were measured at Lackland AFB. Of this Lackland group 106 men had ranks other than basic trainee. The contents of this tape are also described along with Volumes I, II, IV, and V of the AMRL Anthropometric Data Bank Library in the report The AMRL Anthropometric Data Bank Library: Volumes I-V, AMRL-TR-77-1, October 1977. This contains the complete survey in its fully edited form.

For related technical report, see AD-A047 314/XDD.

Keywords: *Data file, *Anthropometry, Data bases, Computer files, Magnetic tape, Air Force personnel, Officer personnel, Enlisted personnel, Flight crews, Trainees, Human body, Sizes(Dimensions), Males, Surveys.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density and parity. Documentation available.

AMR

Data file. An anthropometric study of flying personnel was conducted, in 1950, at 14 Air Force bases in Mass, Mich, Colorado, Washington, California, Texas, and Louisiana. The original statistical analyses were the initial activity of the Anthropology Research Project. The results, reported in TR-52-321, were carried out prior to the availability of modern computer facilities; since publication of that report, the data have been modernized. Millimeter figures for most variables originally recorded but not punched were incorporated into the data. This tape includes data for 4000 subjects and 161 variables, variables 1-132 are body size values, 133 is age, 134-146 are somatotype ratings (those listed as somatotype are ratings done by Dupertuis using Sheldons method). A statistical comparison of the body typing methods of Hooton and Sheldon is provided in SADC TR 56-366 (AD-097 205). The contents of this tape are also described along with Volumes I-III and Volume V of the AMRL Anthropometric Data Bank Library in the report, The AMRL Anthropometric Data Bank Library: Volumes I-V, October 1977. This contains the complete survey in its fully edited form.

For related technical report, see AD-A047 314/XDD.

PB-250 758/0/XDD

Consumers' Perceptions of Adverse Reactions from Cosmetics.

Data file. Ten thousand households in the United States kept diaries of cosmetic usage for three months (September-November 1974) and reported perceived injuries. Reports were investigated by dermatologists for cosmetic-relatedness and severity of injury. Primary purpose of study was to obtain an estimate of the number and types of cosmetic injuries relative to usage patterns for a selected panel of consumers. Data file includes only information given by the 703 people who reported cosmetic-related injuries. The bound two-volume copy of the final survey report is available from NTIS, Accession No. PB-242 479-SET.

For related technical report, see PB-250 799/XDD.

Keywords: *Data file, *Toxicology, *Product safety, *Consumers, Magnetic tapes, Data storage, Responses, Injuries, Epidemiology, Consumption, Dermatology, United States, Damage, Pathology, Surveys, Physiological effects, Utilization, *Cosmetics, Consumer participation, Consumer protection.

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in EBCDIC character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Pacific Island Ecosystem (PIE) Data Base.

Data file. The Pacific Island Ecosystem (PIE) Data Base is produced by the U.S. Fish and Wildlife Service of the Department of Interior. PIE cites references on the biological, ecological, physical and socio-economic processes and features of the coastal ecosystems of the Pacific Islands. The impact of these processes and man's influence on the environment of the Pacific Islands is also cited. The geographical area of the Pacific Islands is defined as the Hawaiian Islands, American Samoa, Guam, the Trust Territory of the Pacific Islands, and other Pacific Islands under U.S. jurisdiction or claimed by the U.S., located approximately between the Tropic of Cancer and the Tropic of Capricorn. PIE contains 20,000 citations with 500-1,000 records added annually from 1927 to the present.

Keywords: *Data file, *Ecology, *Marine biology, Coasts, Environmental impacts, Social effect, Economic impact, Coastal topographic features, Pacific Ocean Islands, Hawaii, American Samoa, Guam, Magnetic tapes, Ecosystems, *Pacific Islands.

LADB: Laboratory Animal Data Bank.

Data file. The major objectives of the Laboratory Animal Data Bank (LADB) program were to provide normal biologic values and other biomedical data on control laboratory animals that enable investigators to evaluate research results, to determine the rate of spontaneous pathologic, oncogenic, and other changes in the common species and strains of laboratory animals, and to ascertain how these changes were affected by laboratory conditions. Approx. 1 million observations from 30,000 animals of about 70 species, strains and substrains were retrievable from the bank which was publicly available from February 1980 to February 1982. Hematology, clinical chemistry, pathology, growth, and development data on negative control, sham control, and vehicle control animals from actual experiments are included in the data bank. Each observation is supplemented by ancillary information such as genetic background, diet, environmental factors, caging, sanitation, and other husbandry practices. Input for the bank was obtained from about 60 different institutions and consists of unpublished data on mice, rats, rabbits, guinea pigs, hamsters, cats, dogs, monkeys, tree shrew, and minipigs. The quality of data was evaluated on the basis of criteria developed by a committee of experts from the Federation of American Societies for Experimental Biology. Typical examples of offline searches that have been performed for researchers include lifetime hematology values on Wistar and Sprague-Dawley rats; frequency of hepatocellular adenomas in B6C3F1 mice; histograms for all clinical chemistry data elements for Marshall beagle dogs by age and sex; and the frequency of hydronephrosis in Charles River Sprague-Dawley rats. The most frequent request was for spontaneous tumor frequencies in the various species of laboratory animals.

Registry of Toxic Effects of Chemical Substances, Computer Tape, 1982 Edition.

Data file. These tapes contain the data and bibliographic CODEN files of the 1982 Registry of Toxic Effects of Chemical Substances (RTECS). Formerly known as the Toxic Substance List, the Registry is an annual compendium of toxicity data abstracted from the scientific literature by the National Institute for Occupational Safety and Health (NIOSH) in compliance with the 1970 Occupational Safety and Health Act. The 1982 RTECS file contains 218,746 entries: 59,224 are names of unique chemicals with their associated toxicity data and 159,522 are synonymous names. For each compound, the following data are provided: prime name and synonyms; CAS number; molecular weight and formula; date when substance record was last updated; Wiswesser Line Notation; irritation, mutation, reproductive effects, tumorigenic, and toxic dose data with references; aquatic toxicity rating; toxicology reviews; government standards and regulations; NIOSH criteria document, current intelligence bulletin, and analytical method citations; and NTP bioassay and EPA TSCA status. The Registry provides information on known toxic and biological effects of chemical substances for use by employers, employees, physicians, industrial hygienists, toxicologists, researchers, and others concerned with safe handling of chemicals. The absence of a substance from the Registry does not indicate that it is not toxic. The toxic doses presented are not to be considered definitive doses for describing safe versus toxic doses for human exposure.

For related technical report, see PB83-223172/XDD.

Keywords: *Data file, *Toxicology, Data storage, Magnetic tapes, Safety, Dosage, Occupational diseases, Industrial hygiene, Hazards, Legislation, Regulations, *Chemical compounds, Toxic substances, Occupational safety and health.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Plantsite Information File.

Data file. The TSCA Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two Plant Site Information File lists names and addresses for more than 6000 processors and manufacturers of chemicals. This file, with the Production Information File and the TSCA Preferred and Synonyms files, provides the complete Toxic Substances Control Act.

Keywords: *Data file, *Chemical compounds, Environmental surveys, Inventories, Chemical industry, Manufacturing, Magnetic tapes, *Toxicology, Toxic Substances Control Act.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-254110/XDD

TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Production Information File.

Data file. The TSCA Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two Production Information File contains production information for more than 50,000 chemicals. This file includes Manufacturing Identification Number (MID) but not manufacturer names and locations. The TSCA Chemical Substances Inventory Initial Inventory Cumulative Supplement Two - Plantsite Information File tape must be used to find this information. The MID links the production figure to the plantsites. See also TSCA Chemical Substances Inventory and Cumulative Supplement Two - Preferred Name File and Synonym File to obtain the complete inventory.

Keywords: *Data file, *Chemical compounds, Environmental surveys, Inventories, Chemical industry, Manufacturing, Magnetic tapes, *Toxicology, Toxic Substances Control Act.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-254128/XDD

TSCA (Toxic Substance Control Act) Chemical Substances inventory: Initial Inventory and Cumulative Supplement Two, Preferred Name File and Synonym File.

Data file. The Toxic Substances Control Act Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two lists names for more than 50,000 chemical substances. The two files included are: File 1: TSCA CAS Registry Numbers (a listing of chemical names by CAS Registry No.), and File 2: TSCA Synonyms (an alphabetical listing of synonyms). See also the TSCA Chemical Substances Inventory, Initial Inventory and Cumulative Supplement two - Plantsite Information File and Production Information file to obtain the complete inventory.

Keywords: *Data file, *Chemical compounds, Environmental surveys, Inventories, Magnetic tapes, Manufacturing, Toxic Substances Control Act, *Toxicology.

18. CARTOGRAPHY

AD-A023 226/4/XDD

Zip Code, Latitude, Longitude. (Zip Lat Long).

Data file. This file contains the latitude and longitude coordinates for each zip code shown in the 1974 zip code directory published by the U.S. Postal Service (with the exception of the A.P.O.'s). Coordinates are provided in terms of degrees, minutes, and seconds. The coordinates were developed in one of five ways indicated by a type flag: (1) a computation based upon the 1970 Census tracts which comprise the zip code area; (2) earlier maps readings of post offices

Field 18—CARTOGRAPHY

located outside the Standard Metropolitan Statistical Areas; (3) the assignment of the coordinates of the main post office to a branch, if there was no other way to locate the branch; (4) the assignment of the coordinates of a minor civil division (MCD) to a post office; (5) current map readings. The record format is as follows: Cois. 1-5 Zip Code, 6-11 Latitude, 12-18 Longitude, 19 Type Flag, 20-80 Comments appear for types 3, 4, 5. There are 37,408 records in the two tapes.

Keywords: *Data file, *Geographic areas, Mail, Coding, Latitude, Longitude, United States, Directories, Magnetic tape, *Zip codes, Postal service.

Availability: NTIS, CP T03, 2 reels mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-223 178/5/XDD

World Data Bank 1.

Data file. World Data Bank 1 (Wdb 1) is a digital representation of the coastlines and boundaries of the world for use in automated mapping systems. The first two files consist of 100k individual coordinate points arranged sequentially to describe each linear feature. The third field is an index to the linear features in Wdb 1. This data bank can be used independently or in conjunction with the Cam program, PB-238 358/6 (documentation) and PB-238 357/8 (tape), which will output this data in 16 different map projections.

Keywords: *Data file, *Mapping, Boundaries, Coasts, Computer programs, *World data bank.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidc, odd parity.

PB-264 650/3/XDD

Digital Land Cover Classification of the Washington Urban Area Derived from LANDSAT Data, 1972 and 1973.

Data file. This digital tape named 'WED 029' contains precision geometrically corrected land cover classification of the Washington urban area, D.C., MD, and VA. Prepared by USGS Land Information and Analysis Office in cooperation with National Aeronautics and Space Administration and U.S. Department of the Interior Earth Resources Observation Systems (EROS) Program. The classification is derived by machine-processing of digital multispectral scanner data for two contrasting Landsat scenes, October 11, 1972 (frame E-1080-15192), and April 9, 1973 (frame E-1260-15201), combined. The window defined by N=230, W=434, S=1018, and E=1418 corresponds to an area 60km by 60km as defined on maps published in USGS folio I-858. Each data point (pixel) is about 76m north-south and 61m west-east, and covers 0.464 hectare (1.14 acre). Each 8 bit byte represents a binary integer from 1-26 and 64. Numbers 1-26 represent the land cover classes listed below. Number 64 describes the background

surrounding the precision geometrically corrected area.

Keywords: *Data file, *Mapping, Urban areas, *District of Columbia, *Virginia, *Maryland, Metropolitan areas, Remote sensing, Magnetic tapes, Landsat satellite.

Availability: NTIS, CP T02, mag tape. Source tape is in BINARY character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions.

PB-271 868/2/XDD

World Data Bank II, Volume 1. North America.

Data file. World Data Bank II is a digital representation of the world divided into five geographic areas. Each area is contained on a single magnetic tape (9 track, 1600 BPI, odd parity, EBCDIC); each tape contains three files of unique line segments defined by individually-digitized points. The five specific tapes and associated areas are Volume 1--North America; Volume 2--South America; Volume 3--Europe; Volume 4--Africa; Volume 5--Asia. The three files contained in each volume are (a) coastlines, islands, lakes (CIL); (b) rivers (RIV); (c) international boundaries (BDY). In addition, Volume 1--North America contains a fourth file of internal boundaries (PDY) to further delineate the individual states of the USA and the provinces of Canada. World Data Bank II was digitized at scales ranging from 1:1 million to 1:4 million. Nominal scale is 1:3 million. A general user guide is included with each volume. This guide describes the physical format of the data contained on the magnetic tape. It further defines the breakdown of data within each of the three files into features and subordinate classifications/ranks. These ranks are hierarchically structured, and are used also for output plotting symbol definition. Additionally, the user guide contains a listing of the Fortran program used to convert the sequential tape data into formatted direct random access magnetic disk files as used by the Cartographic Automatic Mapping (CAM) Program, 5th Edition.

For related technical report, see PB-271 869/XDD.

Keywords: *Data file, *Mapping, Magnetic tapes, Fortran, *North America, *World data bank, Tape to disk conversion.

Availability: NTIS, CP T03, mag tape. Also available in set of 5 mag tapes. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-195 547/5/XDD

Magnetic Tape Record of the Wiswesser Line, Notations in the Desktop Analysis Tool for the Common Data Base.

Data file. The Wiswesser Line Notations for more than 20,200 of the chemical compounds in the Desktop Analysis Tool (Dat) for the Common Data Base (Cdb) (PB-179 900) are available. Record size is 210, block size is 3150, created on an IBM 360/50. The tape contains the Wln molecular formula in Hill format, and the Chemical Abstracts Services Registry number in ascending sequence for all compounds. The permuted index was prepared from this tape.

Keywords: *Data file, *Chemical compounds, Information retrieval, *Molecular structure, *Wiswesser chemical notation system, *Desktop analysis tool, Chemical Abstracts Services Registry.

Availability: NTIS, CP T03, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, Ebcidc, odd or even parity; or 9 track, 800bpi, Ebcidc, odd parity.

PB-196 085/5/XDD

Multiphasic Buffer Systems (Systems Output Tape No. 1).

Data file. Multiphasic buffer systems were designed for use in electrophoretic fractionation, particularly in polyacrylamide gel electrophoresis. They serve to concentrate the sample, provide thin starting zones and offer increased versatility in fractionation. The output tape set lists 4269 multiphasic buffer systems at 0.5 pH intervals between pH 5.0 and 11.0 at - polarity and between pH 2.5 and 9.0 at polarity, 0C and 25C. Tape No. 1 lists output of multiphasic

buffer systems between 2.5 and 9.0 at polarity, 0C (systems 1-691). The tape is 120 character printer image tape from an IBM 360/65 computer system.

For related technical reports, see PB-196 091/3/XDD, PB-196 090/5/XDD, PB-196 089/7/XDD, PB-259 309/XDD.

Keywords: *Data file, *Electrophoresis, *Buffers(Chemistry), *Polyacrylamides, *Gels, Distillation.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidc, odd parity.

PB-196 086/3/XDD

Multiphasic Buffer Systems (Systems Output Tape No. 2).

Data file. Multiphasic buffer systems were designed for use in electrophoretic fractionation, particularly in polyacrylamide gel electrophoresis. They serve to concentrate the sample, provide thin starting zones and offer increased versatility in fractionation. The output tape set lists 4269 multiphasic buffer systems at 0.5 pH intervals between pH 5.0 and 11.0 at - polarity and between pH 2.5 and 9.0 at polarity, 0C and 25C. Tape No. 2 lists the output of multiphasic buffer systems between 2.5 and 9.0 at polarity, 25C (systems 692-1578). The tape is a 120 character printer image tape from an IBM 360/65 computer system.

For related technical reports, see PB-196 091/3/XDD, PB-196 090/5/XDD, PB-196 089/7/XDD, PB-259 310/XDD.

Keywords: *Data file, *Electrophoresis, *Buffers(Chemistry), Input output routines, *Polyacrylamides, *Gels.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidc, odd parity.

PB-196 087/1/XDD

Multiphasic Buffer Systems (Systems Output Tape No. 3).

Data file. Multiphasic buffer systems were designed for use in electrophoretic fractionation, particularly in polyacrylamide gel electrophoresis. They serve to concentrate the sample, provide thin starting zones and offer increased versatility in fractionation. The output tape sets lists 4269 multiphasic buffer systems at 0.5 pH intervals between pH 5.0 and 11.0 at - polarity and between pH 2.5 and 9.0 at polarity, 0C and 25C. Tape No. 3 lists the output of multiphasic buffer systems between 5.0 and 11.0 at - polarity, 0C (systems 1579-2969). The tape is a 120 character printer image tape from an IBM 360/65 computer system.

For related technical reports, see PB-196 091/3/XDD, PB-196 090/5/XDD, PB-196 089/7/XDD, PB-259 311/XDD.

Keywords: *Data file, *Electrophoresis, *Buffers(Chemistry), Input output routines, *Polyacrylamides, *Gels, Distillation.

Availability: NTIS, CP T03, 2 reels mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcidc, odd parity.

PB-196 088/9/XDD

Multiphasic Buffer Systems (Systems Output Tape No. 4).

Data file. Multiphasic buffer systems were designed for use in electrophoretic fractionation, particularly in polyacrylamide gel electrophoresis. They serve to concentrate the sample, provide thin starting zones and offer increased versatility in fractionation. The output tape set lists 4269 multiphasic buffer systems at 0.5pH intervals between pH 5.0 and 11.0 at -polarity and between pH 2.5 and 9.0 at +polarity, 0C and 25C. Tape No. 4 lists the output of systems between 5.0 and 11.0 at -polarity, 25C (systems 2970-4269). The tape is a 120 character printer image tape from an IBM 360/65 computer system. **For related technical reports,** see PB-196 091/3/XDD, PB-196 090/5/XDD, PB-196 089/7/XDD, PB-259 312/XDD.

Keywords: *Data file, *Electrophoresis, *Buffers(Chemistry), Input output routines, *Polyacrylamides, *Gels, Distillation.

Availability: NTIS, CP T03, 2 reels mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd; or 9 track, 800bpi, Ebcdic, odd parity.

Principal Facts of About 64,000 Gravity Stations in the State of California.

Data file. The principal facts for about 64,000 gravity stations within the State of California are contained on this 9-track magnetic tape. Tape blocksize is 8000 with logical record lengths of eighty ASCII characters written at 1600 bpi density. The tape contains a leading explanatory file followed by 28 data files arranged by 1 degree by 2 degree sheets. The gravity datum is that of Woollard and Rose (1963) as used by Chapin (1966). The International Gravity Formula of 1930 is used. Airy-Heiskanen isostatic anomalies are included, computed for an average crustal thickness of 25 km, density of topography 2.67 g/cc and a lower crust-upper mantle density of 0.4 g/cc, in addition to complete Bouguer anomalies reduced at a density of 2.67 g/cc. Terrain corrections extend to 166.7 km from each station. The data from several sources are correct to the best of our abilities and resources, but may still contain discrepancies unknown to the authors.

For related technical report, see PB82-168279/XDD.

Aviation (Aircraft) Radio Station License Data Base.

Data file. The tape contains data for applicants and licensees operating under the Aviation Radio Service, and the primary information is obtained from FCC Form 404, 'Application for Aircraft Radio Station License'. Data records include station and license identification, mailing address (all items do not contain ZIP code), radiofrequency, issue and expiration dates, and various codes. The Aviation (Aircraft) Radio Service data base is converted from the UNIVAC III excess -3 code to a BCDIC (UNIVAC), 800 BPI, 7 track, odd parity tape. The base contains approximately 101,892 records of 948 characters in length, and 2 records per block.

Keywords: *Data file, *Radio communication, Licenses, Magnetic tapes, Radio stations, Radio operators, Radio frequencies, Aircraft.

Availability: NTIS, CP T99, 9 reels mag tape. Available in 7 or 9 track, 800bpi, Bcd, odd parity. Documentation available.

Antenna Survey Tower File.

Data file. The file contains data on all towers requiring FAA or FCC clearance. Data includes latitude, longitude, height above ground level, address of location, FCC file no., FAA docket no., painting & lighting specifications.

Keywords: *Data file, Radio towers, *Radio communication, *Antennas, Surveys, Clearances, Power, Magnetic tapes, Antenna masts.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-272 995/2/XDD

FCC Citizen's Master File, Call Sign Sequence.

Data file. The file contains data for applicants and licensees operating under the FCC citizen's radio service. The primary information is obtained from FCC Form 505, 'Application for Class C or D Station License in the Citizen Radio Service.' Data records include station and license identification, mailing address (.5% do not have Zip code), radio frequency, issue and expiration dates and various codes. The file has been converted into the EBCDIC character code and is available in a variety of recording modes. The entire data base contains over 12 million licensees in 192 character records on magnetic tape.

Keywords: *Data file, *Radio communication, Licenses, Radio stations, Ultrahigh frequencies, Magnetic tapes, *Citizens band radio.

Availability: NTIS, CP T99, mag tape*. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Broadcast AM Data Base (Sometimes Called AM Engineering Data Base).

Data file. The AM Update System is designed to maintain and update the AM Engineering Data Base, which is used to support the AM Channel Studies. The system is presently confined to nighttime notified AM Radio Stations. The data contained in the data base file of the AM data base is derived from form 301, (Application for authority to construct a new broadcast station or make changes in an existing broadcast station), submitted by all AM licensees/permittees, and notification lists submitted under NARBA and MEXICAN agreements. The data covers the operating parameters of the AM stations, i.e., frequency, transmitter location, power, etc. The engineering data of the stations are compared against the data of all stations of the same operating frequency for possible interference with each other.

Keywords: *Data file, *Radio communication, Amplitude modulation, Radiofrequency interference, Radio broadcasting, Magnetic tapes, Fortran, Cobol, Honeywell-6023 computers.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-238792/XDD**Amateur Radio Service Master File Updates.**

Data file. The data tape contains records for Amateur Radio Service licensees who were issued authorizations during a semi-weekly update cycle. Content and format of the file is the same as the Amateur Radio Service master product, that is, station and licensee name, location, issue and expiration dates, etc. are included. Source of data is generally FCC Form 610 'Application for Individual Amateur Radio Station and/or Operator License.' The file contains only additions and changes to the master file and is not the master file itself. Change records are limited to those requiring a new license to be issued (approximately 95% of changes).

Keywords: *Data file, *Licenses, *Radio communication, Magnetic tapes, Amateur radio.

Availability: NTIS, CP T99, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price.

PB81-247710/XDD**Cable Television Physical (Trunk) Data File.**

Data file. A data base of technical information about the services provided to the cable communities. Contains information pertaining to signal carriage and distribution, communities served, and auxiliary cable services performed. This study by aggregating the Cable communities served by individual technical entities, identifies the complete cable system.

Keywords: *Data file, Closed circuit television, Telecommunication, Distribution systems, Magnetic tapes, *Cable television, *Television broadcasting.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-105735/XDD**FCC Decisions Data File (Vols. 67-81).**

Data file. This data file contains the full text data of FCC decisions. These are transcripts of actual hearings/decisions for the period January 13, 1978 through November 21, 1980 (Volumes 67 through 81). This data is published as hard copy volumes of the Federal Communications Commission Reports.

Keywords: *Data file, *Telecommunication, Public administration, *Regulations, Decisions, Magnetic tapes, *Communications management, Federal Communications Commission.

Availability: NTIS, CP T99, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price.

PB82-132176/XDD

FCC Decisions Data File, Volumes 23-30.

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132184/XDD

FCC Decisions Data File, Volumes 31-38.

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132192/XDD

FCC Decisions Data File, Volumes 39-46.

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132200/XDD

FCC Decisions Data File, Volumes 47-54.

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing

Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132218/XDD

FCC Decisions Data File, Volumes 15-22.

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132226/XDD

FCC Decisions Data File, Volumes 6-14.

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132234/XDD

FCC Decisions Data File, Volume 55.

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording

mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132242/XDD**FCC Decision File, Volume 87.**

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-132275/XDD**FCC Decisions Data File, Volumes 1-5.**

Data file. Data consists of decisions rendered by the Federal Communications Commission during Hearing Proceedings. Decisions are those that are primarily in the areas of communication and broadcasting, and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, Decisions, *Regulations, *Communications management, Public administration, Magnetic tapes, Federal Communications Commission, *Telecommunication.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-134917/XDD**FCC Broadcast FM Data Base.**

Data file. The Broadcast FM Data Base contains records for existing and proposed stations, allocations, rulemaking petitions/proposals, and translator/boosters. The data base is converted from Honeywell system standard format, BCD to EBCDIC, 1600 bpi, 9 track, odd parity tape, on the Honeywell H-6023. The data base contains approximately 10,565 records of 300 characters in length, 10 records per block.

Keywords: *Data file, Radio broadcasting, *Radio communication, Radio stations, Frequency allocations, Frequency modulation, Engineering, Regulations, Licenses, Magnet tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-134925/XDD**Broadcast TV Data Base.**

Data file. The Broadcast TV Data Base contains records for existing and proposed stations, allocations,

and rulemaking petitions/proposals. The data base is converted from Honeywell system standard format BCD, to EBCDIC, 1600 bpi, 9 track, odd parity tape, on the Honeywell H-6023. The data base contains approximately 9175 records of 360 characters, 1 record per block.

Keywords: *Data file, *Television broadcasting, Television stations, Frequency allocations, Licenses, Regulations, Magnet tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB32-145186/XDD**FCC Frequency Data Base.**

Data files. The FCC Frequency Data Base contains records reflecting type of service, call sign, station and licensee identification, location, radio frequency, mailing address (all items do not contain complete mailing address), issue and expiration dates, and various other codes and data elements. The data base is maintained on disk in standard Honeywell ISP format and is copied to tape in Honeywell system standard format, 1600 bpi, 9 track, odd parity, using the standard Honeywell BCD character set. The data base contains 2,394,038 records of 33 to 528 characters. The data base contains data for the following radio services: Aviation Land, Broadcast Auxiliary, Broadcast, Common Carrier (Fixed Public), Common Carrier (Land Mobile), Experimental, Industrial (Business), Industrial (Special), Industrial (Other), Land Transportation, Marine (Alaska), Marine (Other), Public Safety (Police), Public Safety (Other), and General.

Keywords: *Data file, *Frequency allocations, *Radio communication, *Licenses, Magnetic tapes, Federal Communications Commission.

Availability: NTIS, CP T99, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price.

PB82-149915/XDD**FCC Decision File (Weekly).**

Data file. Data consists of decisions rendered by the Federal Communications Commission during hearing proceedings. Decisions are those that are primarily in the areas of communications and broadcasting and are limited to FCC's rulings. Hard copy form of this data is produced as FCC Reports.

Keywords: *Data file, *Telecommunication, Communications management, Public administration, *Regulations, Decisions, Magnetic tapes, *Communications management, Federal Communications Commission.

Availability: NTIS, CP T01, mag tape. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

Field 20—COMMUNICATIONS

PB82-157348/XDD

Broadcast Applications Address List.

Data file. The Broadcast Applications Processing (BAPS) Address Label Data contains addresses for all the AM, FM, and TV licensees in the BAPS Data Base.

Keywords: *Data file, *Radio communication, *Television broadcasting, *Licenses, Amplitude modulation, Frequency modulation, Magnetic tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-168238/XDD

Common Carrier Microwave Antenna, Licensee, and Transmitter File.

Data file. Contains identification and operating characteristics of transmitters of acceptable type and of antennas used at Common Carrier Microwave Stations. It also contains names and addresses of licensees of Common Carrier Microwave Stations.

Keywords: *Data file, *Microwave communication, *Radio communication, Common carriers, *Licenses, Magnetic tapes, *Antennas.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

PB82-176397/XDD

Microwave Applications Processing Systems Data Base.

Data file. This tape contains station and antenna location information, signal path information and technical operating characteristics of Microwave radio stations licensed by the Safety & Special Radio Services Bureau of the FCC.

Keywords: *Data file, *Radio communication, *Microwave communications, Microwave antennas, Position(Location), Magnetic tapes.

Availability: NTIS, CP T14, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB82-179045/XDD

Cable Television EEO Data File.

For complete citation, see 9 Health Care.

PB82-179235/XDD

Cable Television Community Unit System (CATV1).

Data file. File No. 1 - The Cable Television Community Unit File contains data for each community served by each cable television system (franchise),

including the call sign for each TV station (up to 30) whose programming is distributed via the system. The address (no zip code) of the local community operating facility is available in each record; however, the business mailing address of the parent cable television system is not present but is available via linkage to the associated Cable Television Mail Address File. Additional data relative to participating TV stations is available via linkage to the associated Cable Television TV Station File. File one contains 16,674 records of 1,176 characters each. File No. 3 - The Cable Television Station File contains data for each U.S. TV broadcast station and those Canadian and Mexican TV stations likely to be carried on U.S. Cable Television Systems. Records reflect data for batch current and past call signs; records for those call signs that have been replaced by a new call sign contain the new call sign. Station data is limited to call sign, effective/termination dates, channel number, city, state, TV network, and station specifics. This file is a subsidiary file of the Cable Television Community Unit File. File 3 contains 2,265 records of 210 characters each. File No. 2 - The Cable Television Mail Address File contains the business mailing address for each major cable television entity, but does not contain the name of the entity. This file is a subsidiary file of the Cable Television Community Unit file as well as other cable television data bases. File two contains 4,755 records of 60 characters each.

Keywords: *Data file, Closed circuit television, Licenses, Television stations, Magnetic tapes, *Cable television.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-191578/XDD

Amateur Radio Service Master File.

Data file. These tapes contain data for licensees operating under the Amateur Radio Service, and the primary information is obtained from FCC Form 610 'Application for Individual Amateur Radio Station and/or Operator License' and FCC Form 610B, 'Application for Amateur Club or Military Recreation Station License.' Data records include station and license identification, mailing address (all items do not contain Zip code), radio frequency, issue and expiration dates, and various codes. The Amateur Radio Service data base is recorded in EBCDIC CHARAC. SET on 1600BPI, 9 track, odd parity tape. The data is recorded in Honeywell System Standard Format. All data blocks are 300 characters in length. The data base contains approximately 400,000 records of data characters.

Keywords: *Data file, *Radio communication, *Licenses, Magnetic tapes, Amateur radio.

Availability: NTIS, CP T19, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-191602/XDD

TV Programming Data Master File.

Data file. The TV Programming Data Master File contains information filed on FCC Form 303-A by all commercial television licensees/permittees.

Keywords: *Data file, *Television broadcasting, Television stations, Magnetic tapes, *Licenses.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-191784/XDD

GWAVE - Data Files and FORTRAN Routine.

Data file. GWAVE is an FCC computer program which computes and plots service/coverage areas for AM broadcast stations. This magnetic tape contains 23 data files and a FORTRAN routine. The data files are used by GWAVE to compute the extent of the service area. The FORTRAN routine is for loading the sequential Region 2 Conductivity Data Base as a random (direct access) file. The complete GWAVE program is available directly from the FCC.

Keywords: *Data file, *Radio communication, Amplitude modulation, Radio broadcasting, Fortran, Magnetic tapes, GWAVE computer program, Service area.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-191867/XDD

Cable Television Community Unit System.

Data file. File No. 1 - The Cable Television Community Unit File contains data for each community served by each cable television system (franchise), including the call sign for each TV station (up to 30) whose programming is distributed via the system. The address (no zip code) of the local community operating facility is available in each record; File No. 3 - The Cable Television Station File contains data for each U.S. TV broadcast station and those Canadian and Mexican TV stations likely to be carried on U.S. Cable Television Systems. File No. 2 - The Cable Television Mail Address File contains the business mailing address for each major cable television entity, but does not contain the name of the entity.

Keywords: *Data file, Licenses, Television stations, Magnetic tapes, *Television broadcasting, *Cable television.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-191982/XDD

Broadcast Equal Employment Opportunity Log Master File (Formerly Broadcast Log Master File).

Data file. Contains records reflecting call sign, station name, city, state, and zip code for licensed radio and TV broadcast facilities. This file also contains Equal Employment Opportunity information for each of these facilities.

Keywords: *Data file, *Radio communication, *Television broadcasting, *Licenses, Magnetic tapes, *Equal opportunity, Honeywell 6600 computers.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-112 524/XDD

Citizens Radio Service: Master File

Data file. The file contains information such as call sign, name, address, class of station, station location, number of transmitters, authorization dates, etc. for every person or organization licensed by the FCC, Safety & Special Radio Services Bureau to operate a Citizens Radio Service (CB) radio station. Source of data is normally FCC Form 505: Application for Station License in the CB or R/C (Radio Control) Service, submitted by persons or organizations desiring such a license.

Keywords: *Data file, Licenses, *Radio communication, Radio stations, Magnetic tapes, *Citizens band radio.

Availability: NTIS, CP T99, mag tape*. Source tape is in Honeywell BCD character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-116327/XDD

FCC Microwave MEANS to MELF Conversion File: Common Carrier City.

Data file. The purpose of the microwave engineering link file is to characterize the electromagnetic microwave environment. Each record represents a link (the frequency path from transmitter to receiver including all passive repeaters). A record consists of a transmitter subrecord, Receiver subrecord, and up to four passive repeater subrecords.

Keywords: *Data file, *Microwave communication, *Radio communication, Electromagnetic environments, Urban areas, Common carriers, Magnet tapes.

Availability: NTIS, CP T13, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Field 20—COMMUNICATIONS

PB83-116335/XDD

FCC Microwave MEANS to MELF Conversion File: Private Radio County.

Data file. The purpose of the microwave engineering link file is to characterize the electromagnetic microwave environment. Each record represents a link (the frequency path from transmitter to receiver including all passive repeaters). A record consists of a transmitter subrecord, Receiver subrecord, and up to four passive repeater subrecords.

Keywords: *Data file, *Microwave communication, *Radio communication, Electromagnetic environments, Rural areas, Magnetic tapes.

Availability: NTIS, CP T04, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-116343/XDD

FCC Microwave MEANS to MELF Conversion File: Private Radio City.

Data file. The purpose of the microwave engineering link file is to characterize the electromagnetic microwave environment. Each record represents a link (the frequency path from transmitter to receiver including all passive repeaters). A record consists of a transmitter subrecord, Receiver subrecord, and up to four passive repeater subrecords.

Keywords: *Data file, *Microwave communication, *Radio communication, Electromagnetic environments, Urban areas, Magnetic tapes.

Availability: NTIS, CP T05, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-118968/XDD

GWAVE - Data Files and FORTRAN Routine.

Data file. GWAVE is an FCC computer program which computes and plots service/coverage areas for AM broadcast stations. This magnetic tape contains 23 data files and a FORTRAN routine. The data files are used by GWAVE to compute the extent of the service area. The FORTRAN routine is for loading the sequential Region 2 Conductivity Data Base as a random (direct access) file. The complete GWAVE program is available directly from the FCC.

Keywords: *Data file, *Radio broadcasting, Ground wave propagation, Fortran, Magnetic tapes, Conductivity, GWAVE computer program, Service areas.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-148692/XDD

Marine Data Base.

Data file. Contains data for applicants and licensees operating under the Marine (Telephone) Radio Serv-

ice. The primary information is obtained from FCC Form 502, Application for Ship Radio Telephone and/or Radio Navigation Station License. Data records include station and license identification, mailing address (all items do not contain Zip Code), radio frequency, issue and expiration date, and various codes.

Keywords: *Data file, Radiotelephones, Licenses, Radio stations, Ships, Magnet tapes, *Radio communication, Marine radio, *Telephone systems.

Availability: NTIS, CP T99, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-154906/XDD

Statistics of Communications Common Carrier, 1977.

Data file. This is a print tape of the 1977 edition of the 'Statistics of Communications Common Carrier' compiled by the Common Carrier Bureau of the FCC. This issue contains financial and operating data for the year 1977. This information was taken principally from annual and monthly reports filed by the Carrier with the Federal Communications Commission.

Keywords: *Data file, *Common carriers, Statistical data, *Telecommunication, Magnetic tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-154914/XDD

Statistics of Communications Common Carrier, 1980.

Data file. This is a print tape of the 1980 edition of the 'Statistics of Communications Common Carrier' compiled by the Common Carrier Bureau of the FCC. This issue contains financial and operating data for the year 1980. This information was taken principally from annual and monthly reports filed by the Carrier with the Federal Communications Commission.

Keywords: *Data file, *Common carriers, Statistical data, *Telecommunication, Magnetic tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-154922/XDD

Statistics of Communications Common Carrier, 1978.

Data file. This is a print tape of the 1978 edition of the 'Statistics of Communications Common Carrier' compiled by the Common Carrier Bureau of the FCC. This issue contains financial and operating data for the year 1978. This information was taken principally

from annual and monthly reports filed by the Carrier with the Federal Communications Commission.

Keywords: *Data file, *Common carriers, Statistical data, *Telecommunication, Magnetic tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-154930/XDD

Common Carrier Land Mobile Base Station Data Base.

Data file. The file contains data provided by common carriers in the Land Mobile Base Station Industry. The data is categorized under three phases: pending, under construction, and licensed. Each applicant/communication system is described according to ownership, location data, antenna data, transmitter data, and then relationship(s). The system generates Construction Permits, Station File Jackets, Licenses, and a monthly Data Base Listing.

Keywords: *Data file, *Radio communication, Licenses, *Common carriers, Magnetic tapes, Land mobile radio.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Cable Television Community Unit System, 1981 (CATV1).

Data file. File No 1 - The Cable Television Community Unit File contains data for each community served by each cable television system (franchise), including the call sign for each TV station (up to 30) whose programming is distributed via the system. The address (no zip code) of the local community operating facility is available in each record. File No 3 - The Cable Television Station File contains data for each U.S. TV broadcast station and those Canadian and Mexican TV stations likely to be carried on U.S. Cable Television Systems. File No 2 - The Cable Television Mail Address File contains the business mailing address for each major cable television entity, but does not contain the name of the entity. This file is a subsidiary file of the Cable Television Community Unit file as well as other cable television data bases. File two contains 5,192 records of 60 characters each.

Keywords: *Data file, Communities, *Television broadcasting, Licenses, Magnetic tapes, *Cable television, Franchising.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording

mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-178392/XDD

Master Frequency Data Base (Mass Media Services).

Data file. The data base contains administrative and technical data elements on authorizations granted by the FCC. The key record types and elements for each authorization are as follows: ADMINISTRATIVE-Licensee name, mailing address, radio service, type of authorization, and issue and expiration dates. FREQUENCY-Emissions, power, frequency, gain, azimuth, and path length. TRANSMITTER-Location description/address, coordinates, class of station, ground elevation radius of operation, and antenna make/model/heights. RECEIVER-Location description/address, coordinates, ground elevation, and antenna make/model/heights. The Mass Media Services portion of the data base contains approximately 228 thousand records.

Keywords: *Data file, *Radio communication, Licenses, Radio stations, Frequency allocations, Magnetic tapes, Mass media radio services.

Availability: NTIS, CP T05, mag tape. Also available in set of 5 mag tapes CP T99, PB83-178442. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-178400/XDD

Master Frequency Data Base (Common Carrier Services).

Data file. The data base contains administrative and technical data elements on authorizations granted by the FCC. The key record types and elements for each authorization are as follows: ADMINISTRATIVE-Licensee name, mailing address, radio service, type of authorization, and issue and expiration dates. FREQUENCY-Emissions, power, frequency, gain, azimuth, and path length. TRANSMITTER-Location description/address, coordinates, class of station, ground elevation radius of operation, and antenna make/model/heights. RECEIVER-Location description/address, coordinates, ground elevation, and antenna make/model/heights. The Common Carrier Services portion of the data base contains approximately 298 thousand records.

Keywords: *Data file, *Radio communication, Licenses, Radio stations, Common carriers, Frequency allocations, Magnetic tapes, Common carrier radio services.

Availability: NTIS, CP T05, mag tape. Also available in set of 5 mag tapes CP T99, PB83-178442. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Master Frequency Data Base (Experimental Service).

Data file. This data base contains administrative and technical data elements on authorizations granted by the FCC. The key record types and elements for each authorization are as follows: ADMINISTRATIVE-Licensee name, mailing address, radio service, type of authorization, and issue and expiration dates. FREQUENCY-Emissions, power, frequency, gain, azimuth, and path length. TRANSMITTER-Location description/address, coordinates, class of station, ground elevation radius of operation, and antenna make/model/heights. RECEIVER-Location description/address, coordinates, ground elevation, and antenna make/model/heights. The Experimental Service portion of the data base contains approximately 10 thousand records.

Keywords: *Data file, *Radio communication, Licenses, Radio stations, Frequency allocations, Magnetic tapes, Experimental radio services.

Availability: NTIS, CP T03, mag tape. Also available in set of 5 mag tapes CP T99, PB83-178442. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-178434/XDD

Master Frequency Data Base (Cable Services).

Data file. The data base contains administrative and technical data elements on authorizations granted by the FCC. The key record types and elements for each authorization are as follows: ADMINISTRATIVE-Licensee name, mailing address, radio service,

type of authorization, and issue and expiration dates. FREQUENCY-Emissions, power, frequency, gain, azimuth, and path length. TRANSMITTER-Location description/address, coordinates, class of station, ground elevation radius of operation, and antenna make/model/heights. RECEIVER-Location description/address, coordinates, ground elevation, and antenna make/model/heights. The Cable Services portion of the data base contains approximately 291 thousand records.

Keywords: *Data file, *Radio communication, Licenses, Radio stations, Frequency allocations, Magnetic tapes, Cable radio services.

Availability: NTIS, CP T05, mag tape. Also available in set of 5 mag tapes CP T99, PB83-178442. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-178483/XDD

Cable Television Physical (Trunk) Data File, 1980.

Data file. A data base of technical information about the services provided to the cable communities. Contains information pertaining to signal carriage and distribution, communities served, and auxiliary cable services performed. This system, by aggregating the Cable communities served by individual technical entities, identifies the complete cable system.

Keywords: *Data file, Services, Telecommunication, Magnetic tapes, *Cable television, *Television broadcasting.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-180667/XDD

Cable Television EEO Data File, 1981.

Data file. A data base of information collected annually from Cable TV System operators. It contains employment figures based on SEX, ETHNIC TYPE and JOB CLASSIFICATION divisions for full time, part time and on the job training employees. The totals of full time and part time employees for each ethnic type and job classification is calculated as is the total of all full time employees.

Keywords: *Data file, Closed circuit television, Personnel, Employment, Magnetic tapes, *Equal opportunity, *Cable television, *Television broadcasting.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-192922/XDD

Cable Television Community Unit System (CATV1) 1980.

Data file. The Cable Television Community Unit File contains data for each community served by each

cable television system (franchise), including the call sign for each TV station (up to 30) whose programming is distributed via the system. The address (no zip code) of the local community operating facility is available in each record; however, the business mailing address of the parent cable television system is not present but is available via linkage to the associated Cable Television Mail Address File. Additional data relative to participating TV stations is available via linkage to the associated Cable Television TV Station File.

Keywords: *Data file, Licenses, *Television broadcasting, Magnet tapes, *Cable television.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-195552/XDD

Statistics of Communications Common Carrier, 1981.

Data file. This is a print tape of the 1981 edition of the 'Statistics of Communications Common Carrier' compiled by the Common Carrier Bureau of the FCC. This issue contains financial and operating data for the year 1981. This information was taken principally from annual and monthly reports filed by the Carrier with the Federal Communications Commission.

Keywords: *Data file, *Telecommunication, *Common carriers, Statistical data, Financing, Operations, Magnet tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-195560/XDD

Common Carrier Earth Station Application File.

Data file. The tape contains the Common Carrier Earth Station Application File used by the Common Carrier Bureau in processing applications for licenses and permits. It consists of 5,038 applications at this time. Each application is made up of 5 records containing such information as the status of the station, identification information, technical information, frequency information and any special provisions.

Keywords: *Data file, *Common carriers, *Radio communication, Licenses, Magnet tapes, Ground stations, Satellite communications.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-220855/XDD

Telephone Companies Docket CC 80-286. Separations Data.

Data file. The file contains 802 observations on the operations of individual telephone companies in each state. It is based on voluntary information requests

which were conducted in January and August 1982 and covers operations for 1980. The information was collected as part of an inquiry regarding proposed changes in the separations procedure for allocating non-traffic-sensitive costs between intrastate and interstate service. Included are data on costs and factors which might affect costs. This data is being used by the FCC to analyze potential high cost factors in a proposed new access cost factor formula in Docket CC 80-286. There are 54 variables in the file.

Keywords: *Data file, *Common carriers, *Telephone systems, Operating costs, Cost estimates, Magnetic tapes.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-220889/XDD

Amateur Radio Service Master File.

Data file. These tapes contain data for licensees operating under the Amateur Radio Service, and the primary information is obtained from FCC Form 610 'Application for Individual Amateur Radio Station and/or Operator License' and FCC Form 610B, 'Application for Amateur Club or Military Recreation Station Recreation.' Data records include station and license identification mailing address (all items do not contain Zip code), radio frequency, issue and expiration dates, and various codes.

Keywords: *Data file, *Radio communication, *Licenses, Magnetic tapes, Amateur radio.

Availability: NTIS, CP T18, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-223750/XDD

Radio Equipment Acceptance File.

Data file. This file contains entries for radio equipment that is considered acceptable for licensing and that has met technical standards to minimize harmful interference on radio channels.

Keywords: *Data file, *Radio equipment, Acceptability, Radiofrequency interference, Magnetic tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB84-104132/XDD

Directional Antenna Data Base.

Data file. The Directional Antenna Data Base is used in conjunction with the TV Engineering Data Base. The TV Engineering Data Base contains basic engineering information about each station, such as channel, power, coordinates, etc. Included is an indication of whether the station operates with a directional antenna pattern. The Directional Antenna Data Base is used to contain a tabulation of the directional pattern for each make and model of directional antenna in the TV Engineering Data Base. There should be a record containing the pattern in the Directional Antenna Data Base for each make and model contained in the TV Engineering Data Base. By designing the two data bases in this fashion, we can have several stations with the same make and model of directional antenna, but need to store the antenna pattern only once. This file is kept current on a monthly basis.

Keywords: *Data file, Television broadcasting, Directional antennas, Antenna radiation patterns, Magnet tapes, *Antennas.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB84-104173/XDD

Aeronautical Frequency Lists and Geographic Location of Radio Stations Operating Near Frequencies Commonly Used by Cable Television Systems.

Data file. This report contains lists and geographic locations of aeronautical radio stations operating near frequencies commonly used for visual, aural, or pilot carriers by cable television systems. These lists are provided to assist cable television system operators in determining whether they must adjust their frequencies or take other action to comply with FCC rules (Section 76.510 and 76.611) prohibiting cable use of certain frequencies in case of conflict with aeronautical radio use of those frequencies.

Keywords: *Data file, *Radio communication, Frequency allocations, Closed circuit television, Electromagnetic compatibility, Regulations, Magnet tapes, Aeronautical radio, Cable television.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Enhanced Microwave Environmental Link File.

Data file. This data base contains all non-government assignments above 942 MHz as recorded in the Commission's Cross Bureau Frequency System (XFS) data base. The XFS data base is the consolidated data base of licensed stations in all bands. The data is recorded on a link-by-link basis. A link is defined as a simplex communications circuit between two points utilizing a single frequency/polarization assignment. A duplex communication circuit would require two links, one link in each direction. There are approximately 225,000 links in the data base. Each link is defined by up to four groupings of card sets. These sets are defined by the character in the first column of each card, i.e. A for administrative data set, T for transmitter data set, R for receiver data set, and P for passive repeater data set.

Keywords: *Data file, *Frequency allocations, *Microwave communication, Radio links, Magnetic tapes.

Availability: NTIS, CP T03, mag tape. Source tape is in the EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

NTIS/DF-73/004/XDD

NTIS Bibliographic Data Base (Government Reports Announcements).

Data file. The bibliographic data base of the National Technical Information Service is available for lease. The file contains all current abstracts of Government-sponsored research and analyses, from which the periodicals Weekly Government Abstracts, Government Reports Announcements, and Government Reports Index are prepared. Current issue tapes are released on a bi-weekly basis. Back issues are available from July 1, 1964 thru current year. The files are in the NTIS version of the COSATI Implementation of the Draft Ansi Standard (Z39.2-1968) for a Format for Bibliographic Information Interchange on Magnetic Tape. The character code is convertible to the standard Ascii code (columns 2, 3, 4, 5), with four exceptions, by adding hex 20 to each six-bit code. (Binary zero is a legal code - thus the file can be written only as odd parity with NTIS IBM equipment). For testing purposes, copies of the most recently available updated issue tape (currently for the updated GRA volume) may be ordered separately. Specify desired track and density and odd parity.

Keywords: *Data file, Bibliographies, Research projects, Information systems, Abstracts, *Bibliographic data bases, Government sponsored research.

Availability: NTIS, CP T99, mag tape. Contact National Technical Information Service, Computer Products Office, Springfield, Va.

22161, concerning availability. 26 reels/year; specify tape recording mode desired: 7 track, 556 or 800bpi, even or odd parity, Bcd; or 9 track, 800bpi, Ebcidc, odd parity.

People's Republic of China Bibliography of Literature Written During the Campaign to Criticize Lin Piao and Confucius, July 1973-December 1974.

Data file. This file was prepared for the use of US government officials. The format, coverage and contents of the file are designed to meet the specific requirements of governmental users. This file is a selective bibliography of English translations of articles written in the People's Republic of China from July 1973 through December 1974 during the Campaign to Criticize Lin Piao and Confucius. Articles that seemed either authoritative or potentially influential in determining the course of the campaign were selected for this file. In general, articles written by representatives of the masses and low-level officials

SCIENCE AND TECHNOLOGY

Field 21—COMPUTER, LIBRARY, AND INFORMATION SCIENCES

of the government, the People's Liberation Army and the Chinese Communist Party were not included. Provided for each entry in the file is: name of the author (in Wade-Giles romanization); primary and secondary sources with publication date and source of the English translation; trigraph of the province and name of the city in which the article was published or broadcast; date of publication of the article selected for translation and title of the article with brief descriptive notes, where needed. The abbreviations used in this file are the standard abbreviations for the Hong Kong press surveys and those used in the reference aid appearances and activities of leading personalities of the people's republic of China (A(CR)75-10). A list of source abbreviations and expansion table for abbreviated locations is attached to this sheet. A more detailed explanation of format and selection criteria appears in the CIA Reference Aid of the same title numbered A(CR) 75-40, October 1975, available from the Document Expediting (DOCEX) Project, Exchange and Gift Division, Library of Congress, Washington, D. C. 20540. The publication contains two print formats of the data in this file, one arranged by author, the other by date of publication. Excluded from it are provincial trigraphs. Also attached are computer record information and graph.

Keywords: *Data file, Foreign government, *China, Political intelligence, Personnel, Data, Newsprint, Translations, Magnetic tapes, *Bibliographies.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 556 or 800 bpi, odd or even parity, BCD. Documentation available.

Index to Selected Articles from the FBIS People's Republic of China Daily Report, August 1970-June 1975.

Data file. This file provides an index to about 25 percent of the articles included in the FBIS People's Republic of China Daily Report from August 1970-June 1975. (Until October 15, 1971 the Daily Report was entitled Communist China Daily Report.) The Daily Report is available by subscription from NTIS. The general criteria for selection of the items are as follows: major national and provincial conferences; major political and military organizations; important political or propaganda campaigns; foreign relations or policy texts of major political pacts or agreements; pertinent information on scientific, education, economic, and plant facilities or subjects; and rallies of an important nature. Provided for each entry in the file is the document number, title of the article, date of publication, numeric subject codes, provincial or country trigraph, location or city names, and pertinent keywords from the article.

For related technical reports, see PB-249 796/XDD, PB-249 797/XDD.

Keywords: *Data file, *China, *Indexes(Documentation), *Periodicals, Meetings, Organizations, Propaganda, Political objectives, Magnetic tapes, Foreign policy, Intelligence, Subject indexing, Information sciences, Information retrieval, Peoples Republic of China Daily Report.

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard

7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-263 925/0/XDD

Contribution to Computer Typesetting Techniques. 9 Track ASCII.

Data file. This tape consists of two files. The first file contains tables of coordinates which make it possible to generate 1377 different alphabetic and graphic characters on either COM devices or on digital plotters. The characters can be generated on vector plotters by connecting the points given in these tables. This method of digitizing graphic arts characters allows them to be generated on any device which can plot vectors of arbitrary length and direction. The tables are those published in NTIS documentation PB-251 845 entitled: 'A Contribution to Computer Typesetting Techniques: Tables of Coordinates for Hershey's Repertory of Occidental Type Fonts and Graphic Symbols.' A copy of this publication is included in this tape package.

For related technical report, see PB-251 845/XDD.

Keywords: *Data file, *Composing, Plotters, Graphic methods, Magnetic tapes, Typography, Computer output microfilm, Computer applications, *Typesetting, Type fonts, Hershey character set.

Availability: NTIS, CP T05, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB-263 926/8/XDD

Contribution to Computer Typesetting Techniques, 7 track BCD.

Data file. This tape contains two files. The first file contains tables of coordinates which make it possible to generate 1377 different alphabetic and graphic characters on either COM devices or on digital plotters. The characters can be generated on vector plotters by connecting the points given in these tables. This method of digitizing graphic-arts characters allows them to be generated on any device which can plot vectors of arbitrary length and direction.

For related technical report, see PB-251 845/XDD.

Keywords: *Data file, *Composing, Plotters, Graphic methods, Magnetic tapes, Typography, Computer output microfilm, Computer applications, *Typesetting, Type fonts, Hershey character set.

Availability: NTIS, CP T05, mag tape. Source tape is in BCD character set. Character set restricts preparation to 7 track, one-half inch tape only. Identify recording mode by specifying density and parity only. Call NTIS Computer Products, if you have any questions. Price includes documentation.

PB-264 172/8/XDD

Information Economy.

Data file. This file contains the underlying database used by the Office of Telecommunications during its research into the information sector of the national

SCIENCE AND TECHNOLOGY

COMPUTER, LIBRARY, AND INFORMATION SCIENCES—Field 21

economy. The data include input-output tables at the 108 and 190 industry level; and the corresponding A-coefficient and Inverse matrices. Industry by Occupation employee compensation tables, for the years 1967 and 1970, are also included. These tables contain detail for 422 occupations and 108 industries. The tape is fully documented in 'User's Guide to the Complete Database (On Magnetic Tape)', Office of Telecommunications Special Report 77-12-9.

For related technical report, see PB-264 173/XDD.

Keywords: *Data file, *Information systems, National government, Econometrics, Telecommunication, Statistical data, Input, Output, Industries, Models, Economic surveys, Matrix methods, Magnetic tapes, Job analysis, Employment, Computer programming, Salaries, *Economic analysis, Data bases, Occupations, Geocoding(United States).

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have question. Price includes documentation.

Index to Selected Articles from the FBIS 'People's Republic of China Daily Report', July 1975-October 1978.

Data file. This file was prepared for the use of US government officials. The format, coverage, and contents of the file are designed to meet the specific requirements of governmental users. This file provides an index to about 25 percent of the articles included in the FBIS People's Republic of China Daily Report from July 1975-October 1978. The Daily Report is available by subscription from NTIS. The general criteria for selection of the items are as follows: major national and provincial conferences; major political and military organizations; important political or propaganda campaigns; foreign relations or policy; texts of major political pacts or agreements; pertinent information on scientific, education, economic subjects or installations; and rallies of an important nature. Provided for each entry in the file is the document number, title of the article, date of publication, numeric subject codes, provincial or country trigraph, location or city names, and pertinent keywords from the article.

Congressional Sourcebook Series (CSS) Data Base Source and Systems File.

Data file. The Congressional Sourcebook Series (CSS) Data Base is produced by the General Accounting Office (GAO). There are two files in the CSS data base. Each file is reissued once a year with no updates. The files are as follows: Requirements for Recurring Reports File - Describes the various requirements for recurring reports to the Congress from the Executive, Legislative, and Judicial Branches of the Federal Government. There are approximately 2,000 citations in this file. Federal Information Sources and Systems File - Describes approximately 1,500 Federal sources and systems maintained by executive agencies, which contain fiscal, budgeting, and program related information.

Keywords: *Data file, *Data sources, *Information systems, National government, Federal budgets, Projects, Data acquisition, Magnetic tapes, Information services, *Reporting, Agencies, Data bases.

Availability: NTIS, CP T99, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price. Also available in set of 2 mag tapes PC E99, PB81-132722.

PB81-132748/XDD

PB81-203043/XDD

Patent Classification File.

Data file. The file cross-references patent classifications and sub-classes to patent numbers. The file includes all patents issued by the U.S. Patent and Trademark Office citing over 4 million patents. The file is completely updated and reissued every six months, usually at the end of June and the end of December.

Keywords: *Data file, *Classifications, Subject indexing, Magnetic tapes, *Patents, *Inventions, Patent classifications, NTIS-COMPTO.

Availability: NTIS, CP T99, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price.

PB81-208050/XDD

Patent Full Text File.

Data file. The file contains full text information on United States patents issued since 1970. The file does not include drawings or molecular configura-

SCIENCE AND TECHNOLOGY

COMPUTER, LIBRARY, AND INFORMATION SCIENCES—Field 21

tions of chemical patents. The Full Text includes patent numbers, patent classifications, inventor's name, organizational names and patent titles. The retrospective years 1970, 1971, 1972, and 1973 do not have all the patents issued in those respective years because this was a test period of having issued patents in magnetic tape. Each year after 1970 progressively included additional patents until all patents were included beginning about 1974.

Keywords: *Data file, Documentation, *Inventions, Organizations, Magnetic tapes, *Patents, Patenting, NTISCOMPTO.

Availability: NTIS, CP T99, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price.

PB81-208068/XDD

Patent Bibliographic File.

Data file. This file contains bibliographic information on United States patents issued since 1970. The information includes a complete bibliographic record with an abstract. The information corresponds to the information contained on the front page of a patent or to that information contained in the printed journal, the 'Official Gazette', printed by the U.S. Government Printing Office. The retrospective years 1970, 1971, 1972, and 1973 do not have all the patents issued in those respective years because this was a test period of having issued patents in magnetic tape. Each year after 1970 progressively included additional patents until all patents were included beginning about 1974.

Keywords: *Data file, *Inventions, Magnetic tapes, *Patenting, NTISCOMPTO.

Availability: NTIS, CP T99, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products for price.

PB81-208076/XDD

Technology Subjects Class 364 Subclass 900 (Special Purpose Digital Processing Systems).

Data file. The file provides technological information about patents issued under Patent Classification 364 Subclass 900, which is entitled 'Special Purpose Digital Processing Systems.' The file is updated as justified, usually annually.

Keywords: *Data file, *Computers, Special purpose computers, *Digital computers, Computer systems hardware, *Data processing equipment, Computer programming, Magnetic tapes, *Patents, *Inventions, *Classifications, Patenting, Data processing systems, NTISCOMPTO.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-208084/XDD

Concordance File.

Data file. This file serves as a guide for relating the United States Patent Classification System to the International Patent Classification (IPC) as published for the World Intellectual Property Organization by Carl Heymans Verlag KG, Munich, West Germany. Because of the difference in the philosophies of the two systems, a complete one-to-one relationship is not possible. Even where a single IPC notation is listed for a single U.S. subclass, a one-to-one translation should not be inferred. As a result, an IPC group listing in this Concordance File may be only a guide to a field of adjacent groups within the whole of which a different group may be found which is more closely aligned to the subject matter under consideration by the user. The file is updated as justified, usually annually.

Keywords: *Data file, *Classifications, Indexes(Documentation), Magnetic tapes, *Patents, *Inventions, Patent classifications, *International Patent Classification, NTISCOMPTO.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-208092/XDD

Technology Subjects Class 364 Subclass 200 (General Purpose Digital Processing Systems).

Data file. The file provides technological information about patents issued under Patent Classification 364 Subclass 200, which is entitled 'General Purpose Digital Processing Systems.' The file is updated as justified, usually annually.

Keywords: *Data file, *Computers, General purpose computers, *Digital computers, Computer systems hardware, *Data processing equipment, Magnetic tapes, Computer programming, *Inventions, *Classifications, Patenting, Data processing systems, NTISCOMPTO.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-208100/XDD

Sequential Classification Title File (Manual of Classification).

Data file. This file is the machine version of the printed product, the Manual of Classification, printed by the U.S. Government Printing Office. The file is a comprehensive listing of the U.S. Patent Classification System. The U.S. Patent Classification System is in a continuous state of change, allowing for new technology to be added to the system. This file reflects the changes that are made to the Patent Classification System. It is updated as justified, usually semi-annually.

Keywords: *Data file, *Classifications, Subject indexing, Magnetic tapes, *Patents, *Inventions, Patent classifications, NTISCOMPTO.

SCIENCE AND TECHNOLOGY

Field 21—COMPUTER, LIBRARY, AND INFORMATION SCIENCES

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-208118/XDD

Index to Classification.

Data file. The file alphabetically lists patents by subject headings assigned to specific patent classifications and subclasses as they are assigned to the U.S. Patent Classification System. It is especially intended as an initial entry into the classification system and should be particularly useful for those lacking experience in its use and those unfamiliar with the particular technology under study. The file is updated annually.

Keywords: *Data files, *Classifications, *Indexes(Documentation), Subject indexing, Magnetic tapes, *Patents, *Inventions, Patent classifications, NTISCOMPTO.

Availability: NTIS, CP T03, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-244568/XDD

PATTAF.

Data file. PATTAF is a patent sequence file including Patent numbers beginning with the first patent which was issued in 1963 and ending (latest update) with the last patent number in 1981. Withdrawn patents are flagged on the file through 1979. Patents which were issued but for which classifications are unknown are also included. Where known, the following bibliographic data are given for each patent: From 1963 on, country or U.S. State of residence of the first inventor and assignment (ownership) at time of issue in 7 categories - (1) unassigned (inventor owned); (2) U. S. Corporation; (3) Foreign Corporation; (4) U. S. Government; (5) Foreign Government; (6) U.S. individual; (7) Foreign individual. From 1967 on, the serial number of the application for the patent and the month and year it was filed. From 1969 on, a numeric company code indicating the specific organization to which the patent was assigned at time of issue. All files are in CDC 60 bit word format. Binary representation of data is extensively used. The files, at present, are updated annually on a calendar year basis. OTAF file updates, which are complicated and involve extensive manual input, are begun as soon as source files are available to begin processing. Experience has shown that this availability varies considerably. Consequently, update completion can vary from around March 15th to as late as June 1st.

Keywords: *Data file, *Patents, *Inventions, Technology innovation, Magnetic tapes, Corporations, Organizations.

Availability: NTIS, CP T01, mag tape*. Source tape is a combination of BCD and binary. Tapes can be prepared in 9 track recording mode only. Identify recording mode desired by specifying density. Call NTIS Computer Products if you have questions.

PB81-244576/XDD

INVALL.

Data file. INVALL is a file which includes the name and addresses of each inventor who received a patent during the period 1975-1980. The address is that given on the face of the patent at issue and includes street address, city, state (or country; if foreign), and zip code (in U.S.) for inventors on patents non-assigned at issue. Where the patent was assigned at issue, only city and state (country; if foreign) are given. The file is in patent number sequence and patent numbers are given. All files are in CDC 60 bit word format. Binary representation of data is extensively used. The files, at present, are updated annually on a calendar year basis. OTAF file updates, which are complicated and involve extensive manual input, are begun as soon as source files are available to begin processing. Experience has shown that this availability varies considerably. Consequently, update completion can vary from around March 15th to as late as June 1st.

Keywords: *Data file, *Patents, *Inventions, Technology innovation, Magnetic tapes, *Personnel.

Availability: NTIS, CP T03, mag tape. Source tape is a combination of BCD and binary. Tapes can be prepared in 9 track recording mode only. Identify recording mode desired by specifying density. Call NTIS Computer Products if you have questions.

PB81-244592/XDD

CONAME.

Data file. The CONAME file contains the name of each organization assigned one or more patents during the period 1969-1980 and the 'unique' company code assigned to that organization. A count is given of the patents each organization received during the period and or indication of whether the organization is U.S., foreign, or one of an undetermined status. The file is in company code sequence. All files are in CDC 60 bit word format. Binary representation of data is extensively used. The files, at present, are updated annually on a calendar year basis. OTAF file updates, which are complicated and involve extensive manual input, are begun as soon as source files are available to begin processing. Experience has shown that this availability varies considerably. Consequently, update completion can vary from around March 15th to as late as June 1st.

Keywords: *Data file, *Patents, *Inventions, Technology innovation, *Corporations, *Organizations, Magnetic tapes.

Availability: NTIS, CP T02, mag tape*. Source tape is a combination of BCD and binary. Tapes can be prepared in 9 track recording mode only. Identify recording mode desired by specifying density. Call NTIS Computer Products if you have questions.

PB81-244600/XDD

PATTLS.

Data file. PATTLS is a file which includes the patent numbers and titles of almost all patents issued since January 1969. All files are in CDC 60 bit word format. Binary representation of data is extensively used. The files, at present, are updated annually on

SCIENCE AND TECHNOLOGY

COMPUTER, LIBRARY, AND INFORMATION SCIENCES—Field 21

a calendar year basis. OTAF file updates, which are complicated and involve extensive manual input, are begun as soon as source files are available to begin processing. Experience has shown that this availability varies considerably. Consequently, update completion can vary from March 15th to as late as June 1st.

Keywords: *Data file, *Patents, *Inventions, Technology innovation, Magnetic tapes.

Availability: NTIS, CP T01, mag tape*. Source tape is a combination of BCD and binary. Tapes can be prepared in 9 track recording mode only. Identify recording mode desired by specifying density. Call NTIS Computer Products if you have questions.

PB82-113788/XDD

MeSH (Medical Subject Headings) Vocabulary File.

Data file. MeSH Vocabulary File (Medical Subject Headings Vocabulary File) is an online vocabulary file of the 14,000 Medical Subject Headings that are used for indexing and retrieving references and for subject cataloging. Also included are approximately 22,000 chemical records. Specific chemicals with their associated Registry Numbers or Enzyme Commission Numbers and MeSH index terms will then be extracted from the vocabulary records and inserted into the MEDLINE unit records as they appear in indexed articles. The file consists of a complete description of each main heading and qualifier including such information as cross references, scope notes, and date of entry into the system.

Keywords: Data base, *Subject index terms, Medicine, Magnetic tapes, Data storage, *Information systems, Thesauri, MeSH, *Medical information systems.

Availability: NTIS, CP T99, mag tape*.

PB82-113796/XDD

CATLINE (CATalog onLine).

Data file. CATLINE (CATalog onLine) contains about 200,000 references to books and serials cataloged at NLM since 1965. CATLINE gives medical libraries in the network immediate access to authoritative cataloging information, thus reducing the need for these libraries to do their own original cataloging. Libraries also find this data base a useful source of information for ordering books and journals and for providing reference and interlibrary loan services. (Available in MARC-compatible format.)

Keywords: Data base, *Cataloging, Magnetic tapes, Data storage, *Information systems, Catline, National Library of Medicine, *Medical information systems.

Availability: NTIS, CP T99, mag tape*.

Foreign Patent Classification File.

Data file. The file contains Country Codes, Document Identifier, Publication Date, and U.S. Subclass information for foreign patents. The file contains information on foreign patents added to the Examiner Search File since January 1979, foreign patents reclassified since May 1981, retrospective reclassification data as available, and information on foreign patents in selected subclasses that have undergone file integrity processing. Coverage, with respect to a specific country or class/subclass, is fragmentary although the file currently contains over 500,000 unique document identifiers.

Keywords: *Data file, Patenting, *Classifications, *Patents, Foreign countries, Coding, *Inventions, *Foreign technology.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-180448/XDD

SICTAF.

Data file. SICTAF is a concordance which indicates for each subclass, valid as of the latest update (1983), one or more of 55 Standard Industrial Classification Product field categories, each of which pertain to that subclass by virtue of the technology to which the subclass is directed. All files are in CDC 60 bit word format. Binary representation of data is extensively used. The files, at present, are updated annually on a calendar year basis.

Keywords: *Data file, *Patents, Classifications, Industries, *Inventions, Technology innovation, Magnetic tapes, *Standard industrial classifications.

Availability: NTIS, CP T03, mag tape*. Source tape is in a combination of BCD and Binary. Tapes can be prepared in 9 track mode only. Identify recording mode desired by specifying density. Call NTIS Computer Products if you have questions.

Codes for Named Populated Places, Primary County Divisions, and Other Locations Entities of the United States (Sixth Update); FIPS PUB 55.

Data file. This sixth update of the Federal Information Processing Standard (FIPS) 55 data file provides a two-character State code and five-character numeric place code to uniquely identify each listed entity. Areas of the United States covered are the fifty States, the District of Columbia, and all outlying territories with significant self-administration. An exhaustive list is carried of incorporated places, census

SCIENCE AND TECHNOLOGY

Field 22—ENERGY SOURCES, GENERATION, AND TRANSMISSION

designated places (CDP's), primary county divisions (such as townships, New England towns, and census county divisions), recognized Indian reservations and Alaska Native villages, and counties. The listing also includes unincorporated places, military bases, National parks, airports, and ground transportation points. A two-character class code distinguishes over seventy entity types. Each entity is identified by the county or counties in which it is located. All exhaustive categories and military bases are identified by Congressional District and, in most cases, by metropolitan statistical areas. Incorporated places, CDP's, and Indian and Alaska Native areas, are cross-referenced to U.S. Bureau of the Census files. ZIP codes are provided for all Post Offices.

Keywords: *Data file, *Coding, Urban areas, Rural areas, Counties, Magnetic tapes, *Federal information processing standards, *Geographic areas, Geocoding.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII or EBCDIC character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying character set and density. Call NTIS Computer Products if you have questions.

Magnetic Tape Containing Oil-Shale Fischer Assay Data for Coreholes in the Uinta Basin, Utah

Data file. The magnetic tape contains Fischer Assay data and is arranged with the following format: EBCDIC (IBM compatible), card image, blocksize 1920 (blocked 24 to 1), record length 80, odd parity, 800 BPI, 9-track, no label tape.

Keywords: *Data file, Magnetic tapes, *Oil shale, *Utah, Data, Drill core analysis, Geochemistry.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 800 bpi, odd or even parity, BCD.

PB-244 204/4/XDD

Inventory of Energy Research and Development Information Resources in the United States (1974).

Data file. This publication is intended to provide scientists, engineers, and others concerned with research and development related to energy with a reference to potentially applicable sources of information within the United States. Very few of these information resources are dedicated solely to energy; most of them deal primarily with subjects or missions that contain energy related components. The inventory consists of three main sections: Information resources; annotated publications; and indexes.

Publication: The inventory is published in book form by the American Society for Information Science under the title 'Energy Information Resources--An Inventory of Energy Information and Data Resources in the Continental United States, Hawaii and Alaska'.

Keywords: *Data file, *Information systems, *Energy.

Availability: NTIS, CP T01, 1 reel mag tape. Available only in 7 track, 800bpi, odd or even parity, Ebcidic. Documentation available.

Lifestyles and Household Energy Use: 1973 and 1975 National Surveys.

Data file. The Energy and Lifestyles data documentation and file are a compilation of data collected in two national housing unit surveys. The first survey conducted in May 1973 collected data for 1455 households and the housing units in which those households resided. The sample was designed to provide an oversampling of low income households. The survey was repeated in 1975 for 3140 households, of which approximately 1000 were repeat households from the 1973 survey. Therefore, on a record dump, some households will have a large block of data, whereas, others will have some blanks for the missing information either from 1973 or 1975. Among the variables collected on the survey are: (1) characteristics, size, construction, and amenities of housing units; (2) economic and demographic data on households; (3) actual consumption and cost of electricity and natural gas in residential use; and estimated cost of fuel oil; (4) characteristics of equipment used for space heating and cooling, as well as water heating; (5) auto ownership and usage; (6) personal transportation behavior; (7) possession of appliances and other energy using household conveniences; and (8) changes in energy-related behavior and attitudes toward energy consumption since energy shortages first came to widespread public attention.

For related technical report, see PB-272 449/XDD.

Keywords: *Data file, *Energy consumption, *Households, *Fuel consumption, Houses, Electricity, Natural gas, Fuel oil, Space heaters, Water heaters, Air conditioners, Transportation, Electric appliances, Public opinion, Attitude surveys, Surveys, Magnetic tapes, Energy use, Residential sector.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-108714/XDD

NIECS (National Interim Energy Consumption Survey) Household Interview File.

Data file. The data file contains information about 4,081 weighted households selected as a probability sample of all households in the 48 contiguous states and interviewed in the fall 1978. The information includes: (1) the structural features of the house such as size, insulation, and openings; the heating and cooling systems; fuels used and the major use made of each fuel; recent installation of types of insulation and equipment to conserve energy; household appliances and vehicles; and, demographic data on the household; (2) an annual amount of dollars expended, quantity consumed (or delivered in the case of fuel oil, kerosene, and LPG), and Btu equivalents for electricity, natural gas, fuel oil and kerosene, and LPG used by each household; (3) long-term average annual heating and cooling degree days for the NOAA division in which the household is located adjusted on a regional basis to reflect the weather for 1978-1979; (4) half-sample indicators for 32 half samples used in calculating the variance for sample statistics through pseudoreplication techniques. There are four files on this tape. The first is a card image file containing this memo. The second is a card image file containing an SPSS file of the data. The third is a card image file containing the COBOL Data description. The fourth is the data proper (HH Interview File). Together these files comprise a preliminary version of the National Interim Energy Consumption Survey (Residential).

Keywords: *Data file, Magnetic tapes, Surveys, Households, *Energy consumption, Residential sector, COBOL.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-112161/XDD

End Use Energy Consumption Data Base: Transportation Sector; EIA Format.

Data file. In general, the End Use Energy Consumption Data Base includes estimates which simultaneously provide a breakdown of transportation fuel by mode, fuel type, sector, carrier, range, use, region and state for the years 1967 through 1976. The estimates are almost entirely derived from data that has already been collected by government, trade association, or survey firms. Products of the data base are a report which contains methods, summary results, and documentation for data tapes and retrieval programs; two data tapes, the EIA tape and the ORNL tape which contain the same data but are recorded in different formats; and a retrieval program tape and user's manual. The data tapes contain the results of all estimating methods developed as well as all totals that can be computed by summing the data over one or more breakdowns. The EIA tape records an energy consumption estimate for all years

Field 22—ENERGY SOURCES, GENERATION, AND TRANSMISSION

on a single record, whereas the ORNL tape devotes a separate record to each year.

For related technical report, see PB81-112203/XDD.

Keywords: *Data file, *Fuel consumption, Rail transportation, Highway transportation, Water transportation, Pipeline transportation, Automobiles, Buses, Trucks, Motorcycles, Boats, Gas pipelines, Data, Magnetic tapes, *Energy consumption, *Transportation, EIA format.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-200669/XDD

Audit of Energy Usage in Commercial Buildings Lighting Systems (Massachusetts).

Data file. The data on this tape was collected by the Massachusetts State Building Code Commission through a regulatory process designed to save energy in commercial buildings. This regulation sought energy efficiency in lighting systems by establishing a watts per square foot building budget and by requiring the submittal of an audit summarizing the lighting system through the delineation of six

broad categories of space usages based on lighting needs. The SBCC received 9299 audits which were computerized - entering square footage and connected load figures for all applicable categories and distinguishing by sequence number, municipality, building use, and building type (existing, new construction, addition or renovation). The data base has been used to report compliance with this regulation and for statistical analysis. A report based upon the results of the statistical analysis is available through the Comm. of Mass. State Building Code Commission, 1 Ashburton Place, Room 1305, Boston, MA. The title of the report is: Energy usage in lighting practices: A report on the power used in commercial buildings in Massachusetts.

Keywords: *Data file, *Commercial buildings, *Electric power, Illuminating, Massachusetts, Magnetic tapes, *Energy consumption, NTISNTIS.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

PB82-114877/XDD

Residential Energy Consumption Survey: Household Screener Survey, 1979-1980, Household Characteristics and Annualized Consumption, Public Use Data Tapes.

Data file. This computer tape contains data and attendant file definition information for the Household Screener Survey conducted by the Energy Information Administration, U.S. Department of Energy for the period 1979-1980. The tape is comprised of three files. The first file contains full SPSS data definition information; the second contains COBOL file definition information and the third file contains the data proper. The data file contains 4,033 records, one record for each sample household. An accompanying Users' Guide contains full technical specifications for the tape as well as brief discussions of issues pertaining to the interpretation of the data.

For related technical reports, see PB82-144885/XDD, PB82-114893/XDD.

Keywords: *Data file, *Electric power, *Fuel consumption, Households, Magnetic tapes, *Energy consumption, *Residential buildings.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Availability: NTIS, PC E01/MF A01, 27p*.

PB82-119462/XDD

SEDS (State Energy Data System) Public Use Tape.

Data file. This file contains all the data of the State Energy Data System (SEDS). The data is used to estimate annual energy consumption by principal energy sources (coal, natural gas, petroleum, electricity), by major end-use sectors (residential, commercial, industrial, transportation, and electric utilities), and by state (50 states, the District of Columbia, and the United States). Data in the file is organized alphabetically by energy source (fuel), by end-use sector or energy activity (sector), by type of data (type) and by state. Twenty data values are associat-

ed with each fuel-sector-type-state grouping representing positionally the years 1960 through 1979. Data values in the file are expressed either as physical units, British thermal units, physical to Btu conversion factors or share factors. The State Energy Data Report is the published output of SEDS.

For related technical report, see PB82-119470/XDD.

Keywords: *Data file, *Fuel consumption, *Electric power, Electric utilities, Coal, Natural gas, Electricity, States(United States), United States, District of Columbia, Magnetic tapes, *Energy consumption, Residential sector, Commercial sector, Industrial sector, Transportation sector, Petroleum.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Cost and Quality of Fuels for Electric Utilities Form 423/ Historic File.

Data file. Information on the cost and quality of fossil fuels for electric utility plants on a plant-by-plant basis grouped on a State and regional basis permits comparison of prices for similar fuels delivered to other plants in the same State and region. Data are limited to electric utility/generating plants in the United States with a combined capacity of 25 megawatts or greater. The report is an annual series by the same title that originated in the Federal Power Commission. Fossil fuels include oil, coal, and natural gas. Reported are data on fuels delivered to peaking units such as combustion turbines, to internal combustion units, to steam-electric plants, and to fossil fuel plants. Aggregates include each of the Census Regions, Bureau of Mines Coal Producing Districts, and total imports by country of origin and State of destination. The report is arranged in five parts each containing a narrative that explains the data and highlights trends. Five of the seven appendices are devoted to data on the 20 largest electric utility companies. This file covers the years 1972 through 1980.

Keywords: *Data file, Fossil fuels, *Electric utilities, Coal, Natural gas, Electric power generation, Electric power plants, Cost, Quality, Prices, Magnetic tapes, *Fuel consumption, *Energy consumption, Petroleum.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Product if you have questions.

Program. This card-image tape contains the files which comprised the solar data base including: grant, grantee reports, technical descriptions, technical concerns, marketing survey; and utility consumption. NBSIR 81-2369, Residential Solar Data Center: Data Resources and reports, describes these files in detail.

Keywords: *Data file, *Solar energy, Grants, Market research, Data, Magnetic tapes, DOE/HUD Solar Heating and Cooling Demonstration Program.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

PB82-134875/XDD

Oil-Shale Fischer Assay Analysis from Selected Coreholes in the Piceance Creek Basin, Colorado.

Data file. A magnetic tape consisting of oil-shale Fischer assay data for selected well cores in the Piceance Creek Basin was prepared as a supplement to NTIS tape PB-230 607/AS. Both tapes serve as a data base for calculating oil-shale resources (Pitman, 1981). The tape is in standard IBM format and has the following specifications: EBCDIC (IBM standard), card-image, blocksize 1720 (blocked 20 to 1), record length 86, odd parity, 1,600 bpi, 9-track, no label tape. Each data file on the tape consists of records containing oil-shale analyses for one well core. The first record in a data file consists of a well-core identifier which is a three-digit number preceded by the character 'C'. The second record contains the well name and location, and the remaining records contain Fischer assay data.

Keywords: *Data file, *Oil shale, Drill core analysis, Piceance Creek Basin, Colorado, Fischer assay.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-134883/XDD

Oil-Yield Resources for Oil-Shale Sequences in Core from the Piceance Creek Basin, Colorado, that Average 10, 15, 20, 25, 30, 35, and 40 Gallons per Ton.

Data file. The Oil-Shale Data Analysis Program developed by the U.S. Geological Survey (Pitman and others, 1972) was designed primarily for the computation of resource estimates from Fischer assay and saline mineral data. Recently, the program was revised by the addition of an algorithm that will compute more systematic and accurate resource values than were previously reported (Watts and VanTrump, 1976). The data on the tape were generated from the algorithm, and consist of tables of oil-shale sequences that maintain specified average oil yields for oil-shale cores in the Piceance Creek Basin, Colorado. Each file corresponds to one well core, and contains a 60 line/page formatted printout of these

tables. The tables consist of thickness, value, and resource for oil-shale sequences that maintain an average oil yield of 10, 15, 20, 25, 30, 35, and 40 gallons per ton. Excluded from averages are sequences of lean oil shale greater than 10 feet thick whose minimum oil yield is generally 15 gallons per ton or less. The Fischer assay data used to generate these tables are on magnetic tape available through NTIS report PB-230 607/AS and (Pitman, 1981). In addition to resource evaluation, these data should be useful for delineating minable zones of oil shale that maintain a certain thickness, grade, and resource.

Keywords: *Data file, *Oil shale, Drill core analysis, Piceance Creek Basin, Colorado, Fischer assay.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Public Use Energy Statistics Data Base - Data Only.

Data file. EIA has developed a broad base of energy and energy-related data, the Public Use Energy Statistics Data Base (PUESDB). It is intended to be used as an aid in the analyses of energy issues by providing a quick means of locating and accessing both current and historical energy and energy related data. The data contained in the PUESDB is a consolidation of select time series extracted from various EIA and non-EIA publications. There are pres-

SCIENCE AND TECHNOLOGY

ENERGY SOURCES, GENERATION, AND TRANSMISSION—Field 22

ently 800 time series in the system; the majority are from the EIA and have been extracted from the Annual Report to Congress, the Monthly Energy Review and the Petroleum Supply Monthly. Data are also extracted from the Monthly Petroleum Product Price Report, the U.S. Crude Oil, Natural Gas, and Natural Gas Liquids Annual Report and the Performance Profiles of the Major Energy Producers. In addition, unpublished EIA data pertaining to acquisition costs, purchases and landed cost of crude oil are included. Non-EIA data measuring characteristics of end-use energy consumption (i.e., heating and cooling degree days, automobile efficiency and economic activity) are also included in the PUESDB. The information in this data base is organized in six sections: petroleum, natural gas, coal, electricity generation (utilities), energy indicators, and economic variables. The first four sections contain series that measure domestic resources, reserves, production, imports, exports, changes in stock levels, sales, and prices at various levels in the supply chain. Variables associated with end-use consumption are contained in the sections on energy indicators, and economic variables. Depending on the time series, the data are available monthly, quarterly, and/or annually. Coverage of the monthly data begins in January 1977, the quarterly data in the first quarter of 1975, and the annual data in 1950. The Public Use Energy Statistics Data Base is available on computer tape and is updated monthly.

For related technical report, see PB82-191586/XDD.

Privately Owned Electric Utilities, Form 1.

Data file. Data are tabulated from annual reports filed with the Federal Energy Regulatory Commission by 192 Classes A and B utilities. Class A utilities are those having annual electric operating revenues of \$2.5 million or more. Class B utilities are those with annual electric operating revenues of \$1 million or more, but less than \$2.5 million. The Class A and B utilities listed comprise nearly 100% of the privately-owned sector of the electric light and power industry. Data include: (1) financial and operational balance sheets; (2) income and retained earnings statements; (3) statements of changes in financial position; (4) capital stock and long-term debt; (5) electric operating revenues, customers, and sales by classes of service; (6) electric operation and maintenance expenses; (7) data per type of utility plant; (8) physical quantities (capacity by type of utility plant); (9) rates of return on electric utility rate base and rates return on common equity; (10) schedule of investment tax credits generated and utilized (since 1962); (11) research, development, and demonstration (for the three most recent years); (12) sales expense, customer service and information expense, and general advertising expense; (13) environmental protection facilities and expenses; (14) environmental protection facilities and expenses.

Information on the cost and quality of fossil fuels for electric utility plants on a plant-by-plant basis grouped on a State and regional basis permits comparison of prices for similar fuels delivered to other plants in the same state and region. Data are limited to electric utility/generating plants in the United States with a combined capacity of 25 megawatts or greater. The report is a continuation of the annual series by the same title that originated in the Federal Power Commission. Fossil fuels include oil, coal, and natural gas. Reported are data on fuels delivered to peaking units such as combustion turbines, to internal combustion units, to steam-electric plants, and to fossil fuel plants. Aggregates include each of the Census Regions, Bureau of Mines Coal Producing Districts, and total United States. Pennsylvania anthracite is shown separately. There are data on imports by country of origin and State of destination. Also provided are data for comparing 1978 Sulfur Regulations with sulfur content of coal delivered. The report is arranged in five parts each containing a narrative that explains the data and highlights trends. Five of the seven appendices are devoted to data on the 20 largest electric utility companies.

Keywords: *Data file, *Fossil fuels, *Electric utilities, Coal, Natural gas, Petroleum products, Electric power generation, Electric power plants, Cost analysis, Prices, Quality, Magnetic tapes, *Fuel consumption.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Power Plant Report - Historical.

Data file. Purpose of Form EIA-759 formerly FPC-4, Power Plant Report is to collect data necessary to fulfill regulatory responsibility; ensure power reliability; and measure fuel consumption and power production. This data tape contains the data collected by the survey. Specific ownership code, prime mover code, kind of fuel code, company code, plant name, current capacity, fuel name, old capacity, effective data - month/year, status, multistate code, current year, generation, consumption, stocks, electric plant code, NERC code.

Keywords: *Data file, *Electric utilities, Fuel consumption, Reliability, Statistical data, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Cost and Quality of Fuels for Electric Utilities (Form 423/Monthly).

Data file. Information on the cost and quality of fossil fuels for electric utility plants on a plant-by-plant basis grouped on a State and regional basis permits comparison of prices for similar fuels delivered to other plants in the same state and region. Data are limited to electric utility/generating plants in the United States with a combined capacity of 25 megawatts or greater. The report is a continuation of the annual series by the same title that originated in the Federal Power Commission. Fossil fuels include oil, coal, and natural gas. Reported are data on fuels delivered to peaking units such as combustion turbines, to internal combustion units, to steam-electric plants, and to fossil fuel plants. Aggregates include each of the Census Regions, Bureau of Mines Coal Producing Districts, and total United States. Pennsylvania anthracite is shown separately. There are data on imports by country of origin and State of destination. Also provided are data for comparing 1978 Sulfur Regulations with sulfur content of coal delivered. The report is arranged in five parts each containing a narrative that explains the data and highlights trends. Five of the seven appendices are devoted to data on the 20 largest electric utility companies. 60 tables.

Keywords: *Data file, *Fossil fuels, Cost analysis, *Electric utilities, Comparison, Air pollution, Regulations, Trends, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. State Energy Data System (SEDS) Public Use Tape.

Data file. This file contains all the data of the State Energy Data System (SEDS). The data is used to

estimate annual energy consumption by principal energy sources (coal, natural gas, petroleum, electricity), by major end-use sectors (residential, commercial, industrial, transportation, and electric utilities), and by state (50 states, the District of Columbia, and the United States). Data in the file is organized alphabetically by energy source (fuel), by end-use sector or energy activity (sector), by type of data (type) and by state. Twenty one data values are associated with each fuel-sector-type-state grouping representing positionally the years 1960 through 1981. Data values in the file are expressed either as physical units, British thermal units, physical to Btu conversion factors or share factors.

For related technical reports, see PB83-229336/XDD, PB83-229344/XDD.

Keywords: *Data file, Coal, Natural gas, Magnetic tapes, Petroleum products, Electric power demand, *Energy consumption, SEDS system, *Fuel consumption.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Public Use Energy Statistical Data Base.

Data file. The Public Use Energy Statistics Data Base (PUESDB) is a data base of energy related time series data and metadata. The main purpose of the PUESDB is to provide a machine readable 'mirror image' of published energy related information to the analyst in an efficient and concise way. The current version of the PUESDB has been entirely restructured beginning with the July 1983 tape. Each variable (time series) has a new series code. The data base includes both time series data and written information pertaining specifically to each series. The PUESDB currently focuses on two publications, the Monthly Energy Review (MER) and the Annual Energy Outlook (AEO). Approximately one-third of all data in these publications are in the PUESDB. The PUESDB also currently includes data from the U.S. Crude Oil and Natural Gas Reserves Annual Report and the National Oceanic and Atmospheric Administration's Monthly Heating and Cooling Degree Days Report. Data from these publications are updated in the PUESDB using additional new software that semi-automates the update procedure. The PUESDB has been designed to include any additional information as needs and resources will allow.

Keywords: *Data file, *Energy, Magnetic tapes, Energy consumption, PUESDB computer programs.

Publicly Owned Electric Utilities in the United States, 1964-81 Form 3.

Data file. Annual financial and operation information about publicly-owned utilities operating in the United States and Puerto Rico are presented in a series dating back to 1946. The statistics were issued up to 1977 by the Federal Power Commission; since 1977, they have been published by the Energy Information Administration (EIA). Publicly-owned refers to electric utilities operated by municipalities and Federal powered agencies, which develop, transmit, or distribute power. Data are given for 25 municipal wholesaler electric utilities whose revenues from sales for resale are 51% or more of total electric operating revenue; 456 municipal retailer electric utilities whose revenues from sales for resale are 51% or less of total electric operating revenues; and 79 Federal projects. Covered are financial and operational data for major municipals and for Federal projects by kind of plant, by income source, by disposition, by class of customers, by type of, and by class of production. Composite statements for major municipals and for Federal projects cover balance sheet data; income accounts; number of electric customers, kilowatt-hour sales, and revenues from sales; electric operation and maintenance expenses; in service costs by type of electric utility plant and by type of power generation; electric energy generated and received, by type of plant; balance sheet relationships, and income account relationships. The last three sections of this report contain summary tables and separately detailed tabulations of financial data, by company and by State/location for municipal wholesalers, municipal retailers, and for Federal projects.

Keywords: *Data file, *Electric utilities, *Public utilities, Assets, Revenue, Income, Electric power generation, Sales, Operating costs, Earnings, Magnetic tapes, Return on investment, Financial statements.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Interstate Pipeline's Annual Report of Gas Supply, 1981-1982 (FERC-15).

Data file. The computer data tape specified herein contains two files consisting of FERC-15 respondent data for years 1981 and 1982, respectively. Each file is identical in format and consists principally of reserves and production data reported in the Synopsis of Gas Supply, Schedule I, and Schedule II of the FERC-15. The Synopsis of Gas Supply and Schedule I contain summary level reserves and production data reflective of the detail information contained in Schedule II. The Synopsis of Gas Supply I consist of a single page each. All volumes reported on these

SCIENCE AND TECHNOLOGY

ENERGY SOURCES, GENERATION, AND TRANSMISSION—Field 22

two forms are on a dry basis at a pressure base of 14.73 psia and 60 degrees Fahrenheit. Each unique source of supply is reported in Schedule II. The Schedule II format allows a maximum of five unique sources to be reported on each page, therefore Schedule II submissions may vary from one page to many. The data contained within each file are sorted ascendingly by company code, page number and line number.

Keywords: *Data file, Gas supply, *Natural gas, Reserves, Gas pipelines, *Pipeline transportation, Computer programs.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Fischer Assay Oil-Shale Data (1940-June 1983).

Data file. The Fischer Assay procedure developed and standardized by the University of Wyoming Research Corporation (Laramie Energy Technology Center) is an empirical method of estimating the amount of oil which might be produced from a sample of oil-shale by some commercial process. Throughout the last 40 years wells have been drilled in the United States, primarily Colorado, Utah, and Wyoming, which sampled the major oil-shale deposits. The Fischer Assay Oil-Shale Data Base contains the analyses of the samples taken from these wells. Each file in the data base corresponds to a well and its samples. There are approximately 1500 files in the data base. The record of each sample within a well (file) contains the following information: year of assay, beginning depth of the sample, ending depth of the sample, percent by weight of oil, percent by weight of water, percent by weight of spent shale, percent by weight of gas loss, gallons per ton of oil, gallons per ton of water, specific gravity, and tendency to coke.

Keywords: *Data files, *Oil shale, *Chemical analysis, *Oil, Sampling, *Fischer assay.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Residential Energy Consumption Survey (RECS): Housing Characteristics, 1981, Consumption and Expenditures April 1981 through March 1982, and Monthly Billing Data.

Data file. This tape presents data from the 1981 Residential Energy Consumption Survey. The Residential Energy Consumption Surveys have been designed by the Energy Information Administration to provide information concerning consumption in the residential sector. The Public Use Tape presents the survey data file, an SPSS file program, a Table Producing Language (TPL) file program, a TPL codebook and files of the monthly billing data used to produce the survey data file annual consumption and expenditures data. The survey data file contains basic data concerning housing unit characteristics from the interview questionnaire and annualized (April 1981-March 1982) fuel consumption and expenditures (excluding transportation fuel) derived from the records of the households' fuel suppliers. Also included are weather variables, marginal electricity rates, and a weighing variable. The file contains 6,204 sample households from the contiguous U.S. These households represent 82.7 million weighted households. The smallest unit of analysis is the individual household. However, the finest geographic identification available for each household is Census division.

For related technical report, see PB84-120468/XDD.

Keywords: *Data file, *Residential buildings, *Households, Expenses, Houses, Characteristics, Magnetic tapes, *Energy consumption, *Fuel consumption.

Residential Energy Consumption Survey: Household Transportation Panel Monthly Gasoline Purchases and Vehicle and Household Characteristics, June 1979-September 1981.

Data file. The Household Transportation Panel is a data set of gasoline purchases by month for a national sample of households from the contiguous United States for the period June 1979 to September 1981. The data set is part of a series of Energy Information Administration surveys on Residential Energy Consumption. The Transportation Panel was designed to enable the analysis of residential vehicle fuel consumption at the household level on both a monthly and annual basis. The predominant design of the transportation panel was 2-4-2, that is, households were in the panel for two months, out for four months, and then in for another two months. For each household, data include the number of vehicles used regularly. For each vehicle, data include year, make, model, gallons of fuel purchased in month, gallons of fuel consumed in month, cost of fuel purchased, tank capacity and beginning and end of month odometer readings. The finest geographic identification available is Census region. The public use tape has 2 files. File 1 contains the survey data. It is a hierarchical file. File 2 is a file description in Table Producing Language format. The tape documentation includes a complete description of the data file and the survey.

For related technical report, see PB84-162270/XDD.

Residential Energy Consumption Survey: Consumption and Expenditures, 1980-1981, Monthly Billing Data.

Data file. This tape presents files of billing period energy consumption and expenditures data for households from the 1980 Residential Energy Consumption Survey (RECS). The RECS have been designed by the Energy Information Administration (EIA) to provide information concerning energy consumption within the residential sector. The billing data files contain data for electricity, fuel oil, liquefied petroleum gas, and natural gas as well as corresponding weather data (14 bases). The most frequent billing period is a month. Included in these files are households that paid directly to the utility company for all uses of the fuel. This tape supplements a previously issued tape, Residential Energy Consumption Survey: Housing Characteristics, 1980 and Consumption and Expenditures, April 1980 through March 1981 which contains the household interview data and annualized fuel consumption and expenditures data (excluding transportation fuel) derived from this billing data provided by the households' fuel suppliers. Households from Alaska and Hawaii were removed from the billing data files as part of the steps taken to prevent possible identification of survey respondents. The data, therefore, represent only the contiguous United States. The technical documentation describes the billing data files and provides specifications concerning the field location of each variable. Detailed information concerning the survey is available in the documentation for the household interview tape, which this tape supplements, and in Residential Energy Consumption Survey: Consumption and Expenditures, April 1980 through March 1981 Part 1: National Data (available from the EIA).

Keywords: *Data file, *Residential Buildings, *Households, Expenses, Houses, Magnetic tapes, Electric power, Fuel oil, Liquefied petroleum gas, Natural gas, *Energy consumption.

Data file. The Public Use Energy Statistics Data Base (PUESDB) is a data base of energy related time series data and metadata. The main purpose of the PUESDB is to provide a machine readable 'mirror image' of published energy related information to the analyst in an efficient and concise way. The PUESDB was restructured in July 1983. Each variable (time series) has a series code. The data base includes both time series data and written information pertaining specifically to each series. The PUESDB currently focuses on two publications, The Monthly Energy Review (MER), and The Annual Energy Outlook (AEO). Approximately one-third of all data in these publications are in the PUESDB. The MER and AEO were selected for inclusion because of their significance to the overall EIA energy data scheme and because writing software capable of transferring data from their respective systems to the PUESDB was possible. The PUESDB also currently includes data from the U.S. Crude Oil and Natural Gas Reserves Annual Report and NOAA's Monthly Heating and Cooling Degree Days Report.

Keywords: *Data file, *Prices, *Energy, Expenses, Magnetic tapes, Time series analysis, *Fuel consumption, *Energy consumption.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Power Plant Report - Historical. Part 1, 1977-1983.

Data file. The purpose of Form EIA-759 formerly FPC-4, Power Plant Report is to collect data necessary to fulfill regulatory responsibility; ensure power reliability; and measure fuel consumption and power production. This data tape contains the data collected by the survey. Specific ownership code, prime mover code, kind of fuel code, company code, plant name, current capacity, fuel name, old capacity, effective data - month/year, status, multistate code, current year, generation, consumption, stocks, electric plant code, NERC code.

Keywords: *Data file, *Electric power plants, Electric power generation, Fuel consumption, Capacity, Statistical data, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Privately Owned Electric Utilities, (Form 1), 1974-1982, Historic, Part 2.

Data file. Data are tabulated from annual reports filed with the Federal Energy Regulatory Commission by 192 Classes A and B utilities. Class A utilities are those having annual electric operating revenues of \$2.5 million or more. Class B utilities are those with annual electric operating revenues of \$1 million or more, but less than \$2.5 million. The Class A and B utilities listed comprise nearly 100% of the privately-owned sector of the electric light and power industry. Data include: (1) financial and operational balance sheets; (2) income and retained earnings statements; (3) statements of changes in financial position; (4) capital stock and long-term debt; (5) electric operating revenues, customers, and sales by classes of service; (6) electric operation and maintenance expenses; (7) data per type of utility plant; (8) physical quantities (capacity by type of utility plant); (9) rates of return on electric utility rate base and rates return on common equity; (10) schedule of investment tax credits generated and utilized (since 1962); (11) research, development, and demonstration (for the three most recent years); (12) sales expense, customer service and information expense, and general advertising expense; (13) environmental protection facilities and expenses; (13) environmental protection facilities and expenses. Part 1 of this historic file (PB84-188614) covers the period 1964-1973.

Keywords: "Data file, *Electric utilities, Assets, Liabilities, Revenue, Electric power generation, Operating costs, Profits, Magnetic tapes.

Report of Oil Imports into the United States and Puerto Rico, Forms EIA-814/EIA-315 (January 1983-February 1984).

Data file. Form EIA-814 is used in monthly surveys of firms importing crude oil, unfinished oil, and finished petroleum products into the United States and Puerto Rico. It is used to collect data on port of entry, country of origin, location of refinery, quantity of crude or product in barrels, and sulfur content. Participation in the survey is mandatory under P.L. 93-275. The respondent universe consisted of approximately 1,200 firms as of January 1, 1984. However, only a selected 250 importers must report each month regardless of import activity. All others must report only for a month in which they actually had imports. Data collected in the surveys are published in aggregate form. Formerly, these data were collected on FEA-P126-M-0, FEA-1005-1M, FEA-P113-M-0, and ERA-60. The form EIA-815 (formerly FEA-P133-M-0) Monthly Shipments from Puerto Rico to the United States Report collects data on the volume of petroleum products shipped from Puerto Rico into the 50 states and the District of Columbia.

Keywords: "Data file, *International trade, *Petroleum products, Imports, Surveys, Legislation, Magnetic tapes.

Cost and Quality of Fuels for Electric Utilities Form 423, Historic (1972-1983.)

Data file. Information on the cost and quality of fossil fuels for electric utility plants on a plant-by-plant basis grouped on a State and regional basis permits comparison of prices for similar fuels delivered to other plants in the same state and region. Data are limited to electric utility/generating plants in the United States with a combined capacity of 25 megawatts or greater. The report is a continuation of the annual series by the same title that originated in the Federal Power Commission. Fossil fuels include oil, coal, and natural gas. Reported are data on fuels delivered to peaking units such as combustion turbines, to internal combustion units, to steam-electric

SCIENCE AND TECHNOLOGY

Field 22—ENERGY SOURCES, GENERATION, AND TRANSMISSION

plants, and to fossil fuel plants. Aggregates include each of the Census Regions, Bureau of Mines Co.) Producing Districts, and total United States. Pennsylvania anthracite is shown separately. There are data on imports by country of origin and State of destination. Also provided are data for comparing 1978 Sulfur Regulations with sulfur content of coal delivered. The report is arranged in five parts each containing a narrative that explains the data and highlights trends. Five of the seven appendices are devoted to data on the 20 largest electric utility companies. 60 tables.

Keywords: *Data file, *Fossil fuels, *Electric utilities, Prices, Coal, Natural gas, Petroleum products, Electric power generation, Electric power plants, Cost analysis.

Availability: NTIS, CP T02, mag tape*. Source tape is in the EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. PB84-196864/XDD

Publicly Owned Electric Utilities in the United States, Form 3 (1964-1973).

Data file. Annual financial and operation information about publicly-owned utilities operating in the United

States and Puerto Rico are presented in a series dating back to 1946. The statistics were issued up to 1977 by the Federal Power Commission; since 1977, they have been published by the Energy Information Administration (EIA). Publicly-owned refers to electric utilities operated by municipalities and Federal powered agencies, which develop, transmit, or distribute power. Data are given for 25 municipal wholesaler electric utilities whose revenues from sales for resale are 51% or more of total electric operating revenue; 456 municipal retailer electric utilities whose revenues from sales for resale are 51% or less of total electric operating revenues; and 79 Federal projects. Covered are financial and operational data for major municipalities and for Federal projects by kind of plant, by income source, by disposition, by class of customers, by type of, and by class of production. Composite statements for major municipalities and for Federal projects cover balance sheet data; income accounts; number of electric customers, kilowatt-hour sales, and revenues from sales; electric operation and maintenance expenses; in service costs by type of electric utility plant and by type of power generation; electric energy generated and received, by type of plant; balance sheet relationship, and income account relationships. The last three sections of this report contain summary tables and separately detailed tabulations of financial data, by company and by State/location for municipal wholesalers, municipal retailers, and for Federal projects. An index lists the name of each reporting publicly-owned utility of Federal project and the State(s) in which it operates. Document preface explains format, the regulations governing data compilation, and a list of companion reports published by the EIA. Other narrative sections briefly summarize tables.

Keywords: *Data file, *Electric utilities, *Public utilities, Revenue, Operating costs, Income, Sales, Assets, Earnings, United States, Puerto Rico, Magnetic tapes, Return on investment, Electric power generation, *Wholesale trade, Financial statements.

PB84-213065/XDD

Nonresidential Energy Consumption Survey: Building Characteristics, Annual Consumption and Expenditures, October 1979 through January 1980.

Data file. This tape presents data from the 1979-1980 Nonresidential Buildings Energy Consumption Survey. The NBECS have been designed by the Energy Information Administration to provide information concerning consumption in the nonresidential sector. The Public Use Tape presents the survey

data file, an SPSS file program, a Table Producing Language (TPL) file program, a TPL codebook and a COBOL file used to produce the survey data file of annual consumption and expenditures data. The survey data file contains basic data concerning building characteristics from the interview questionnaire and annualized (October 1979 - January 1980) fuel consumption and expenditures derived from the records of the building's fuel suppliers. Also included are weather variables, and a weighting variable. The file contains 6,222 sample buildings from the contiguous U.S. These buildings represent 4.0 million weighted buildings. The smallest unit of analysis is the individual building. However, the finest geographic identification available for each building is Census region. The tape documentation provides job control language for unloading the tape, a discussion of confidentiality provisions, and complete file descriptions.

For related technical reports, see PB84-213057/XDD, PB84-213040/XDD.

Keywords: *Data file, *Buildings, Fuel consumption, Heating, Cooling, Statistical data, Magnetic tapes, COBOL, Electric power, *Nonresidential buildings, *Energy consumption, *Energy conservation.

Electric Utility Company Monthly Statement/Current, EIA-826, January-March 1984.

Data file. Purpose of Form EIA-826 formerly FERC-5, Electric Utility Company Monthly Statement, is to collect data necessary to fulfill regulatory responsibility; identify near-term trends in energy use; and contingency analysis. This form is filed monthly by approximately 150 electric utilities. All privately owned electric utilities with annual electric operating revenues of \$100,000,000 or more must respond. In addition, the sample includes other selected electric utilities. This reported data is expanded by factors, calculated using annual data from a previous period, to give electric sales data by state and sector. Other information collected includes data gathered on depreciation, construction, net income before taxes, and extraordinary items. This data file is also available on a standing order basis.

Keywords: *Data file, *Electric utilities, *Sales, *Income, *Depreciation, *Construction, *Consumption, Magnetic tapes, Energy consumption.

PB-255 506/8/XDD

Los Angeles Reactive Pollutant Program Data - Modelers' Archive. September 1973-November 1973.

Data file. This file, the Modelers' Archive, is the second of two data files which contain the data collected by the Los Angeles Reactive Pollutant Program (LARPP) during the summer and early fall of 1973. The program was sponsored by the Coordinating Research Council, Inc., and its goal was to obtain a three-dimensional description of the various stages in the buildup of air pollutants in the Los Angeles area. A previous data file by the same title was issued in September of 1975. This is a companion to the earlier file. This file contains: (1) vertical profiles of average pollutant concentration; (2) vertical profiles of average and instantaneous temperature and humidity data; (3) positional data for the tetroons used to track a moving air mass; (4) printer plots of vertical profile data. A seven volume document is also available which describes the Modelers' Archive in detail.

For related technical reports, see PB-255 507/XDD, PB-255 508/XDD, PB-255 509/XDD, PB-255 510/XDD, PB-255 511/XDD, PB-255 512/XDD, PB-255 513/XDD, PB-255 514/XDD.

Master Data File from the 1975 Northeast Oxidant Transport Study.

Data file. The data from the EPA/Region I Summer 1975 Northeast Oxidant Transport Study have been

SCIENCE AND TECHNOLOGY

Field 23—ENVIRONMENTAL POLLUTION AND CONTROL

collected, validated, and compiled by SRI. The final product is a comprehensive data base for the study, stored on a single reel of magnetic tape. The manual describes the content and format of this magnetic tape. Both air quality and meteorological data, from ground stations and aircraft, are included for the study, which began on July 15 and ended on August 31, 1975. Four aircraft covered different geographical areas throughout the Northeast. The aircraft were operated by Battelle Columbus Laboratories, Washington State University, the Interstate Sanitation Commission, and EPA (Las Vegas). Ground station data are included for Massachusetts, New York, New Jersey, Connecticut, and Rhode Island. Detailed hydrocarbon analysis for samples collected aloft and on the ground were conducted by Washington State University and EPA (Research Triangle Park) and are reported in the master file. Upper air data (rawinsondes, pibals, and the Albany ozonesonde are also reported for the study period.

For related technical report, see PB-271 287/XDD.

Keywords: *Data file, Oxidizers, *Air pollution, Atmospheric diffusion, Ozone, Magnetic tapes, EPA region 1, Air quality data, *Northeast Region(United States).

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. cal profiles of sulfur concentrations and air temperature measured from helicopters.

For related technical reports, see PB-277 132/XDD, PB-277 133/XDD.

Keywords: *Data file, *Air pollution, *Sulfur dioxide, Fortran, Magnetic tapes, Aerial surveys, Concentration(Composition), Atmospheric motion, New York, *New York City(New York), Air pollution sampling, UNIVAC-1110 computers.

Availability: NTIS, CP T03, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions. Price includes documentation.

PB-283 265/7/XDD

National Marine Fisheries Service Species/Mercury Data

Data file. The tape contains total mercury data (ppm) for 79 species and/or categories of fish and shellfish representing all major commercial and recreational species of the U.S. collected during 1971-73. The majority of the data was provided by the National Marine Fisheries Service (NMFS). Other contributors were: the Michigan Department of Natural Resources and the New York State Department of Conservation for data on freshwater species, and Fisheries and Environment Canada for swordfish data. For each species information is given on the location of catch, month and year caught, weight in grams and mercury concentration in ppm.

Keywords: *Data file, *Mercury(Metal), *Fishes, *Shellfish, Magnetic tapes, Punched cards, Concentration(Composition), Weight(Mass), Statistical data, Fresh water fishes, United States, Michigan, New York, Canada, Hawaii, Alaska, *Water pollution, Commercial fishing, Sport fishing, Catch statistics.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB83-134015/XDD

Geoecology Data Base (SAS Format).

Data file. The Geoecology Data Base represents a unique compilation of computerized environmental data for research and development. The system is designed to provide rapid access to data at appropriate spatial and temporal scales for environmental impact assessment and planning. It is an integrated data base of diverse environmental resource information from extant sources. Data are stored at the county level of resolution for the conterminous United States. The Geoecology Data Base contains selected data on terrain and soils, water resources, forestry, vegetation, agriculture, land use, wildlife, air quality, climate, natural areas, and endangered species. Basic files on human population are also included to complement the environmental files.

For related technical report, see ORNL/TM-7351/XDD.

Keywords: *Data file, Magnetic tapes, Local government, National government, Land use, Forestry, Agriculture, Climate, Air quality, Wildlife, Natural resources, *Ecology, *Environmental impacts.

Availability: NTIS, CP T02, mag tape. Source tape is an IBM/SAS formatted file. Specify recording mode desired. Call NTIS Computer Products if you have questions. Price includes documentation.

PB83-173963/XDD

Wastewater Treatment - Cost Estimates for Construction of Publicly Owned Facilities, 1982 Needs Survey.

Data file. Comprehensive cost estimates of constructing all grant-eligible municipal treatment works needed by existing and future populations. The only complete inventory of municipal treatment works. A comprehensive technical and cost data base for management programmatic, and technical analyses of the construction grants program. Includes a preliminary analysis of the future Federal share of treatment works cost.

For related technical reports, see PB83-148486/XDD, PB83-173955/XDD.

Keywords: *Data file, Cost estimates, *Sewage treatment, Municipalities, Construction, Grants, Management, Forecasting, National government, *Water treatment, Sewage treatment plants.

Availability: NTIS, CP T08, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB83-195511/XDD

Volatile Organic Chemicals in the Atmosphere: An Assessment of Available Data.

Data file. A significant body of information is currently available to characterize the burden of possibly-hazardous organic chemicals (HOCs) in ambient environments. However, these data have not been accessible in an organized format, and no attempt had been made to study their significance or to integrate them into a useful and cohesive document. In this study, ambient data, primarily from the years 1970 through 1980, from 241 references covering 151 chemicals were collected and collated into a computer-accessible data base. Data acquisition has been limited primarily to a few geographical regions, and most sampling programs have been performed in the warmer months and during daylight hours. Specific recommendations are made for future studies regarding data reporting. A strategy for an effective national monitoring program was presented.

For related technical report, see PB83-195503/XDD.

Keywords: *Data file, *Hazardous materials, *Organic compounds, *Air pollution, Concentration(Composition), Sampling, Volatile organic compounds.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-

Steam-Electric Plant Air and Water Quality Control Data 1974-1980/(Form EIA-767).

Data file. The files consist of data from pages 2, 5, 9, and 9(a) of FPC Form 67 and its successor Form EIA-767. The data from 1974-1980 came from electric generating plants with a steam-electric generating capacity of 25 megawatts or greater. Data for 1981 came from plants whose steam-electric capacity was 100 megawatts or greater. Page 2 data are fuel consumption and quality by month per plant. Page 5 data are fuel consumption by month by boiler and boiler operation load data. Page 9 data are equipment design parameters per boiler which include design fuel consumption, percent boiler efficiency and air flow at 100 percent load. Page 9(a) data concern boiler ability to burn alternate fuels.

Keywords: *Data file, *Electric utilities, Fuel consumption, Boilers, Magnetic tapes, Fuels, *Air pollution, *Water pollution, Fuel substitution.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), January 1-21, 1976.

Data file. The St. Louis Regional Air Pollution Study (RAPS), provided a comprehensive documentation of regional air quality, meteorology and pollutant emissions. RAPS involved an average data collection rate in excess of one million observations per day over a 3 year period (1974-1977). The overall objective of the Regional Air Pollution Study (RAPS) was to create a comprehensive research data set to be used in the development, evaluation and validation of Air Quality Simulation Models. The RAPS 1976 hourly area source emissions data are contained on a series of six IBM binary or eighteen CDC binary tapes. Hourly emissions of the criteria pollutants (1) total suspended particulate, (2) sulfur dioxide, (3) ni-

nitrogen oxide, (4) total hydrocarbons (5) carbon monoxide, as well as fugitive dust and the breakdown of total hydrocarbon into moles of nonreactive hydrocarbon, paraffins, olefins, aromatics and aldehydes are reported for 1989 RAPS grids varying in size from 1 square kilometer to 100 square kilometers. The gridded area covers Air Quality Control Region (AQCR) 70 in entirety. The reported hourly data combines several major categories of area source emissions: river vessels, fugitive dust, highways, railroads, stationary residential and commercial, off-highway mobile, stationary industrial sources and airports. The stationary industrial source category contains the minor point sources emitting less than 0.01% of a given pollutant. The complimentary hourly point source data is available on another series of tapes. State-of-the-art emission inventory methodologies in 1976 were used to provide much of the temporal and spatial resolution required for use in Air Quality Simulation Models. The first file on each tape contains file formats and record layouts. The second file on each tape contains grid descriptions; thus each tape may be accessed independently. This tape covers the time period of January 1-21, 1976. Publications: Regional Air Pollution Study (RAPS) Emission Inventory Summarization. PB-293-164/OBE Regional Air Pollution Study (RAPS) Emission Inventory Handbook: Volume 1 PB-249-613/1SL, Volume 2 PB-250-113/8SL, and Volume 3 PB-250-114/6SL.

PB84-240266/XDD

Resource Conservation Recovery Act Notification Data File.

Data file. This file contains data compiled for the Resource Conservation Recovery Act. Notification of Hazardous Waste Activity, EPA Form 8700-12 was used to collect the data. The file was updated with information compiled from the Application for a Hazardous Waste Permit, EPA Form 3510-3. The data includes names and addresses of the facility owner and operator, as well as the facility contact name and phone number. The data indicates whether a facility is a generator, treat/store/disposer, and/or transporter of hazardous waste. There is also a listing of code numbers of waste handled taken from 40 CFR Part 261.

Keywords: *Data file, *Hazardous materials, *Waste disposal, *Regulations, Licenses, State government, *Resource conservation recovery act, Listings.

Availability: NTIS, CP T02, mag tape. Source tape is in the EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

AND HYDROLOGY

PB-197 514/3/XDD

Magnetic Tape Containing 7192 Chemical Analyses of Sedimentary Rocks of the Central and Northwestern United States.

Data file. The file contains 7192 chemical analyses of sedimentary rocks from the central and northwestern United States. With each analysis is an identification number, amount of excess aluminum oxide, amount of excess ferric oxide, amount of three main constituents (uncombined silica, clay, and carbonate), classification group, state, county, number within county, rock name, age, formation, and use. A report, containing a related computer program, may be ordered separately as PB-220 478. The report includes the source listing of a 258 statement Fortran 4 IBM 360/65 computer program for selective retrieval of data from the tape.

For related technical report, see PB-220 478/2/XDD.

Keywords: *Data file, *Sedimentary rocks, *Geochemistry, Minerals, Alaska, Midwestern states, Northwestern states.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: IBM compatible, 7 track, 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcidc, odd parity.

PB-209 567/7/XDD

Description of Magnetic Tape and 'Read-Only' Retrieval Program of Geochemical Data, Coeur d'Alene District, Idaho.

Data file. The file contains analyses of 8195 soil samples from the Coeur d'Alene district, Idaho. For each sample, the content of each of 36 elements is given. In addition, latitude and longitude are provided for each sample. The report provides a summary of the arrangements of data on the tape, a physical description of the tape, and a 'read-only' computer program for data retrieval.

Keywords: *Data file, Soil analysis, *Idaho, *Geochemistry, Chemical, Computer programming, Information retrieval.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcidc, odd parity.

PB-210 928/8/XDD

Magnetic Tape Containing Semiquantitative Spectrographic Analyses and Some Selected Chemical Analyses of Rocks and Stream Sediments from the Cloud Peak Primitive Area, Wyoming.

Data file. The file contains analyses of 769 samples of rock stream sediment, and pan concentrates from the Cloud Peak Primitive Area and Vicinity, Wyoming. Sample localities, description of samples, and discussion of analyses will be published in U.S. Geological Survey Bulletin 1371-C.

Keywords: *Data file, *Wyoming, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Sediments, Spectroscopic analysis, Streams.

SCIENCE AND TECHNOLOGY

Field 24—NATURAL RESOURCES, GEOLOGY, AND HYDROLOGY

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: IBM compatible, 7 track, 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcdic, odd parity.

PB-211 684/6/XDD

Magnetic Tape Containing Semiquantitative Spectrographic and Chemical Analyses of Rocks and Stream Sediments from the Gila Wilderness, Gila Primitive Area and Vicinity, New Mexico.

Data file. The tape contains four files: Unaltered rocks, 533 samples, 36 variables, input ID-Unaltered; Altered rocks, 574 samples, 36 variables, input ID-Altered; Stream sediments, 1375 samples, 36 variables, input ID-Strmsed; Pan concentrates, 177 samples, 36 variables, input ID-Pancon. Sample localities, description of samples, and discussion of analyses will be released in open file by the U.S. Geological Survey.

Keywords: *Data file, *New Mexico, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Sediments, Spectroscopic analysis.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

PB-213 036/7/XDD

Magnetic Tape Containing Stream-Sediment Analytical Data, Central Maine (with Description).

Data file. The file contains analyses of 6155 soil samples from central Maine, generally between 44 degrees and 46 degrees N latitude. For each sample the concentrations of 28 different chemical determinations are given. X and y coordinates for each sample are also given. The report provides a summary of the arrangement of the data on the tape and a physical description of the tape.

Keywords: *Data file, *Geochemistry, *Maine, Sediments, Chemical composition, Soils, Coordinates.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity; or 9 track, 800bpi, odd parity.

PB-220 816/3/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment, Rocks, and Pan Concentrates from the Teton Corridor, Wyoming

Data file. This tape contains 29 files. Sample localities, description of samples, and discussion of analyses will be released in open file by the U.S. Geological Survey in a report entitled, 'Mineral Resources of the Teton Corridor, Teton County, Wyoming', by J.D. Love, and J. C. Antweiler, U.S. Geological Survey, and F. E. Williams, U.S. Bureau of Mines. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included.

Keywords: *Data file, *Wyoming, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Wyoming, Sediments, Rocks, Spectroscopic analysis, Magnetic tapes, USGS.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; or 9 track, 800bpi, odd parity.

PB-220 817/1/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment and Soils, Rocks, and Pan Concentrates from the Absaroka Primitive Area and Vicinity, Montana

Data file. This tape contains 3 files: stream sediments and soils, 814 samples, 36 variables, input ID-WEDOW SS; rock samples, 429 samples, 36 variables, input ID-WEDOW RK; and pan concentrate samples, 16 samples, 36 variables, input ID-WEDOW CC. Sample localities, description of samples, and discussion of analyses will be released in open file by the U.S. Geological Survey in a report entitled, 'Mineral resources of the Absaroka Primitive Area and vicinity, Park and Sweet Grass Counties, Montana', by Helmuth Wedow, Jr., and David L. Gaskill, U.S. Geological Survey, and D'Arcy P. Banister and Eldon C. Pattee, U.S. Bureau of Mines, with a section on 'Interpretation of geophysical data', by Donald L. Peterson, U.S. Geological Survey. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included.

Keywords: *Data file, *Montana, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Montana, Sediments, Soils, Rocks, Spectroscopic analysis, Magnetic tapes, USGS.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity; or 9 track 800 BPI, odd parity.

PB-220 818/9/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rocks and Stream Sediment from the Study Areas Contiguous to the Uncompahgre Primitive Area, Colorado

Data file. This tape contains one file: rock and stream sediment, 986 samples, 49 variables, input ID-UNCOMPAG. Sample localities, description of samples, and discussion of analyses will be released in open file by the U.S. Geological Survey in a report entitled, 'Mineral resources of study areas contiguous to the Uncompahgre Primitive Area, San Juan Mountains, southwestern Colorado', by T. A. Steven, P. W. Lipman, F. S. Fisher, U.S. Geological Survey, and by C. L. Bieniewski, and H. C. Meeves, U.S. Bureau of Mines, with a section 'Interpretation of Aeromagnetic Data', by Peter Popenoe and R. G. Luedke, U. S. Geological Survey. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included.

Keywords: *Data file, *Colorado, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Colorado, Sediments, Rocks, Spectroscopic analysis, Magnetic tapes, USGS.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity; or 9 track, 800 BPI, odd parity.

NATURAL RESOURCES, GEOLOGY, AND HYDROLOGY—Field 24

PB-220 819/7/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rock and Stream Sediment from the Scapegoat Wilderness (Formerly Lincoln Back Country), Montana

Data file. This tape contains one file: rock and stream sediments, 3,207 samples, 41 variables, input ID-ALL. Sample localities, description of samples, and discussion of analyses are in a U.S. Geological Survey report entitled 'Mineral resources of the Lincoln Back Country area, Powell and Lewis and Clark Counties, Montana,' by M.R. Mudge and others, which was released to the open files March 25, 1971. The published version will be USGS Bulletin 'Mineral resources of the Scapegoat Wilderness, Powell and Lewis and Clark Counties, Montana,' by M. R. Mudge, R. L. Earhart, and K. C. Watts, Jr., U.S. Geological Survey, and by E. T. Tuckey and W. L. Rice, U.S. Bureau of Mines, with a section on 'Geophysical surveys,' by D. L. Peterson, U.S. Geological Survey. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included.

Keywords: *Data file, *Montana, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Montana, Sediments, Rocks, Spectroscopic analysis, Magnetic tapes, USGS.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800 BPI, odd and even parity; or 9 track, 800 BPI, odd parity.

PB-223 208/0/XDD

Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 1 - 1967-68.

Data file. Aeromagnetic and total count gamma radiation data were observed over Liberia, West Africa, in 1967-68. These data have been digitized, gridded, and additionally processed and are presented here in magnetic tape suitable for computer plotting or additional processing. The data are referenced to the Liberian Hotine Rectified Skew Orthomorphic projection and rectangular coordinates indicated on published maps of Liberia. The five files of data consist of: (1) Total count gamma radiation (2) total magnetic intensity relative to an arbitrary datum, (3) regional magnetic component (with main earths field removed), (4) near surface (residual) magnetic component, and (5) correlation function (near-surface magnetic-total count gamma radiation). The magnetic data have been analyzed using the method of Spector and Grant (1970); the correlation function was calculated by a method developed by A. Spector.

Keywords: *Data file, *Magnetic surveys, *Radiometry, Gamma rays, *Aeromagnetic data, *Liberia.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, Bcd, odd or even parity; or 9 track, 800bpi, Ebcdic, odd parity.

PB-223 209/8/XDD

Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 2 - 1967-68.

Data file. Aeromagnetic and total count gamma radiation data were observed over Liberia, West Africa, in 1967-68. These data have been digitized, gridded, and additionally processed and are presented here in magnetic tape suitable for computer plotting or additional processing. The data are referenced to the Liberian Hotline Rectified Skew Orthomorphic projection and rectangular coordinates indicated on published maps of Liberia. The five files of data consist of: (1) Total count gamma radiation, (2) total magnetic intensity relative to arbitrary datum, (3) regional magnetic component (with main earths field removed), (4) near surface (residual) magnetic component, and (5) correlation function (near-surface magnetic-total count gamma radiation). The magnetic data have been analyzed using the method of Spector and Grant (1970); the correlation function was calculated by a method developed by A. Spector.

Keywords: *Data file, *Magnetic surveys, *Radiometry, Gamma rays, *Liberia, *Aeromagnetic data.

The magnetic data have been analyzed using the method of Spector and Grant (1970); the correlation function was calculated by a method developed by A. Spector.

Keywords: *Data file, *Magnetic surveys, *Radiometry, Natural radioactivity, Gamma rays, *Aeromagnetic data, *Liberia.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd or even parity, Bcd, or 9 track, 800bpi, Ebcidic or Ascii, odd parity.

PB-223 215/5/XDD

Magnetic, and Radiometric Data of Liberia West Africa, Area Block 8 - 1967-68.

Data file. Aeromagnetic and total count gamma radiation data were observed over Liberia, West Africa, in 1967-68. These data have been digitized, gridded, and additionally processed and are presented here in magnetic tape suitable for computer plotting or additional processing. The data are referenced to the Liberian Hotline Rectified Skew Orthomorphic projection and rectangular coordinates indicated on published maps of Liberia. The five files of data consists of: (1) total count gamma radiation, (2) total magnetic intensity relative to an arbitrary datum, (3) regional magnetic component (with main earth's field removed), (4) near surface (residual) magnetic component, and (5) correlation function (near-surface magnetic-total count gamma radiation). The magnetic data have been analyzed using the method of Spector and Grant (1970); the correlation function was calculated by a method developed by A. Spector.

PB-229 947/7/XDD

Magnetic Tape Containing Results of Semiquantitative Spectrographic Analyses of the Magnetic Fractions of 680 Alaskan Alluvial Concentrates

Data file. This tape contains a card-image format of analytical data arranged in 680 rows of 35 variables (data columns), followed by 54 replicate analyses of one of the samples. Data in parts per million are presented for Ag, As, Au, Ba, Be, Bi, Cd, Co, Cr, Cu, La, Mn, Mo, Nb, Ni, Pb, Sb, Sc, Sn, Sr, V, W, Y, Zn, and Zr; data in percent are given for Al, Ca, Fe, Mg, and Ti. In addition, the Alaskan File No., latitude and longitude, and map code for each sample are listed. Map code refers to a list of 43 topographic quadrangles, at 1:250,000 scale, in which Alaskan Detrital concentrates were collected. The tape is 7-track, no-label, even-parity, card-image, 800 BPI, record length 80, and block size 1600. It was recorded on IBM 360-65.

Keywords: *Data file, Spectrochemical analysis, *Geochemistry, Geochemical prospecting, *Alaska, Magnetic properties, Metalliferous mineral deposits, Ferromagnetism, Alluvium, Trace elements, Magnetic tapes, USGS.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; or 9 track, 800bpi, odd parity.

PB-231 246/0/XDD

Magnetic Tape Containing Results of Semiquantitative Spectrographic Analysis of 1069 Alaskan Alluvial Concentrates

Data file. Data in percent are given for Al, Ca, Fe, Mg, and Ti; data in parts per million are listed for Ag, As, Au, B, Ba, Be, Bi, Cd, Ce, Co, Cr, Cu, Eu, Gd, Ge, Hf, In, La, Li, Mn, Mo, Nb, Ni, Pb, Pd, Pt, Sb, Sc, Sn, Sr, Ta, Te, Th, Ti, U, V, W, Y, Zn, and Zr. In addition, the Alaskan File No., latitude and longitude, and map code (for 43 topographic quadrangles at 1:250,000 scale, in which samples were collected) for each sample are listed. Recorded on an IBM 360-65, the tape is 7-track, no-label, even-parity, card-image, 800 BPI, record length 80, and blocksize 1600.

Keywords: *Data file, Magnetic tapes, *Geochemistry, Alluvium, *Alaska, Spectrochemical analysis, Metalliferous mineral deposits, USGS.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; or 9 track, 800bpi, odd parity.

PB-232 049/7/XDD

Spectrographic and Chemical Analyses of Rock and Stream Sediment Samples from the Granite Fiords Wilderness Study Area, Alaska

Data file. This tape contains 2 files: file No. 1, 625 stream sediment samples; file No. 2, 877 rock samples; 38 variables; input ID-ALL. Sample localities, descriptions of selected samples, and discussion of analyses will be released in a U.S. Geological Survey report (Bulletin) entitled, 'Mineral resources of the Granite Fiords Wilderness Study Area, Alaska', by Henry C. Berg, Raymond L. Elliott, and James G. Smith, U.S. Geological Survey, and Thomas L. Pittman and Arthur L. Kimball, U.S. Bureau of Mines, with a section on 'Aeromagnetic Interpretation', by Andrew Griscom, U.S. Geological Survey. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included. (Author)

Keywords: *Data file, *Geochemistry, Magnetic tapes, *Alaska, Spectrochemical analysis, Metalliferous mineral deposits, Granite Fiords Wilderness.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; Bcd; or 9 track, 800bpi, odd parity.

PB-232 345-SET/XDD

Digital Magnetic Tapes of Single Channel Seismic Reflection Profiles on the Continental Shelf and Slope between Bering Strait and Barrow, Alaska, and MacKenzie Bay, Canada

Data file. Approximately 2600 miles of single channel seismic reflection data were collected in the Beaufort and Chukchi Seas and digitally recorded on 67 reels of magnetic tape. The tapes were recorded in standard IBM-compatible, 9-track, NRZI, 800 bpi mode. Each record consists of a 20 word (320 bit) header, followed by data collected at a 2 millisecond interval. Most records are 4 seconds long resulting a record length of 4040 or 4800 records. Data on each tape is listed and details on format are given.

For related technical report, see PB-232 344/2/XDD.

Keywords: *Data file, *Seismic prospecting, Alaska, *Beaufort Sea, *Chukchi Sea, Magnetic tapes, Seismic reflection, Seismic refraction, Digital recording.

Availability: NTIS, CP T99, 67 reels mag tape. Set includes 67 reels magnetic tape (available only in 9 track, 800 BPI, odd parity, EBCDIC), PB-232 345-01 thru PB-232 345-67 and documentation. Tapes may be ordered individually CP T01.

PB-235 001/5/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rocks, Stream Sediments, and Panned Concentrates from the Du Noir Addition, Washakie Wilderness, Fremont County, Wyoming.

Data file. This tape contains one file: rocks, stream sediments, and panned concentrates, 382 samples, 29 variables, input ID-TOTAL. Sample localities, description of samples, and discussion of analyses will be released in open file by the U.S. Geological Survey in a report entitled, 'Mineral resources of the Du Noir Addition, Washakie Wilderness, Fremont County, Wyoming', by H. J. Prostka and J. C. Antweiler, U.S. Geological Survey, and C. L. Bieniewski, U.S. Bureau of Mines, with a section on 'Aeromagnetic Survey', by M. D. Kleinkopf, U.S. Geological Survey. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included.

Keywords: *Data file, *Spectrochemical analysis, *Geochemistry, Mineral deposits, Metalliferous minerals, Magnetic tapes, *Wyoming, Fremont County(Wyoming).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; or 9 track, 800bpi, odd parity.

PB-235 002/3/XDD

Physical Properties Testing of Soils and Rocks, 1967-1974.

Data file. The physical properties data set consists of descriptive and analytical data generated by the U.S. Geological Survey at Denver, Colorado. The data are for the most part, made up of data on tuffaceous material from the Nevada Test Site. However, the data set also includes information on a variety of other rock and soil types from several states. The descriptive data, such as rock (or soil) type and geologic age, are coded according to a scheme presented later in this report. Analytic data, such as compressive strength, are stored as numeric variables with the specified dimension.

For related technical report, see PB-235 003/1/XDD.

Keywords: *Data file, *Soil properties, *Rock properties, Engineering geology, Civil engineering, Tables(Data), Rock tests, Magnetic tapes.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity, Bcd; or 9 track, 800bpi, odd parity, Ebcdic. Price includes User's Guide.

PB-235 078/3/XDD

Semiquantitative Spectrographic Analyses of Rock Samples, Coeur d'Alene District, Shoshone County, Idaho.

Data file. Semiquantitative spectrographic analyses are given in percent for Fe, Mg, Ca, and Ti, and in parts per million for Mn, Ag, B, Ba, Co, Cr, Cu, La, Mo, Ni, Pb, Sc, Sr, V, Y, Zn, and Zr. Atomic absorption analyses in parts per million are given for Zn, Ag, Cd, Te, Co, Pb, Hg, Au, Na, and K. In addition,

latitude, longitude and rock type for each sample are listed for eight files. The tape containing this analytical data has eight data files as follows: Total analyses, 3979 X 39; Wallace 993 X 39; Burke 402 X 39; Revett 455 X 39; St. Regis 839 X 39; Pritchard 727 X 39; Monzonite 106 X 39; Belt undivided 446 X 39.

Keywords: *Data file, *Geochemistry, Spectrochemical analysis, Geochemical prospecting, Mineral deposits, Magnetic tapes, *Idaho, Coeur d'Alene district, Shoshone County(Idaho).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity, Bcd, or 9 track, 800bpi, odd parity, Ebcdic.

PB-238 412/1/XDD

Semiquantitative Spectrographic Analyses of Detrital Ilmenite from the Inner Piedmont Belt, North Carolina and South Carolina.

Data file. This tape contains a card-image format of analytical data in 383 rows of 64 variables (data columns). The data matrix contains the following parameters: row identifiers (field numbers), laboratory numbers, latitudes, longitudes, state codes, county codes, and chemical variables for samples of detrital ilmenite from the Inner Piedmont belt of North and South Carolina. Fe, Mg, Ca, Ti, Al, K, and P are in percent; the 52 other elements reported are in parts per million. The tape is 7 track, no label, odd parity, card image, 800 BPI, EBCDIC, record length 80 and block size 1920 (blocked 24 to 1).

Keywords: *Data file, *Geochemistry, *Ilmenite, Magnetic tapes, Chemical composition, *South Carolina, Spectrochemical analysis, Detritus, North Carolina.

Availability: NTIS, CP T01, 1 reel mag tape. Available only in 9 track, 800 BPI, odd parity, EBCDIC.

PB-238 413/9/XDD

Spectrographic and Chemical Analyses of Mineralized Ores and Floats, Mines and Dumps, Stream Sediments and Pan Concentrates from the Cougar Lakes-Mount Aix Study Area, Yakima and Lewis Counties, Washington.

Data file. This tape contains four files: ores and floats, 1,529 samples, 36 variables, input ID-DS1; mines and dumps, 11 samples, 34 variables, input ID-DS2; stream sediments, 779 samples, 36 variables, input ID-DS3; pan concentrates, 37 samples, 34 variables, input ID-DS4. Sample localities, description of samples, and discussion of analyses will be released in open file by the U.S. Geological Survey in a report entitled, 'Mineral resources of the Cougar Lakes-Mount Aix study area, Yakima and Lewis Counties, Washington', by George C. Simmons, U.S. Geological Survey, and Ronald M. Van Noy and Nicholas T. Zilka, U.S. Bureau of Mines, with a section on the Interpretation of Aeromagnetic Data, by Willard E. Davis, U.S. Geological Survey. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Spectrographic analysis, Chemical analysis, Washington(State).

Spectrographic and Chemical Analyses of Stream Sediments and Rock from the Alpine Lakes Study Area and Additions, Washington.

Data file. This tape contains one file: rock and stream sediments, 4,665 samples, 47 variables, input ID-ALL. Sample localities, description of samples and discussion of analyses are available in U.S. Geological Survey Open-File Report 75-3 entitled 'Mineral Resources of Additions to the Alpine Lakes Study Area, Chelan, King, and Kittitas Counties, Washington', by J. L. Gualtieri, U.S. Geological Survey and H. K. Thurber, M. S. Miller, A. B. McMahan, and F. F. Federspiel, U.S. Bureau of Mines.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, *Washington(State), Metalliferous mineral deposits, Magnetic tapes, Trace elements, Spectrochemical analysis, Rocks, Sediments, Alpine Lakes, Chelan County(Washington), King County(Washington), Kittitas County(Washington).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 300 bpi, odd or even parity, BCD.

PB-240 488/7/XDD

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Nabesna Quadrangle, Alaska.

Data file. This tape contains one file: rock and stream sediments, 2005 samples, 41 variables, from Nabesna quadrangle, Alaska.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, *Alaska, Metalliferous mineral deposits, Spectrochemical analysis, Magnetic tapes, Rocks, Sediments, Trace elements, Nabesna quadrangle(Alaska).

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600bpi, odd parity, Ebcidic; or 7 track, 800bpi, odd or even parity, BCD. Documentation available.

PB-243 454/6/XDD

Geochemical Data in the Eastern Part of the Upper Peninsula of Michigan, 1972-73.

Data file. A study in the Michigan part of the Army Map Service Sault Ste. Marie, Michigan, U.S., Ontario, Canada, 2 degrees quadrangle evaluated geochemical analyses of soil samples from a glaciated region as an aid to finding target areas that have potential for ores of metals. Most of the samples are soil from the upper 30 cm (12 in) of unconsolidated debris overlying bedrock, but some samples of bed-

rock, stream sediments, beach sands, peat, and mulch were analyzed. Bedrock overburden ranges from none in areas of bedrock outcrops to as much as 133 m (436 ft) and is composed of clayey silt to fine sand of lacustrine origin clayey till to boulder till of glacier origin, sand to boulders of fluvioglacial origin and recently formed peat and muck. Analytical results indicate that soil samples from overburden of unknown thickness and composition in a glaciated region likely will not indicate target areas if overburden is more than 1 1/2 - 2 m (5 - 7 ft) thick. This is especially true if overburden is clayey silt or clayey till.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, *Michigan, Ontario, Sands, Magnetic tapes, Glacial deposits, Soil chemistry.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 800 bpi, odd or even parity, BCD.

Spectrographic and Chemical Analyses of Stream Sediment and Rock from the Indian Peaks Study Area, Colorado

Data file. This tape contains four files: stream sediments, 292 samples, 42 variables, input ID-STR SED; Fresh rock, 271 samples, 42 variables, input ID-Fresh; Altered rock, 128 samples, 42 variables, input ID-ALTERED; Mineralized rock, 237 samples, 42 variables, input ID-MINERAL. Sample localities, description of samples, and discussion of analyses will be released by the U.S. Geological Survey in a bulletin report entitled 'Mineral resources of the Indian Peaks study area, Boulder and Grand Counties, Colorado' by R. C. Pearson, U. S. Geological Survey, and C. N. Speltz, U. S. Bureau of Mines and Gordon Johnson, U. S. Geological Survey.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Spectrochemical analysis, Chemical analysis, Sediments, Rocks, Magnetic tapes, Indian Peaks, *Colorado.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 800 bpi, odd or even parity, BCD.

PB-252 214/2/XDD

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the North Absaroka Study Area, Park and Sweet Counties, Montana.

Data file. This tape contains three files: (1) stream sediments: 1,113 samples; (2) others: 67 samples; (3) rocks: 931 samples. Card image format: The first 70 card columns contain data with a FORTRAN format of 10(A1,F6.0). Card columns 71-78 and 79-80 are row identifiers and card sequence numbers, respectively. The data matrix contains 34 variables listed as 'STAPAC COLUMN IDENTIFIERS' on attached sheet. Each card contains 10 variables; thus, each sample is listed on three lines (records) of 10 variables and one line of four variables.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, Spectrochemical analysis, Metalliferous mineral deposits, Streams, Rocks, Magnetic tapes, *Montana, Park County(Montana), Sweet County(Montana), North Absaroka(Montana).

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in EBCDIC character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-253 190/3/XDD

Spectrographic and Chemical Analyses of Stream Sediment and Rocks from the Proposed Additions to the Scapegoat Wilderness, Powell and Lewis and Clark Counties, Montana.

Data file. This tape contains two files: (1) rocks: samples 1-480; 40 variables; (2) stream sediments: samples 481-600; 43 variables. Sample localities, description of samples and discussion of analyses are available in U.S. Geological Survey open-file report 76-225 entitled 'Mineral Resources of the proposed additions to the Scapegoat Wilderness, Powell and Lewis and Clark Counties, Montana, by Robert L. Earhart, David J. Grimes, and Reinhard W. Leinz, U.S. Geological Survey and Lawrence Y. Marks, U.S. Bureau of Mines.'

Keywords: *Data file, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Spectrochemical analysis, Chemical analysis, Sediments, Rocks, Magnetic tapes, *Montana.

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in EBCDIC character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Seismic Data from Downhole Array Near San Francisco Bay, California.

Data file. This tape contains data from the downhole seismometer array described in U.S. Geological Survey Open-File Report No. 76-296, 'Analysis of seismograms from a downhole array in sediments near San Francisco Bay', by William B. Joyner, Richard E. Warrick, and Adolph A. Oliver III, April 1976. Each data record on the tape is written in the FORMAT (8F10.2) and corresponds to the output in microvolts, at one instant of time, of channels 1 through 8 of the array. Channel No. 1 is the vertical component at 186 meters depth; No. 2 is the vertical component at 40 meters; No. 3 is the vertical component at 12 meters; No. 4 is the vertical component at the surface; No. 5 is the north component at 186 meters; No. 6 is the north component at 40 meters; No. 7 is the north component at 12 meters; and No. 8 is the north component at the surface. Successive records represent successive instants of time at a sample rate of 50 samples per second. File No. 1 contains the Bear Valley, California, earthquake of September 4, 1972, origin time 18 04 40.8 GMT, magnitude 4.7. The file contains 7000 records representing 140 seconds of data beginning about 70 seconds before the first P arrival. File No. 2 contains the San Fernando, California, earthquake of February 9, 1971, origin time 14 00 41.6 GMT, magnitude 6.6. The file contains 18,000 records representing 360 seconds of data beginning about 100 seconds before the calculated first P arrival.

Keywords: *Data file, *Earthquakes, *Seismology, Seismic arrays, Magnetic tapes, California, San Fernando Earthquake, Bear Valley Earthquake, *San Francisco(California).

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in ASCII character set. Tape can be prepared in most standard 7 or

9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-254 972/3/XDD

Spectrographic and Chemical Analyses of Stream Sediments, Rocks, and Soils from the Scotchman Peak Wilderness Study Area, Lincoln and Sanders Counties, Montana, and Bonner County, Idaho.

Data file. This tape contains three files: (1) rocks: 205 samples; 41 variables; (2) stream sediments: 100 samples; 41 variables; (3) soils: 22 samples; 12 variables. Sample localities, description of samples and discussion of analyses are available in U.S. Geological Survey open-file report 76-entitled 'Mineral resources of the Scotchman Peak wilderness study area, Lincoln and Sanders Counties, Montana, and Bonner County, Idaho.'

Keywords: *Data file, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Spectrochemical analysis, Chemical analysis, Sediments, Rocks, Soil chemistry, Magnetic tapes, *Montana, *Idaho, Lincoln County(Montana), Sanders County(Montana), Bonner County(Idaho), Scotchman Peak Wilderness Area.

Availability: NTIS, CP T01, 1 reel mag tape. Source tape is in EBCDIC character set. Tape can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-255 795/7/XDD

Spectrographic and Chemical Analyses of Mineralized Rock and Stream Sediments from the Laramie Peak Study Area, Wyoming.

Data file. This tape contains five files: stream sediments, 422 samples, 41 variables, input ID-STMSED; all rocks, 205 samples, 41 variables, input ID-ROCK; rocks - dike, 88 samples, 41 variables, input ID-ROCK-D; rocks - granitic, 74 samples, 41 variables, input ID-ROCK-G; rocks - other, 41 samples, 41 variables, input ID-ROCK-S. Sample localities, description of samples, and discussion of analyses are in U.S. Geological Survey Bulletin, entitled, 'Mineral Resources of the Laramie Peak Study Area, Albany and Converse Counties, Wyoming', by Kenneth Segerstrom, U.S. Geological Survey, and R. C. Weisner, U. S. Bureau of Mines, with a section on 'Aeromagnetic Interpretation', by M. Dean Kleinkopf, U.S. Geological Survey. All of the analytical results obtained by the U.S. Geological Survey during the mineral survey are included.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, Metalliferous mineral deposits, Spectrochemical analysis, Chemical analysis, Sediments, Rocks, Magnetic tapes, Laramie Peak, *Wyoming.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 7 track, one-half inch tape only. Identify recording mode by specifying density and parity only. Call NTIS Computer Products, if you have questions.

PB-261 854/4/XDD

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Chama-Southern San Juan Mountains Wilderness Study Area, Mineral, Rio Grande, Archuleta, and Conejos Counties, Colorado.

For complete citation, see 19 Chemistry and Physics.

PB-261 855/1/XDD

Spectrographic and Chemical Analyses of Stream Sediments, Rocks, and Panned Concentrates from the West Elk Wilderness and Vicinity, Delta and Gunnison Counties, Colorado.

Master Environmental Control and Mine System Design Simulator for Underground Coal Mining-Test Data File.

Data file. The data sets on this tape are test data for the computer programs comprising the Master Environmental Control and Mine System Design Simulator for Underground Coal Mining. The programs are on BuMines Tape 1-77 (MDS-5). The Master Design Simulator is completely documented in an 11-volume report available through NTIS (Report No. PB-272 032). These test data correspond to example applications of each of the subsystems of the simulator which are found in the report. The Master Design Simulator has a wide range of possible applications in the design and evaluation of underground coal mining systems from the standpoints of health and safety, productivity, and mine environment. It consists of nine free-standing function-oriented subsystems linked together into an integrated, comprehensive model of an entire mining system. The subsystems which make up the Simulator are Geology and Reserves, Methane Generation, Roof Support, Subsidence, Production, Rail Haulage, Cost, Water Generation, and Ventilation. In addition to these, there is a Dynamic subsystem in which the production, rail haulage, methane generation and roof support subsystems function interactively on a continuous basis to simulate a mining operation.

For related technical report, see PB-272 032/XDD.

Keywords: *Data file, *Coal mining, Safety engineering, Health physics, Computerized simulation, Environmental surveys, Magnetic tapes, Fortran.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-266 902/6/XDD

Results of Spectrographic and Chemical Analyses of Geochemical Samples from the McCarthy Quadrangle, Alaska.

Data file. This tape contains nine files of data from the McCarthy Quadrangle, Alaska. The files are as follows: stream sediments, rocks, glacial debris, oxalic leachates, heavy mineral concentrates and ferromagnetic minerals, Willow vegetation and Moose pellet feces.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, *Alaska, Spectrochemical analysis, Sediments, Glacial deposits, Rocks, Magnetite, Minerals, Vegetation, Feces, Wildlife, Sampling, Statistics, Magnetic tapes, McCarthy Quadrangle.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-275 360/6/XDD

Seismic Data for 15 Earthquakes Recorded on a Downhole Array in Sediments Near San Francisco Bay, California.

Data file. This tape contains data from the downhole seismometer array described in 'Analysis of seismograms from a downhole array in sediments near San Francisco Bay', by William B. Joyner, Richard E. Warrick, and Adolph A. Oliver III, Bull. of the Seis. Soc. of America, vol. 66, no. 3, pages 937-958, June 1976. Each data record on the tape is written in the FORMAT (12F10.2) and corresponds to the output in microvolts, at one instant of time, of channels 1 through 12 of the array. Successive records represent successive instants of time. The first two files are system response tests (see appendix of above reference). The remaining fifteen files contain recorded earthquakes, in the order shown on the attached List. The tape contains data from 15 earthquakes and two system response tests recorded on a downhole array established by the U.S.G.S. on the S.W. shore of the S. F. Bay. Output is given for the vertical and two horizontal components at the surface, at depths of 12 and 40 meters within the sediments, and just below the top of the bedrock at a depth of 186 meters. The data may be used to study the effect of soft sediments on low-amplitude seismic ground motion.

Keywords: *Data file, Bays(Topographic features), *Earthquakes, Seismic arrays, Sediments, Seismic detection, Earth movements, California, *Seismology, Magnetic tapes, *San Francisco Bay, Ground motion.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions.

PS-276 777/0/XDD

Analytical Results from Rock and Stream-Sediment Samples Collected in Ketchikan and Prince Rupert Quadrangles, Southeastern Alaska

Data file. This tape contains two files of data for geochemical samples: File 1 contains data from 1731 rock samples, file 2 contains data from 2667 stream-sediment samples.

Keywords: *Data file, *Geochemistry, Geochemical prospecting, *Alaska, Spectrochemical analysis, Sediments, Glacial deposits, Rocks, Minerals, Sampling, Trace elements, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-286 959/2/XDD

Spectrographic and Chemical Analyses of Stream-Sediment and Rock Samples from the Minarets Wilderness and Adjacent Areas, California.

Data file. This tape contains three files of analyses. (1) 1007 stream-sediment samples. (2) 102 unmineralized rocks. (3) 33 mineralized rocks. Card image format: the 1st 70 card columns contain data with a Fortran format of 10(AI, F6.0). Card columns 71-78 and 79-80 are row identifiers and card sequence numbers respectively. The variables in the data matrix are listed as 'SELECTED COLUMN IDENTIFIERS' on the attached sheets. Each card contains 10 variables; thus, for example, a stream sediment sample with 33 variables is listed on 3 lines (records) of 10 variables and 1 line of 3 variables. A sample locality map and discussion and evaluation of the analytical results will be published by the Geological Survey in a report entitled 'Mineral Resources of the Minarets Wilderness and Adjacent Areas, Madera and Mono Counties, California'.

Keywords: *Data file, Metalliferous mineral deposits, *Geochemistry, Geochemical prospecting, Chemical analysis, Spectrochemical analysis, Sampling, Streams, Sediments, Magnetic tapes, Trace elements, Minarets Wilderness, *California, Madera County(California), Mono County(California).

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-292 892/7/XDD

Hydrologic Data for Soldier Creek Basin, Kansas.

Data file. Selected hydrologic data collected in Soldier Creek Basin, Kansas, are available on magnetic tape in card-image format. Data on the tape includes water discharge in fifteen-minute and daily time intervals; rainfall in fifteen-minute and daily time intervals; suspended sediment in concentrations and particle-sizes; bed material in particle-sizes; ground-water levels; and chemical quality of water in concentrations of selected constituents.

SCIENCE AND TECHNOLOGY

Keywords: *Data file, *Hydrology, Soldier Creek Basin, *Water quality, Rainfall, Suspended sediments, Particle size, Diurnal variations, Ground water, Concentration(Composition), Stream flow, Magnetic tapes, *Kansas, Water levels.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Character set restricts preparation to 9 track one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-296 549/9/XDD

Puerto Rico Seismic Program. Seismological Data Report, July 1, 1975-December 31, 1977.

Data file. The purpose of this report is to compile and make available preliminary data acquired from the Puerto Rico Seismographic Network in order to facilitate current studies of earthquake occurrence. Record interpretation, data processing, and collation of hypocenter data and related event parameters were performed by the U.S. Geological Survey, Golden, Colorado. Hypocenter solution data are given for all solved earthquakes and blasts, and hypocenter data for teleseisms and unsolved earthquakes are summarized. Hypocenter solutions for local earthquakes are designated either 'fixed depth solution' or 'free depth solution' for all computations except those designated 'probable blast,' the depth is allowed to go free from the starting depth if the data are of sufficiently good quality; if not, the depth remains fixed at the starting value (15 km), the nominal depth for the specific source area, or the depth is fixed at the value yielding the best solution. Teleseisms are designated 'teleaseismic solution.'

Keywords: *Data file, *Seismology, *Earthquakes, Data processing, Seismological stations, Seismic detection, Seismic data, Depth, Sources, Explosions, Puerto Rico, Teleaseisms, Hypocenters.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB-300 543/6/XDD

Geochemical Data for New Mexico.

Data file. The data on this NTIS tape have been retrieved from the U.S. Geological Survey's geochemical data file called RASS (Rock Analysis Storage System), designed and used for storage and retrieval of geochemical data generated in the laboratories of the U.S. Geological Survey. Data are predominately from rocks, but include other materials. The material classification and number of samples in each class are Igneous rocks (1,037 samples), Metamorphic rocks (50), Sedimentary rocks (1,186), Unconsolidated sediments (1,070), Single mineral (244), Soil (441), Water (4), Plants (265), Organic fuels or related substances (214), Miscellaneous (154), Other (393).

Keywords: *Data file, Rocks, *Geochemistry, *New Mexico, *Rock properties, Chemical composition, Sediments, Water,

Plants(Botany), Soils, Minerals, Organic compounds, Igneous rocks, Metamorphic rocks, Sedimentary rocks, Magnetic tapes.

Geocoding: RASS system.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-160111/XDD

Computer Tape Containing Geologic, Geochemical and Remote Sensing Data for the Ely and Rowe Canyon Study Areas, Nevada.

Data file. The purpose of this report is to present the data used in the characteristic analysis of Ely and Rowe Canyon study areas in east-central Nevada. The data consist of information obtained from geologic maps, geochemical surveys, and remote-sensing imagery. The data is stored in a raw form and in a gridded array. The special data arrays required as input for characteristic analysis are also on the tape. All gridded data sets were reduced to ternary form by using a second derivative technique in the characteristic-analysis data-preparation system, PREP (Hanley, unpub. data, 1979).

For related technical report, see PB81-160129/XDD.

Keywords: *Data file, *Ely Canyon, *Rowe Canyon, Geological surveys, Geology, *Geochemistry, Geochemical prospecting, Geologic investigations, Magnetic tapes, Data, Nevada, *Remote sensing.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-211567/XDD

FCC M3 Map Data File.

Data file. Separate maps of the United States, Canada, and Mexico have been developed which show estimated conductivity regions within each country. The area within the national boundaries is divided into sectors which have each been assigned a value of ground conductivity ranging from 0.5 mmhos/m to 40 mmhos/m. For signal propagation studies seawater is assigned a conductivity of 5000 mmhos/m. The Canadian soil map also contains regions labeled 'unknown' or 'conductivity based on limited data'.

Keywords: *Data file, *Soil properties, *Conductivity, Wave propagation, United States, Mexico, Canada, Maps, Magnetic tapes, NTISFCC.

Availability: NTIS, CP T03, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB81-212912/XDD

Stream-Sediment Geochemical Survey of the Bureau of Land Management's American Flats-Silverton Planning Unit in Southwest Colorado.

Data file. A mineral assessment was undertaken by Barringer Research, Inc. on behalf of the Bureau of Land Management covering the American Flats-Silverton Planning unit in southwest Colorado. A total

of 1203 stream-sediment samples were collected with 1195 of these subsequently being analyzed by Barringer Research. The Bureau of Land Management's staff geologists collected 89 rock chip samples and 157 talus samples that were also analyzed. A hard copy of this text, data files, and associated maps has been open-filed with the U.S. Geological Survey.

For related technical report, see PB81-212920/XDD.

Keywords: *Data file, Minerals, Colorado, Sampling, Fortran, *Geochemistry, *Sedimentology, Sediment-water interfaces, Land management, American Flats-Silverton Planning, NTISDILMCO.

Spectrographic and Chemical Analyses of Rocks and Stream-Sediments for the Choteau 2 Quadrangle, Montana.

Data file. This tape contains 32 spectrographic and chemical analyses, and locations for geochemical samples from the Choteau 2 quadrangle, Montana. The tape file consists of two files, rocks, and stream sediments. The first five records of each data set give the data set name, number of samples and variables, and all variable identifiers; e.g. an identifier of S-Fe% indicates spectrographic analysis of iron in percent. An identifier of AA-AU-P indicates atomic absorption of gold, in parts per million, using a partial digestion. Each sample is comprised of five records; 10 variables each on records 1, 2, and 3; two variables each on records 4 and 5. Records 1 through 4 have a data format of 10(A1, F6.0). Record 5 is 2F14.5. All have the sample identifier, A8, in columns 71-78 and the record sequence number 11 in column 80.

Keywords: *Data file, Spectrochemical analysis, Chemical analysis, *Geochemistry, Sampling, Montana, *Rock properties, *Soil properties.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Pilot Test of Frequency Methods for Ungaged Watersheds by Water Resources Council's Hydrology Committee.

Data file. The Water Resources Council's Committee on Hydrology conducted a pilot test of procedures used to determine peak flow frequency values at ungaged locations. The primary objective of the pilot test was to permit the efficient designing and conducting of a nationwide test. To accomplish this objective, nine procedures were tested on a sample of 70 watersheds, 42 in the northern midwest and 28 in the Pacific Northwest. The data set in files 1 on this tape contains the peak flow frequencies for the 50-, 10-, and 1-percent chance events. In file 2, this information has been combined to provide information on the bias, reproducibility, and time required to apply each procedure at each watershed.

For related technical report, see PB81-239329/XDD.

Keywords: *Data file, *Stream flow, *Floods, *Watersheds, Magnetic tapes, Sites, Field tests, Stream gages, Peak flow, Flood frequency, Pacific Northwest Region(United States), Northwest Region(United States).

Trace Element Data for Bedrock Geochemical Samples from the West Chicagof-Yakobi Wilderness Study Area, Southeastern Alaska.

Data file. The Wilderness Act (Public Law 88-577, September 3, 1964) and related acts require the U.S. Geological Survey and the U.S. Bureau of Mines to survey certain area on Federal lands to determine their mineral resource potential. The act provides that areas under consideration for wilderness designation be studied for suitability for incorporation into the wilderness system. Results must be made available to the public and be submitted to the President and the Congress. This report provides background data for a mineral survey of some national forest lands on western Chicagof and Yakobi Islands, southeastern Alaska, that are being considered for wilderness designation. The area studied is within the Tongass National Forest, about 25 miles (40 km) northeast of the town of Sitka. To assist with the evaluation of the mineral resources of the study area, a reconnaissance geochemical sampling program was conducted during 1978 and 1979. This magnetic computer tape contains the analytic data for, and locations of, 2230 bedrock geochemical samples collected during this study.

For related technical report, see PB82-191834/XDD.

Analyses of Natural Gases, 1981.

Data file. This tape contains routine analyses and related source data for 12,838 natural gas samples. These samples were collected as a part of a continuous survey of the free world for occurrences of helium. This survey has been conducted in the United States by the Bureau of Mines since 1917. In late 1965, the study was expanded to include foreign gasfields. Samples released for publication have been published in a series of USBM bulletins and information circulars. This tape contains all samples released for publication through December 31, 1981. There is one record on the tape for each sample analysis. The tape does not contain a label, standard or non-standard. The tape is a nine-track, 800 BPI, odd parity, ASCII tape. Each record contains 328 characters. The records are blocked 1 (one) per block. Oil and Gas Field Code Master List (EIA).

Data file. The Energy Information Administration has developed a system of codification of the oil and gas fields throughout the United States, the Oil and Gas Field Code Master List. It is intended to provide a unique standard code for all oil and/or gas fields. The Master List is organized by State, with fields sorted alphabetically by name within each individual State. Fields located in the Federal Offshore area are listed with the adjacent State. The fields listed are geologic fields as defined by EIA (An area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structural feature and/or stratigraphic condition. There may be two or more reservoirs in a field which are separated vertically by intervening impervious strata, or laterally by local geologic barriers or by both). This definition is not currently used by all States in their designation of fields; consequently, areas classified as individual fields in certain States may be found combined in the Master List.

Lithologic, Petrographic and Resource Data to Accompany Report on Estimation of Uranium Endowment in the Westwater Canyon Member, Morrison Formation, San Juan Basin, Colorado Plateau.

Data file. The gridded data used to evaluate the geologic favorability of uranium concentration and consequently, to estimate the undiscovered uranium endowment in the Westwater Canyon Member, Morrison Formation, San Juan Basin, Colorado Plateau in a report by McCammon and others (1983) have been stored on magnetic tape. Interpreted data describing the lithologic and petrographic characteristics of the Westwater, exploration intensity and discovered uranium endowment were generated for a grid made up of 5292 4 km square cells. The database is in GRASP output format. In addition to the interpreted data, the ternary transformations and ternary-transformed data used to evaluate the favorability within each cell with respect to 9 different regionalized deposit models for uranium have also been stored. These data are in a form that can be read by the PREPRO program described by Bridges and others (1983) to create the matarray for the NCHARAN program described by McCammon and others (1983) that was used to generate the estimates in the report. The names and descriptions of all the variables used are stored as part of the file.

Keywords: *Data file, *Uranium, Geology, Lithology, Petrography, *Geochemistry.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

GEO THERM Data Tape Giving Geochemistry of Geothermal Springs, Wells in the U.S.

Data file. The data tape contains 10405 records which give location, temperature, and geochemistry for fluid samples from geothermal springs, wells, and fumaroles found in the United States. Records may contain up to 118 items but can also contain only a few variables. Condensate, gas, and water analyses may be present. Concentrations for commonly reported solutes may be given as well as results of stable isotope analyses. All numeric fields use the following format: c (blank)999 where c = qualification code which is always present. Entries include: L = less than, G = greater than, T = trace (not followed by number), Q = qualified (other data in qualification field), E = estimated, R = midpoint of range (actual range in qualification field), pad character = 12-7-9 multi-punch. The pad character is present when a data value is unqualified. The '999' is a number of varying precision but it always contains a decimal point. See Bliss, J. D., and Raport, A., 1983, **GEO THERM: the U.S. Geological Survey geothermal information system: Computers & Geosciences**, v. 9, no. 1, p. 35-39, for additional information.

Keywords: *Data file, *Geochemistry, Sampling, Temperature, Chemical analysis, Concentration(Composition), Geothermal systems, Geothermal fluids, Geothermal wells, Geothermal springs, Fumaroles.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

Ohio Magnetic Data at Elevations 1000 ft Above Ground and 2000 ft Above Sea Level in a Grid-ded Format.

Data file. Two digital gridded magnetic data sets of Ohio at elevations 1,000 ft (305 M) above ground and 2,000 (610 m) ft above sea level are contained on a the magnetic tape described in this report. The data were gridded at a spacing of 1 km (0.62 mi) and projected using a Lambert conformal projection (standard parallels of 33N and 45N, central meridian of 83W, and base latitude of 0 degrees).

Keywords: *Data files, *Magnetic surveys, *Ohio, Magnetic anomalies, Magnetic signatures, Grids(Coordinates), Latitude, Longitude.

Geocoding: tates(United States).

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

PB84-156017/XDD

Oil and Gas Field Code Master List (December 1983).

Data file. ETA has developed a system of codification of the oil and gas fields throughout the United States, the Oil and Gas Field Code Master List. It is intended to provide a unique standard code for all oil and/or gas fields. The Master List is organized by State, with fields sorted alphabetically by name within each individual State. Fields located in the Federal Offshore area are listed with the adjacent State. The fields listed are geologic fields as defined by EIA (An area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structural feature and/or stratigraphic condition. There may be two or more reservoirs in a field which are separated vertically by interening impervious strata, or laterally by local geologic barriers or by both). This definition is not currently used by all States in their designation of fields; consequently, areas classified as individual fields in certain States may be found combined in the Master List.

For related technical report, see PB84-156033/XDD.

Keywords: *Data file, *Oil fields, *Gas fields, Standards, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation, PB84-156033.

Grazing Rental Appraisal Data.

Data file. The 'Public Rangeland Improvement Act of 1978' required the Secretaries of Agriculture and the Department of Interior to conduct a study of grazing fees in the Western United States and make recommendations for alternative fee systems before January 1986. The 'Grazing Rental Appraisal' was a part of the overall study. This appraisal was conducted throughout the Western United States and includes information obtained in 17 States. The States covered all or in part are: AZ, CA, CO, ID, KS, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA and WY. The purpose of the appraisal was to estimate fair market rental value of grazing on the public rangelands, as administered by the BLM and the FS. Information contained on the computer tape reflects results of individual interviews with parties to grazing lease transactions both in the private and public sectors. It also contains the results of interviews with State, corporate, and other Federal or governmental entities. The data identifies terms and conditions of the various leases, as well as acreages, distances from lease properties, improvements, availability of stock water, class, kind and type of stock grazed, and who is responsible for maintenance and repair and day to day care of stock, i.e., doctoring, salt and movement to and from the lease. Also, who controls access, hunting, predator control and other uses. The conclusions in the appraisal were based in part on the analysis of the information contained on this computer tape.

For related technical report, see PB84-242205/XDD.

Keywords: *Grazing land, *National parks, *Public land, *Prices, Government policies, Grassland, Leasing.

Availability: NTIS, CP T03, mag tape. Source tape is in the EBCDIC character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions. Price includes documentation PB84-242205.

Cooperative Thyrotoxicosis Therapy Follow-Up Study (1946-1964).

Data file. The thyrotoxicosis study was initiated in 1961 to test for an increase in the incidence of leukemia in hyperthyroid patients treated with iodine-131. Twenty-two study centers representing twenty-six medical institutions submitted records on 36,000 patients treated for hyperthyroidism in the period January 1946 through December 1964. Source docu-

ments are questionnaires sent to twenty-two study centers which represented twenty-six medical institutions. Data were thereby acquired on 36,000 patients treated for hyperthyroidism.

Keywords: *Data file, *Hyperthyroidism, *Leukemias, *Radiotherapy, *Information systems, Iodine 131, BRH.

Availability: NTIS, CP T03, 2 reels mag tape. Specify tape recording mode desired: 7 track, 800bpi, odd and even parity; or 9 track, 800bpi, odd parity.

PB-232 434/1/XDD

X-Ray Exposure Study: 1964

Data file. The principal objective of the study was to provide estimates of U.S. population exposure to x-ray examinations or procedures, for a variety of demographic and x-ray facility characteristics. The data collected were intended to guide the development of programs aimed at promoting more efficient use of x-rays in medical and dental practice; to develop hypotheses and identify population groups for further research; and to establish a baseline for evaluating the effectiveness of program efforts. The design of the study included a household interview survey of a representative sample of the U.S. population and a mail followup to the x-ray facilities involved.

Keywords: *Data file, *X ray absorption, Radiation dosage, *Radiography, Exposure, Surveys, Dentistry, Medicine, Populations.

Availability: NTIS, CP T01, 1 reel mag tape. Available only in 9 track, 800bpi, odd parity, Ebcidc.

PB-232 435/8/XDD

Dose Translation Study - 1964

Data file. Based on the exposure data collected in a 1964 X-ray exposure study, the gonad dose and the genetically significant dose for the U.S. population have been estimated in the dose translation study. The application of several models was required in the process, including a model to estimate skin exposure as a function of reported technical parameters, and a dose model to estimate gonad dose from radiographic examinations, with the knowledge of the exposure to any portion of the body. An additional model was developed for estimating gonad dose from fluoroscopic examinations.

Keywords: *Data file, *X ray absorption, *Radiation dosage, *Radiography, Reproductive system, Dose rate, Exposure, Models.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 7 track, 800bpi, even parity, Bcd; or 9 track, 800bpi, odd parity, Ebcidc.

PB-245 600/2/XDD

National Health Related Items Code Tape.

Data file. The National Health Related Items Code (NHRIC) Directory Magnetic Tape contains medical device (health related items) product information supplied to FDA by medical device firms cooperating in the implementation of the NHRIC system. Each product is assigned a 10 digit code. The first four digits identify the Labeler (manufacturer, repackager

SCIENCE AND TECHNOLOGY

Field 25—MEDICAL SCIENCES

or distributor) and the next six digits the product. Information on approximately 22,000 medical device products marketed by 80 firms is included in this tape edition.

Keywords: *Data file, *Medical equipment, *Directories, Magnetic tapes, Data storage devices, Inventory control, Manufacturers, Distributors.

Availability: NTIS, CP T01, 1 reel mag tape. Specify tape recording mode desired: 9 track, 800 or 1600 bpi, odd parity, EBCDIC; or 7 track, 800 bpi, odd or even parity, BCD. Documentation available.

PB-262 496/3/XDD

Natural Toxicants Literature File through 1975.

Data file. The Food and Drug Administration Natural Toxicants Literature file is maintained to provide a current awareness of published investigations and reviews. The file provides the means to search and retrieve information on selected topics. The data base is accumulated by routine scanning of: Current Contents Life Science; Current Contents Agriculture, Biology and Environmental Sciences; Chemical Abstracts; Current Abstracts of Chemistry and Index Chemicus; Automatic Subject Citation Alert (ASCA) service provided by The Institute for Scientific Information from a weekly scan of their literature acquisitions that match an interest profile provided by us; and documents acquired by personal contacts. The interest profile covers all natural toxicants, and related disciplines with an emphasis on mycotoxins. Hard copy of all titles is obtained and scanned for determination of appropriate search codes and keys. This copy is kept in a central reference file in the FDA laboratories. Titles are entered as acquired to maintain current awareness and search capabilities.

Keywords: *Data file, *Bibliographies, Toxicology, Documents, Magnetic tapes, *Toxic substances, Biotoxins, Mycotoxins.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tape(s) can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Documentation available.

PB-291 261/6/XDD

Supplementary Data System, Microdata File, New Mexico, 1976.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, source of injury or illness; and occupation, industry, age, sex, and weekly wages of injured or ill employee. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the New Mexico Labor and Industrial Commission from records of workers' compensation cases involving eight or more lost workdays which were reported during 1976. Data include cases arising

in private and public employments with these principal exceptions: private employers with three or fewer employees, farm labor, domestic servants, and students employed by educational institutions to help defray the cost of tuition, for which workers' compensation is voluntary, and casual workers. In addition, Federal employees and employees engaged in railroad and maritime employments are not covered by the State act and cases involving such employees will not be included in these data.

For related technical report, see PB-288 258/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *New Mexico, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-291 262/4/XDD

Supplementary Data System, Microdata File, South Dakota, 1976.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; time of accident, time workday began, nature of injury or illness, part of body affected, type of accident or exposure, source of injury or illness; and occupation, industry, age, sex, and length of service of injured or ill employee. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the South Dakota State Department of Health from records of workers' compensation cases reported during 1976 to the Department. Data include cases arising in private and public employments with these principal exceptions: elected or appointed State, county, or local officials; certain farm workers and domestic servants; casual workers; and executive officers of non-profit corporations. Workers' compensation coverage is voluntary for the preceding categories. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees will not be included in these data.

For related technical report, see PB-288 258/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *South Dakota, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year of occurrence; time of accident, time workday began, nature of injury or illness, part of body affected, type of accident or exposure, source of injury or illness; and occupation, industry, age, sex, and length of service of injured or ill employee. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the Colorado Department of Labor and Employment from records of workers' compensation cases involving fatalities or more than three lost workdays. Data include cases arising in private and public employments with these principal exceptions: some farm and ranch labor, domestic or casual labor, and non-profit, religious, or charitable workers. In addition, Federal employees and employers engaged in railroad and maritime employments are not covered by the State act and cases involving such employees will not be included in these data.

For related technical report, see PB-288 258/XDD.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB-291 273/1/XDD

Supplementary Data System, Microdata File, California, 1976.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, source of injury or illness; and industry and sex of injured or ill employee. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the California Department of Industrial Relations from records of workers' compensation cases involving fatalities, or one or more lost workdays, which were reported during 1976. Data include cases arising in private and public employments with the exception of some domestic servants, casual employees, part-time gardeners, volunteer or charitable workers, and uncompensated athletes. Also, cases involving workers covered by Federal compensation laws are not included.

For related technical report, see PB-288 258/XDD.

PB-291 319/2/XDD

Supplementary Data System Microdata File, Oregon, 1976.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, source of injury or illness; and industry and sex of injured or ill employee. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the Oregon Workmen's Compensation Board from records of workers' compensation cases which entitle the worker to compensation. Data include cases arising in private and public employments with these principal exceptions: workers of any city having a population of more than 200,000 that provides by ordinance

or charter compensation equivalent to compensation under the Act; domestic servants; maintenance workers' about a private home; casual workers (for whom, during any 30 day period, the total labor cost, regardless of the number of workers, is less than \$100.00); employees performing services primarily for board and lodging from any religious, charitable, or relief organizations; and sole proprietors, partners, and officers of corporations. Also, employments subject to Federal compensation or liability acts are not covered by State workers' compensation acts.

For related technical report, see PB-288 258/XDD.

PB-291 343/2/XDD

Supplementary Data System, Microdata File, North Carolina, 1976.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness; part of body affected, type of accident or exposure, source of injury or illness; and industry, age, and sex of injured or ill employee; and indemnity compensation and medical payments. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the North Carolina Department of Labor from records of workers' compensation cases closed during 1976 for which indemnity compensation and/or medical benefits were paid. Indemnity compensation was paid for cases in which disability exceeded seven days. Employers were allowed to report cases involving only medical treatment which cost less than \$75 during 1/1/76 through 6/30/76 or \$100 during 7/1/76 through 12/31/76 in a summary report; such cases are not included in these data. Data include cases arising in private and public employments with these principal exceptions: Those employed by employers with less than four employees, domestic servants, and farm labor. Injuries and illnesses to employees of such employers are not included in the data except for those employers who voluntarily elected coverage. In addition, Federal employees and employees engaged in railroad and maritime employments were not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB-288 258/7/XDD.

Each case record contains year, month and day of occurrence; time of accident and time workday began; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; and occupation, industry, age, sex, length of service, and weekly wages of injured or ill employee. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the Iowa Bureau of Labor from records of workers' compensation cases which occurred during 1977 and involved fatalities or two or more lost workdays. Data include cases arising in private and public employments with these principal exceptions: Some farmworkers, domestic and casual workers, and various management officials of non-profit corporations. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB-288 258/7/XDD.

PB-292 477/7/XDD

Supplementary Data System, Microdata File, North Carolina, 1977.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; time of accident; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, length of service, and weekly wages of injured or ill employee; and indemnity compensation and medical payments. Technical documentation is avail-

able: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the North Carolina Department of Labor from records of workers' compensation cases closed during 1977 for which indemnity compensation and/or medical benefits were paid. Indemnity compensation was paid for cases in which disability exceeded seven days. Employers were allowed to report cases involving only medical treatment which cost less than \$100 in a summary report; such cases are not included in these data. Data include cases arising in private and public employments with these principal exceptions: Those employed by employers with less than four employees, domestic servants, and farm labor. Injuries and illnesses to employees of such employers are not included in the data except for those employers who voluntarily elected coverage. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data. **For related technical report, see PB-288 258/7/XDD.**

PB80-108798/XDD

Supplementary Data System, Microdata File, Minnesota, 1977.

Data file. The data file contains records of individual occupational injuries and illnesses for Minnesota. Each case record contains year of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; and occupation, industry, age, sex, and weekly wages of injured or ill employee. Data includes cases arising in public employment, with the exception of the State legislature and elected or appointed officials of any political subdivisions which have not provided coverage. Data also include cases arising in private employment with the principal exceptions of some agricultural employees, some domestic and household workers, and nonprofit organizations. Federal, railroad, and maritime employments are not covered.

For related technical report, see PB-288 258/XDD.

PB80-111107/XDD

Supplementary Data System, Microdata File, California, 1977.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year and month of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, and length of service of injured or ill employee. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the California Department of Industrial Relations from records of workers' com-

pensation cases involving fatalities, or one or more lost workdays, which were reported during 1977. Data include cases arising in private and public employments with the exception of some domestic servants, casual employees, part-time gardeners, volunteer or charitable workers, and uncompensated athletes. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB-288 258/XDD.

Keywords: *Data file, Industrial accidents, Occupational diseases, Injuries, Magnetic tapes, Data storage, Occurrence, California, *Industrial medicine, illnesses, *Occupational safety and health.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB80-115702/XDD

Supplementary Data System, Microdata File, Wisconsin, 1977.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, and sex of injured or ill employee; and indemnity compensation and medical payments. Technical documentation is available: PB-288 258, Supplementary Data System, Microdata Files, User's Guide, 1976-77. Data were compiled by the Wisconsin Department of Industry, Labor, and Human Relations from records of workers' compensation cases. Data are either from cases which occurred during 1977, or compensated cases closed during 1977 regardless of the date of occurrence, as indicated. Data include cases arising in public and private employments with these principal exceptions: Certain private employments with fewer than three employees; certain farmers employing fewer than six; and casual workers. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB-288 258/XDD.

PB80-158397/XDD

Supplementary Data System, Microdata File, North Carolina, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, length of service, and weekly wages of injured or ill employee; and indemnity compensation and medical payments. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the North Carolina Department of Labor from records of workers' compensation cases closed during 1978 for which indemnity compensation and/or medical benefits were paid. Indemnity compensation was paid for cases in which disability exceeded seven days. Employers were allowed to report cases involving only medical treatment which cost less than \$100 in a summary report; such cases are not included in these data. Data include cases arising in public employments, and in private employments with these principal exceptions: Those employed by employers with less than four employees, domestic servants, and farm labor. Injuries and illnesses to employees of such employers are not included in the data except for those employers who voluntarily elected coverage. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB80-149982/XDD.

PB80-160575/XDD

Supplementary Data System, Microdata File, Utah, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; and occupation, industry, age, sex, length of service, and weekly wages of injured or ill employee. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the Utah Industrial Commission from records of reported workers' compensation cases which occurred during 1978 and which involved fatalities or medical expense or treatment beyond first aid. Data include cases arising in public employments; and in private employments with these principal exceptions: Casual employees, certain agricultural employees, domestic employees, and proprietors or partners, for whom voluntary coverage is permitted. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *Utah, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB80-160583/XDD

Supplementary Data System, Microdata File, Minnesota, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; and occupation, industry, age, sex, and weekly wages of injured or ill employee. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the Minnesota Department of Labor and Industry from records of workers' compensation cases which occurred in 1978 and

SCIENCE AND TECHNOLOGY

Field 25—MEDICAL SCIENCES

involved fatalities, serious injuries, three or more lost workdays, or permanent disability. Data include cases arising in private and public employments with these principal exceptions: employees of the State legislature, elected or appointed officials unless covered by ordinance or resolution of their political subdivisions, and some agricultural, domestic and household workers. In addition, Federal, railroad, and maritime employments are not covered by State workers' compensation acts and cases involving such employees are not included in the data. **For related technical report, see PB80-149982/XDD.**

PB80-160591/XDD

Supplementary Data System, Microdata File, Michigan, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; and occupation, industry, age, and sex of injured or ill employee. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the Michigan Bureau of Safety and Regulations from workers' compensation reports of cases which occurred during 1978 and which resulted in death or seven or more lost workdays. Data include cases arising in private and public employments with these principal exceptions: Those employed by certain nonagricultural employers with less than three employees; those employed by agricultural employers of less than three regular employees; those employed by certain agricultural employers with three or more employees; and certain household domestic servants. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data. **For related technical report, see PB80-149982/XDD.**

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *Michigan, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB80-168164/XDD

Supplementary Data System, Microdata File, South Dakota, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, and length of service of injured or ill employee. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the South Dakota State Department of Health from records of workers' compensation cases which occurred during 1978. Data include cases arising in public employments except for elected or appointed State, county, or local officials; and in private employments with these principal exceptions: Certain farm workers, domestic servants, and casual workers unless covered voluntarily; persons whose employment is not in the usual course of the trade, business, occupation, or profession of the employer; and executive officers of non-profit corporations. Workers' compensation coverage is voluntary for the preceding categories. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *South Dakota, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

PB80-196439/XDD

Supplementary Data System, Microdata File, California, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year and month of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, and length of service of injured or ill employee; and extent of disability (supplied for fatalities only). Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the California Department of Industrial Relations from records of workers' compensation cases involving fatalities, or one or more lost workdays, which were reported during 1978. Data include cases arising in private and public employments with the exception of some domestic servants, casual employees, part-time gardeners, volunteer or charitable workers, and uncompensated athletes. In addition, Federal, railroad and maritime

employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB80-149982/XDD.

PB80-202559/XDD

Supplementary Data System, Microdata File, Colorado, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; time of accident and time workday began; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, length of service, and weekly wages of injured or ill employee. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the Colorado Department of Labor and Employment from records of workers' compensation cases which were received in 1978. Data include cases arising in private and public employments with these principal exceptions: employees of farms and ranches with a calendar-year payroll of less than \$10,000, and some casual, domestic, non-profit, religious, and charitable workers. In addition, Federal, railroad, and maritime employments are not covered by State workers' compensation acts and cases involving such employees are not included in the data.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *Colorado, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB80-202567/XDD

Supplementary Data System, Microdata File, Missouri, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses, selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; and lapsed time; nature of injury or illness, part of body affected, type of accident or exposure, and

source of injury or illness; occupation, industry, age, sex, and weekly wages of injured or ill employee. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the Missouri Division of Workers' Compensation from records of workers' compensation cases which occurred during 1978. Data include cases arising in public employments, and in private employments with these principal exceptions: Employers with five or fewer regular employees, and some farm labor and domestic servants. Injuries and illnesses to workers in these categories are not included in the data except for those employers who voluntarily elect coverage. In addition, Federal, railroad and maritime employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *Missouri, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Availability: NTIS, Mag Tape \$125.00, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-143349/XDD

Supplementary Data System, Microdata File, Tennessee, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness, occupation, industry, age, sex, and weekly wages of injured or ill employee. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. Data were compiled by the Tennessee Department of Labor from records of workers' compensation cases resulting in death, permanent-partial disability, or eight or more lost workdays which were received during 1978. The data include cases arising in public and private employments with these principal exceptions: agricultural employees, household workers, casual employees, and employments with fewer than five workers, for which voluntary coverage is permitted. In addition, Federal and railroad employments are not covered by the State act and cases involving such employees are not included in these data.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Industrial accidents, Occupational diseases, Magnetic tapes, Data storage, *Tennessee, *Industrial medicine, Safety, Occurrence, Injuries, Exposure, Records, *Occupational safety and health, Workmens compensation, Illnesses.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-151227/XDD

Supplementary Data System, Microdata File, New York, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, and weekly wages of injured or ill employee; and extent of disability and indemnity compensation. Technical documentation is available: PB80-149982, Supplementary Data System, Microdata Files, User's Guide, 1978-79. The data were compiled by the New York Workers' Compensation Board from records of workers' compensation cases closed during 1978 which involve death, eight or more lost workdays, or volunteer firefighters. The data include cases arising in private and public employments with these principal exceptions: local government employees in non-hazardous occupations, public school teachers in cities of over a million inhabitants, certain agricultural employees, household workers, and employees in religious, charitable, or educational institutions and corporations, railroad and maritime workers, and other employees covered under Federal compensation laws.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *New York, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB81-165771/XDD

Supplementary Data System, Microdata File Wisconsin, 1978.

Data file. Tape contains records of individual occupational injuries and illnesses. Selected injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System of the Bureau of Labor Statistics. Each case record contains year, month and day of occurrence; time of accident and time workday began; nature of injury or illness, part of body affected, type of accident or exposure, and source of injury or illness; occupation, industry, age, sex, length of service, and weekly wages of injured or ill employee; and extent

of disability and indemnity compensation. Data were compiled by the Wisconsin Department of Industry, Labor, and Human Relations from records of workers' compensation cases. Tables are based either on cases which occurred during 1978, or compensated cases which closed during 1978 regardless of the date of occurrence. Data include cases arising in public and private employments with these principal exceptions: certain private nonfarm employments with two or fewer employees, certain farm employments with five or fewer employees, household workers, and certain casual employees, for which voluntary coverage is permitted, railroad and Federal employees, and longshorepersons and other employees covered under Federal compensation laws.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Occupational diseases, Industrial accidents, *Industrial medicine, *Wisconsin, Magnetic tapes, Data storage, Records, Injuries, Occurrence, Exposure, Safety, *Occupational safety and health, Illnesses, Workmens compensation.

Approved Prescription Drug Products with Therapeutic Equivalence Evaluations.

Data file. This data file was created to allow computer processing of data from the Approved Prescription Drug Products with Therapeutic Equivalence Evaluations (APDP). Each record contains the information required to identify a particular drug product. Other information regarding conventions and use of the data is contained in the preface to the APDP. To facilitate processing, there is some duplication of information among records so that each record contains all identifying information. In addition, for each record one NDA or ANDA number is included although more than one may apply to the particular drug product identified. The possibility of multiple numbers exists because the applicant may have more than one NDA or ANDA approved for the same drug product within the context of the data in the APDP. The distinguishing information may be package size, excipients, distributors, etc.

Keywords: *Data file, *Drugs, Data storage, Magnetic tapes, Antibiotics, *Prescription drugs, *Pharmacology.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-134891/XDD

National Cooperative Gallstone Study: Chenodiol for Dissolution of Gallstones.

Data file. The National Cooperative Gallstone Study was a controlled clinical trial of the efficacy and safety of chenodiol for dissolution of cholesterol gallstones. The tape contains four SAS data sets. SAS (the Statistical Analysis System) is a software package provided by the SAS Institute, Inc. (Cary, North Carolina) which includes a flexible data management

facility and a variety of statistical procedures for the analysis of data. The four data sets are named ANALYSIS, COVAR, F311, and RADIOL. Although these data sets can be read using an IBM utility, it is recommended that the data sets be read using the statistical analysis system itself. The advantage of a SAS file is that SAS maintains a directory of each variable on the file according to the assigned variable name, and variables may thus be referenced and documented by name rather than physical location in the data file. The Statistical Analysis System is described by Barr, et al, SAS User's Guide, Cary, North Carolina: SAS Institute, Inc.; 1979.

For related technical report, see PB82-134909/XDD.

Keywords: *Data file, *Cholelithiasis, Data storage, Magnetic tapes, Dissolving, Clinical medicine, Efficacy, Safety, Statistical analysis, Biliary system diseases, Cholesterol, *Gallstones, *Chenodeoxycholic acid.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation, PB81-211930, and PB82-134909.

PB82-140518/XDD

Automated Problem-Oriented Medical Information System (PROMIS) Data Tape, Final Version, 1981.

Data file. The overall goals of PROMIS are that (1) the medical record, utilizing a 'problem-oriented' approach, be the instrument whereby the following objectives can be implemented, and that (2) the technique of record keeping be the basis for the beginning realization of these goals and that (3) a real-time computer system be used to overcome the data distribution and time barriers that are insurmountable on a manual basis using conventional hospital and clinical medical records. The objectives are to (1) facilitate good patient care by making immediately available (in minutes) to the individual physician a complete, updated list of problems on any patient and by providing simultaneously, as a unit, all the data in sequence (narrative, laboratory, etc.) pertinent to any of these problems; (2) make possible epidemiological studies and other research endeavors in terms of problems, having all the data on any given problem immediately available; (3) make possible a medical audit; (4) make possible a business audit to assess the physical, financial and time resources that go into the solution or management of a given problem; and (5) provide problem-oriented records that can serve as the basis for clinical medical education. To realize these objectives PROMIS, for the good of the patient is not dependent upon the memories of individuals; preserves without ambiguity the logic of all actions; coordinates the efforts of all persons involved in the patient's care; and provides feedback with which the performance of health care providers may be evaluated and improved. The full resources of PROMIS are available at all times to all persons involved in the care of a patient, each of whom interact directly with the com-

puterized system without the need for mediating persons or paper. Touch-sensitive screens are used to display all the information in the system as it is needed by individual users. By selecting choices (and occasionally typing in data), a user is guided through a logical sequence of displays structuring his interaction with general and patient-specific medical data and building a 'message' to be stored in the patient's record. The PROMIS system emphasizes responsiveness and reliability. An interactive display medium must be responsive if users are not to become frustrated. Redundancy is built into the system on many levels to prevent loss of data or access to data should a failure occur. Data tapes 1 through 12 house a copy of all the PROMIS frames and tables, and the data structures comprising the PROMIS medical data base. The frames and tables are used to store data, to create displays for viewing on a CRT screen, and to branch from display to display when choices on the displays are selected. Each frame or table is a paragraph. A logical group of paragraphs is a file. The number of files on any tape is arbitrary. To interpret these data structures, the Functional Specification of a PROMIS Instance System, Level II is required (NTIS Interim Report No. NCHSR 81-67).

For related technical reports, see PB82-140526/XDD, PB82-140534/XDD, PB82-140542/XDD, PB82-140559/XDD.

Availability: NTIS, CP T13, mag tape*. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions. Price includes documentation. For computer program tapes, see PB82-140567.

PB82-169996/XDD

National Drug Code Directory Data File.

Data file. This is a standard magnetic tape which contains 221,968 variable length records. There are 4 record types: Type 1 records contain basic information including the NDC, trade name, labeler, route of administration, dose form, etc. Type 2 records contain information about packaging such as package code, type and size. Type 3 records contain information about ingredient. The printed directory includes a maximum of 3 ingredients. The data tape includes all active ingredients. Type 4 records contain information about the drug class.

Keywords: *Data file, *Drugs, Directories, Magnetic tapes, Data storage, Standards, Manufacturers, Packaging, Dosage, Dose forms, Inventory control, *Pharmacology, National Drug Code Directory.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying track, density, and parity. Call NTIS Computer Products if you have questions.

PB82-179243/XDD

Supplementary Data System Microdata File, File 3, 1979.

Data file. Tape contains 284,739 records of individual occupational injuries and illnesses for 1979 from 7 States: Colorado, Delaware, Montana, New York, North Carolina, Virginia, and Wisconsin. Cases which closed or reached final determination during 1979 are included. The data were obtained from workers compensation records by means of a Federal-State cooperative program called the Supplementary Data System. Data are limited to employments covered by State workers compensation acts. Injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System. Each case record describes the injury or illness according to nature and source, part of body affected, and type of accident or exposure; occupation, industry, age, sex, and weekly wage of the injured or ill employee; the year, month, and day of occurrence; and the extent of disability and amount of indemnity compensation paid.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Industrial accidents, Occupational diseases, *Industrial medicine, Workmens compensation, Injuries, Safety, Magnetic tapes, *Occupational safety and health.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB82-179268/XDD

ICD-9-CM Adjunct Materials - Editing Aids, Sex Specific Codes and Full Titles.

Data file. The ICD-9-CM codes with full titles magnetic tape provides the full title for each code contained in the published Tabular Lists of ICD-9-CM Volume 1, Diseases and Volume 3, Procedures. Use of this tape will allow computer generated data displays to translate ICD-9-CM codes into English. This tape will permit the entry of a code into the computer, which will generate display of the code and full title for the code. For example, entry of 474.0 will return: 474.0 Chronic tonsillitis. Valid disease codes may be 3, 4, or 5 digits in length. Valid procedure codes may be 3 or 4 digits in length. Footnote references are used (1) to identify titles that should not be used since the code is further divided and (2) to identify inapplicable codes where application of fifth digits to a series of categories results in illogical titles.

For related technical report, see PB82-179250/XDD.

Keywords: *Data file, *Diseases, Sex, Classifications, Coding, Magnetic tapes, Females, Males.

Availability: NTIS, Mag Tape \$125.00, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density,

and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB82-179284/XDD

ICD-9-CM Adjunct Materials - Diagnosis Conversion Table ICD-9-CM to ICDA-8.

Data file. The ICD-9-CM to ICDA-8 Diagnosis Table magnetic tape provides for the conversion of diagnostic information recorded in ICD-9-CM rubrics to the equivalent rubrics in ICDA-8. The greater specificity of ICD-9-CM does not permit a reverse conversion. The Conversion Table lists only 'valid' codes in both classifications. The codes are sequenced according to the ICD-9-CM code. Valid diagnosis codes for ICD-9-CM may be 3, 4, or 5 digits in length. Valid diagnosis codes for ICDA-8 may be 3 or 4 digits in length. The majority of ICD-9-CM codes will convert to a single ICDA-8 code. In some cases, two ICDA-8 codes are required for accurate conversion from ICD-9-CM because the ICD-9-CM code contains more information than is present in the equivalent ICDA-8 code--sometimes an exact conversion is not possible and the choice of the most likely equivalent must be made. This tape also includes four appendices which address the problem areas and give the results of the arbitration process employed in creation of the tables.

For related technical report, see PB82-179276/XDD.

Keywords: *Data file, *Diseases, Diagnosis, Sex, Classifications, Coding, Females, Males, Magnetic tapes.

Availability: NTIS, Mag Tape \$125.00, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB82-179300/XDD

ICD-9-CM Adjunct Materials - Codes and Full Titles.

Data file. The ICD-9-CM sex-specific codes with full titles magnetic tape provides the full titles for each sex-specific code in the published Tabular Lists of ICD-9-CM, Volume 1, Diseases and Volume 3, Procedures. Sex-specific means that they are to be used only for females or only for males. Use of this tape will allow simple edits to prevent use of erroneous data, e.g., females having male-specific diagnoses or procedures, or vice versa. Valid disease codes may be 3, 4, or 5 digits in length. Valid procedure codes may be 3 or 4 digits in length. Footnote references are used (1) to identify titles that should not be used since the code is further divided and (2) to identify inapplicable codes where application of fifth digits to a series of categories results in illogical titles.

For related technical report, see PB82-179292/XDD.

Keywords: *Data file, *Diseases, Sex, Classifications, Coding, Females, Males, Magnetic tapes.

PB82-179318/XDD

Supplementary Data System, Microdata File, File 1, 1979.

Data file. Tape contains 442,701 records of individual occupational injuries and illnesses for 1979 from 10 jurisdictions: Hawaii, Idaho, Missouri, Montana, Nebraska, South Dakota, Utah, Vermont, Virgin Islands, and Wyoming. Cases which involve medical treatment are included, whether or not time was lost from work. There is no information in the records to indicate whether a particular case involved loss of time from work. Injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System. Each case record describes the injury or illness according to nature and source, part of body affected, and type of accident or exposure; occupation, industry, age, and sex of the injured or ill employee; and the year, month, and day of occurrence. Time of accident is provided by Hawaii, Idaho, South Dakota, Utah, Virgin Islands, and Wyoming; while lapsed time (the hour of shift during which the accident occurred) is available only for Nebraska. Length of service of injured or ill employee is provided by all jurisdictions except Hawaii, Missouri, Nebraska, and Vermont. Weekly wage of employee is provided by all jurisdictions except South Dakota, Vermont, and Wyoming.

For related technical report, see PB80-149982/XDD.

Keywords: *Data file, Industrial accidents, Occupational diseases, *Industrial medicine, Workmens compensation, Safety, Magnetic tapes, Injuries, *Occupational safety and health.

Availability: NTIS, CP T02, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording mode desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

PB82-186057/XDD

ICD-9-CM Adjunct Materials - Codes and Abbreviated Titles.

Data file. The ICD-9-CM sex-specific codes with abbreviated titles magnetic tape provides the abbreviated titles for each sex-specific code in the published Tabular Lists of ICD-9-CM, Volume 1, Diseases and Volume 3, Procedures. Sex-specific means that they are to be used only for females or only for males. Use of this tape will allow simple edits to prevent use of erroneous data, e.g., females having male-specific diagnoses or procedures, or vice versa. Abbreviated titles contain up to 24 alphabetic characters in the form of shortened words. A particular shortened word may refer to more than one full nomenclature word, e.g., def = defect, deficiency, deformity. Conversely, one nomenclature word may be referred to by similar shortened words containing a variable number of characters, e.g., lac, lacerat,

lacer = laceration. Individual abbreviations must be interpreted only in the context of the titles in which they appear. This tape also contains the procedure classes as defined by the Uniform Hospital Discharge Data Set. Valid disease codes may be 3, 4, or 5 digits in length. Valid procedure codes may be 3 or 4 digits in length. Footnote references are used (1) to identify titles that should not be used since the code is further divided and (2) to identify inapplicable codes where application of fifth digits to a series of categories results in illogical titles.

For related technical report, see PB82-186040/XDD.

Keywords: *Data file, *Diseases, Sex, Classifications, Coding, Females, Males, Magnetic tapes.

Availability: NTIS, Mag Tape \$125.00, mag tape*. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. ICD-9-CM Adjunct Materials - Diagnosis Conversion Table ICD-9-CM to ICD-9.

Data file. The ICD-9-CM to ICD-9 Diagnosis Conversion Table magnetic tape provides for the conversion of diagnostic information recorded in ICD-9-CM rubrics to the equivalent rubrics in ICD-9. The greater specificity of ICD-9-CM does not permit a reverse conversion. The Conversion Table lists only 'valid' codes in both classifications. The codes are sequenced according to the ICD-9-CM code. Valid diagnosis codes for ICD-9-CM may be 3, 4, or 5 digits in length. Valid diagnosis codes for ICD-9 may be 3 or 4 digits in length. There are footnote references for these areas in ICD-9 where provision is made for optional use of fifth digits. (These fifth digits are mandatory in ICD-9-CM). An additional footnote is used with ICD-9-CM code E 849. This code is unique to ICD-9-CM; it does not appear in ICD-9. All valid ICD-9-CM codes are listed in the Conversion Tables. There were no codes that did not convert.

For related technical report, see PB82-186065/XDD.

PB82-186180/XDD

Supplementary Data System, Microdata File, File 2, 1979.

Data file. Tape contains 709,913 records of individual occupational injuries and illnesses for 1979 from 16 States. The minimum number of days of disability before a report of a case is included in the tape varies by State as follows: 1 day for Alaska, California, Massachusetts, and New Jersey; 2 days for Indiana, Iowa, and Kentucky; 3 days for Minnesota; 4 days for Colorado, Maryland, Oregon, and Wisconsin; 7 days for Arizona and Michigan; and 8 days for New Mexico and Tennessee. However, there is no information in the records to indicate the total number of days of disability for any particular case. Some or all of the cases supplied by California, Minnesota, and New Jersey have weights greater than one because they are part of a sample. Total weighted cases is 1,012,442. The data were obtained from workers' compensation records by means of a Federal-State cooperative program called the Supplementary Data System. Data are limited to employments covered by workers' compensation acts. Alaska, Iowa, Maryland, Michigan, and Minnesota provided cases which occurred during 1979. The remaining States provided cases for which notification was received by their workers' compensation agencies during 1979. Injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System. Each case record describes the injury or illness according to nature and source, part of body affected, and type of accident or exposure; industry, age, and sex of the injured or ill employee; and the year of occurrence. Occupation of the injured or ill employee and the month of occurrence are available for all States except Massachusetts. All States except California and Massachusetts provide day of occurrence. Time of accident is provided by Alaska, Colorado, Indiana,

Field 25—MEDICAL SCIENCES

Iowa, Kentucky, Maryland, and New Mexico. Length of service of injured or ill employee is provided by Alaska, Colorado, Indiana, Iowa, Kentucky, Maryland, Massachusetts, and New Mexico. Weekly wage of employee is provided by Alaska, Colorado, Indiana, Iowa, Kentucky, Maryland, Minnesota, New Mexico, Tennessee, and Wisconsin.

For related technical report, see PB80-149982/XDD.

PB82-205071/XDD

National Cooperative Gallstone Study, SAS Data Sets, Chenodiol, Hepatotoxicity, Liver Biopsy.

Data file. The National Cooperative Gallstone Study was a controlled clinical trial of the efficacy and safety of chenodeoxycholic Acid (chenodiol) for dissolution of cholesterol gallstones. The treatment of chenodiol led to concern about its possible hepatotoxicity. This study was performed to evaluate whether gross or specific morphologic abnormality occurred after the treatment of chenodiol. The results of the study and detailed statistical analyses are included in an NTIS document. To accompany that document this tape has been prepared to include the actual data files employed for the statistical analyses. The specifications of the tape is on NTIS-PB82-205089. The tape contains five SAS data sets. SAS (the Statistical Analysis System) is a software package provided by the SAS Institute, Inc. (Cary, North Carolina) which includes a flexible data management facility and data sets are named B1617C, BIOP2, BIOP3, BIOP11, MICRO1. Although these data sets can be read using an IBM utility, it is recommended that the data sets be read using the statistical analysis system itself. The advantage of a SAS file is that SAS maintains a directory of each variable on the file according to the assigned variable name, and variables may thus be referenced and documented by name rather than physical location in the data file. The Statistical Analysis System is described by Barr, et al., SAS User's Guide, Cary North Carolina: SAS Institute, Inc., 1979.

For related technical report, see PB82-205089/XDD.

PB83-129122/XDD

University Group Diabetes Program Data File,

Data file. The University Group Diabetes Program Data was long-term prospective clinical trial designed to evaluate the efficacy of two different oral hypoglycemic agents and two different dosage schedules of insulin compared to diet alone in preventing or delaying vascular complications in patients with non-insulin dependent diabetes. This study was funded by the NIAMDD and included 12 Clinical Centers and 1,027 patients. It was initiated in 1960. Data collection ended in 1975 and funding terminated April 30, 1982. A data file containing all values of the measurements and observations obtained at scheduled quarterly and annual examinations as well as the special eye, heart, kidney, and peripheral vascular examinations during the entire period of study for each of the 1,027 patients who were entered into the University Group Diabetes Program has been prepared. The Variables included on this data file are those for which results have been presented in the majority of University Group Diabetes Program publications.

Keywords: *Data file, *Drugs, *Insulin, Efficacy, Dosage, Diets, Prevention, Vascular diseases, Patients, Medical examination, *Hypoglycemic agents, *Diabetes.

Supplementary Data System, Microdata File, File 3, 1980.

Data file. Tape contains 343,445 records of individual occupational injuries and illnesses for 1980 from 7 States: Colorado, Delaware, Idaho, Montana, New York, North Carolina, and Wisconsin. Cases which closed or reached final determination during 1980 are included. Cases which involved death or permanent disability were included by all States. Idaho and North Carolina provided cases which included medical expense, whether or not indemnity compensation was paid, in addition to cases involving 6 or more days of disability for Idaho and 8 or more days of disability for North Carolina. The other States provided only cases which involved indemnity compensation paid for 4 or more days of disability in Colorado, Delaware, and Wisconsin; 6 or more lost workdays (generally equivalent to 8 or more days of disability) in Montana, and 8 or more days of disability in New York. The data were obtained from workers' compensation records through a Federal-State cooperative program called the Supplementary Data System. Data are limited to employments covered by State workers' compensation acts. Injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System. Each case record describes the injury or illness according to nature and source, part of body affected, and type of accident or exposure; occupation, indus-

try, age, sex, and the year, month, and day of occurrence; and the extent of disability and amount of indemnity compensation paid. Associated object or substance is provided by Colorado, Delaware, New York, and North Carolina. Time of accident is provided by Colorado, Delaware, Idaho, and North Carolina. Colorado also provides lapsed time (the hour of shift during which the accident occurred). Length of service of injured or ill employee is provided by Colorado, Delaware, and North Carolina. Weekly wage of injured or ill employee is provided by all States except Colorado. Idaho and North Carolina provide the amount of medical expense. Technical documentation is available: PB83-133553, Supplementary Data System, Microdata Files, User's Guide, 1980 Edition.

For related technical report, see PB83-133553/XDD.

Keywords: *Data file, *Industrial medicine, Occupational diseases, United States, Injuries, Magnetic tape, Illnesses, *Occupational safety and health, Workmens compensation.

PB83-154955/XDD

Supplementary Data System, Microdata File, File 2, 1980.

Data file. Tape contains 693,997 records of individual occupational injuries and illnesses which involve death, permanent disability, or days of disability for 1980 from 17 States. The minimum number of days of disability before a case is included is: 1 day for Alaska, California, Indiana, Massachusetts, and New Jersey; 2 days for Kentucky; 3 days for Minnesota; 4 days for Colorado, Iowa, Maryland, Oregon, and Wisconsin; 6 days for Mississippi; 7 days for Michigan; and 8 days for Arizona, New Mexico, and Tennessee. However, the records do not indicate the total number of days of disability for any particular case. Some California, Minnesota, and New Jersey cases have weights greater than one due to sampling. Total weighted cases is 976,778. The data were obtained from workers' compensation records through a Federal-State cooperative program called the Supplementary Data System. Data are limited to employments covered by workers' compensation acts. Alaska, Maryland, Michigan, and Minnesota provided cases which occurred during 1980. The remaining States provided cases for which notification was received by their workers' compensation agencies during 1980. Injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System. Each case record describes the injury or illness according to nature and source, part of body affected, and type of accident or exposure; industry, age, and sex of the injured or ill employee; and year and month of occurrence. Occupation and day of occurrence are available for all States except Massachusetts. Associated object or substance is provided by California, Colorado,

Iowa, Maryland, Minnesota, and New Mexico. Lapsed time (the hour of shift during which the accident occurred) is provided by Alaska, Colorado, and Iowa. Length of service is provided by California, Colorado, Indiana, Iowa, Maryland, Massachusetts, Mississippi, and New Mexico. Weekly wage is provided by Alaska, Indiana, Iowa, Kentucky, Maryland, Minnesota, Mississippi, Tennessee, and Wisconsin. Kind of insurance is provided for Alaska, Mississippi, and Oregon. Fatalities for California are also provided. Technical documentation is available: PB83-133553, Supplementary Data System, Microdata Files, User's Guide, 1980 Edition.

For related technical report, see PB83-133553/XDD.

Approved Prescription Drug Products with Therapeutic Equivalence Evaluations.

Data file. This data file was created to allow computer processing of data from the Approved Prescription Drug Products with Therapeutic Equivalence Evaluations (APDP). Each record contains the information required to identify a particular drug product. Other Information regarding conventions and use of the data is contained in the preface to the APDP. To facilitate processing, there is some duplication of information among records so that each record contains all identifying information. In addition, for each record one NDA or ANDA number is included although more than one may apply to the particular drug product identified. The possibility of multiple numbers exists because the applicant may have more than one NDA or ANDA approved for the same drug product within the context of the data in the APDP. The distinguishing information may be package size, excipients, distributors, etc.

Keywords: *Data file, *Drugs, Data storage, Magnetic tapes, Antibiotics, *Prescription drugs.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. PB84-112507/XDD

Diabetic Retinopathy Study Data.

Data file. The Diabetic Retinopathy Study (DRS) was a multicenter clinical trial to evaluate the efficacy of photocoagulation, (argon laser and xenon arc) in the treatment of proliferative diabetic retinopathy. This randomized, controlled study involved 1,758 patients enrolled at 15 medical centers. Photocoagulation with either argon laser or xenon arc, as used in the study, was found to be effective in reducing the risk of severe visual loss and in inhibiting the progression of retinopathy. These effects were apparent in all

stages of diabetic retinopathy studied: proliferative, severe nonproliferative, and background. Also found were some deleterious effects of treatment, namely small losses of visual acuity and constriction of the peripheral visual field. The accompanying tape contains eight datasets produced by the DRS Coordinating Center. The first four datasets contain, in order, information from the (1) eye examinations, (2) medical examinations, (3) fundus photographs, and (4) treatment specifications. The second four datasets contain Fortran language programs to produce printouts for each patient -- there is one program for each of the four information files. The program files are in the same order as the information files.

PB84-120062/XDD

Supplementary Data System, Microdata File, File 1, 1981.

Data file. File 1 contains 319,485 records of individual occupational injuries and illnesses for 1981 from 9 jurisdictions: Hawaii, Idaho, Maine, Montana, Nebraska, Utah, Vermont, Virgin Islands, and Wyoming. Cases which involve medical treatment are included, whether or not time was lost from work. There is no information in the records to indicate whether a particular case involved loss of time from work. Some cases supplied by Wyoming have weights greater than one because they are part of a sample. Total weighted cases is 325,440. The data were obtained from workers' compensation records by means of a Federal-State cooperative program, the Supplementary Data System. Data are limited to employments covered by State workers' compensation acts. Injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System. Each case record describes the injury or illness according to nature and source, part of body affected, and type of accident or exposure; occupation, industry, and sex of the injured or ill employee; and the year, month, and day of occurrence. Age of the injured or ill employee was provided by all jurisdictions except Utah. Associated object or substance (object, substance, or person with respect to which measures could have been introduced to prevent the accident or mitigate the injury or illness) was supplied by Maine, Utah, Vermont, and Wyoming. Lapsed time (the hour of shift during which the accident occurred) is available for Nebraska, Virgin Islands, and Wyoming. Length of service of injured or ill employee was provided by Maine and Wyoming. Weekly wage was provided by Montana, Nebraska, and the Virgin Islands. Kind of insurance carried by employers of injured or ill employees is available for Idaho, Maine, Nebraska, and Utah. Technical documentation is available: PB83-133553, Supplementary Data System, Microdata Files, User's Guide, 1980 Edition.

For related technical report, see PB83-133553/XDD.

Supplementary Data System, Microdata File, File 2, 1981.

Data file. File 2 contains 671,416 records of individual occupational injuries and illnesses for 1980 from 16 States. The minimum number of days of disability before a report of a case is included in the file varies: 1 day for Alaska, California, and Indiana, 2 days for Kentucky; 3 days for Minnesota; 4 days for Colorado, Iowa, Maryland, Missouri, Oregon, and Wisconsin; 6 days for Mississippi, 7 days for Michigan; and 8 days for Arizona, New Mexico and Tennessee. However, records do not indicate the number of days of disability for any particular case. Some cases supplied by California and Minnesota have weights greater than one because they are part of a sample. Total weighted cases is 884,628. The data were obtained from workers' compensation records by means of a Federal-State cooperative program, the Supplementary Data System. Data are limited to employments covered by workers' compensation acts. Injury and illness factors were classified in accordance with standard definitions used in the Supplementary Data System. Each case record describes the injury or illness according to nature and source, part of body affected, and type of accident or exposure; occupation, industry, age, and sex of the injured or ill employee; and the year, month, and day of occurrence. Associated object or substance (object, substance, or person with respect to which measures could have been introduced to prevent the accident or mitigate the injury or illness) was supplied by California, Iowa, Kentucky, Maryland, Minnesota, New Mexico, and Wisconsin. Lapsed time (the hour of shift during which the accident occurred) was provided by Alaska and Iowa. Length of service of injured or ill employee was provided by California, Colorado, Indiana, Iowa, Maryland, Mississippi, and New Mexico. Weekly wage was provided by Alaska, Indiana, Iowa, Kentucky, Maryland, Minnesota, Mississippi, Missouri, Oregon, Tennessee, and Wisconsin. Kind of insurance carried by employers of injured or ill employees is available for Alaska, Colorado, Iowa, Mississippi, and Oregon. Cases which resulted in fatalities were identified by California, New Mexico, and Oregon. Technical documentation is available: PB83-133553, Supplementary Data System, Microdata Files, User's Guide, 1980 Edition.

Approved Prescription Drug Products with Therapeutic Equivalence Evaluations.

Data file. This data file was created to allow computer processing of data from the Approved Prescription Drug Products with Therapeutic Equivalence Evaluations (APDP)*. Each record contains the information required to identify a particular drug product. Other information regarding conventions and use of the data is contained in the preface to the APDP. To

facilitate processing, there is some duplication of information among records so that each record contains all identifying information. In addition, for each record one NDA or ANDA number is included although more than one may apply to the particular drug product identified. The possibility of multiple numbers exists because the applicant may have more than one NDA or ANDA approved for the same drug product within the context of the data in the APDP. The distinguishing information may be package size, excipients, distributors, etc.

Keywords: *Data file, *Drugs, Data storage, Magnetic tapes, Antibiotics, *Prescription drugs.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Friction Snubber Force Measurement System. Data Tape, Test Runs 1 and 2.

Data file. Twelve field test runs were performed to measure friction snubber forces using a device developed by Wyle Laboratories, Colorado Springs.

Reel 1 contains test runs 001 and 002. Four devices were installed on a Type I truck (the Barber S-2) which was placed under the B-end of a empty open hopper car. Forty-eight channels of data were acquired on friction snubber force, car speed, automatic location detection, acceleration, and displacement at critical points on the truck and carbody. The first test run was made over branchline class 2 track on the Blue Diamond Spur near Las Vegas, Nevada. The test zone included both tangent and curved jointed rail with an uphill grade of approximately 1.8%. The test run starts at 20 mph at milepost 5 and continues until milepost 7, where the speed starts decreasing down to 2 mph at the end of the test at milepost 8.2. The second test run was made over mainline class 4 track with a downhill grade of approximately 0.8%. The test run starts at 50 mph at milepost 322 and continues until milepost 324.5, where the speed starts decreasing down to 5 mph at the end of the test at milepost 326.8. The significant test parameters associated with these two tests are: Car Type - 100-ton open hopper; Car Orientation - B-end forward; Car Tare Weight - 63,600 pounds; Tare Weight 149,300 pounds; Type of Lading - empty; Truck Center - 40 feet, 6 inches; No. of Loco's - 1; No. of Cars Fore - 2; No. of Cars Aft - 2; Truck Type - Barber 70-ton; Wheel Base - 68 inches; Springs Group Out - 7 D5; Spring Group In - 4 D5; Stat Spring Comp - 11 inches; Center Plate Diameter - 14 inches; Center Plate Lub - Moly Disulfide; Side Bear B-End - Stucki double; Side Bear Clear - 0.23 inches; Snubber Type - load varying; Snubber Springs - 2 Barber B432.

For related technical report, see PB80-129596/XDD.

PB81-181695/XDD

Truck Design Optimization Project (TDOP) Phase II Type I Truck Performance Test, Test Run 001A.

Data file. Sixteen field tests were performed by Wyle Laboratories, Colorado Springs to measure the performance characteristics of a Type I freight car truck. Reel 1 contains test run 1a. (When more than one try was required to obtain a successful run it is denoted with a letter suffix.) A pair of ASF ride control trucks were placed under an empty 100-ton open hopper carbody. New AAR 1/20 wheel profiles were used. The object of the test was to provide performance data during curve negotiation. The test was performed on February 13, 1980 on Union Pacific track near Las Vegas, Nevada. Ninety-six channels of data were acquired to measure car speed, automatic location detection, lateral/vertical wheel-rail forces, wheel/rail angle of attack, axle rotation position, accelerations and displacements at critical points on the truck and carbody. This test run was made over branchline Class 2 track on the Blue Diamond Spur near Las Vegas, Nevada. The test zone included both tangent and curved jointed rail with an uphill grade of approximately 1.5%. The test run starts at 4 mph at milepost 4 and goes to 30 mph at milepost 5.8 and back down to a stop at milepost 8. At the completion of the test run, ap-

proximately 30 seconds of noise floor (quiescent) data will be recorded.

For related technical report, see PB81-172157/XDD.

Truck Design Optimization Project (TDOP) Phase II Type I Truck Performance Test, Test Run 005B.

Data file. Sixteen field tests were performed by Wyle Laboratories, Colorado Springs to measure the performance characteristics of a Type I freight car truck. Reel 5 contains test run 5b. (When more than one try was required to obtain a successful run it is denoted with a letter suffix.) A pair of ASF ride control trucks were placed under an empty 100-ton open hopper carbody. New AAR 1/20 wheel profiles were used. The object of the test was to provide performance data during curve negotiation. The test was performed on February 12, 1980 on Union Pacific track near Las Vegas, Nevada. Ninety-six channels of data were acquired to measure car speed, automatic location detection, lateral/vertical wheel-rail forces, wheel/rail angle of attack, axle rotation position, accelerations and displacements at critical points on the truck and carbody. This test run was made over mainline curved track between Arden and Sloan near Las Vegas, Nevada. The test consist was run through a series of eleven left and right curves ranging from 2 to 6 degrees of curvature. The test was run in a downhill direction with a grade of approximately 1%. The test was run at speeds near equilibrium speed for each curve in the test zone. Actual speed varied from 34 mph to 48 mph for the test run. At the completion of test run a controlled sequence of train line brake application was applied to characterize performance during braking.

For related technical report, see PB81-172157/XDD.

Keywords: *Data file, *Freight cars, *Undercarriage, Velocity, Railroad tracks, Vehicle wheels, Hopper cars, Magnetic tapes, *Wheel rail interactions.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products, if you have questions. Price includes documentation.

Truck Design Optimization Project (TDOP) Phase II Type I Truck Performance Test, Test Run 006A.

Data file. Sixteen field tests were performed by Wyle Laboratories, Colorado Springs to measure the performance characteristics of a Type I freight car truck. Reel 6 contains test run 6a. (When more than one try was required to obtain a successful run it is denoted with a letter suffix.) A pair of ASF ride control trucks were placed under an empty 100-ton open hopper carbody. New AAR 1/20 wheel profiles were used. The object of the test was to provide perform-

ance data during curve negotiation. The test was performed on February 13, 1980 on Union Pacific track near Las Vegas, Nevada. Ninety-six channels of data were acquired to measure car speed, automatic location detection, lateral/vertical wheel-rail forces, wheel/rail angle of attack, axle rotation position, accelerations and displacements at critical points on the truck and carbody. This test was made over mainline tangent bolted jointed rail between Arjden and Boulder Junction near Las Vegas, Nevada. The tests were run in a downhill direction with a grade of approximately 0.9%. The tests were conducted in 5 mph steps between 40 and 79 mph. At the completion of the test run, a controlled sequence of train line brake application was used to bring the consist to a stop.

For related technical report, see PB81-172157/XDD.

Truck Design Optimization Project (TDOP) Phase II Type I Truck Performance Test, Test Run 007.

Data file. Sixteen field tests were performed by Wyle Laboratories, Colorado Springs to measure the performance characteristics of a Type I freight car truck. Reel 7 contains test run 7. (When more than one try was required to obtain a successful run it is denoted with a letter suffix.) A pair of ASF ride control trucks were placed under an empty 100-ton open hopper carbody. New AAR 1/20 wheel profiles were used. The object of the test was to provide performance data during curve negotiation. The test was performed on January 24, 1980 on Union Pacific track near Las Vegas, Nevada. Ninety-six channels of data were acquired to measure car speed, automatic location detection, lateral/vertical wheel-rail forces, wheel/rail angle of attack, axle rotation position, accelerations and displacements at critical points on the truck and carbody. This test was made over mainline tangent bolted jointed rail between Arden and Boulder Junction near Las Vegas, Nevada. The tests were run in a downhill direction with a grade of approximately 0.9%. The tests were conducted in 5 mph steps between 79 and 40 mph. At the completion of the test run, a controlled sequence of train line brake application was used to bring the consist to a stop.

GAMTAB; Radioactive-Decay gamma-Ray Catalog.

Data file. This package contains a two-part catalog of gamma rays emitted by nuclides in radioactive decay and a list of corresponding references. The first part lists the gamma rays in order of ascending energy. This listing consists of gamma-ray energy and uncertainty, abundance, half-life, production mode, and the energies of two of the more abundant

associated gamma rays. The second part of the catalog lists up to 50 of the more abundant gamma rays for each nuclide. The listing for each nuclide includes half-life, production mode, possible genetic relationships, and references. This listing is followed by the energy, uncertainty in energy, and abundance of each gamma ray. References available through May 1973 corresponding to the reference keys listed for each nuclide in part 2 are listed as the third file.IBM360. (ERA citation 08:026954)

Keywords: *Data file, Computer codes, Radioisotopes, *Gamma rays, G codes, Decay, ERDA/400600, ERDA/400700, *Radioactive decay, Half life.

Availability: NTIS, CP T16, mag tape. U.S. Sales Only. Price includes documentation. Tapes can be prepared in most recording modes for one-half inch tape. Specify recording mode desired. Call NTIS Computer Products if you have questions.

DOECTZDATA; California Sixteen-Zone Weather Data.

Data file. DOECTZDATA is a collection of hourly weather data for each of 365 days in a year for sixteen different California thermal zones representing Eureka, Santa Rosa, San Francisco, Santa Cruz, Santa Barbara, Los Angeles, San Diego, Santa Ana, Pasadena, San Bernardino, Red Bluff, Sacramento, Fresno, Daggett, Brawley, and Tahoe. The data presented are in the form of the WBAN Hourly Surface Observation data used by the National Climatic Center, Asheville, North Carolina. They include the sky condition, visibility, weather and/or obstruction to vision information, sea level pressure, dew point temperature, wind direction and speed, station pressure, dry and wet bulb temperature, relative humidity, and cloud and obscuring phenomena information.IBM360; OS/360. For related technical report, see PB-259 626/XDD.

Keywords: *Data file, *Building codes, *Standards, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in FIELDATA character set. Character set restricts preparation to 7 track, one-half inch tape only. Identify recording mode by specifying density and parity only. Call NTIS Computer Products, if you have any questions. Documentation available.

PB80-125339/XDD

Primary Water Resources Data-Base for the Second National Water Assessment (Magnetic Tape).

Data file. The Second National Water Assessment by the U.S. Water Resources Council presents a comprehensive nationally consistent data base for the 21 water resources regions of the United States, published in report format in four volumes as 'The Nation's Water Resources--1975-2000' (December 1978, through GPO). The magnetic tape contains much of the data presented in 'Volume 3, Analytical Data.' Information is presented not only for the 21 water resources regions, but for 106 water assessment subregions that provide more localized information. Information is presented for present (1975) and future (1985 and 2000) conditions. All basic data (45,000 items) from the report is on the tape except: (1) Derived analytical results; (2) monthly details of water data; and (3) dry conditions data. Monthly water data will be available at a future date (400,000 items).

For related technical report, see PB80-125347/XDD.

Keywords: *Data file, Water resources, Assessments, Magnetic tape, United States, Forecasting, *Water supply.

Availability: NTIS, CP T02, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording modes desired by specifying character set, track, density, and parity. Call NTIS Computer Products if you have questions. Price includes documentation.

Analyses of Natural Gases (1917-1982).

Data file. This tape contains routine analyses and related source data for 13106 natural gas samples. These samples were collected as a part of a continuous survey of the free world for occurrences of helium. This survey has been conducted in the United States by the Bureau of Mines since 1917. In late 1965, the study was expanded to include foreign gasfields. Samples released for publication have been published in a series of USBM bulletins and information circulars. This tape contains all samples released for publication through December 31, 1982. (It replaces previous tapes forwarded to you.) There is one record on the tape for each sample analysis. The tape does not contain a label, standard or non-standard. The tape is a nine-track, 800 BPI, odd parity, ASCII tape. Each record contains 328 characters. The records are blocked 1 (one) per block. Helium Field Operations of the Bureau of Mines, located in Amarillo, Texas, may be contacted for further information.

Keywords: *Data file, *Natural gas, *Helium, *Chemical analysis, Sampling, Surveys, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

PB83-220814/XDD

Aeromagnetic Data from Southeastern Missouri.

Data file. An aeromagnetic survey of an area in southeastern Missouri was flown by the U.S. Geological Survey in late 1979 and early 1980. The survey was carried out as part of a mineral resource assessment of the Irish Wilderness Area. Total field magnetic data were acquired using a Geometrics Proton Magnetometer G-803 installed in a Heli-Porter aircraft. Radar altimeter data were also collected. The survey was flown at a barometric altitude of 1200' above sea level along 37 flight lines oriented in a north-south direction at a mean spacing of 1/2 mile (805 m). The magnetic data were corrected for diurnal drift and the regional magnetic field was removed. Ground elevation was calculated from the radar altimeter data and the nominal flight altitude. The radar altimeter, corrected total field magnetic, and ground elevation data are stored with position coordinates in the data file described by this report.

Keywords: *Data file, *Magnetic surveys, Natural resources, Mineral deposits, Missouri, Magnetic tapes, Aerial prospecting, Southeast Region(Missouri), Irish Wilderness Region.

Availability: NTIS, CP T02, mag tape. Source tape is in ASCII character set. Character set restricts preparation to 9 track, one-

half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

PB83-223131/XDD

Planetary Image Videodisc.

Data file. The Planetary Image Videodisc is an analog-encoded optical disc containing more than 100,000 black and white images of Mercury, Venus, Mars, and Jupiter taken during the Mariner, Viking, and Voyager planetary missions. An equivalent number of 8- x 10-in. photographs would require nearly 300 cubic feet of storage space (14 cabinets containing 666 binders). More than a year of effort went into organizing, labelling, and photographing the individual images on 35-mm film. The film was transferred to videotape, then a master videodisc was produced, and copies for distribution were made. The disc represents the first full-scale use of videodisc technology for storage and retrieval of an image archive and a significant step toward our ultimate goal of widespread dissemination of space science data to both the scientific and educational communities. The disc can be played on Laser Disc Players made by Sony, Discovision, Pioneer, and Magnavox.

Keywords: *Data file, Mercury(Planet), Venus(Planet), Mars(Planet), Jupiter(Planet), *Space exploration, Mariner spacecraft, Viking spacecraft, Voyager project, *Videodiscs.

Availability: NTIS, CP T99, mag tape*. Data file produced on Videodisc. Call NTIS Computer Products for price.

Master Cross Reference List, Part 1 (Defense Logistics Services Center).

Data file. Part 1 of the Master Cross Reference List is a Master List of Logistics Reference Numbers cross-referenced to their applicable National Stock Number(s) in the Federal Catalog System. It contains nine basic elements of data: Logistics Reference Number assigned by the manufacturers; Manufacturers Code, identifying the manufacturer; Reference Number variation Code, indicating whether the reference number is item identifying or requires additional data to correctly identify the item of supply; National Stock Number/Permanent System Control Number; Reference Number Category Code, that designates the relationship of reference number to an item of supply; Item Standardization Code indicates if the item is authorized or not for procurement; Service/Agency Designator Code, delineates the S/A that accepted a National Stock Number that was ordered as a substitute for an item; Description Availability, will indicate whether or not the item has a description in the DLSC Master File; and Item Name is the approved name given to this item.

Keywords: *Data file, *Logistics management, *Federal cataloging system, *Supply management, Catalogs(Publications), Federal supply classification, Inventory control, Magnetic tapes.

Availability: NTIS, CP T99, mag tape. Source tape is in EBCDIC character set. Tapes can be prepared in most standard 7 or 9 track recording modes for one-half inch tape. Identify recording

Radiometer-Scatterometer (RADSCAT) Flight Data (1973-1977).

Data file. This file contains aircraft scatterometer data obtained over the ocean with the NASA Langley Research Center developed Radiometer-Scatter-

ometer (RADSCAT) instrument. These data are described in NASA Technical Memorandum 84608, entitled 'Archival of Aircraft Scatterometer Data from AAFE RADSCAT Missions.' The tapes contain nerdas parameters and instrument output parameters. The first record in each file contains the mission number; flight number; the day, month, and year in which the data were acquired; and the flight line and run number. The record structure, scale factors, etc., are given in the document referenced above. The Radiometer-Scatterometer (RADSCAT) instrument was developed through the Advanced Applications Flight Experiment (AAFE) Program to study the capability of the sensor to make measurements of target signature from a remote platform. The RADSCAT was designed to make K-Band Scatterometer Normalized Radar Cross Section (NRCS) measurements and radiometer brightness temperature measurements of the same target on the Earth's surface. Only the Scatterometer data are provided on these tapes, since the radiometer measurement precision was found to be coarse (greater than 10K). A detailed description of the AAFE RADSCAT is available in NASA TM X-73900, entitled 'Laboratory Calibration of AAFE Radiometer/Scatterometer (RADSCAT)'.

Keywords: *Data file, *Aircraft instruments, Radiometers, Radar cross sections, Ocean surveillance, Magnetic tapes, *Scatterometers.

Availability: NTIS, CP T11, mag tape. Source tape is in the ASCII character set. This restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions.

NASA (National Aeronautics and Space Administration) Langley High-Speed Wind Tunnel Test Data 110 Data File.

Data file. An investigation was made in the Langley 7- by 10-Foot High-Speed Tunnel to study the effects of wing leading- and trailing-edge flap deflections and canard incidence on the longitudinal aerodynamic characteristics of an advanced fighter configuration with forward-swept wing. This tape contains test conditions, configuration information, and body and stability axis data for Test 110. The tape is written in line printer line images so that any copy program can list the contents of the tape. The data proper are preceded by test records which describe the contents of the tape and provide a sample of a FORTRAN 77 program which can be used to read the tape and reconstruct the original binary standard interface file. The tape supplements the NASA TM-85795 document entitled 'Low-Speed Investigation of Effects of Wing Leading- and Trailing-Edge Flap Deflections and Canard Incidence on a Fighter Configuration Equipped with a Forward-Swept Wing'.

Keywords: *Data file, *Swept wings, Fighter aircraft, Wind tunnels, Aerodynamic characteristics, Magnetic tapes.

Availability: NTIS, CP T02, mag tape. Source tape is in the ASCII character set. This restricts preparation to 9 track, one-half inch tape only. Identify recording mode by specifying density only. Call NTIS Computer Products if you have questions. Price includes documentation NASA-TM-85795.

GEOLOGICAL SURVEY, DENVER, COLO. GEOLOGIC DIV.

USGS-GD-74-033

Magnetic Tape Containing Oil-Shale Fischer Assay Data for Coreholes in the Uinta Basin, Utah
(DOI/DF-74/130)
PB-238 682/9/XDD

22

USGS/GD-75/001

Spectrographic and Chemical Analyses of Stream Sediments and Rock from the Alpine Lakes Study Area and Additions, Washington.
(DOI/DF-74/147)
PB-240 487/9/XDD

24

USGS/GD-75/002

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Nabesna Quadrangle, Alaska.
(DOI/DF-74/148)
PB-240 488/7/XDD

24

USGS-GD-76/005

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the North Absaroka Study Area, Park and Sweet Counties, Montana.
(DOI/DF-76/002)
PB-252 214/2/XDD

24

USGS/GD-76/007

Spectrographic and Chemical Analyses of Stream Sediment and Rocks from the Proposed Additions to the Scapegoat Wilderness, Powell and Lewis and Clark Counties, Montana.
(DOI/DF-76/003)
PB-253 190/3/XDD

24

USGS/GD-76/008

Spectrographic and Chemical Analyses of Stream Sediments, Rocks, and Soils from the Scotchman Peak Wilderness Study Area, Lincoln and Sanders Counties, Montana, and Bonner County, Idaho.
(DOI/DF-76/004)
PB-254 972/3/XDD

24

USGS/GD-76/017

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Chama-Southern San Juan Mountains Wilderness Study Area, Mineral, Rio Grande, Archuleta, and Conejos Counties, Colorado.
(DOI/DF-77/001)
PB-261 854/4/XDD

19

USGS/GD-76/016

Spectrographic and Chemical Analyses of Stream Sediments, Rocks, and Panned Concentrates from

the West Elk Wilderness and Vicinity, Delta and Gunnison Counties, Colorado.
(DOI/DF-77/002)
PB-261 855/1/XDD

19

USGS/GD-77/005

Results of Spectrographic and Chemical Analyses of Geochemical Samples from the McCarthy Quadrangle, Alaska.
(DOI/DF-77/008)
PB-266 902/6/XDD

24

GEOLOGICAL SURVEY, GOLDEN, CO.

USGS-GD-83-003

Analytical Results for Stream-Sediment Concentrate, Sieved Stream-Sediment, Rock, and Water Samples from the Silver City 1 x 2 Degree Quadrangle, Arizona and New Mexico.
(DOI/DF-83/006)
PB83-220863/XDD

24

USGS-GD-83-006

Spectrographic, Chemical and Radioactivity Analyses of Rock, Stream-Sediment, and Soil Samples from the Hell's Canyon Study Area, Wallowa County, Oregon, and Idaho and Adams Counties, Idaho.
(DOI/DF-83/007)
PB83-255059/XDD

24

USGS-GD-83-007

Lithologic, Petrographic and Resource Data to Accompany Report on Estimation of Uranium Endowment in the Westwater Canyon Member, Morrison Formation, San Juan Basin, Colorado Plateau.
(DOI/DF-83/008)
PB83-255042/XDD

24

Spectrographic and Chemical Analysis of Rock, Stream-Sediment, and Concentrate Samples from the Teton Wilderness and Adjacent Study Areas, Teton, Fremont, and Park Counties, Wyoming.
(DOI/DF-83/002)
PB83-198069/XDD

24

GEOLOGICAL SURVEY, LAWRENCE, KS. WATER RESOURCES DIV.

Hydrologic Data for Soldier Creek Basin, Kansas.
(DOI/DF-79/001)
PB-292 892/7/XDD

24

GEOLOGICAL SURVEY, MENLO PARK, CA.

Magnetic Computer Tape Containing Analytical Data from Rock, Stream-Sediment, and Stream-Sediment Heavy-Mineral Concentrate Samples from Bradfield Canal, Southeastern Alaska.
(DOI/DF-80/004)
PB81-108631/XDD

24

Principal Facts of About 64,000 Gravity Stations in the State of California.
(DOI/DF-82/001)
PB82-168287/XDD

19

GEOLOGICAL SURVEY, MENLO PARK, CA. GEOLOGIC DIV.

USGS-GD-83-008

GEOTHERM Data Tape Giving Geochemistry of Geothermal Springs, Wells in the U.S.
(DOI/DF-84/001)
PB84-107705/XDD

24

USGS/GD-84/003

Geochemical Data for Rock Samples from the Petersburg and Parts of the Port Alexander, and Sumdum Quadrangles, Southeastern Alaska.
(DOI/DF-84/005)
PB84-234426/XDD

19

GEOLOGICAL SURVEY, MENLO PARK, CALIF. BRANCH OF ALASKAN GEOLOGY.

USGS/GD-78/001

Analytical Results from Rock and Stream-Sediment Samples Collected in Ketchikan and Prince Rupert Quadrangles, Southeastern Alaska
(DOI/DF-78/002)
PB-276 777/0/XDD

24

GEOLOGICAL SURVEY, MENLO PARK, CALIF. BRANCH OF PACIFIC-ARCTIC MARINE GEOLOGY.

Digital Magnetic Tapes of Single Channel Seismic Reflection Profiles on the Continental Shelf and Slope between Bering Strait and Barrow, Alaska, and MacKenzie Bay, Canada
PB-232 345-SET/XDD

GEOLOGICAL SURVEY, MENLO PARK, CALIF. GEOLOGIC DIV.

USGS/GD-76/009

Seismic Data from Downhole Array Near San Francisco Bay, California.
(DOI/DF-76/005)
PB-254 971/5/XDD

24

USGS/GD-77/008

Seismic Data for 15 Earthquakes Recorded on a Downhole Array in Sediments Near San Francisco Bay, California.
(DOI/DF-78/001)
PB-275 360/6/XDD

24

GEOLOGICAL SURVEY, RESTON, VA.

USGS-GD-73-009

Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment, Rocks, and Pan Concentrates from the Teton Cmsdor, Wyoming
PB-220 816/3/XDD

24

USGS-GD-73-010

Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment and Soils, Rocks, and Pan Concentrates from the Absaroka Primitive Area and Vicinity, Montana
PB-220 817/1/XDD

24

USGS-GD-73-011

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rocks and Stream Sediment from the Study Areas Contiguous to the Uncompahgre Primitive Area, Colorado
PB-220 818/9/XDD

24

USGS-GD-73-013

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rock and Stream Sediment from the Scapegoat Wilderness (Formerly Lincoln Back Country), Montana
PB-220 819/7/XDD

24

USGS-GD-73-031

Spectrographic and Chemical Analyses of Mineralized Rock and Stream Sediments from the Alpine Lakes Area, Washington
PB-228 419/8/XDD

24

USGS-GD-73-032

Spectrographic and Chemical Analyses of Stream Sediment and Rock from the Beartooth Primitive Area and Vicinity, Montana and Wyoming
PB-228 420/6/XDD

24

USGS-GD-73-034

Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment, Rock, Soil, and Concentrates from the Sawtooth National Recreation Area, Idaho
PB-224 872/2/XDD

24

USGS-GD-74-009

Spectrographic and Chemical Analyses of Rock and Stream Sediment Samples from the Granite Fiords Wilderness Study Area, Alaska
PB-232 049/7/XDD

24

USGS-GD-74-023

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rocks, Stream Sediments, and Panned Concentrates from the Du Noir Addition, Washakie Wilderness, Fremont County, Wyoming.
(DOI/DF-74/003)
PB-235 001/5/XDD

24

USGS-GD-74-032

Spectrographic and Chemical Analyses of Mineralized Ores and Floats, Mines and Dumps, Stream Sediments and Pan Concentrates from the Cougar Lakes-Mount Aux Study Area, Yakima and Lewis Counties, Washington.
(DOI/DF-74/128)
PB-238 413/9/XDD

24

USGS/GD-75/018

Spectrographic and Chemical Analyses of Stream Sediment and Rock from the Indian Peaks Study Area, Colorado
(DOI/DF-75/004)
PB-246 033/5/XDD

24

PB-207 780/8/XDD

Health Care Delivery Concept Lists - Hierarchical List and Program Tape. Magnetic Tape Record.
PB-207 780/8/XDD 9 CP T01

PB-209 352/4/XDD

Federal Individual Income Tax Return Data for Each Five-Digit Zip Code Area in the U.S. - 1969.
PB-209 352/4/XDD 6 CP T03

PB-209 567/7/XDD

Description of Magnetic Tape and 'Read-Only' Retrieval Program of Geochemical Data, Coeur d'Alene District, Idaho.
PB-209 567/7/XDD 24 CP T01

PB-210 928/8/XDD

Magnetic Tape Containing Semiquantitative Spectrographic Analyses and Some Selected Chemical Analyses of Rocks and Stream Sediments from the Cloud Peak Primitive Area, Wyoming.
PB-210 928/8/XDD 24 CP T01

PB-211 684/6/XDD

Magnetic Tape Containing Semiquantitative Spectrographic and Chemical Analyses of Rocks and Stream Sediments from the Gila Wilderness, Gila Primitive Area and Vicinity, New Mexico.
PB-211 684/6/XDD 24 CP T01

PB-213 036/7/XDD

Magnetic Tape Containing Stream-Sediment Analytical Data, Central Maine (with Description).
PB-213 036/7/XDD 24 CP T01

PB-219 966/9/XDD

Fiscal Year 1974 Master Account Title File - Final Report.
PB-219 966/9/XDD 5 CP T01

PB-219 968/5/XDD

Fiscal Year 1974 Budget Preparation System Master File - Final Report.
PB-219 968/5/XDD 5 CP T01

PB-220 816/3/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment, Rocks, and Pan Concentrates from the Teton Corridor, Wyoming
PB-220 816/3/XDD 24 CP T01

PB-220 817/1/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment and Soils, Rocks, and Pan Concentrates from the Absaroka Primitive Area and Vicinity, Montana
PB-220 817/1/XDD 24 CP T01

PB-220 818/9/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rocks and Stream Sediment from the Study Areas Contiguous to the Uncompahgre Primitive Area, Colorado
PB-220 818/9/XDD 24 CP T01

PB-220 819/7/XDD

Magnetic Tape Containing Spectrographic and Chemical Analyses of Rock and Stream Sediment from the Scapegoat Wilderness (Formerly Lincoln Back Country), Montana
PB-220 819/7/XDD 24 CP T01

PB-221 850/5/XDD

Simulated Tax and Transfer Systems: Stat-Parson (1970-71).

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (New York, Part I). PB-170 785/0/XDD 8

Population and Housing Data for the United States by Standard Location Areas, 1960 Census - (California, Part II). PB-170 786/8/XDD 8

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (New York, Part II; California, Part II). PB-170 787/6/XDD 8

CHEMICAL ANALYSIS

Analyses of Natural Gases, 1981. PB82-191859/XDD 24

Spectrographic and Chemical Analysis of Rock, Stream-Sediment, and Concentrate Samples from the Teton Wilderness and Adjacent Study Areas, Teton, Fremont, and Park Counties, Wyoming. PB83-198069/XDD 24

Analyses of Natural Gases (1917-1982). PB83-210286/XDD 27

Analytical Results for Stream-Sediment Concentrate, Sieved Stream-Sediment, Rock, and Water Samples from the Silver City 1 x 2 Degree Quadrangle, Arizona and New Mexico. PB83-220863/XDD 24

Spectrographic, Chemical and Radioactivity Analyses of Rock, Stream-Sediment, and Soil Samples from the Hell's Canyon Study Area, Wallowa County Oregon, and Idaho and Adams Counties, Idaho. PB83-255059/XDD 24

Fischer Assay Oil-Shale Data (1940-June 1983). PB84-110881/XDD 22

Geochemical Data for Rock Samples from the Petersburg and Parts of the Port Alexander, and Sumdum Quadrangles, Southeastern Alaska. PB84-234426/XDD 19

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Chama-Southern San Juan Mountains Wilderness Study Area, Mineral, Rio Grande, Archuleta, and Conejos Counties, Colorado. PB-261 854/4/XDD 19

CHEMICAL COMPOUNDS

Registry of Toxic Effects of Chemical Substances, Computer Tape, 1982 Edition. PB83-223180/XDD 17

TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Plantsite Information File. PB83-254102/XDD 17

TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Production Information File. PB83-254110/XDD 17

TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Preferred Name File and Synonym File. PB83-254128/XDD 17

Magnetic Tape Record of the Wiswesser Line, Notations in the Desktop Analysis Tool for the Common Data Base. PB-135 547/5/XDD 19

CHENODEOXYCHOLIC ACID

National Cooperative Gallstone Study: Chenodiol for Dissolution of Gallstones. PB82-134891/XDD 25

CHENODESOXYCHOLIC ACID

National Cooperative Gallstone Study, SAS Data Sets, Chenodiol, Hepatotoxicity, Liver Biopsy. PB82-205071/XDD 25

CHINA

China: Supplement to the Directory of Officials of the People's Republic of China. A(CR) 75-16, April 1975. PB-246 395/8/XDD 15

People's Republic of China Bibliography of Literature Written During the Campaign to Criticize Lin Biao and Confucius, July 1973-December 1974. PB-246 631/6/XDD 21

Chinese Contact File, 1972-November 1975. PB-246 750/2/XDD 15

Index to Selected Articles from the FBIS People's Republic of China Daily Report, August 1970-June 1975. PB-249 795/6/XDD 21

Catalog Number 4235.
PB-296 023/5/XDD 10

DEPRECIATION

Electric Utility Company Monthly Statement/
Current, EIA-826, January-March 1984.
PB84-214527/XDD 22

DERMATOLOGY

Health and Nutrition Examination Survey
(HANES I) 1971-1975, Dermatology Data
Tape, Catalog Number 4151.
PB80-130255/XDD 10

DESKTOP ANALYSIS TOOL

Magnetic Tape Record of the Wiswesser
Line, Notations in the Desktop Analysis Tool
for the Common Data Base.
PB-195 547/5/XDD 19

DIABETES

University Group Diabetes Program Data
File.
PB83-129122/XDD 25

DIABETES MELLITUS

Diabetes Data Tape from the National
Health Examination Survey of Adults 18-79
Years, Cycle I, 1959-1962.
PB-293 132/7/XDD 10

DIABETIC RETINOPATHY

Diabetic Retinopathy Study Data.
PB84-112507/XDD 25

DICTIONARIES

Dictionary of Occupational Titles, 4th Edition.
PB83-198044/XDD 4

DIETS

Nationwide Food Consumption Survey, Basic
Household, Spring Quarter, 1977-78.
PB80-190176/XDD 16

DIGITAL COMPUTERS

- Nutritive Values of Foods, as in Agriculture Information Bulletin No. 382.
PB80-190192/XDD 16
- Nationwide Food Consumption Survey, Basic Individual, Spring Quarter, 1977-78.
PB80-190218/XDD 16
- Nationwide Food Consumption Survey, Basic Individual, Spring Quarter, 1965.
PB80-195415/XDD 16
- Nationwide Food Consumption Survey, Basic Household, Summer Quarter, 1977-78.
PB80-197411/XDD 16
- Nationwide Food Consumption Survey, Basic Individual, Summer Quarter, 1977-78.
PB80-197429/XDD 16
- Nationwide Food Consumption Survey, Basic Household, Fall Quarter, 1977-78.
PB80-200215/XDD 16
- Nationwide Food Consumption Survey, Basic Individual, Fall Quarter, 1977-78.
PB80-200223/XDD 16
- Nationwide Food Consumption Survey, Basic Household, Winter Quarter, 1977-78.
PB80-202542/XDD 16
- Nationwide Food Consumption Survey, Household Low Income 1977-78.
PB81-114399/XDD 16
- Nationwide Food Consumption Survey, Individual Low Income, 1977-78.
PB81-118838/XDD 16
- Nationwide Food Consumption Survey, Individual Winter, 1977-78.
PB81-118853/XDD 16
- Food Consumption Survey, Hawaii Household, 1977-78.
PB81-146755/XDD 16
- Food Consumption Survey, Alaska Household, 1977-78.
PB81-146763/XDD 16
- Food Consumption Survey, Hawaii Individual, 1977-78.
PB81-146771/XDD 16
- Food Consumption Survey, Alaska Individual, 1977-78.
PB81-162539/XDD 16
- NHANES II (National Health and Nutrition Examination Survey, Second). Model Gram and Nutrient Composition Data Tape. Catalog Number 5702 and 5703.
PB82-142613/XDD 10
- NHANES II (National Health and Nutrition Examination Survey, Second). 24-hour Recall - Specific Food Item Tape.
PB82-142639/XDD 10
- Health and Nutrition Examination Survey (HANES I) 1971-1975. Dietary Frequency and Adequacy, Catalog Number 4701.
PB-295 906/2/XDD 10
- Health and Nutrition Examination Survey (HANES I) 1971-1975. 24-Hour Food Consumption Intake Data Tape, Catalog Number 4704.
PB-297 339/4/XDD 10

DIGITAL COMPUTERS

- Technology Subjects Class 364 Subclass 900 (Special Purpose Digital Processing Systems).
PB81-208076/XDD 21
- Technology Subjects Class 364 Subclass 200 (General Purpose Digital Processing Systems).
PB81-208092/XDD 21

DIRECTORIES

- National Drug Code Directory.
PB84-168681/XDD 25

SUBJECT INDEX

- Natural Gas Policy Act Notices of Determination - FERC Form 121 (Biweekly).
PB84-174770/XDD 22
Natural Gas Policy Act Notices of Determination - FERC Form 121 (Monthly).
PB84-174788/XDD 22

GELS

- Multiphase Buffer Systems (Systems Output Tape No. 1).
PB-196 085/5/XDD 19
Multiphase Buffer Systems (Systems Output Tape No. 2).
PB-196 086/3/XDD 19
Multiphase Buffer Systems (Systems Output Tape No. 3).
PB-196 087/1/XDD 19
Multiphase Buffer Systems (Systems Output Tape No. 4).
PB-196 088/9/XDD 19

GEOCHEMICAL PROSPECTING

- Magnetic Computer Tape Containing Analytical Data from Rock, Stream-Sediment, and Stream-Sediment Heavy-Mineral Concentrate Samples from Bradfield Canal, Southeastern Alaska.
PB81-108631/XDD 24

GEOCHEMISTRY

- Computer Tape Containing Geologic, Geochemical and Remote Sensing Data for the Ely and Rowe Canyon Study Areas, Nevada.
PB81-160111/XDD 24
Stream-Sediment Geochemical Survey of the Bureau of Land Management's American Flats-Silverton Planning Unit in Southwest Colorado.
PB81-212912/XDD 24
Spectrographic and Chemical Analyses of Rocks and Stream-Sediments for the Choteau 2 Quadrangle, Montana.
PB81-233959/XDD 24
Spectrographic and Chemical Analyses of Rock, Stream-Sediment, and Concentrate Samples from Walker Lake 2 Quadrangle, California and Nevada.
PB81-233967/XDD 24
Trace Element Data for Bedrock Geochemical Samples from the West Chigof-Yakobi Wilderness Study Area, Southeastern Alaska.
PB82-191842/XDD 24
Spectrographic and Chemical Analysis of Rock, Stream-Sediment, and Concentrate Samples from the Teton Wilderness and Adjacent Study Areas, Teton, Fremont, and Park Counties, Wyoming.
PB83-198069/XDD 24
Analytical Results for Stream-Sediment Concentrate, Sieved Stream-Sediment, Rock, and Water Samples from the Silver City 1 x 2 Degree Quadrangle, Arizona and New Mexico.
PB83-220863/XDD 24

SUBJECT INDEX

- Lithologic, Petrographic and Resource Data to Accompany Report on Estimation of Uranium Endowment in the Westwater Canyon Member, Morrison Formation, San Juan Basin, Colorado Plateau.
PB83-255042/XDD 24
Spectrographic, Chemical and Radioactivity Analyses of Rock, Stream-Sediment, and Soil Samples from the Hell's Canyon Study Area, Wallowa County Oregon, and Idaho and Adams Counties, Idaho.
PB83-255059/XDD 24
GEOTHERM Data Tape Giving Geochemistry of Geothermal Springs, Wells in the U.S.
PB84-107705/XDD 24
Geochemical Data for Rock Samples from the Petersburg and Parts of the Port Alexander, and Sumdum Quadrangles, Southeastern Alaska.
PB84-234426/XDD 19
Magnetic Tape Containing 7192 Chemical Analyses of Sedimentary Rocks of the Central and Northwestern United States.
PB-197 514/3/XDD 24
Description of Magnetic Tape and 'Read-Only' Retrieval Program of Geochemical Data, Coeur d'Alene District, Idaho.
PB-209 567/7/XDD 24
Magnetic Tape Containing Semiquantitative Spectrographic Analyses and Some Selected Chemical Analyses of Rocks and Stream Sediments from the Cloud Peak Primitive Area, Wyoming.
PB-210 928/8/XDD 24
Magnetic Tape Containing Semiquantitative Spectrographic and Chemical Analyses of Rocks and Stream Sediments from the Gila Wilderness, Gila Primitive Area and Vicinity, New Mexico.
PB-211 684/6/XDD 24
Magnetic Tape Containing Stream-Sediment Analytical Data, Central Maine (with Description).
PB-213 036/7/XDD 24
Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment, Rocks, and Pan Concentrates from the Teton Corridor, Wyoming.
PB-220 816/3/XDD 24
Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment and Soils, Rocks, and Pan Concentrates from the Absaroka Primitive Area and Vicinity, Montana.
PB-220 817/1/XDD 24
Magnetic Tape Containing Spectrographic and Chemical Analyses of Rocks and Stream Sediment from the Study Areas Contiguous to the Uncompahgre Primitive Area, Colorado.
PB-220 818/9/XDD 24
Magnetic Tape Containing Spectrographic and Chemical Analyses of Rock and Stream Sediment from the Scapegoat Wilderness (Formerly Lincoln Back Country), Montana.
PB-220 819/7/XDD 24
Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment, Rock, Soil, and Concentrates from the Sawtooth National Recreation Area, Idaho.
PB-224 872/2/XDD 24
Spectrographic and Chemical Analyses of Mineralized Rock and Stream Sediments from the Alpine Lakes Area, Washington.
PB-226 419/8/XDD 24

- Spectrographic and Chemical Analyses of Stream Sediment and Rock from the Bear-tooth Primitive Area and Vicinity, Montana and Wyoming.
PB-228 420/6/XDD 24
Magnetic Tape Containing Results of Semiquantitative Spectrographic Analyses of the Magnetic Fractions of 680 Alaskan Alluvial Concentrates.
PB-229 947/7/XDD 24
Magnetic Tape Containing Results of Semiquantitative Spectrographic Analysis of 1069 Alaskan Alluvial Concentrates.
PB-231 246/0/XDD 24
Spectrographic and Chemical Analyses of Rock and Stream Sediment Samples from the Granite Fjords Wilderness Study Area, Alaska.
PB-232 049/7/XDD 24
Magnetic Tape Containing Spectrographic and Chemical Analyses of Rocks, Stream Sediments, and Panned Concentrates from the Du Noir Addition, Washakie Wilderness, Fremont County, Wyoming.
PB-235 001/5/XDD 24
Semiquantitative Spectrographic Analyses of Rock Samples, Coeur d'Alene District, Shoshone County, Idaho.
PB-235 078/3/XDD 24
Semiquantitative Spectrographic Analyses of Detrital Ilmenite from the Inner Piedmont Belt, North Carolina and South Carolina.
PB-238 412/1/XDD 24
Spectrographic and Chemical Analyses of Mineralized Ores and Floats, Mines and Dumps, Stream Sediments and Pan Concentrates from the Cougar Lakes-Mount Aix Study Area, Yakima and Lewis Counties, Washington.
PB-238 413/9/XDD 24
Spectrographic and Chemical Analyses of Stream Sediments and Rock from the Alpine Lakes Study Area and Additions, Washington.
PB-240 487/9/XDD 24
Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Nabesna Quadrangle, Alaska.
PB-240 488/7/XDD 24
Geochemical Data in the Eastern Part of the Upper Peninsula of Michigan, 1972-73.
PB-243 454/6/XDD 24
Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Lone Peak Wilderness Study Area, Utah and Salt Lake Counties, Utah.
PB-244 133/5/XDD 24
Spectrographic and Chemical Analyses of Stream Sediment and Rock from the Bear-tooth Primitive Area and Vicinity, Montana and Wyoming.
PB-245 403/1/XDD 24
Spectrographic and Chemical Analyses of Stream Sediment and Rock from the Indian Peaks Study Area, Colorado.
PB-246 033/5/XDD 24
Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the North Absaroka Study Area, Park and Sweet Counties, Montana.
PB-252 214/2/XDD 24

SUBJECT INDEX

HEALTH CARE UTILIZATION

Spectrographic and Chemical Analyses of Stream Sediment and Rocks from the Proposed Additions to the Scapegoat Wilderness, Powell and Lewis and Clark Counties, Montana.

PB-253 190/3/XDD 24

Spectrographic and Chemical Analyses of Stream Sediments, Rocks, and Soils from the Scotchman Peak Wilderness Study Area, Lincoln and Sanders Counties, Montana, and Bonner County, Idaho.

PB-254 972/3/XDD 24

Spectrographic and Chemical Analyses of Mineralized Rock and Stream Sediments from the Laramie Peak Study Area, Wyoming.

PB-255 795/7/XDD 24

Spectrographic and Chemical Analyses of Stream Sediments and Rocks from the Chama-Southern San Juan Mountains Wilderness Study Area, Mineral, Rio Grande, Archuleta, and Conejos Counties, Colorado.

PB-261 854/4/XDD 19

Spectrographic and Chemical Analyses of Stream Sediments, Rocks, and Panned Concentrates from the West Elk Wilderness and Vicinity, Delta and Gunnison Counties, Colorado.

PB-261 855/1/XDD 19

Results of Spectrographic and Chemical Analyses of Geochemical Samples from the McCarthy Quadrangle, Alaska.

PB-266 902/6/XDD 24

Analytical Results from Rock and Stream-Sediment Samples Collected in Ketchikan and Prince Rupert Quadrangles, Southeastern Alaska.

PB-276 777/0/XDD 24

Spectrographic and Chemical Analyses of Stream-Sediment and Rock Samples from the Minarets Wilderness and Adjacent Areas, California.

PB-286 959/2/XDD 24

Geochemical Data for New Mexico.

PB-300 543/6/XDD 24

Geochemical Data for Colorado.

PB-300 544/4/XDD 24

GEOCODING

Multi-Regional Input-Output Basic Data Tape, DOTR5.

PB-251 369/5/XDD 2

Petroleum Industry Survey Data Tape (1973).

PB-256 634/7/XDD 7

Statistics of Income - 1972, Small Area Data, Individual Income Tax Returns, Table 3 (Supplemental Report)

PB-285 310/9/XDD 6

National Travel Survey - 1967.

XEN/DF-73/057 15

GEOGRAPHIC AREAS

Zip Code, Latitude, Longitude. (Zip Lat Long).

AD-A023 226/4/XDD 18

Counties and County Equivalents of the States of the United States.

PB81-108623/XDD 21

Codes for Named Populated Places, Primary County Divisions, and Other Locations Entities of the United States (Sixth Update); FIPS PUB 55

PB84-162742/XDD 21

Countries, Dependencies, and Areas of Special Sovereignty.

PB-267 936/3/XDD 21

GEOGRAPHIC AREAS

Standard Abbreviations and Codes for States and Outlying Areas of the United States - Federal Information Processing Standard.

PB-190 719/5/XDD 21

GEORGIA

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Georgia, Massachusetts).

SUBJECT INDEX

INDUSTRIAL MEDICINE

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (New York, Part II; California, Part II).
PB-170 787/6/XDD 8

HYDROLOGY

Analytical Results for Stream-Sediment Concentrate, Sieved Stream-Sediment, Rock, and Water Samples from the Silver City 1 x 2 Degree Quadrangle, Arizona and New Mexico.
PB83-220863/XDD 24
Hydrologic Data for Soldier Creek Basin, Kansas.
PB-292 892/7/XDD 24

HYPERTHYROIDISM

Cooperative Thyrotoxicosis Therapy Follow-Up Study (1946-1964).
PB-229 867/7/XDD 25

HYPOGLYCEMIC AGENTS

University Group Diabetes Program Data File.
PB83-129122/XDD 25

IDAHO

Supplementary Data System, Microdata File, Idaho, 1978.
PB81-240350/XDD 25
Description of Magnetic Tape and 'Read-Only' Retrieval Program of Geochemical Data, Coeur d'Alene District, Idaho.
PB-209 567/7/XDD 24
Magnetic Tape Containing Spectrographic and Chemical Analyses of Stream Sediment, Rock, Soil, and Concentrates from the Sawtooth National Recreation Area, Idaho
PB-224 872/2/XDD 24
Semiquantitative Spectrographic Analyses of Rock Samples, Coeur d'Alene District, Shoshone County, Idaho.
PB-235 078/3/XDD 24
Spectrographic and Chemical Analyses of Stream Sediments, Rocks, and Soils from the Scotchman Peak Wilderness Study Area, Lincoln and Sanders Counties, Montana, and Bonner County, Idaho.
PB-254 972/3/XDD 24
Supplementary Data System, Microdata File, Idaho, 1976.
PB-292 466/0/XDD 25
Supplementary Data System, Microdata File, Idaho, 1977.
PB-296 022/7/XDD 25

ILLINOIS

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Illinois).
PB-170 784/3/XDD 8

ILMENITE

Semiquantitative Spectrographic Analyses of Detrital Ilmenite from the Inner Piedmont Belt, North Carolina and South Carolina.
PB-238 412/1/XDD 24

IMPORTS

Imports - Industrial Commodity Classes (1972 SIC): 1972 to Date (Updated Quarterly).
PB82-948700/XDD 2
Imports - By Tariff Commodity Class: 1968 to Date (Updated Quarterly).
PB82-948800/XDD 2
Export and Import Price Indexes: 1970 to Date (Updated Quarterly).
PB82-948900/XDD 2
Report of Oil Imports into the United States and Puerto Rico, Form ERA 60 (January 1977-December 1982).
PB84-163021/XDD 2

Crude, Unfinished, Finished and Residual Fuel Oil Data File
PB-229 488/2/XDD 2

INCOME

Income Survey Development Program (ISDP). 1979 Research Panel Working Files, Linking Index and Extract File.
PB83-244749/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel: Wave 5 Data File.
PB83-244756/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel: Wave 4 Data File.
PB83-244764/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel: Wave 3 Data File.
PB83-244772/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel: Wave 2 Data File.
PB83-244780/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel: Wave 1 Data File.
PB83-244798/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel: Wave 6 Data File.
PB83-244806/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel, Linking Index File for Matching Individual Waves.
PB83-244814/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel, Extract File from Wave 5 Questionnaire.
PB83-244822/XDD 6
Electric Utility Company Monthly Statement/Current, EIA-826, January-March 1984.
PB84-214527/XDD 22
Monthly Household and Family Composition.
PB84-215417/XDD 6
Income Survey Development Program (ISDP) 1979, Wave 2, Final Version.
PB84-217389/XDD 6
Income Survey Development Program (ISDP) 1979, Wave 5, Final Version.
PB84-217397/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel Wave 4, Final Version.
PB84-220060/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel Wave 3, Final Version.
PB84-220078/XDD 6
Income Survey Development Program (ISDP). 1979 Research Panel Wave 1, Final Version.
PB84-220086/XDD 6
Simulated Tax and Transfer Systems: Stats-Person (1970-71).
PB-221 650/5/XDD 6
Simulated Tax and Transfer System: Stats-Family (1970-71).
PB-221 651/3/XDD 6
Simulated Tax and Transfer System (Stats) - Unit (1970-71).
PB-221 652/1/XDD 6
Simulated Tax and Transfer System (Stats) - Social Security Unit (1970-71).
PB-221 653/9/XDD 6

Statistics of Income - 1972, Small Area Data, Individual Income Tax Returns, Table 1 (Supplemental Report)
PB-285 308/3/XDD 6
Statistics of Income - 1972, Small Area Data Individual Income Tax Returns, Table 2 (Supplemental Report)
PB-285 309/1/XDD 6
Statistics of Income - 1972, Small Area Data, Individual Income Tax Returns, Table 3 (Supplemental Report)
PB-285 310/9/XDD 6

INCOME TAXES

Federal Individual Income Tax Return Data for Each Five-Digit Zip Code Area in the U.S. - 1969.
PB-209 352/4/XDD 6

INDEXES (DOCUMENTATION)

Index to Classification.
PB81-208118/XDD 21
Index to Selected Articles from the FBIS People's Republic of China Daily Report, August 1970-June 1975.
PB-249 795/6/XDD 21
Index to Selected Articles from the FBIS 'People's Republic of China Daily Report', July 1975-October 1978.
PB-289 612/4/XDD 21

INDIANA

Supplementary Data System, Microdata File, Indiana, 1978.
PB80-197445/XDD 25
Supplementary Data System, Microdata File, Indiana, 1977.
PB-292 464/5/XDD 25
Supplementary Data System, Microdata File, Indiana, 1976.
PB-292 483/5/XDD 25

INDUSTRIAL MEDICINE

Supplementary Data System, Microdata File, Tennessee, 1977.

Supplementary Data System, Microdata File, Utah, 1977.
PB-297 796/5/XDD 25

INDUSTRIES

Industry Profiles: 1958-1969. (Data Base and Calculations).
COM-71-50349/4/XDD 7
Economic Development Administration Industrial Location Planning System (ILPS) - Summary Data Tape
COM-74-11065/8/XDD 7
Magnetic Data Tape for Input-Output Transactions by Transportation Mode - 1947 and 1958 Tables.
PB-178 679/7/XDD 2
Capital Stock Estimates, 1947-1971.
PB-242 638/5/XDD 6
State Estimates of Output, Employment and Payrolls, 1967.
PB-247 702/4/XDD 4
Petroleum Industry Survey Data Tape (1973).
PB-256 634/7/XDD 7
Standard Industrial Classification Manual, 1977.
PB-296 331/2/XDD 7

INFANT MORTALITY

Vital Statistics Infant Mortality Data, 1964-66.
PB-238 560/7/XDD 14

INFORMATION SYSTEMS

Congressional Sourcebook Series (CSS) Data Base Source and Systems File.
PB81-132730/XDD 21
Congressional Sourcebook Series (CSS) Data Base Reports File.
PB81-132748/XDD 21
MeSH (Medical Subject Headings) Vocabulary File.
PB82-113788/XDD 21
CATLINE (CATalog onLine).
PB82-113796/XDD 21
Health Planning and Administration.
PB82-113804/XDD 9
Automated Problem-Oriented Medical Information System (PROMIS) Data Tape, Final Version, 1981.
PB82-140518/XDD 25
National Fire Incident Reporting System (NFIRS) Data Base. 1982 Incident Report File.
PB84-103365/XDD 7
National Fire Incident Reporting System (NFIRS) Data Base. 1982 Equipment Report File.
PB84-103373/XDD 7
National Fire Incident Reporting System (NFIRS) Data Base. 1982 Master File.
PB84-103423/XDD 7
Health Care Delivery Concept Lists - Hierarchical List and Program Tape. Magnetic Tape Record.
PB-207 780/8/XDD 9

Cooperative Thyrotoxicosis Therapy Follow-Up Study (1946-1964).
PB-229 867/7/XDD 25
Inventory of Energy Research and Development Information Resources in the United States (1974).
PB-244 204/4/XDD 22
Information Economy.
PB-264 172/8/XDD 21

INJURIES

Data Tape of Medical Malpractice Closed Claims (1976).
PB80-111271/XDD 7

INPUT OUTPUT ANALYSIS

Data Files for the Report: Implementation and Evaluation of the Multiregional Input-Output Model of the United States.
COM-73-10533/0/XDD 2
Magnetic Data Tape for Input-Output Transactions by Transportation Mode - 1947 and 1958 Tables.
PB-178 679/7/XDD 2
Multiregional Input-Output Basic Data - DOTR1
PB-233 583/4/XDD 2
Multiregional Input-Output Basic Data - DOTR2
PB-233 584/2/XDD 2
Multiregional Input-Output Basic Data - DOTR3
PB-233 585/9/XDD 2
Multiregional Input-Output Basic Data - DOTR4
PB-233 586/7/XDD 2
State Estimates of Output, Employment and Payrolls, 1967.
PB-247 702/4/XDD 4
Multi-Regional Input-Output Basic Data Tape, DOTR5.
PB-251 369/5/XDD 2
Multi-Regional Input-Output Basic Data Tape, DOTR6.
PB-251 370/3/XDD 2

INSTRUCTORS

Teacher Data File - 1977 National Survey of Science, Mathematics and Social Studies Education
PB-284 330/8/XDD 15

INSULIN

University Group Diabetes Program Data File.
PB83-129122/XDD 25

INSURANCE

Data Tape of Medical Malpractice Closed Claims (1976).
PB80-111271/XDD 7
Data Tape for Battelle Study of 'Employment Related Health Benefits in Private Non-farm Business Establishments in the U.S.'.
PB81-211104/XDD 4

INTELLIGENCE

Ethnic Minorities IQ Data File.
PB-265 813/6/XDD 15

INTELLIGENCE TESTS

Test Scores for 684 Executives and 923 Brain Damaged Subjects Seen in Halstead Laboratory of Medical Psychology 1935-69. Higher Brain Functions in Man and the Frontal Lobes.
PB-197 069/8/XDD 15

INTERNATIONAL PATENT CLASSIFICATION

Concordance File.
PB81-208084/XDD 21

INTERNATIONAL TRADE

Foreign Production, Supply and Distribution of Agricultural Commodities.
PB82-157314/XDD 1
Imports - Industrial Commodity Classes (1972 SIC): 1972 to Date (Updated Quarterly).
PB82-948700/XDD 2
Imports - By Tariff Commodity Class: 1968 to Date (Updated Quarterly).
PB82-948800/XDD 2
Export and Import Price Indexes: 1970 to Date (Updated Quarterly).
PB82-948900/XDD 2
Report of Oil Imports into the United States and Puerto Rico, Form ERA 80/Current (January-December 1983).
PB84-163013/XDD 2
Report of Oil Imports into the United States and Puerto Rico, Form ERA 60 (January 1977-December 1982).
PB84-163021/XDD 2
Report of Oil Imports into the United States and Puerto Rico, Forms EIA-814/EIA-815 (January 1983-February 1984).
PB84-191154/XDD 22
Transoceanic Cargo Study: Data Tape - U.S. Foreign Trade, 1963-68 Air and Water Combined.
PB-201 045/2/XDD 2
Transoceanic Cargo Study: Data Tape - U.S. Foreign Trade - 1963-68; Air and Water Combined, Exports: Research Study, Data Tape.
PB-201 046/0/XDD 2
Crude, Unfinished, Finished and Residual Fuel Oil Data File
PB-229 488/2/XDD 2

- Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 5 - 1967-68.
PB-223 212/2/XDD 24
- Magnetic, and Radiometric Data of Liberia West Africa. Area Block 6 - 1967-68.
PB-223 213/0/XDD 24
- Magnetic, and Radiometric Data of Liberia West Africa. Area Block 7 - 1967-68.
PB-223 214/8/XDD 24
- Magnetic, and Radiometric Data of Liberia West Africa. Area Block 8 - 1967-68.
PB-223 215/5/XDD 24
- Magnetic, and Radiometric Data of Liberia West Africa. Area Block 9 - 1967-68.
PB-223 216/3/XDD 24
- Magnetic, and Radiometric Data of Liberia West Africa. Area Block 10 - 1967-68.
PB-223 217/1/XDD 24

LICENSES

- Restricted/Commercial Licenses Master File.
PB80-220825/XDD 20
- Common Carrier Individual Land Mobile Data Base.
PB80-226087/XDD 20

Microwave Application Processing System Owner File.

- PB81-199531/XDD 20
- Amateur Radio Service Master File Updates.
PB81-238792/XDD 20
- FCC Frequency Data Base.
PB82-145186/XDD 20
- Broadcast Applications Address List.
PB82-157348/XDD 20
- Common Carrier Microwave Antenna, Licensee, and Transmitter File.
PB82-168238/XDD 20
- Amateur Radio Service Master File.
PB82-191578/XDD 20
- TV Programming Data Master File.
PB82-191602/XDD 20
- Broadcast Equal Employment Opportunity Log Master File (Formerly Broadcast Log Master File).
PB82-191982/XDD 20
- Amateur Radio Service Master File.
PB83-220889/XDD 20

LIGHT COAGULATION

- Diabetic Retinopathy Study Data.
PB84-112507/XDD 25

LITIGATION

- U.S. Versus AT and T Trial Transcripts.
PB82-158866/XDD 11
- U.S. Versus AT and T Stipulation/Contention Packages.
PB82-158874/XDD 11
- U.S. Versus AT and T Depositions.
PB82-158882/XDD 11
- U.S. Versus AT and T Trial Exhibit Information.
PB82-158890/XDD 11
- U.S. Versus AT and T Bibliographic Document Abstracts.
PB82-158908/XDD 11

LIVESTOCK

- Livestock Production, Disposition and Income (1965-69).
PB-234 639/3/XDD 1

LOGISTICS

- Management Data List - Consolidated (ML-C).
PB84-212653/XDD 27
- Management Data List - Consolidated (ML-C).
PB84-240225/XDD 27

LOGISTICS MANAGEMENT

- Master Cross Reference List, Part 1 (Defense Logistics Services Center).
PB84-118009/XDD 27
- Master Cross Reference List, Part 2. (Defense Logistics Service Center).
PB84-217249/XDD 27
- Master Cross Reference List, Part 3 (Defense Logistics Service Center).
PB84-217256/XDD 27

LONG TERM CARE

- National Nursing Home Survey, 1977. Data Tapes.
PB80-188030/XDD 9
- National Nursing Home Survey, 1977. 5 State Data Tapes.
PB80-188717/XDD 9
- Analysis of Incentive Reimbursement System for Health Care and LTC Services (1973).
PB-269 452/9/XDD 9

SUBJECT INDEX

MATHEMATICAL MODELS

Long Term Care Alternatives: Section 222 Day Care and Homemaker Demonstrations; LTC 003 Data Tape
PB-283 727/6/XDD 9

LOS ANGELES (CALIFORNIA)

Los Angeles Reactive Pollutant Program Data Archive, Feb-Jun 1975.
PB-244 297/8/XDD 23

Los Angeles Reactive Pollutant Program Data - Modelers' Archive, September 1973-November 1973.
PB-255 508/8/XDD 23

Freeway Surveillance Data - Data Tapes, January 1974 - February 1976.
PB-263 643/9/XDD 13

Los Angeles Freeway Data Tapes.
PB-294 873/5/XDD 13

LOW INCOME GROUPS

Nationwide Food Consumption Survey, Household Low Income 1977-78.
PB81-114399/XDD 16

Nationwide Food Consumption Survey, Individual Low Income, 1977-78.
PB81-118838/XDD 16

Nationwide Food Consumption Survey, Individual Winter, 1977-78.
PB81-118853/XDD 16

Employment Opportunity Pilot Project (EOPP), Employer and Household Data Base.
PB83-251181/XDD 4

MAGNETIC SURVEYS

Aeromagnetic Data from Southeastern Missouri.
PB83-220814/XDD 27

Ohio Magnetic Data at Elevations 1000 ft Above Ground and 2000 ft Above Sea Level in a Gridded Format.
PB84-125905/XDD 24

Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 1 - 1967-68.
PB-223 208/0/XDD 24

Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 2 - 1967-68.
PB-223 209/8/XDD 24

Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 3 - 1967-68.
PB-223 210/6/XDD 24

Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 4 - 1967-68.
PB-223 211/4/XDD 24

Magnetic, and Radiometric Data of Liberia, West Africa, Area Block 5 - 1967-68.
PB-223 212/2/XDD 24

Magnetic, and Radiometric Data of Liberia West Africa, Area Block 6 - 1967-68.
PB-223 213/0/XDD 24

Magnetic, and Radiometric Data of Liberia West Africa, Area Block 7 - 1967-68.
PB-223 214/8/XDD 24

Magnetic, and Radiometric Data of Liberia West Africa, Area Block 8 - 1967-68.
PB-223 215/5/XDD 24

Magnetic, and Radiometric Data of Liberia West Africa, Area Block 9 - 1967-68.
PB-223 216/3/XDD 24

Magnetic, and Radiometric Data of Liberia West Africa, Area Block 10 - 1967-68.
PB-223 217/1/XDD 24

MAINE

Magnetic Tape Containing Stream-Sediment Analytical Data, Central Maine (with Description).
PB-213 036/7/XDD 24

MALIGNANT NEOPLASMS

U.S. Cancer Mortality Rates and Trends 1950-1979.
PB84-196914/XDD 10

MANPOWER

National LSA (Labor Surplus Area) Zipcode File, FY84.
PB84-146281/XDD 4

MANUFACTURERS

Producer Price Index: 1947 to Date (Updated Monthly).
PB82-948600/XDD 2

Large Combustor Energy Consumption Data Base 1979.
PB83-120477/XDD 7

NATO Supply Code for Manufacturers Excluding U.S. and Canada, Code Sequence (H4-3D).
PB84-158286/XDD 7

NATO Supply Code for Manufacturers, Excluding U.S. and Canada, Name Sequence (H4-3B).
PB84-158294/XDD 7

Vital Statistics Marriage, Detail, 1979.
PB81-238743/XDD 14

Vital Statistics Marriage Data, Detail, 1980.
PB83-261610/XDD 14

Vital Statistics Marriage Data, Detail, 1981.
PB84-164201/XDD 14

Vital Statistics Marriage Data, Detail, 1968.
PB-235 645/9/XDD 14

Vital Statistics Marriage Data, Detail - 1969.
PB-235 646/7/XDD 14

MARYLAND

Supplementary Data System, Microdata File, Maryland, 1977.
PB80-108814/XDD 25

Supplementary Data System, Microdata File, Maryland, 1978.
PB80-158330/XDD 25

Digital Land Cover Classification of the Washington Urban Area Derived from LANDSAT Data, 1972 and 1973.
PB-264 650/3/XDD 18

Supplementary Data System, Microdata File, Maryland, 1976.
PB-291 266/5/XDD 25

MASSACHUSETTS

Population and Housing Data for the United States by Standard Location Areas, 1980 Census (Georgia, Massachusetts).
PB-170 783/5/XDD 8

MASTER FILES

Transoceanic Cargo Study: Data Tape - U.S. Foreign Trade, 1963-68 Air and Water Combined.
PB-201 045/2/XDD 2

MATHEMATICAL MODELS

Federal Modeling Survey.
PB-234 121/2/XDD 7

MEDICAID

MEDICAID

- Effect of MEDICAID on Health Care of Low-Income Persons (1968-69).
PB-234 587/4/XDD 10

MEDICAL EQUIPMENT

- Medical Device Establishment Registration Master File.
PB80-111131/XDD 9
National Health Related Items Code Tape.
PB-245 600/2/XDD 25

MEDICAL EXAMINATION

- Test Scores for 684 Executives and 923 Brain Damaged Subjects Seen in Halstead Laboratory of Medical Psychology 1935-69. Higher Brain Functions in Man and the Frontal Lobes.
PB-197 069/8/XDD 15
Physical Measurements Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.
PB-293 122/8/XDD 10
Integrated Data Tape from the National Health Examination Survey of Children 6-11 Years, Cycle II, 1963-1965.
PB-293 124/4/XDD 10
Osteoarthritis and Rheumatoid Arthritis Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.
PB-293 130/1/XDD 10
Diabetes Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.
PB-293 132/7/XDD 10
Vision Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.
PB-293 136/8/XDD 10
Cardiovascular Findings Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.
PB-293 138/4/XDD 10
Health and Nutrition Examination Survey (HANES I) 1971-1975. Health Care Needs, General Medical History and Supplements on Respiratory and Cardiovascular Data Tape, Catalog Number 4091.
PB-296 029/2/XDD 9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Medical History Questionnaire (Ages 1-11) Data Tape, Catalog Number 4067.
PB-296 031/8/XDD 9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Ophthalmology Data Tape, Catalog Number 4161.
PB-296 033/4/XDD 9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Medical Examination (Ages 1-74) Data Tape, Catalog Number 4233.
PB-296 035/9/XDD 9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Medical History (Ages 12-74) Data Tape, Catalog Number 4081.
PB-296 073/0/XDD 9

MEDICAL INFORMATION SYSTEMS

- MeSH (Medical Subject Headings) Vocabulary File.
PB82-113788/XDD 21
CATLINE (CATalog onLine).
PB82-113796/XDD 21
Health Planning and Administration.
PB82-113804/XDD 9

SUBJECT INDEX

- Automated Problem-Oriented Medical Information System (PROMIS) Data Tape, Final Version, 1981.
PB82-140518/XDD 25

MEDICAL MALPRACTICE

- Data Tape of Medical Malpractice Closed Claims (1976).
PB80-111271/XDD 7

MEDICAL SERVICES

- Determinants of Service Intensity Data Tape: Reabstracted PAS Data and AHA/AMA Data for 17 Study Hospitals.
PB80-115710/XDD 9
Survey Data of Medical Group Practices Study: Formatted Data Tapes.
PB80-191349/XDD 9
National Ambulatory Medical Care Survey, 1978.

SUBJECT INDEX

NUTRITION

NEUROPSYCHOLOGICAL TESTS

- Test Scores for 684 Executives and 923 Brain Damaged Subjects Seen in Halstead Laboratory of Medical Psychology 1935-69. Higher Brain Functions in Man and the Frontal Lobes.
PB-197 069/8/XDD 15

NEVADA

- Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Nevada, Washington).
PB-170 775/1/XDD 8

NEW JERSEY

- Supplementary Data System, Microdata File, New Jersey, 1978.
PB80-158389/XDD 25
Supplementary Data System, Microdata File, New Jersey, 1976.
PB-291 325/9/XDD 25
Supplementary Data System, Microdata File, New Jersey, 1977.
PB-292 475/1/XDD 25

NEW MEXICO

- Supplementary Data System, Microdata File, New Mexico, 1978.
PB80-160518/XDD 25
Magnetic Tape Containing Semiquantitative Spectrographic and Chemical Analyses of Rocks and Stream Sediments from the Gila Wilderness, Gila Primitive Area and Vicinity, New Mexico.
PB-211 684/6/XDD 24
Supplementary Data System, Microdata File, New Mexico, 1976.
PB-291 261/6/XDD 25
Supplementary Data System, Microdata File, New Mexico, 1977.
PB-291 263/2/XDD 25
Geochemical Data for New Mexico.
PB-300 543/6/XDD 24

NEW YORK

- Supplementary Data System, Microdata File, New York, 1978.
PB81-151227/XDD 25
Population and Housing Data for the United States by Standard Location Areas, 1960 Census (New York, Part I).
PB-170 785/0/XDD 8
Population and Housing Data for the United States by Standard Location Areas, 1960 Census (New York, Part II; California, Part II).
PB-170 787/6/XDD 8

NEW YORK CITY (NEW YORK)

- City of New York Emergency Ambulance Demonstration Project.
PB-200 435/6/XDD 10
New York City Air Pollution Project of 1964-1969
PB-277 131/9/XDD 23

NONRESIDENTIAL BUILDINGS

- Nonresidential Energy Consumption Survey: Building Characteristics, Annual Consumption and Expenditures, October 1979 through January 1980.
PB84-213065/XDD 22

NORTH AMERICA

- World Data Bank II, Volume 1. North America.
PB-271 868/2/XDD 18

NORTH CAROLINA

- Supplementary Data System, Microdata File, North Carolina, 1978.
PB80-158397/XDD 25

- Supplementary Data System, Microdata File, North Carolina, 1976.
PB-291 343/2/XDD 25

- Supplementary Data System, Microdata File, North Carolina, 1977.
PB-292 477/7/XDD 25

NORTHEAST REGION (UNITED STATES)

- Master Data File from the 1975 Northeast Oxidant Transport Study.
PB-271 286/7/XDD 23

NURSES

- National Sample Survey of Registered Nurses, 1977.
PB81-172363/XDD 9
National Sample Survey of Registered Nurses II: Special County Tape.
PB83-254086/XDD 9
National Sample Survey of Registered Nurses (1977): Special County Tape.
PB84-151752/XDD 9

NURSING HOMES

- National Nursing Home Survey, 1977. Data Tapes.
PB80-188030/XDD 9
National Nursing Home Survey, 1977. 5 State Data Tapes.
PB80-188717/XDD 9
National Master Facility Inventory - Nursing and Related Care Homes, 1980.
PB83-178459/XDD 9
Master Facility Inventory - Nursing Homes and Other Health Facilities, 1976.
PB-287 230/7/XDD 9
Master Facility Inventory - Nursing Homes and Other Health Facilities Survey, 1973.
PB-287 268/7/XDD 9
Master Facility Inventory - Nursing Homes and Other Health Facilities Survey, 1971.
PB-287 270/3/XDD 9

NUTRIENTS

- Data Base for Pilot Study of Nutrient Content of School Lunches.
PB84-196906/XDD 16

NUTRITION

- Health and Nutrition Examination Survey (HANES I) 1971-1975. Dermatology Data Tape, Catalog Number 4151.
PB80-130255/XDD 10
Health and Nutrition Examination Survey (HANES I). Spirometry Data Tape, Best Trials Only, Catalog Number 4250.
PB80-145931/XDD 10
Health and Nutrition Examination Survey (HANES I) 1971-1975. Computer Measurements and Interpretations of Electrocardiograms, Catalog Number 4140.
PB80-168222/XDD 10
Nationwide Food Consumption Survey, Basic Household, Spring Quarter, 1977-78.
PB80-190176/XDD 16
Nutritive Values of Foods, as in Agriculture Information Bulletin No. 382.
PB80-190192/XDD 16
Nationwide Food Consumption Survey, Basic Individual, Spring Quarter, 1977-78.
PB80-190218/XDD 16
Nationwide Food Consumption Survey, Basic Individual, Spring Quarter, 1965.
PB80-195415/XDD 16
Nationwide Food Consumption Survey, Basic Household, Summer Quarter, 1977-78.
PB80-197411/XDD 16
Nationwide Food Consumption Survey, Basic Individual, Summer Quarter, 1977-78.
PB80-197429/XDD 16

- Nationwide Food Consumption Survey, Basic Household, Fall Quarter, 1977-78.
PB80-200215/XDD 16
Nationwide Food Consumption Survey, Basic Individual, Fall Quarter, 1977-78.
PB80-200223/XDD 16
Nationwide Food Consumption Survey, Basic Household, Winter Quarter, 1977-78.
PB80-202542/XDD 16
Nationwide Food Consumption Survey, Household Low Income 1977-78.
PB81-114399/XDD 16
Nationwide Food Consumption Survey, Individual Low Income, 1977-78.
PB81-118838/XDD 16
Nationwide Food Consumption Survey, Individual Winter, 1977-78.
PB81-118853/XDD 16
Yields and Losses or Gains in Preparation of Foods.
PB81-146730/XDD 16
Food Consumption Survey, Hawaii Household, 1977-78.
PB81-146755/XDD 16
Food Consumption Survey, Alaska Household, 1977-78.
PB81-146763/XDD 16
Food Consumption Survey, Hawaii Individual, 1977-78.
PB81-146771/XDD 16
Food Consumption Survey, Alaska Individual, 1977-78.
PB81-162539/XDD 16
Nationwide Food Consumption Survey, Puerto Rico, Household, 1977-78.
PB82-138454/XDD 16
Nationwide Food Consumption Survey, Puerto Rico, Individual, 1977-78.
PB82-138462/XDD 16
Nationwide Food Consumption Survey, Individual Low Income, 1979-80.
PB82-138488/XDD 16
Nutritive Values of Foods Used in the Nationwide Food Consumption Survey (Including Puerto Rico), Basic Household, 1977-78.
PB82-138496/XDD 16
Nutritive Values of Foods Used in the Nationwide Food Consumption Survey Including Puerto Rico, Basic Individual, 1977-78.
PB82-138504/XDD 16
Nutritive Values of Foods as in Home and Garden Bulletin No. 72² Revised 1981, Release 2.
PB82-138512/XDD 16
NHANES II (National Health and Nutrition Examination Survey, Second). Model Gram and Nutrient Composition Data Tape. Catalog Number 5702 and 5703.
PB82-142613/XDD 10
NHANES II (National Health and Nutrition Examination Survey, Second). 24-hour Recall - Specific Food Item Tape.
PB82-142639/XDD 10
NHANES II: National Health and Nutrition Examination Survey, Total Nutrient Intake/Food Frequency and Other Related Dietary Data Tape, Catalog Number 5701.
PB82-168261/XDD 10
Food Consumption Survey, Elderly Individual, Spring and Summer, 1977-78.
PB83-134023/XDD 16
Elderly Household Food Consumption Survey, 1977-78.
PB83-137281/XDD 16

NUTRITION SURVEYS

SUBJECT INDEX

NHANES II (National Health and Nutrition Examination Survey, 1976-1980), Medical History, Ages 12-74 Years. Catalog Number 5020.	
PB83-154815/XDD	10
Data Set 456, Food Composition Data, Release 4.	
PB83-180455/XDD	16
Nutrient Data Base for Standard Reference, USDA/Release 3.	
PB83-180463/XDD	16
Data Set 456-3, Food Composition Data, Release 4.	
PB83-180471/XDD	16
NHANES II (National Health and Nutrition Examination Survey, 1976-1980), Medical History, Ages 6 Months-11 Years.	
PB83-215616/XDD	10
Health and Nutrition Examination Survey (HANES I) 1971-1975. Dietary Frequency and Adequacy. Catalog Number 4701.	
PB-295 906/2/XDD	10
Health and Nutrition Examination Survey (HANES I) 1971-1975. General Well-Being and NIMH's CES-D Depression Scale Data Tape. Catalog Number 4171.	
PB-295 020/1/XDD	10
Health and Nutrition Examination Survey (HANES I) 1971-1975. Model Gram and Nutrient Composition Data Tapes. Catalog Number 4702 and 4703.	
PB-295 027/6/XDD	10
Health and Nutrition Examination Survey (HANES I) 1971-1975. Health Care Needs, General Medical History and Supplements on Respiratory and Cardiovascular Data Tape. Catalog Number 4091.	
PB-295 029/2/XDD	9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Medical History Questionnaire (Ages 1-11) Data Tape. Catalog Number 4067.	
PB-295 031/8/XDD	9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Ophthalmology Data Tape. Catalog Number 4161.	
PB-295 033/4/XDD	9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Medical Examination (Ages 1-74) Data Tape. Catalog Number 4233.	
PB-295 035/9/XDD	9
Health and Nutrition Examination Survey (HANES I) 1971-1975. Medical History (Ages 12-74) Data Tape. Catalog Number 4081.	
PB-295 073/0/XDD	9
Health and Nutrition Examination Survey (HANES I) 1971-1975. 24-Hour Food Consumption Intake Data Tape. Catalog Number 4704.	
PB-297 339/4/XDD	10
NUTRITION SURVEYS	
NHANES II (National Health and Nutrition Examination Survey, 1976-1980) Health History Supplement, Ages 12-74 Years.

OCCUPATIONS

Standard Occupational Classification Manual 1980 (SOC). PB81-162513/XDD 4

Current Population Survey Augmented with DOT Characteristics (April 1971). PB81-162638/XDD 4

Dictionary of Occupational Titles (DOT) (Fourth Edition) Scores for 1970 Census Categories. PB81-162653/XDD 4

Dictionary of Occupational Titles, 4th Edition. PB83-198044/XDD 4

OHIO

Ohio Magnetic Data at Elevations 1000 ft Above Ground and 2000 ft Above Sea Level in a Gridded Format. PB84-125905/XDD 24

Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Ohio). PB-170 774/4/XDD 8

OIL

Fischer Assay Oil-Shale Data (1940-June 1983). PB84-110881/XDD 22

OIL FIELDS

Oil and Gas Field Code Master List (December 1983). PB84-156017/XDD 24

OIL POLLUTION

Oil and Hazardous Materials Spill Information Retrieval System (OHM-SIRS), 1 Jul 72-31 Dec 74. PB-243 661/6/XDD 23

OIL SHALE

Oil-Shale Fischer Assay Analysis from Selected Coreholes in the Piceance Creek Basin, Colorado. PB82-134875/XDD 22

Oil-Yield Resources for Oil Shale Sequences in Core from the Piceance Creek Basin, Colorado, that Average 10, 15, 20, 25, 30, 35, and 40 Gallons per Ton. PB82-134883/XDD 22

Fischer Assay Oil-Shale Data (1940-June 1983). PB84-110881/XDD 22

Oil Shale Fischer Assay Data for Coreholes in the Piceance Creek Basin, Colorado. PB-230 607/4/XDD 22

Magnetic Tape Containing Oil-Shale Fischer Assay Data for Coreholes in the Uinta Basin, Utah. PB-238 682/9/XDD 22

OILS

Oil and Gas Field Code Master List (EIA). PB83-149500/XDD 24

Crude, Unfinished, Finished and Residual Fuel Oil Data File. PB-229 488/2/XDD 2

OREGON

Supplementary Data System, Microdata File, Oregon, 1978. PB80-160567/XDD 25

Supplementary Data System, Microdata File, Oregon, 1977. PB-291 268/1/XDD 25

Supplementary Data System, Microdata File, Oregon, 1976. PB-291 319/2/XDD 25

ORGANIC COMPOUNDS

Volatile Organic Chemicals in the Atmosphere: An Assessment of Available Data. PB83-195511/XDD 23

ORGANIZATIONS

CONAME. PB81-244592/XDD 21

Organizational Structure of Health Maintenance Organizations (HMOs). PB84-155068/XDD 9

OSTEOARTHRITIS

Osteoarthritis and Rheumatoid Arthritis Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962. PB-293 130/1/XDD 10

PACIFIC ISLANDS

Pacific Island Ecosystem (PIE) Data Base. PB81-132755/XDD 17

National Survey of Personal Health Practices and Consequences-Wave I.	9
PRICES	
Consumer Price Index: 1913 to Date (Updated Monthly).	2
Producer Price Index: 1947 to Date (Updated Monthly).	2
Export and Import Price Indexes: 1970 to Date (Updated Quarterly).	2
Energy Price and Expenditure Data System - Data. (1970-1980).	7
Public Use Energy Statistics Data Base (PUESDB), 1949-1984.	22
State Energy Price and Expenditure Data System - DATA.	22
Grazing Rental Appraisal Data.	24
PRISONS	
National Jail Census - 1970.	11
Juvenile Detention and Correctional Facility, Census File - 1971.	11
PRODUCT SAFETY	
Consumers' Perceptions of Adverse Reactions from Cosmetics.	17
PRODUCTIVITY	
Productivity and Safety Data for 535 Coal Mines, 1975-79.	7
PSYCHOLOGICAL EVALUATION	
Symptoms of Psychological Distress Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.	10
PSYCHOLOGICAL TESTS	
Test Scores for 684 Executives and 923 Brain Damaged Subjects Seen in Halstead Laboratory of Medical Psychology 1935-69.	15
Higher Brain Functions in Man and the Frontal Lobes.	15
PUBLIC LAND	
Grazing Rental Appraisal Data.	24
Nation-Wide Outdoor Recreation Supply Inventory, 1965.	15
PUBLIC OFFICIALS	
China Leader Appearance File, 1976-77.	15
PUBLIC OPINION	
Survey of the Public's Attitude Towards Soil, Water and Renewable Resources (Narrative Report, Data Books, Data Tape).	15
Attitudes of the U.S. Public Toward Science and Technology: Data Tape, 1979.	15
Attitudes of the U.S. Public Toward Science and Technology - 1972.	15
Attitudes of the U.S. Public Toward Science and Technology - 1974.	15
Attitudes of the U.S. Public Toward Science and Technology-1976.	15
PUBLIC UTILITIES	
Publicly Owned Electric Utilities in the United States, 1964-81 Form 3.	22
Cumulative Monthly Financial and Operating Data for Major Telephone Companies, 1976-1982, Historic (FCC Form 901).	6
Cumulative Monthly Financial and Operating Data for Major Telephone Companies, (FCC Form 901)/Current.	6
Publicly Owned Electric Utilities in the United States, Form 3 (1964-1973).	22
Publicly Owned Electric Utilities in the United States, Form 3 (1974-1976, 1978-1982).	22
Annual Statistical Report of REA-Electric Distribution Borrowers (1972).	3
Annual Statistical Report of REA Power Supply Borrowers (1972).	3
Annual Statistical Report of REA Power Supply Borrowers (1973).	3
Annual Statistical Report of REA Electric Borrowers (1973).	3
PUERTO RICO	
Nationwide Food Consumption Survey, Puerto Rico, Household, 1977-78.	16
Nationwide Food Consumption Survey, Puerto Rico, Individual, 1977-78.	16
Nutritive Values of Foods Used in the Nationwide Food Consumption Survey (Including Puerto Rico), Basic Household, 1977-78.	16
Nutritive Values of Foods Used in the Nationwide Food Consumption Survey Including Puerto Rico, Basic Individual, 1977-78.	16
RADIATION DOSEAGE	
Dose Translation Study - 1964.	25
RADIO BROADCASTING	
GWAVE - Data Files and FORTRAN Routine.	20
RADIO COMMUNICATION	
Citizens Radio Service: Transactions.	20
Ohio and Michigan Radio Deregulation File.	20
Restricted/Commercial Licenses Master File.	20
Common Carrier Individual Land Mobile Data Base.	20
Industry Equal Employment Opportunity Master File (1979).	4
Microwave Application Processing System Owner File.	20
Broadcast AM Data Base (Sometimes Called AM Engineering Data Base).	20
Amateur Radio Service Master File Updates.	20
Aeronautical Frequency Lists and Geographic Location of Radio Stations Operating Near Frequencies Commonly Used by Cable Television Systems.	20
FCC Broadcast FM Data Base.	20
FCC Frequency Data Base.	20
Broadcast Applications Address List.	20
Common Carrier Microwave Antenna, Licensee, and Transmitter File.	20

SUBJECT INDEX

SU-34

367

SUBJECT INDEX

SAN DIEGO (CALIFORNIA)

REMOTE SENSING

Computer Tape Containing Geologic, Geochemical and Remote Sensing Data for the Ely and Rowe Canyon Study Areas, Nevada. PB81-160111/XDD 24

REPORTING

Congressional Sourcebook Series (CSS) Data Base Source and Systems File. PB81-132730/XDD 21
Congressional Sourcebook Series (CSS) Data Base Reports File. PB81-132748/XDD 21

RESCUE OPERATIONS

City of New York Emergency Ambulance Demonstration Project. PB-200 435/6/XDD 10

RESIDENTIAL BUILDINGS

Residential Energy Consumption Survey: Household Screener Survey, 1979-1980, Household Characteristics and Annualized Consumption, Public Use Data Tapes. PB82-114877/XDD 22
Residential Energy Consumption Survey: National Interim Energy Consumption Survey, 1978-1979, Household Monthly Energy Consumption and Expenditures. PB82-114901/XDD 22
Residential Energy Consumption Survey (RECS): National Interim Energy Consumption Survey, 1978-1979, Household Monthly Energy Consumption and Expenditures. Shoppers Guide. PB82-114927/XDD 22
Residential Energy Consumption Survey: Housing Characteristics, and Annualized Consumption and Expenditures, 1980 through 1981. PB83-199554/XDD 22
Residential Energy Consumption Survey (RECS): Housing Characteristics, 1981, Consumption and Expenditures April 1981 through March 1982, and Monthly Billing Data. PB84-120476/XDD 22
Residential Energy Consumption Survey: Consumption and Expenditures, 1980-1981, Monthly Billing Data. PB84-166230/XDD 22

RESOURCE CONSERVATION RECOVERY ACT

Resource Conservation Recovery Act Notification Data File. PB84-240266/XDD 23

RHEUMATOID ARTHRITIS

Osteoarthritis and Rheumatoid Arthritis Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962. PB-293 130/1/XDD 10

ROCK PROPERTIES

Spectrographic and Chemical Analyses of Rocks and Stream-Sediments for the Choctaw 2 Quadrangle, Montana. PB81-233959/XDD 24
Spectrographic and Chemical Analyses of Rock, Stream-Sediment, and Concentrate Samples from: Walker Lake 2 Quadrangle, California and Nevada. PB81-233967/XDD 24
Spectrographic and Chemical Analysis of Rock, Stream-Sediment, and Concentrate Samples from the Teton Wilderness and Adjacent Study Areas, Teton, Fremont, and Park Counties, Wyoming. PB83-198069/XDD 24

Spectrographic, Chemical and Radioactivity Analyses of Rock, Stream-Sediment, and Soil Samples from the Hell's Canyon Study Area, Wallowa County Oregon, and Idaho and Adams Counties, Idaho. PB83-255059/XDD 24
Physical Properties Testing of Soils and Rocks, 1967-1974. PB-235 002/3/XDD 24
Geochemical Data for New Mexico. PB-300 543/6/XDD 24
Geochemical Data for Colorado. PB-300 544/4/XDD 24

ROCKS

Geochemical Data for Rock Samples from the Petersburg and Parts of the Port Alexander, and Sumdum Quadrangles, Southeastern Alaska. PB84-234426/XDD 19

ROWE CANYON

Computer Tape Containing Geologic, Geochemical and Remote Sensing Data for the Ely and Rowe Canyon Study Areas, Nevada. PB81-160111/XDD 24

RURAL AREAS

Annual Statistical Report of REA Telephone Borrowers (1972). PB-224 075/2/XDD 3
Annual Statistical Report of REA Telephone Borrowers (1973). PB-238 402/2/XDD 3
Annual Statistical Report of REA Electric Borrowers (1973). PB-238 405/5/XDD 3
Annual Statistical Report of REA Telephone Borrowers. PB-247 891/5/XDD 3
Annual Statistical Report of REA Power Supply Borrowers. PB-247 892/3/XDD 3
Annual Statistical Report of REA Electric Distribution Borrowers. PB-247 893/1/XDD 3

SAINT LOUIS (MISSOURI)

Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), January 1-21, 1976. PB84-203512/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), January 22-February 11, 1976. PB84-203520/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), February 12-March 3, 1976. PB84-203538/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), March 4-24, 1976. PB84-203546/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), March 25-April 14, 1976. PB84-203553/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), April 15-May 5, 1976. PB84-203561/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), May 6-26, 1976. PB84-203579/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), May 27-June 16, 1976. PB84-203587/XDD 23

Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), June 17-July 7, 1976. PB84-203595/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), July 8-28, 1976. PB84-203603/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), July 29-August 18, 1976. PB84-203611/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), August 19-September 8, 1976. PB84-203629/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), September 30-October 20, 1976. PB84-203645/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), October 21-November 10, 1976. PB84-203652/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), November 11-December 1, 1976. PB84-203660/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), December 2-22, 1976. PB84-203678/XDD 23
Regional Air Pollution Study (RAPS) 1976 Hourly Area Source Emissions (CDC Format), December 23-31, 1976. PB84-203686/XDD 23

SALARIES

Data Files for the Report: Implementation and Evaluation of the Multiregional Input-Output Model of the United States. COM-73-10533/0/XDD 2
Industry Employment, Hours, and Earnings - National: 1909 to Date (Updated Monthly). PB82-948100/XDD 4
Industry Employment, Hours, and Earnings - State and Area: 1939 to Date (Updated Monthly). PB82-948200/XDD 4
Multiregional Input-Output Basic Data - DOTRI. PB-233 583/4/XDD 2
State Estimates of Output, Employment and Payrolls, 1967. PB-247 702/4/XDD 4
Pennsylvania Continuous Wage and Benefit History. PB-289 909/4/XDD 4
Arizona Employment and Unemployment Data and the Continuous Wage and Benefit History. PB-291 001/6/XDD 4

SALES

Electric Utility Company Monthly Statement/Current, EIA-826, January-March 1984. PB84-214527/XDD 22

SALMON

Survey of Purchases of Fish Products by Households, Volume 4, Canned Salmon (1969-70). PB-194 347/1/XDD 1

SAN DIEGO (CALIFORNIA)

San Diego Bus Transit Study (1972-75). PB-272 753/5/XDD 13

SAN FRANCISCO BAY

SUBJECT INDEX

SAN FRANCISCO BAY

Seismic Data for 15 Earthquakes Recorded on a Downhole Array in Sediments Near San Francisco Bay, California.
PB-275 360/6/XDD 24

SAN FRANCISCO (CALIFORNIA)

Seismic Data from Downhole Array Near San Francisco Bay, California.
PB-254 971/5/XDD 24

SARDINES

Survey of Fish Products by Households, Volume 6, Canned Sardines (1969-70).
PB-194 350/5/XDD 1

SAVINGS

Household Pension Survey.
PB81-24557/XDD 6

SCATTEROMETERS

Radiometer-Scatterometer (RADSCAT) Flight Data (1973-1977).
PB84-214543/XDD 27

SCHOOL LUNCHES

Data Base for Pilot Study of Nutrient Content of School Lunches.
PB84-196906/XDD 16

SEDIMENTARY ROCKS

Magnetic Tape Containing 7192 Chemical Analyses of Sedimentary Rocks of the Central and Northwestern United States.
PB-197 514/3/XDD 24

SEDIMENTOLOGY

Stream-Sediment Geochemical Survey of the Bureau of Land Management's American Flats-Silverton Planning Unit in Southwest Colorado.
PB81-212912/XDD 24
Analytical Results for Stream-Sediment Concentrate, Sieved Stream-Sediment, Rock, and Water Samples from the Silver City 1 x 2 Degree Quadrangle, Arizona and New Mexico.
PB83-220863/XDD 24

SEISMIC PROSPECTING

Digital Magnetic Tapes of Single Channel Seismic Reflection Profiles on the Continental Shelf and Slope between Bering Strait and Barrow, Alaska, and MacKenzie Bay, Canada.
PB-232 345-SET/XDD 24

SEISMOLOGY

Seismic Data from Downhole Array Near San Francisco Bay, California.
PB-254 971/5/XDD 24
Seismic Data for 15 Earthquakes Recorded on a Downhole Array in Sediments Near San Francisco Bay, California.
PB-275 360/6/XDD 24
Puerto Rico Seismic Program. Seismological Data Report, July 1, 1975-December 31, 1977.
PB-296 549/9/XDD 24

SEROLOGY

Health and Nutrition Examination Survey (HANES I) 1971-1975. Biochemistry, Serology, Hematology, Peripheral Blood Slide, and Urinary Data Tape, Catalog Number 4500.
PB-297 344/4/XDD 10

SEWAGE TREATMENT

Wastewater Treatment - Cost Estimates for Construction of Publicly Owned Facilities, 1982 Needs Survey.
PB83-173963/XDD 23

SHELLFISH

Survey of Purchases of Fish Products by Households, Volume 2, Fresh and Frozen Shellfish (1969-70).
PB-194 346/3/XDD 1

Survey of Fish Products by Households, Volume 7, Miscellaneous Canned Fish or Shellfish (1969-70).
PB-194 352/1/XDD 1

National Marine Fisheries Service Species/Mercury Data
PB-283 265/7/XDD 23

SHOCK ABSORBERS

Friction Snubber Force Measurement System. Data Tape, Test Runs 1 and 2.
PB81-122764/XDD 26

Friction Snubber Force Measurement System. Data Tape, Test Runs 3 and 4.
PB81-122772/XDD 26

Friction Snubber Force Measurement System. Data Tape, Tests Runs 5 and 6.
PB81-122780/XDD 26

Friction Snubber Force Measurement System. Data Tape, Test Runs 7 and 8.
PB81-122798/XDD 26

Friction Snubber Force Measurement System. Data Tape, Test Runs 9 and 10.
PB81-122806/XDD 26

Friction Snubber Force Measurement System. Data Tape, Test Runs 11 and 12.
PB81-122814/XDD 26

SITE SURVEYS

Economic Development Administration Industrial Location Planning System (ILPS) - Summary Data Tape
COM-74-11095/8/XDD 7

SKINFOLD

Health and Nutrition Examination Survey (HANES I) 1971-1975. Anthropometry, Goniometry, Skeletal Age, Bone Density and Cortical Thickness Data Tape, Catalog Number 4111.
PB-295 908/8/XDD 10

SOCIAL SECURITY

Simulated Tax and Transfer Systems: Stats-Person (1970-71).
PB-221 650/5/XDD 6

Simulated Tax and Transfer System: Stats-Family (1970-71).
PB-221 651/3/XDD 6

Simulated Tax and Transfer System (Stats) - Unit (1970-71).
PB-221 652/1/XDD 6

Simulated Tax and Transfer System (Stats) - Social Security Unit (1970-71).
PB-221 653/9/XDD 6

SOCIAL SERVICES

Triage: Coordinated Delivery of Services to the Elderly.
PB82-138538/XDD 12

AFDC Study (Aid to Families with Dependent Children), 1975.
PB-264 541/4/XDD 12

WIN II Program Evaluation - Data Tape for Public Use Data Base (1954-75).
PB-284 229/2/XDD 4

SOCIAL WELFARE

AFDC Studies (Aid to Families with Dependent Children), 1969.
PB-231 177/7/XDD 12

Adult Category Surveys: APTD (Aid to the Permanently and Totally Disabled).
PB-231 230/4/XDD 12

Adult Category Surveys: AB Aid to the Blind.
PB-231 239/5/XDD 12

AFDC Studies (Aid to Families with Dependent Children) 1971.
PB-231 240/3/XDD 12

Adult Category Surveys: CAA. (Old Age Assistance).
PB-231 242/9/XDD 12

Federal-State Program of Vocational Rehabilitation SRS-RSA-300 (Case Service Report), FY 70.
PB-231 291/6/XDD 12

AFDC Study (Aid to Families with Dependent Children), 1973.
PB-241 033/0/XDD 12

AFDC Study (Aid to Families with Dependent Children), 1967.
PB-241 034/8/XDD 12

SOCIOECONOMIC STATUS

Labor Force - National: 1948 to Date (Updated Monthly).
PB82-948000/XDD 4

Simulated Tax and Transfer Systems: Stats-Person (1970-71).
PB-221 650/5/XDD 6

Simulated Tax and Transfer System: Stats-Family (1970-71).
PB-221 651/3/XDD 6

Simulated Tax and Transfer System (Stats) - Unit (1970-71).
PB-221 652/1/XDD 6

Simulated Tax and Transfer System (Stats) - Social Security Unit (1970-71).
PB-221 653/9/XDD 6

SOIL PROPERTIES

FCC M3 Map Data File.
PB81-211567/XDD 24

Spectrographic and Chemical Analyses of Rocks and Stream-Sediments for the Choctaw 2 Quadrangle, Montana.
PB81-233959/XDD 24

Spectrographic and Chemical Analyses of Rock, Stream-Sediment, and Concentrate Samples from Walker Lake 2 Quadrangle, California and Nevada.
PB81-233967/XDD 24

Physical Properties Testing of Soils and Rocks, 1967-1974.
PB-235 002/3/XDD 24

SOLAR ENERGY

HUD Residential Solar Demonstration Program Data.
PB82-132341/XDD 22

SOUTH AMERICA

World Data Bank II, Volume 2. South America.
PB-271 870/8/XDD 18

SOUTH CAROLINA

Semiquantitative Spectrographic Analyses of Detrital Ilmenite from the Inner Piedmont Belt, North Carolina and South Carolina.
PB-238 412/1/XDD 24

Supplementary Data System, Microdata File, South Carolina, 1976.
PB-293 668/0/XDD 25

SOUTH DAKOTA

Supplementary Data System, Microdata File, South Dakota, 1978.
PB80-168164/XDD 25

Supplementary Data System, Microdata File, South Dakota, 1976.
PB-291 262/4/XDD 25

Supplementary Data System, Microdata File, South Dakota, 1977.
PB-292 467/8/XDD 25

SPACE EXPLORATION

Planetary Image Video-disc.
PB83-223131/XDD 27

SUBJECT INDEX

TELECOMMUNICATION

Selected NASA (National Aeronautics and Space Administration) JPL (Jet Propulsion Laboratory) Mission Video Images (Video-disc).
PB84-191162/XDD 27

STANDARD INDUSTRIAL CLASSIFICATIONS
SICTAF.
PB83-180448/XDD 21
Standard Industrial Classification Manual, 1977.
PB-296 331/2/XDD 7

STANDARD METROPOLITAN STATISTICAL AREAS
PSIDATA-CHAR/Private Sector Initiatives Market Area Resource File, 1972-1980.
PB84-215219/XDD 10

STANDARDS
Standard Abbreviations and Codes for States and Outlying Areas of the United States - Federal Information Processing Standard.
PB-190 719/5/XDD 21
References to U.S. Standards by Selected Building Codes, (EBCDIC Version)
PB-274 613/9/XDD 27
References to U.S. Standards by Selected Building Codes (UNIVAC FIELDATA)
PB-274 614/7/XDD 27

STATES (UNITED STATES)
SEDS (State Energy Data System) Public Use Tape (1960-1982).
PB84-186964/XDD 22

STREAM FLOW
Pilot Test of Frequency Methods for Ungaged Watersheds by Water Resources Council's Hydrology Committee.
PB82-164237/XDD 24

STRESS (PSYCHOLOGY)
Symptoms of Psychological Distress Data Tape from the National Health Examination Survey of Adults 18-79 Years, Cycle I, 1959-1962.
PB-293 126/9/XDD 10

STUDENTS
Survey of Graduate Science Student Support (1966-72).
PB-252 632/5/XDD 15
Survey of Graduate Science Student Support, Fall 1973.
PB-252 633/3/XDD 15

SUBJECT INDEX TERMS
MeSH (Medical Subject Headings) Vocabulary File.
PB82-113788/XDD 21
Health Care Delivery Concept Lists - Categorized Version.
PB-207 778/2/XDD 9
Health Care Delivery Concept Lists - Alphabetized, Rockville, Md.
PB-207 779/0/XDD 9
Health Care Delivery Concept Lists - Hierarchal List and Program Tape, Magnetic Tape Record.
PB-207 780/8/XDD 9
Air Pollution Technical Information Center (APTIC). Open-End File.
PB-267 124/6/XDD 23

SULFUR DIOXIDE
New York City Air Pollution Project of 1964-1969
PB-277 131/9/XDD 23

SUPPLY (ECONOMICS)
Petroleum Supply Annual, 1983.
PB84-233022/XDD 22

Petroleum Supply Monthly, January-May 1984.
PB84-234418/XDD 22

SUPPLY MANAGEMENT
Master Cross Reference List, Part 1 (Defense Logistics Services Center),
PB84-116009/XDD 27
NATO Supply Code for Manufacturers Excluding U.S. and Canada, Code Sequence (H4-3D).
PB84-158286/XDD 7
NATO Supply Code for Manufacturers, Excluding U.S. and Canada, Name Sequence (H4-3B).
PB84-158294/XDD 7
Federal Supply Code for Manufacturers, U.S. and Canada, Name Sequence (H4-1B).
PB84-910900/XDD 7
Federal Supply Code for Manufacturers, U.S. and Canada, Code Sequence (H4-2B).
PB84-911000/XDD 7
Federal Supply Code for Manufacturers, Cancelled/Replacement FSCM Listings, Code Sequence.
PB-238 756/1/XDD 7
Federal Supply Code for Manufacturers, Current/Obsolete FSCM Listings, Code Sequence.
PB-238 757/9/XDD 7

SURVEYS
CLMS-3 Public Use Data Tape for Sampled July 1976-September 1977 New CETA Enrollees.
PB81-245516/XDD 4

SWEEP WINGS
NASA (National Aeronautics and Space Administration) Langley High-Speed Wind Tunnel Test Data 110 Data File.
PB84-233014/XDD 27

TAXES
Statistics of Income - 1972, Small Area Data, Individual Income Tax Returns, Table 1 (Supplemental Report)
PB-285 308/3/XDD 6
Statistics of Income - 1972, Small Area Data Individual Income Tax Returns, Table 2 (Supplemental Report)
PB-285 309/1/XDD 6
Statistics of Income - 1972, Small Area Data, Individual Income Tax Returns, Table 3 (Supplemental Report)
PB-285 310/9/XDD 6

TECHNOLOGY
Attitudes of the U.S. Public Toward Science and Technology: Data Tape, 1979.
PB81-208134/XDD 15
Attitudes of the U.S. Public Toward Science and Technology - 1972
PB-275 361/4/XDD 15
Attitudes of the U.S. Public Toward Science and Technology - 1974
PB-275 363/0/XDD 15
Attitudes of the U.S. Public Toward Science and Technology-1976.
PB-287 718/1/XDD 15

TELECOMMUNICATION
Common Carrier Industry Consolidation, 1978.
PB80-197437/XDD 20
Restricted/Commercial Licenses Master File.
PB80-220825/XDD 20
Statistics of Communications Common Carrier (1979).
PB81-184863/XDD 6

FCC Decisions Data File (Vols. 67-81).
PB82-105735/XDD 20
FCC Decision File.
PB82-105867/XDD 20
FCC Decision File, Volume 86.
PB82-119751/XDD 20
FCC Decisions Data File, Volumes 23-30.
PB82-132176/XDD 20
FCC Decisions Data File, Volumes 31-38.
PB82-132184/XDD 20
FCC Decisions Data File, Volumes 39-46.
PB82-132192/XDD 20
FCC Decisions Data File, Volumes 47-54.
PB82-132200/XDD 20
FCC Decisions Data File, Volumes 15-22.
PB82-132218/XDD 20
FCC Decisions Data File, Volumes 6-14.
PB82-132226/XDD 20
FCC Decisions Data File, Volume 55.
PB82-132234/XDD 20
FCC Decision File, Volume 87.
PB82-132242/XDD 20
FCC Decisions Data File, Volumes 1-5.
PB82-132275/XDD 20
FCC Decision File (Weekly).
PB82-149915/XDD 20
Statistics of Communications Common Carrier, 1977.
PB83-154906/XDD 20
Statistics of Communications Common Carrier, 1980.
PB83-154914/XDD 20
Statistics of Communications Common Carrier, 1978.
PB83-154922/XDD 20
Statistics of Communications Common Carrier, 1981.
PB83-195552/XDD 20
FCC (Federal Communications Commission) Decision File, Volume 92, Number 5.
PB84-145234/XDD 20
FCC (Federal Communications Commission) Decision File, Volume 92, Number 4.
PB84-145242/XDD 20
FCC (Federal Communications Commission) Decision File, Volume 92, Number 3.
PB84-145259/XDD 20
FCC (Federal Communications Commission) Decision File, Volume 92, Number 2.
PB84-145267/XDD 20
FCC (Federal Communications Commission) Decision File, Volume 92, Number 1.
PB84-145275/XDD 20
FCC (Federal Communications Commission) Decision File, Volume 91, Number 7.

TERMINOLOGY

- Health Care Delivery Concept Lists - Categorized Version.
PB-207 778/2/XDD 9
Health Care Delivery Concept Lists - Alphabetized, Rockville, Md.
PB-207 779/0/XDD 9
Health Care Delivery Concept Lists - Hierarchical List and Program Tape. Magnetic Tape Record.
PB-207 780/8/XDD 9

TEXAS

- Population and Housing Data for the United States by Standard Location Areas, 1960 Census (Texas, Connecticut).
PB-170 780/1/XDD 8

TIME SERIES ANALYSIS

- Magnetic Data Tape for Input-Output Transactions by Transportation Mode - 1947 and 1958 Tables.
PB-178 679/7/XDD 2

TOXIC SUBSTANCES

- Registry of Toxic Effects of Chemical Substances (RTECS), 1983 Edition.
PB84-193580/XDD 17
Natural Toxicants Literature File through 1975.
PB-262 496/3/XDD 25

TOXICOLOGY

- Poison Control Inquiry Data Base (1962-80).
PB80-202534/XDD 25
Registry of Toxic Effects of Chemical Substances, Computer Tape, 1982 Edition.
PB83-223180/XDD 17
TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Plantsite Information File.
PB83-254102/XDD 17
TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Production Information File.
PB83-254110/XDD 17
TSCA (Toxic Substance Control Act) Chemical Substances Inventory: Initial Inventory and Cumulative Supplement Two, Preferred Name File and Synonym File.
PB83-254128/XDD 17
Registry of Toxic Effects of Chemical Substances (RTECS), 1983 Edition.
PB84-193580/XDD 17
Consumers' Perceptions of Adverse Reactions from Cosmetics.
PB-250 758/0/XDD 17

TRAFFIC ENGINEERING

- Freeway Surveillance Data - Data Tapes. January 1974 - February 1976.
PB-263 643/9/XDD 13
Los Angeles Freeway Data Tapes.
PB-234 873/5/XDD 13

TRAINING

- CLMS (Continuous Longitudinal Manpower Survey) Public Use Tape of Selected March 1976 CPS Data (CPS-1).
PB80-211352/XDD 4
CLMS-2, Version 3 Public Use Tape for Sampled July 1975-June 1976 CETA Enrollees.
PB81-245482/XDD 4
CLMS-3 Public Use Data Tape for Sampled July 1976-September 1977 New CETA Enrollees.
PB81-245516/XDD 4
CLMS-1, Version 2, Public Use Tape for Sampled January-June 1975 New CETA Enrollees.
PB81-245532/XDD 4
CLMS Public Use Tape of Selected March 1977 CPS Data (CPS-2).
PB81-245599/XDD 4
CLMS Public Use Tape of Selected March 1976 CPS Data (CPS-1, Version 3).
PB81-245615/XDD 4

TRANSPORTATION

- End Use Energy Consumption Data Base: Transportation Sector; EIA Format.
PB81-112161/XDD 22
End Use Energy Consumption Data Base: Transportation Sector; ORNL Format.
PB81-112195/XDD 22

TRAVEL

- National Travel Survey - 1967.
XEN/DF-73/057 15

TRUCKS

- Chilton Light Truck Data Base.
PB81-184830/XDD 2

TUNAS

- Survey of Fish Products by Households, Volume 5, Canned Tuna (1969-70).

NTIS PRODUCTS

NTIS BIBLIOGRAPHIC DATABASE

All items announced by NTIS are included in the magnetic tapes of the NTIS Bibliographic Database. Most items have full bibliographic citations, and they may be used to create a wide variety of information products.

The magnetic tape containing the bibliographic database may be leased annually. Files back to 1964 are available; current tapes are shipped biweekly to subscribers.

The NTIS Bibliographic Database is also available online from the following commercial vendors:

Dialog Information Services
3460 Hillview Avenue
Palo Alto, CA 94303
(800) 227-1960

SDC Search Service
2500 Colorado Avenue
Santa Monica, CA 90406
(800) 421-7229

Bibliographic Retrieval Services, Inc.
1200 Route 7
Latham, NY 12110
(800) 833-4707

Mead Data Central
P.O. Box 933
Dayton, OH 45401
(800) 227-4908

User services are also offered by the New England Research Application Center (NERAC), Mansfield Professional Park, Storrs, CT 06268. Phone (203) 486-4533. The database is also available online in Europe through several nodes in the EURONET system and in Canada through CISTI.

The NTIS Bibliographic Database can be searched by research report title, personal or corporate author, NTIS order number or contract number, and by subject, using keywords or descriptors.

DIRECTORY OF COMPUTER SOFTWARE

This Directory contains descriptions of Federal software available from NTIS on magnetic tape. The information in this Directory was compiled in cooperation with more than 100 agencies in the U.S. Government. More than 1300 programs, including 700 new programs recently received from the National Energy Software Center (NESC), are listed and described in over 20 subject categories. Five indexes are included for easy reference.

The Directory of Computer Software, 1985 can be ordered as PB85-162121/XDD, price \$40 domestic/\$70 foreign.
